(c) *Protection for Federal Communications Commission monitoring stations.* (1) Applicants in the vicinity of a FCC monitoring station for a radio station authorization to operate new transmitting facilities or changed transmitting facilities which would increase the field strength produced over the monitoring station in excess of that previously authorized are advised to give consideration, prior to filing applications, to the possible need to protect the FCC stations from harmful interference. Geographical coordinates of the facilities which require protection are listed in § 0.121(c) of the FCC rules. Applications for stations (except mobile stations) which will produce on any frequency a direct wave fundamental field strength of *greater than 10 mV/m* in the authorized bandwidth of service (−65.8 dBW/m² power flux density assuming a free space characteristic impedance of 120 π ohms) at the referenced coordinates, may be examined to determine extent of possible interference. Depending on the theoretical field strength value and existing root-sum-square or other ambient radio field signal levels at the indicated coordinates, a clause protecting the monitoring station may be added to the station authorization.

[Docket No. 85N-0223]

Obstetrical and Gynecological Devices; Effective Date of Requirement for Premarket Approval; Contraceptive Tubal Occlusion Device (TOD) and Introducer

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is requiring the filing of a premarket approval application or a notice of completion of a product development protocol for the contraceptive tubal occlusion device (TOD) and introducer, a medical device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: December 30, 1987.

FOR FURTHER INFORMATION CONTACT: Raju G. Kammula, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of February 26, 1980 (45 FR 12712), FDA published a final rule classifying into class III (premarket approval) the TOD and introducer (21 CFR 884.5380). Section 884.5380 applies to any TOD and introducer that was in commercial distribution before May 28, 1976, the date of enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94-295) and to any device that FDA has found to be substantially equivalent to the TOD and introducer and that has been marketed on or after May 28, 1976. For the sake of convenience, both the devices that were on the market before May 28, 1976, and the substantially equivalent devices that were marketed on or after that date are referred to as "preamendments devices."

In the **Federal Register** of October 7, 1985 (50 FR 40950), FDA published a proposed rule to require the filing under section 515(b) of the Federal Food, and Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(b)) of a premarket approval application (PMA) or a notice of completion of a product development protocol (PDP) for the TOD and introducer. In accordance with section 515(b)(2)(H) of the act, FDA included in the preamble to the proposal the agency's proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the premarket approval requirements of the act, and on the benefits to the public from use of the device (50 FR 40951). The agency provided an opportunity for interested persons to submit comments on the proposed rule and on the agency's proposed findings. Under section 515(b)(2)(B) of the act, FDA also provided an opportunity for interested persons to request a change in classification of the device based on new information relevant to its classification. Any petition requesting a change in the classification of the TOD and introducer was required to be submitted by October 22, 1985. The comment period closed on December 6, 1985.

FDA did not receive any petitions requesting a change in the classification of the device. FDA received two letters of comment on the proposed rule. One comment was from a manufacturer of the device, and the other comment was from a trade association.

Both comments focused on FDA's proposal to require carcinogenicity data for the TOD. In the proposed rule, FDA stated that, because the TOD is intended to be implanted, the long-term material integrity and safety must be established to avoid the potential risk of carcinogenicity.

1. One comment stated that TOD's are made from materials that are generally regarded as nontoxic and nontissue reactive, and that any risk of a TOD as a potential carcinogen is highly speculative and cannot be confirmed or denied. Manufacturers of TOD's should, therefore, be allowed the opportunity to address the issue on a more scientific basis. The comment suggested that a reasonable approach would be the convening of the Obstetrics and Gynecological Devices Panel (the Panel) to discuss the probable risks of TOD's as a carcinogen. If the Panel were to conclude that an unacceptably high risk of carcinogenicity is posed by TOD's, the Panel could address the issue of the proper study design to assess the carcinogenicity risk. The comment also observed that the risks associated with TOD's are no greater than those associated with other tubal sterilization procedures.

FDA disagrees with the comment. Although TOD's are made of materials that are generally thought to be biocompatible, some of the materials used in the various versions of this generic type of device may cause long-term adverse tissue reactions. TOD's are intended to be implanted in young healthy women and remain implanted during their lifetimes. FDA believes that data should be submitted showing the long-term safety of the materials used in the TOD. FDA notes that the Panel has already discussed the overall biocompatibility of TOD's and did not find any conclusive data demonstrating that materials used in preamendments TOD's have no long-term adverse effect, such as an adverse tissue reaction (see 44 FR 19961; April 3, 1979).

2. The other comment stated that FDA's proposal to require data showing that the TOD does not present a potential for carcinogenicity is inconsistent with FDA's decision on similar devices, such as the contraceptive intrauterine device (IUD) (21 CFR 884.5360) (see 50 FR 33500, August 19, 1985; 51 FR 16648, May 5, 1986).

FDA believes that its regulatory decisions are consistent. The preamendments IUD had a material safety history from clinical use greater than 20 years. Thus, the final rule establishing an effective date of the requirement for premarket approval of the IUD (51 FR 16648; May 5, 1986), did not require submission of more data than was already available on the long-term biocompatibility of the IUD. On the other hand, little data on long-term use of the TOD are available. Under the circumstances, manufacturers of the TOD are required to provide data on long-term safety of the device.

FDA has reexamined, and finds appropriate, its proposed findings and conclusions with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the TOD and introducer to meet the act's PMA requirements. Accordingly, FDA is promulgating a final rule requiring premarket approval for the TOD and introducer under section 515(d)(3) of the act and is summarizing its findings with respect to: (1) The degree of risk of illness or injury designed to be eliminated or reduced by requiring the TOD and introducer to have an approved PMA or declared completed PDP, and (2) the benefits to the public from the use of the device.

II. Findings With Respect to Risks and Benefits

A. Degree of Risk Pregnancy—Ectopic Pregnancy

1. *Pregnancy rate.* Failure of the device to close the fallopian tube completely could result in an unwanted pregnancy. The reported data indicate that the overall risk of pregnancy for

TOD's ranges from 1 to 27 pregnancies per 100 women.

2. *Ectopic pregnancy.* The cumulative lifetime risk of ectopic pregnancy for a woman undergoing a tubal sterilization is only 2.1 per 1,000 women (which is less than the risk of ectopic pregnancy for nonsterilized women). However, 16 percent of all pregnancies occurring after tubal sterilization are ectopic.

3. *Abnormal menstrual patterns.* Recently, concern has been expressed that sterilization may be related to disturbances in menstrual patterns requiring hysterectomy or other surgical treatment. However, the published data on this subject are contradictory and inconclusive.

4. *Infections.* Infections appear to be one of the common complications associated with TOD's. Infections occur most often at the incision site and in the pelvis.

5. *Pain.* Pain is one of the most frequent complications of sterilization by TOD's.

6. *Trauma—Bleeding.* Transection of the fallopian tubes associated with mesosalpingeal bleeding is a well-known traumatic complication of female sterilization. The frequency of this complication has not been reported for tubal occlusion clips, but has been reported as 2.6 percent for the Falope Ring.

7. *Tissue toxicity.* Implanted TOD devices may contain materials which are not biocompatible, thereby producing adverse tissue reaction. Although the tubal occlusion bands and clips are made of materials that are generally thought to be biocompatible, it is possible that contaminants may be introduced during the manufacture of the device or that some of the materials may cause adverse tissue reactions that are not recognized immediately after implantation.

FDA concludes that these risks could be eliminated or reduced by requiring the TOD and introducer to undergo premarket approval.

B. Benefits of the Device

Female sterilization is the most popular method of fertility control for women in the United States. Female sterilization by TOD's has been reported to be relatively safe and shown to have failure rates of less than 1 per 100 women. Female sterilization by electrocoagulation, though as effective as female sterilization by TOD's, reportedly presents potential risks to health of skin, bowel, and bladder burns (see 50 FR 40952 and 40953, October 7, 1985). Many women who have completed their desired family size prefer sterilization by TOD's over contraception from use of IUD's, oral contraceptives, or vaginal barrier contraceptives.

III. Final Rule

Under section 515(b)(3) of the act, FDA is adopting the proposed findings as published in the preamble to the proposed rule and is issuing a final rule to require premarket approval of the generic type of device, the TOD and introducer.

Under the final rule, a PMA or a notice of completion of a PDP is required to be filed on or before December 30, 1987, for any TOD and introducer that was in commercial distribution before May 28, 1976, or that has been found by FDA to be substantially equivalent to such a device on or before December 30, 1987. An approved PMA or a declared completed PDP is required to be in effect for any such device on or before June 28, 1988. (If FDA finds that continued availability of a device for which a PMA has been timely filed is necessary for the public health, FDA may, under section 515(d)(1)(B)(i) of the act, extend the 180-day period for taking action on the PMA.) Any TOD and introducer that was not in commercial distribution before May 28, 1976, or that has not on or before December 30, 1987, been found by FDA to be substantially equivalent to a TOD and introducer that was in commercial distribution before May 28, 1976, is required to have an approved PMA or a declared completed PDP in effect before it may be marketed.

If a PMA or a notice of completion of a PDP for a TOD and introducer is not filed on or before December 30, 1987, that device will be deemed adulterated under section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)), and commercial distribution of the device will be required to cease. The device may, however, be distributed for investigational use, if the requirements of the investigational device exemption (IDE) regulations (21 CFR Part 812) are met.

Under § 812.2(d) of the IDE regulations, FDA hereby stipulates that the exemptions from the IDE requirements in § 812.2(c) (1) and (2) will no longer apply to clinical investigations of the TOD and introducer. Further, FDA concludes that investigational TOD's and introducers are significant risk devices as defined in § 812.3(m), and advises that as of the effective date of § 884.5380(c) the requirements of the IDE regulations regarding significant risk devices will apply to any clinical investigation of a TOD and introducer. For any such device, therefore, an IDE submitted to FDA, under § 812.20, is required to be in effect under § 812.30 before an investigation is initiated or continued on or after December 30, 1987. FDA advises all persons who intend to sponsor any clinical investigation involving the TOD and introducer to submit an IDE application to FDA no later than November 30, 1987, to avoid the interruption of ongoing investigations.

IV. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) and (e) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

V. Economic Impact

FDA has examined the economic consequences of this final rule in accordance with the criteria in section 1(b) of Executive Order 12291 and found that the rule will not be a major rule as specified in the Order. The agency believes that only four or five small firms will be affected by this rule. Therefore, the agency certifies under the Regulatory Flexibility Act (Pub. L. 96–354) that the rule will not have a significant economic impact on a substantial number of small entities. An assessment of the economic impact of this final rule has been placed on file in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 884

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 884 is amended as follows:

PART 884—OBSTETRICAL AND GYNECOLOGICAL DEVICES

1. The authority citation for 21 CFR Part 884 continues to read as follows:

Authority: Secs. 501(f), 510, 513, 515, 520, 701(a), 52 Stat. 1055, 76 Stat. 794–795 as amended, 90 Stat. 540–546, 552–559, 565–574, 576–577 (21 U.S.C. 351(f), 360, 360c, 360e, 360j, 371(a)); 21 CFR 5.10.

2. In § 884.5380 by revising paragraph (c), to read as follows:

§ 884.5380 Contraceptive tubal occlusion device (TOD) and introducer.

* * * * *

(c) *Date premarket approval application (PMA) or notice of*

completion of a product development protocol (PDP) is required. A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before December 30, 1987, for any TOD and introducer that was in commercial distribution before May 28, 1976, or that has on or before December 30, 1987, been found to be substantially equivalent to a TOD and introducer that was in commercial distribution before May 28, 1976. Any other TOD and introducer shall have an approved PMA or a declared completed PDP in effect before being placed in commerical distribution.

Dated: September 9, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

Part V

Department of Agriculture

Agricultural Marketing Service

7 CFR Part 60

Establishment of Fees and Charges for Cotton Market News Reports; Final Rule

VOL 52 ISS 190 OCT 1 1987 UMI

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 60

Establishment of Fees and Charges for Cotton Market News Reports

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Agricultural Marketing Service (AMS) amends 7 CFR Part 60 to add the Cotton Division to the list of Divisions collecting user fees for published market news reports. A final rule, originally published on April 8, 1983 in 48 FR 15222, authorizes the collection of fees for the distribution of copies of market news publications requested by the general public for all AMS Commodity Divisions except the Cotton Division. This rule authorizes the collection of fees from recipients of market news reports issued by the Cotton Division.

DATE: This rule is effective October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Fred S. Mullins, Cotton Division, AMS, USDA, Washington, DC 20250; (202) 447–2145.

SUPPLEMENTARY INFORMATION: The Department implemented a final rule, 7 CFR Part 60 (48 FR 15221–15222, April 8, 1983), which provided for the collection of fees for the printing, handling and mailing of market news reports distributed by AMS pursuant to the authority contained in the Agriculture and Feed Act of 1981 (7 U.S.C. 2242a). Such fees and charges were set at a level which would cover as nearly as practicable the costs of printing, handling and postage of the market reports requested by the general public. The Department's decision to collect fees for market news reports was consistent with the Department's goal of reducing its cost of publishing and distributing publications.

Market news reports published by the Cotton Division of AMS were not included in Part 60. This rule adds the Cotton Division, AMS, to that Part and authorizes the collection of fees and charges, as determined reasonable for reports issued by the Cotton Division, AMS, pursuant to the authority contained in 7 U.S.C. 2242a, as amended by the Food Security Act of 1985, Pub. L. 99–198.

Fees for the publications will vary from time to time due to numerous factors which affect printing, handling and distribution costs. As several of these factors (e.g. number of subscribers, postage, etc.) are not fixed, it is expected that the total costs will fluctuate from time to time. Since fees are only adjusted as necessary to recover expenses of printing, handling and distribution, the fees will be computed and revised when necessary to assure recovery of the Departmental costs and each adjustment will not be published in the **Federal Register**. Subscription renewal notices will be used to specify subscription rates. Based on estimates of current costs and activity level, fees during the initial subscription period for reports published by the Cotton Division will be charged according to the following schedule:

REPORTS ISSUED BY COTTON DIVISION

Report	Frequency	Subscription rate in U.S. Dollars			
		Annual		Single Issue	
		United States, Canada, Mexico	Other Countries (Air Mail)	Daily, Weekly, Bi-Weekly, Monthly [1]	Annual
Daily Spot Cotton Quotations	Daily	115.00	175.00	1.00	
Daily Spot Cotton Quotations (Fri. only)	Weekly	25.00	40.00	1.00	
Weekly Cotton Market Review	Weekly	25.00	50.00	1.00	
Weekly Report of Certificated Stock in Licensed Whses	Weekly	25.00	40.00	1.00	
Quality of Cotton Classed Under Smith-Doxey Act	Weekly [2]	30.00	30.00	1.00	
Cottonseed Review	Weekly [2]	15.00	20.00	1.00	
Cotton Fiber and Processing Test Results	Bi-Weekly [2] (plus annual).	30.00	60.00	1.00	
	Annual only	10.00	15.00		10.00
Cotton Price Statistics	Monthly + Annual	30.00	60.00	1.00	
	Annual only	5.00	8.00		5.00
Long Staple Review	Monthly	12.00	16.00	1.00	
Cotton Linters Review	Monthly	12.00	16.00	1.00	
US Cotton Quality Rpt for Ginnings Prior to ——	Monthly [2]	15.00	30.00	1.00	
Cotton Quality, Crop of ——	Annual	10.00	12.00		10.00
Cotton Quality, Supply-Disappearance-Carryover	Annual	5.00	8.00		5.00
Cotton Varieties Planted, —— Crop	Annual	5.00	8.00		5.00
Cottonseed Quality, Crop of ——	Annual	5.00	8.00		5.00

[1] $5.00 minimum charge.
[2] During harvesting.

In addition, this final rule deletes unnecessary language in § 60.5(a) and amends the authority citation. These changes are effective October 1, 1987.

A proposed rule was published in the July 23 1987 **Federal Register** (52 FR 27685). A 15 day comment period was provided for interested persons to comment on this proposed rule. Comments were received from a cotton exchange and a trade association. Both stated that the cotton exchanges and their members who serve on the Spot Cotton Quotation Committees should receive a copy of the Daily Spot Quotations Report free of charge because the committees donate time to provide the Cotton Division with the necessary price information. The members of the Cotton Exchanges and the Spot Cotton Quotation Committees

are cotton merchants. It has been determined that, in the interest of equity and uniform treatment with all other cotton merchants and with the participants in the other commodity programs which AMS administers, the cotton exchanges and the committees should be required to purchase their subscriptions. In addition, one commenter suggested that AMS issue one yearly order form. Such a procedure will be adopted through the subscription renewal process.

The final rule has been reviewed under USDA procedures established to implement Executive Order 12291 and Department's Regulation 1512–1 and has been determined to be a "non-major" rule because it does not meet any of the criteria established for major rules under the executive order. In conformance with the provision of the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601 *et seq.*), full consideration has been given to the potential economic impact upon small business entities. Most producers and dealers fall within the definition of "small business", as defined in the Regulatory Flexibility Act. However, a number of firms who are expected to use the market news reports do not meet the definition of small business because of their individual size. The Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact upon a substantial number of small entities. This rule would in no way affect normal competition in the marketplace. It merely authorizes the collection of fees and charges for market news reports that are requested on a voluntary basis. The fees established have been set at the lowest possible level. It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because interested persons were apprised of an anticipated October 1, 1987 effective date in the proposed rule which is the beginning of the fiscal year. In addition, subscriptions to the cotton market news reports are available on a voluntary basis.

List of Subjects in 7 CFR Part 60

Government publication, Market news reports, Subscription fees.

Accordingly, for the reasons set forth in the preamble, 7 CFR Part 60 is amended as follows:

PART 60—[AMENDED]

1. The authority citation for Part 60 is revised to read as follows:

Authority: 7 U.S.C. 15b, 7 U.S.C. 1622(g), 7 U.S.C. 2242a.

2. In § 60.5 the section heading and paragraph (a) are revised to read as follows:

§ 60.5 Market news reports published by the Cotton Division; Dairy Division; Fruit and Vegetable Division; Livestock, Meat, Grain, and Seed Division; and Poultry Division.

* * * * *

(a) Market news reports shall be available on an annual subscription (or seasonal subscription for reports issued by the Fruit and Vegetable Division upon written request and upon payment of a subscription fee, except that no fees will be charged to other government agencies which assist in the collection of market news data for the requested report.

* * * * *

Date: September 30, 1987.

William T. Manley,

Deputy Administrator, Marketing Programs.

FEDERAL REGISTER PAGES AND DATES, OCTOBER

36749-36888.....1

CFR PARTS AFFECTED DURING OCTOBER

At the end of each month, the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

LIST OF PUBLIC LAWS

Last List September 29, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.J. Res. 224/Pub. L. 100-116

Designating the week of October 18, 1987, through October 24, 1987, as "Benign Essential Blepharospasm Awareness Week." (Sept. 28, 1987; 101 Stat. 750; 1 page) Price: $1.00

S. 1596/Pub. L. 100-117

To extend the period for waivers of State eligibility requirements to enable certain States to qualify for child abuse and neglect assistance. (Sept. 28, 1987; 101 Stat. 751; 1 page) Price: $1.00

S.J. Res. 135/Pub. L. 100-118

To designate October 1987 as "Polish American Heritage Month." (Sept. 28, 1987; 101 Stat. 752; 2 pages) Price: $1.00

CFR ISSUANCES 1987
January–July 1987 Editions and Projected October, 1987 Editions

This list sets out the CFR issuances for the January–July 1987 editions and projects the publication plans for the **October, 1987** quarter. A projected schedule that will include the **January, 1988** quarter will appear in the first **Federal Register** issue of January.

For pricing information on available 1986–1987 volumes consult the CFR checklist which appears every Monday in the Federal Register.

Pricing information is not available on projected issuances. Individual announcements of the actual release of volumes will continue to be printed in the **Federal Register** and will provide the price and ordering information. The weekly CFR checklist or the monthly List of CFR Sections Affected will continue to provide a cumulative list of CFR volumes actually printed.

Normally, CFR volumes are revised according to the following schedule:

Titles 1–16—January 1
Titles 17–27—April 1
Titles 28–41—July 1
Titles 42–50—October 1

All volumes listed below will adhere to these scheduled revision dates unless a notation in the listing indicates a different revision date for a particular volume.

*Indicates volume is still in production.

Titles revised as of January 1, 1987:

Title

TABLE OF EFFECTIVE DATES AND TIME PERIODS—OCTOBER 1987

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

DATE OF FR PUBLICATION	15 DAYS AFTER PUBLICATION	30 DAYS AFTER PUBLICATION	45 DAYS AFTER PUBLICATION	60 DAYS AFTER PUBLICATION	90 DAYS AFTER PUBLICATION

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

The President

Proclamation 5709 of September 29, 1987

AIDS Awareness and Prevention Month, 1987

By the President of the United States of America

A Proclamation

The Human Immunodeficiency Virus (HIV) and the disease AIDS (Acquired Immune Deficiency Syndrome) into which it can develop are a severe public health problem in the United States and elsewhere. HIV destroys the immune system and attacks the central nervous system, leading to devastating physical consequences and then to death. Because the virus has a long incubation period and the progress of the disease varies sharply from individual to individual, people can unwittingly carry and spread it for years.

AIDS afflicts thousands of Americans, and an unknown number are infected with HIV without showing any symptoms. The deadly virus is most commonly spread through sexual contact with an infected person, especially through homosexual practices; through intravenous drug use with contaminated needles; and through other transmissions of infected blood. Our country's huge and vital public health task of AIDS prevention and treatment is underway. Massive public and private efforts have already led to definite advances in research and treatment. Our understanding of AIDS remains incomplete, however, and much remains to be done before any vaccine or cure is found.

A Presidential Commission is studying the public health dangers of the HIV epidemic, including the medical, legal, ethical, social, and economic impact, and will issue a report next year, focusing on Federal, State, and local measures to protect the public from contracting the virus, to help find a cure for AIDS, and to care for those already afflicted.

Both medicine and morality teach the same lesson about prevention of AIDS. The Surgeon General has told all Americans that the best way to prevent AIDS is to abstain from sexual activity until adulthood and then to restrict sex to a monogamous, faithful relationship. This advice and the advice to say no to drugs can, of course, prevent the spread of most AIDS cases. Millions already follow this wise and timeless counsel, and our Nation is the poorer for the lost contributions of those who, in rejecting it, have suffered great pain, sorrow, and even death.

Education is crucial for awareness and prevention of AIDS. Parents have the primary responsibility to help children see the beauty, goodness, and fulfillment of chastity before marriage and fidelity within it; know the blessings of stable family life; and say yes to life and no to drugs. Educational efforts should be locally determined and consistent with parental values. Educators can develop and relay accurate health information about AIDS without mandating a specific curriculum on this subject. Parents and educators should teach children not to engage in premarital sex or to use drugs, and should place sexuality in the context of marriage, fidelity, commitment, and maturity.

Prevention of AIDS also demands responsibility from those who persist in high-risk behavior that is spreading AIDS. While many of these individuals apparently have not been convinced by educational efforts, some have begun to modify their behavior. AIDS is a fatal communicable disease of wide proportions, and all people of goodwill must realize that it is a public health problem whose prevention requires, at minimum, measures of detection, testing, and treatment now routinely taken against less dangerous communica-

ble diseases. Our goal must be to protect the lives, the health, and the well-being of all our citizens. Public officials are entrusted with and sworn to the sacred duty of such protection. Our country needs wisdom and courage in this effort.

We also need to remember that the battle against AIDS calls for calmness, compassion, and conviction—calmness, to remember that fear is the enemy of just solutions; compassion, for all AIDS victims; and conviction, for the understanding and the willingness to combat this major public health threat effectively.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim the month of October 1987 as AIDS Awareness and Prevention Month, and I call on Americans to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 29th day of Sept., in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5710 of September 29, 1987

National Lupus Awareness Month, 1987

By the President of the United States of America

A Proclamation

Systemic lupus erythematosus or lupus is often called "the great impersonator" because it can mimic so many other diseases. A disorder of the body's immune system, lupus may affect the joints, the skin, and one or more internal organs (such as the kidneys, heart, and brain) in varying combinations. As many as 500,000 Americans—mostly women in their childbearing years—may suffer from this autoimmune disorder.

Normally, an individual's immune system protects him or her from infection by producing antibodies that react with and eliminate foreign substances. In autoimmune diseases such as lupus, however, the immune system can harm the individual by making antibodies that react against the person's own tissues.

Scientists are not yet sure why the body's antibody-producing system behaves this way, but they are conducting extensive research seeking the cause of the disease. Their research studies include: investigations on genes that underlie the development of the disease; research on a wide variety of immune system components and chemical messengers; research on initiation of abnormal immune reactivity; and hormonal studies. Such fundamental studies will lead to the design of improved treatments that alleviate the symptoms of lupus, or even better, attack the disease itself.

Thanks to recent research progress, lupus has become more a chronic disease than the acute and often fatal disorder it was decades ago. Nevertheless, deaths do occur, and new research findings and new approaches to diagnosis and treatment are needed to eliminate lupus. A concerted Federal-private research effort is working to ultimately uncover the cause and cure for this distressing disease.

The Congress, by Public Law 100–106, has designated the month of October 1987 as "Lupus Awareness Month" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of October 1987 as Lupus Awareness Month. I urge the people of the United States and educational, philanthropic, scientific, medical, and health care organizations and professionals to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of September, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5711 of September 29, 1987

Child Health Day, 1987

By the President of the United States of America

A Proclamation

For nearly 6 decades, Americans have observed Child Health Day in reaffirmation of our private and public national commitment to the good health of every child. During this year's observance, we should resolve to redouble our efforts to ensure that all aspects of health services needed by mothers, babies, and older children are properly identified, provided, and used, when and where needed. Appropriate perinatal, medical, nutritional, and educational services should be made available in accordance with family needs, including specialized services for those at risk for poor pregnancy outcomes such as low birth weight, delivery complications, or developmental problems.

Babies and older children with special health needs such as severe chronic illnesses, birth impairments, and related conditions often require early intervention and highly specialized care. A family-centered, comprehensive program of medical, educational, and social services in the community and in the home may also be needed.

It is vital that approaches such as these be fostered throughout our country. Preventing low birth weights and infant mortality from other causes; reducing disability levels; and increasing the feasibility of home care in cases of severe chronic illness are objectives of high priority. Health professionals and staff members of State and local social service agencies can improve the effectiveness of health care delivery as they cooperate fully in these approaches.

Federal health services, research, and financing agencies continue to focus upon support of such endeavors. For instance, the recently created Bureau of Maternal and Child Health and Resource Development has as a central element of its mission the promotion of case-managed perinatal care as well as care for babies and older children who have special health care needs. Real progress can be made through the combination of State and local action and cooperation and Federal encouragement and support.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, pursuant to a joint resolution approved on May 18, 1928, as amended (36 U.S.C. 143), do hereby proclaim Monday, October 5, 1987, as Child Health Day.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of September, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5712 of September 30, 1987

Implementation of Agreement Concerning Certain Pasta Articles From the European Community

By the President of the United States of America

A Proclamation

1. On September 15, 1987, the United States and the European Community (EC) entered into an agreement to resolve the long-standing dispute over EC exports of subsidized pasta products to the United States. I have now determined, pursuant to section 301 of the Trade Act of 1974, as amended (Act) (19 U.S.C. 2411), to take action necessary to implement the agreement. In accordance with the agreement, certain pasta articles the product of any member country of the EC, exported on or after October 1, 1987, will be denied entry into the customs territory of the United States unless accompanied by documentation establishing that such imports are receiving reduced refund payments from the EC or are benefitting solely from Inward Processing Relief from the EC.

2. Section 301(a) of the Act (19 U.S.C. 2411(a)) authorizes the President to take all appropriate and feasible action within his power to enforce the rights of the United States under any trade agreement, or to respond to any act, policy, or practice of a foreign country or instrumentality that is unjustifiable, unreasonable, or discriminatory and burdens or restricts U.S. commerce. Pursuant to section 301(a), such actions can be taken on a nondiscriminatory basis or solely against the foreign government or instrumentality involved. Section 301(d) of the Act (19 U.S.C. 2411(d)) authorizes the President to take action on his own motion and on an expedited basis if required.

3. I have decided, pursuant to section 301(a) and (d) of the Act, to direct the United States Trade Representative to take such actions as he deems necessary and appropriate to enforce the provisions of the agreement. The U.S. Customs Service shall exclude from entry, or withdrawal from warehouse for consumption, into the customs territory of the United States all shipments the product of any member country of the EC, exported on or after October 1, 1987, of macaroni, noodles, vermicelli, and similar alimentary pastes composed primarily of wheat, provided for in items 182.35 and 182.36 part 15B, schedule 1 of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), unless accompanied by such documentation as is determined by the USTR to be necessary to ensure compliance with the agreement. The U.S. Customs Service shall collect and assemble such data as are necessary to monitor compliance with the agreement.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including but not limited to section 301(a) and (d) of the Trade Act of 1974, do proclaim that:

1. The U.S. Customs Service shall exclude from entry, or withdrawal from warehouse for consumption, into the customs territory of the United States all macaroni, noodles, vermicelli, and similar alimentary pastes composed primarily of wheat, provided for in items 182.35 and 182.36, part 15B, schedule 1 of the Tariff Schedules of the United States, the product of any member country of the European Community unless accompanied by such documenta-

tion as the United States Trade Representative determines necessary and appropriate to enforce the agreement.

2. The United States Trade Representative shall determine what actions are necessary to enforce the agreement and shall notify the U.S. Customs Service of the documentary requirements necessary to permit entry, or withdrawal from warehouse for consumption, into the customs territory of the United States of such pasta articles.

3. The U.S. Customs Service shall collect and assemble such data as are necessary to monitor compliance with the agreement.

4. This Proclamation shall be effective with respect to such pasta articles exported from the EC on or after October 1, 1987.

IN WITNESS WHEREOF, I have hereunto set my hand this 30th day of September, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

VOL 52 ISS 191 OCT 2 1987 UMI

Presidential Documents

Memorandum of September 30, 1987

Determination Under Section 301 of the Trade Act of 1974

Memorandum for the United States Trade Representative

Pursuant to section 301 of the Trade Act of 1974, as amended (19 U.S.C. 2411), I have determined to take actions necessary to implement an agreement signed on September 15, 1987, with the European Community (EC) with respect to exports of certain pasta products to the United States. In accordance with the agreement, the U.S. Customs Service shall exclude from entry, or withdrawal from warehouse for consumption, into the customs territory of the United States all shipments the product of any member country of the EC, exported on or after October 1, 1987, of macaroni, noodles, vermicelli, and similar alimentary pastes composed primarily of wheat, provided for in items 182.35 and 182.36 part 15B, schedule 1 of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), unless such shipments are accompanied by appropriate documentation establishing that such imports are receiving reduced refund payments from the EC or are benefitting solely from Inward Processing Relief from the EC. The United States Trade Representative (USTR) shall determine what actions are necessary to enforce the agreement and shall notify the U.S. Customs Service of the documentary evidence necessary to permit entry of such pasta articles. The U.S. Customs Service will collect and assemble such data as are necessary to monitor the agreement. I have determined to take this action on my own motion on an expedited basis under the authority of section 301(d)(1) of the Trade Act of 1974 (19 U.S.C. 2411(d)(1)).

Statement of Reasons

The agreement implemented by this determination resolves a long-standing dispute over certain EC subsidy practices I previously determined to be unfair (47 FR 31841). On November 30, 1981, the USTR initiated an investigation of export subsidies on certain pasta products from the EC (46 FR 59675), on the basis of a petition filed by the National Pasta Association under section 301 of the Trade Act of 1974. The United States pursued this matter under the dispute resolution procedures of the Subsidies Code. In 1983, a Subsidies Code panel found, after lengthy and careful examination of the arguments of both sides, that EC export subsidies on pasta products are inconsistent with Article 9 of the Subsidies Code. The EC and certain other countries declined to permit adoption of the panel ruling. Subsequent efforts to achieve a settlement through bilateral negotiations were unsuccessful.

In the context of a separate dispute with the EC concerning tariff preferences granted by the EC on certain citrus products, I imposed increased duties on certain pasta products under Proclamation 5354 of June 21, 1985 (50 FR 26153), as modified by Proclamation 5363 of August 15, 1985 (50 FR 33711). These increased duties on pasta products were withdrawn, effective August 21, 1986, by action of the USTR under authority delegated by Proclamation 5363, as a result of the negotiation of a satisfactory settlement of the dispute concerning citrus preferences (51 FR 30146). One of the terms of that settlement with the EC was that the United States and the EC would negotiate a satisfactory settlement of the dispute over EC pasta subsidies.

The agreement implemented by this determination and accompanying Proclamation is the result of those negotiations. The agreement reasonably restricts the EC subsidies on pasta exported to the United States, and therefore is an appropriate and feasible response to enforce the rights of the United States under the trade agreements of the United States or to respond to EC acts, policies, and practices that are unjustifiable, unreasonable, or discriminatory and burden or restrict U.S. commerce.

This determination shall be published in the **Federal Register**.

Memorandum of September 30, 1987

Annual Determination on Steel Industry Modernization

Memorandum for the United States Trade Representative

Section 806 of the Steel Import Stabilization Act (19 U.S.C. 2253 note) requires that I make an annual affirmative determination that specified conditions have been met by the domestic steel industry to justify continuation of authority under section 805 to enforce steel restraint agreements. The attached *Report of the President under the Steel Import Stabilization Act,* and the report prepared at my direction by the United States International Trade Commission, *Annual Survey Concerning Competitive Conditions in the Steel Industry and Industry Efforts to Adjust and Modernize,* enumerate the actions taken by the domestic industry consistent with an affirmative determination under section 806.

Based upon this information, I hereby make an affirmative determination for the third annual period (October 1, 1986–September 30, 1987) that during such period:

(A) The major companies of the steel industry, taken as a whole, have—

(i) committed substantially all of their net cash flow from steel product operations for purposes of reinvestment in, and modernization of, that industry; and

(ii) taken sufficient action to maintain their international competitiveness;

(B) each of the major companies committed not less than 1 percent of net cash flow to the retraining of workers, except as waived below; and

(C) the enforcement authority provided under section 805 remains necessary to maintain the effectiveness of bilateral arrangements undertaken to eliminate unfair trade practices in the steel sector.

Moreover, I hereby waive the application of section 806(b)(1)(B) with respect to one major company (Wheeling-Pittsburgh Steel Corporation) now operating under Chapter 11 of the Federal bankruptcy laws; and another major company (Nucor Corporation) not having or reasonably anticipating significant unemployment in steel operations, in light of recent growth in employment.

You are hereby authorized and directed to report this determination to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate. This memorandum shall be published in the **Federal Register.**

Executive Order 12610 of September 30, 1987

Continuance of Certain Federal Advisory Committees

By the authority vested in me as President by the Constitution and statutes of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C., App.), it is hereby ordered as follows:

Section 1. Each Advisory Committee listed below is continued until September 30, 1989:

(a) Advisory Committee on Small and Minority Business Ownership; Executive Order No. 12190 (Small Business Administration).

(b) Committee for the Preservation of the White House; Executive Order No. 11145, as amended (Department of the Interior).

(c) Federal Advisory Council on Occupational Safety and Health; Executive Order No. 12196, as amended (Department of Labor).

(d) President's Committee on White House Fellowships; Executive Order No. 11183, as amended (Office of Personnel Management).

(e) President's Committee on the International Labor Organization; Executive Order No. 12216 (Department of Labor).

(f) President's Committee on Mental Retardation; Executive Order No. 11776 (Department of Health and Human Services).

(g) President's Committee on the National Medal of Science; Executive Order No. 11287, as amended (National Science Foundation).

(h) President's Council on Physical Fitness and Sports; Executive Order No. 12345, as amended (Department of Health and Human Services).

(i) President's Economic Policy Advisory Board; Executive Order No. 12296 (Office of Policy Development).

(j) President's Export Council; Executive Order No. 12131, as amended (Department of Commerce).

(k) President's National Security Telecommunications Advisory Committee; Executive Order No. 12382, as amended (Department of Defense).

Sec. 2. Notwithstanding the provisions of any other Executive order, the functions of the President under the Federal Advisory Committee Act that are applicable to the committees listed in Section 1 of this Order, except that of reporting annually to the Congress, shall be performed by the head of the department or agency designated after each committee, in accordance with guidelines and procedures established by the Administrator of General Services.

Sec. 3. The following Executive Orders, which established committees that have terminated or whose work is completed, are revoked:

(a) Executive Order No. 12490, establishing the National Commission on Space.

(b) Executive Order No. 12427, establishing the President's Advisory Council on Private Sector Initiatives.

(c) Executive Order No. 12526, establishing the President's Blue Ribbon Commission on Defense Management.

BEST COPY AVAILABLE

(d) Executive Order No. 12511, establishing the President's Child Safety Partnership.

(e) Executive Order No. 12503, as amended by Executive Order No. 12529, establishing the President's Commission on Americans Outdoors.

(f) Executive Order No. 12435, establishing the President's Commission on Organized Crime.

(g) Executive Order No. 12575, establishing the President's Special Review Board.

(h) Executive Order No. 12546, establishing the Presidential Commission on the Space Shuttle Challenger Accident.

Sec. 4. Executive Order No. 12534 is superseded.

Sec. 5. This Order shall be effective September 30, 1987.

Rules and Regulations

Federal Register
Vol. 52, No. 191
Friday, October 2, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 226

Child Care Food Program; Documentation and Verification of Eligibility

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: On May 22, 1987, the Department published a proposed rule to implement the automatic free meal eligibility and verification provisions mandated by the School Lunch and Child Nutrition Amendments of 1986 (Pub. L. 99–500 and Pub. L. 99–591) in the Child Care Food Program (CCFP). In addition, that rulemaking also proposed several discretionary changes to the procedures governing the application for free or reduced price benefits and the verification of eligibility in the CCFP. This interim rulemaking action: (1) Responds to commenters' views regarding the proposed rulemaking; (2) *requires* the implementation of automatic (or "categorical") eligibility and related verification provisions in the CCFP in Fiscal Year 1988; (3) makes *optional* for Fiscal Year 1988 and *mandatory* for Fiscal Year 1989 the implementation of the discretionary changes which were proposed in the May 22, 1987 rulemaking. The Department is publishing these regulations in interim form in order to allow interested parties an opportunity to submit additional comments based on their experience in implementing categorical eligibility and the related verification procedures mandated by Pub. L. 99–500 and Pub. L. 99–591. In addition, those States choosing to implement immediately the discretionary changes to the application and verification procedures proposed in the May 22, 1987 rulemaking will also have operational experience on which to base additional comments. This rulemaking is intended to simplify eligibility and verification procedures and improve administrative consistency.

DATES: This interim rulemaking is effective October 1, 1987. The section entitled "Implementation", which appears at the end of this preamble, details those changes which must be implemented on October 1, 1987 and those for which implementation may be delayed at State discretion until October 1, 1988. To be assured of consideration, comments must be postmarked on or before December 31, 1987.

ADDRESS: Comments should be addressed to Mr. Lou Pastura, Chief, Policy and Program Development Branch, Child Nutrition Division, Food and Nutrition Service, United States Department of Agriculture, 3101 Park Center Drive, Room 509, Alexandria, Virginia 22302.

FOR FURTHER INFORMATION CONTACT: Mr. Lou Pastura or Mr. James C. O'Donnell at the above address or by telephone at (703) 756–3620.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under Executive Order 12291 and has been classified *not major* because it will not have an annual effect on the economy of $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or foreign markets.

This rule has also been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 through 612). Pursuant to this review, Ms. Anna Kondratas, the Administrator of the Food and Nutrition Service, has certified that this interim rule will not have a significant economic impact on a substantial number of small entities.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting and recordkeeping requirements that are included in §§ 226.9, 226.15, 226.17, 226.19 and 226.23 of this interim rule have been approved by the Office of Management and Budget (OMB) under clearance 0584–0055. This program is listed in the Catalog of Federal Domestic Assistance under No. 10.558 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (7 CFR Part 3015, Subpart V, and final rule related notice published at 48 FR 29114, June 24, 1983). This interim regulation implements both nondiscretionary provisions of law and discretionary initiatives of the Department concerning the free and reduced price application and verification process in the Child Care Food Program. Since the large majority of free and reduced price applications are submitted at the beginning of the fiscal year, and since Congress clearly intended that categorical eligibility be available to program participants in a timely manner, the Administrator of the Food and Nutrition Service has determined, in accordance with 5 U.S.C. 553(d), that good cause exists to make this rule effective less than 30 days after publication. Furthermore, with respect to the nondiscretionary provisions of this rule which merely recite statutory requirements, this rule constitutes an interpretative rule for which a 30 day waiting period is not required.

Background

On May 22, 1987, the Department published a proposed rule in the **Federal Register** (52 FR 19354) to: (1) Provide automatic free meal eligibility and simplified verification procedures for children from households receiving food stamps or from "assistance units" receiving Aid to Families with Dependent Children (AFDC) benefits; (2) require additional income information from households applying on behalf of other children (i.e., children who are *not* part of food stamp households or AFDC assistance units); (3) require that CCFP applications include a signed certification that the information being provided by the household on the application is true and correct; and (4) eliminate "institution conferences" as a method of verification in the CCFP. A 60-day comment period was provided during which the Department received 18 comments on the proposed

VOL
52
ISS
191
OC
2
1987
UMI

regulation. Commenters represented State agencies responsible for administering the CCFP; public and private nonprofit sponsors of child care centers and family day care homes; and child care centers. Many of the comments received dealt with portions of the CCFP regulations which were not part of the proposed rulemaking, and only 8 of the 18 comments concerned the Department's proposal to make several discretionary changes to the CCFP application and verification procedures.

In order to implement the School Lunch and Child Nutrition Amendments of 1986 in a timely manner, this interim rulemaking mandates full implementation of the categorical eligibility and related verification procedures by October 1, 1987. However, implementation of the remaining changes proposed in the May 22, 1987 rulemaking is *optional* in Fiscal Year 1988 and *mandatory* in Fiscal Year 1989. The specific discretionary provisions involved in optional Fiscal Year 1988 implementation are discussed in the section entitled "Implementation" which appears at the end of this preamble.

By promulgating in interim form the nondiscretionary changes mandated in Pub. L. 99–500 and Pub. L. 99–591, the Department wishes to give State agencies and institutions the opportunity to submit additional comments based on their actual experience in implementing automatic free meal eligibility and related verification procedures for the Fiscal Year 1988 Program. In addition, those States choosing to implement immediately the discretionary changes proposed in the May 22, 1987 rulemaking are also encouraged to submit additional comments reflecting their experience with these provisions.

The remainder of this preamble will discuss the views expressed by commenters in relation to each of the provisions discussed in the May 22, 1987 rulemaking. Comments which addressed portions of the 7 CFR Part 226 regulations not substantively affected by the proposed rulemaking are not discussed herein.

General Comments

Of the 18 comments received, 7 expressed agreement with the changes proposed in the May 22, 1987 rulemaking. Most of these commenters, and many of those expressing concern regarding specific provisions of the proposed rulemaking, commended the effort to simplify eligibility and verification procedures and to bring about administrative consistency between the CCFP and the School Programs. Five (5) commenters requested that the Department issue guidance on the revised application and verification procedures. These commenters felt that such guidance was imperative since categorical eligibility requires that eligibility be established for each child, rather than for entire households as in the past. The Department understands that there may be some confusion at the local level, especially in regard to determining eligibility in "mixed households" (i.e., households which include both categorically eligible children and other children who are not categorically eligible). The Department is revising the applicable guidance, but again reiterates the request made in the preamble to the proposed rulemaking that States and institutions submit specific comments and questions concerning the implementation of categorical eligibility. Comments on the interim rule should reflect administering agencies' practical experience in implementing these provisions, and will thus be helpful to the Department in its effort to provide clear and complete guidance materials.

1. Comments on Categorical Eligibility and Related Verification Provisions

In addition to the requests for guidance noted above, two State agencies provided comments on categorical eligibility's impact on the application process. One of these commenters requested that the definition of "household" be expanded to clarify the procedures for processing applications from mixed households and from households which include both a food stamp household and an AFDC assistance unit. Both commenters felt that the regulations should provide more specific language pertaining to processing mixed households. The Department agrees that this information is needed by administering agencies, but believes that it would be more appropriate to address such situations in guidance materials rather than attempting to deal with a large and complex variety of possible circumstances in the regulations themselves. The definition of "household" remains unchanged in § 226.2, as do the definitions of "food stamp household" and "AFDC assistance unit" added to Part 226 in the proposed rulemaking, in order to facilitate reference to requirements which apply to all households and those which apply to specific types or parts of households.

A third comment on the subject of "mixed households" misunderstood the Department's intent in the proposed rulemaking. The commenter believed that since Congress intended to simplify the application process it would not require two different types of eligibility determinations to be made for the same household. Because the commenter believed that using two techniques to determine eligibility in mixed households would be cumbersome and too complicated, she concluded that eligibility for *all* children in a mixed household would have to be based on income and family size. The proposed rule provided that in a mixed household, two types of eligibility determinations are made—the first provides automatic eligibility for children from food stamp households or AFDC assistance units within the mixed household, while the second applies to all other children in the household and is based on total household size and income.

The Department does not believe that this treatment of mixed households adds significantly to the burden or complexity of the eligibility process. Prior to the passage of the School Lunch and Child Nutrition Amendments, the eligibility determination for children in a mixed household would have been based on income alone; now, the only additional step is to review a simple application containing the child's name, a food stamp or AFDC case number and a signature. In addition, a mixed household can always choose to submit income and family size information for all children in the household. Finally, the Department believes strongly that its implementation of categorical eligiblity is consistent with section 323 of Pub. L. 99–591 and section 4203 of Pub. L. 99–500, both of which state that, "A *child* shall be considered automatically eligibile . . . if the *child* is a member of" a food stamp household or an AFDC assistance unit (emphases added). This wording makes clear that congressional intent is to extend categorical eligibility to children receiving benefits under the Food Stamp or AFDC Programs, regardless of whether they reside in a household with other children who are not categorically eligible. Therefore, to require income and family size information for these children would be inconsistent with the statutory requirement concerning categorical eligibility.

The remainder of the comments concerning the nondiscretionary changes mandated by the School Lunch and Child Nutrition Amendments of 1986 involved the implementation of simplified verification procedures for categorically eligible children. With respect to the verification of food stamp or AFDC participation, one commenter noted that the "Notice of Eligibility"

provided to recipients by the food stamp or AFDC office will not necessarily list all the members of the food stamp household or AFDC assistance unit. The commenter suggested that in such cases it might be difficult for households to obtain the appropriate proof of current program certification from their food stamp or AFDC office. This commenter recommended that households be required to provide the case number only at the time of application and be penalized only if the information proved false. A second commenter believed that the Department should accept identification cards or issuance receipts as verification of certification in the Food Stamp or AFDC Programs.

The Department wishes to emphasize that these issues arise only at the time of verification. When making an application, the household need only provide the food stamp or AFDC case number. Only if a household's application is selected for verification will proof of food stamp or AFDC participation be required. In further response to the first commenter, the Department does not wish to place an unreasonable verification burden on those households selected for verification. Consistent with this concern, the definition of "verification" at § 226.23 and the verification procedures set forth at § 226.23 (h)(2)(iv) of the proposed rulemaking permit State agencies to use other sources of information for verification if the written evidence provided by the household is insufficient to establish food stamp or AFDC certification. Thus, if the written evidence submitted by the household is not adequate to verify the current food stamp or AFDC certification of the child(ren) for whom automatic eligibility was claimed, the State agency may then choose to contact the local food stamp or welfare agency to obtain this information. In response to the second commenter, the Department wishes to point out that, in accordance with § 226.23 (h)(2)(iii), the "Notice of Eligibility" is not the only document which households may use to establish their food stamp or AFDC certification. For example, an identification card is acceptable proof of certification *Provided* that it contains an expiration date; in fact, § 226.23 (h)(2)(iii) provides that "equivalent official documentation issued by a food stamp or welfare office", will suffice as long as it establishes the current certification of the children for whom benefits were claimed.

With regard to the proposed change to the definition of "verification", the Department has noticed a point of possible confusion. In this interim rule, the definition is revised to make clear that the only verification which can be required for a child whose eligibility is based on food stamp or AFDC participation is verification that the child is part of a currently certified food stamp household or AFDC assistance unit. In addition, the phrase permitting verification of other application information for children who are not catgorically eligible for the program has been moved to emphasize this State agency option. Section 226.23(h)(2)(i) has also been revised to make this clarification.

11. Comments on Discretionary Changes to Application and Verification Requirements

Eight (8) commenters specifically addressed the discretionary changes proposed in the May 22, 1987 rulemaking. Of these, one (1) commenter expressed agreement with all of the proposed changes; three (3) commenters opposed the requirement to obtain additional income information from households applying for free or reduced price benefits; two (2) commenters made observations relating to the collection of additional income information; and two (2) commenters expressed the opinion that the Department's proposed changes did not establish full consistency between the methods of verification employed in the school programs and the CCFP.

Of the three commenters which disagreed with the proposal to collect information on the source(s) of income for each household member, two were from child care centers. One center operator believed that the collection of additional information would create an added burden for centers and households. The other center operator believed that the added burden on households would discourage households from applying for benefits and would result in lower reimbursement for centers.

The Department does not, of course, wish to impose unnecessary burdens on either local entities or households. Rather, based on its experience in administering the National School Lunch Program, the Department believes that the collection of additional information will lead to the submission of more complete and accurate income statements by households, and will therefore improve program accountability. Similar information is collected in relation to the receipt of means-tested benefits in other Child Nutrition Programs, and that process has not been demonstrated to be excessively burdensome. Finally, it should be reiterated that this change in application requirements will provide greater consistency in the administration of the school programs and the CCFP. Since the same agency often administers all of these programs, the States' burden will be *decreased* by implementing uniform application requirements.

The third commenter objecting to the collection of additional income information stated that such information would only be useful to State agencies which chose to conduct verification in non-pricing programs (verification of income is not required for non-pricing programs, but States may choose to verify this information if they wish). The commenter therefore suggested that collection of income by source be left to State discretion. However, in addition to its usefulness for verification purposes, the Department reiterates that the collection of additional income data is likely to improve the accuracy and completeness of the information submitted by the household. Thus, program accountability should be improved regardless of whether the household participates in a pricing or non-pricing program and regardless of whether the State chooses to verify the income information on the application in a non-pricing program.

Without objecting to the collection of income by source, two commenters provided observations regarding potential problems in implementing this change to the application requirements. One commenter expressed support for greater consistency in application requirements in the school programs and CCFP, but feared that collection of income by source could *increase* the potential for erroneous eligibility determinations. The Department believes that there might be a *very slight* possibility of an increase in errors by centers and day care home sponsors because more numbers would have to be added together to determine overall household income. However, the greater accuracy which results from reminding applicants that wages are not the only type of countable income will far outweigh the small potential for error by administering agencies.

The second commenter requested that the definition of "documentation" be revised to clarify that the income received by a household member should appear next to the member's name on the application. The Department believes that this information should more properly be included in the guidance material being developed on CCFP application and verification procedures.

Finally, in regard to the Department's desire to improve administrative consistency between the school programs and the CCFP, two State agencies suggested that the Department propose additional changes to make verification more uniform across these programs. Specifically, these commenters believed that verification in CCFP pricing programs should be conducted by institutions rather than by State agencies, just as school food authorities conduct income verification in the National School Lunch and School Breakfast Programs.

However, because of the differences between the school programs and the CCFP, it is neither possible nor desirable to perform verification identically in these programs. For example, in the case of non-pricing programs in the CCFP, it would clearly be inappropriate for institutions to perform verification, since the institution will receive greater reimbursement from the Department if it serves more free and reduced price meals. With respect to verification in pricing programs, it must be noted that participating CCFP institutions are, in most cases, small, private entities, with limited access to verification information. In addition, given the small number of pricing programs and the regulatory flexibility to schedule and perform verification on a limited number of applications, this requirement does not impose a significant burden on State agencies. Given these factors, the Department believes that this inconsistency between the school programs and the CCFP is necessary and appropriate and does not conflict with the overall goal of consistency between the programs.

Implementation

This interim rulemaking is effective October 1, 1987. Implementation of the regulation on October 1, 1987 is *mandatory* except for the following requirements for which implementation may be delayed until October 1, 1988: (1) collection of income information from each household member, identified by source of income (see clause (c) under the definition of "Documentation" in §226.2, and §226.23(e)(1)(ii)(D)); (2) certification that the information on the application is true and correct (see §226.23(e)(1)(ii)(G)); and (3) elimination of "institution conferences" (see the introductory sentence to §226.23(h)(2)(iv) and §226.23(h)(2)(iv)(D)). In lieu of the above requirements, during fiscal year 1988: a complete application can provide total household income without identifying income by household member and source; applications need not include the perjury certification; and institution conferences may continue to be used as a source of verification.

List of Subjects in 7 CFR Part 226

Day care, Food assistance programs, Grant programs—Health, Infants and Children, Surplus agricultural commodities.

Accordingly, for the reasons set forth in the preamble, the Department is amending 7 CFR Part 226 as follows:

PART 226—CHILD CARE FOOD PROGRAM

1. The authority citation for Part 226 is revised to read as follows:

Authority: Secs. 323, 326, and 361, Pub. L. 99–500 (42 U.S.C. 1758, 1760, and 1766); secs. 323, 326, and 361 of Pub. L. 99–591 (42 U.S.C. 1758, 1760, and 1766); secs. 803, 810, and 820, Pub. L. 97–35, 95 Stat. 521–535 (42 U.S.C. 1758, 1766); sec. 2, Pub. L. 95–627, 92 Stat. 3603 (42 U.S.C. 1766); sec. 10, Pub. L. 89–642, 80 Stat. 889 (42 U.S.C. 1779), unless otherwise noted.

2. In §226.2:

a. New definitions of "AFDC Assistance Unit" and "Food Stamp Household" are added in alphabetical order.

b. The definitions of "Documentation", "Free Meal", and "Verification" are revised.

The revisions and additions specified above read as follows:

§226.2 Definitions.

* * * * *

"AFDC assistance unit" means any individual or group of individuals which is currently certified to receive assistance under the Aid to Families with Dependent Children Program in a State where the standard of eligibility for AFDC benefits does not exceed the income eligibility guidelines for free meals under this part.

* * * * *

"Documentation" means the completion of the following information on a free and reduced price application: (a) Names of all household members; (b) social security number of each adult household member or an indication that an adult household member does not possess one; (c) household income received by each household member, identified by source of income (such as earnings, wages, welfare, pensions, support payments, unemployment compensation, and social security) and total household income; and (d) the signature of an adult member of the household. However, prior to October 1, 1988, collection of the information specified in clause (c) of this definition may, at the State agency's option, be limited to total household income. Alternatively, "documentation" for a child who is a member of a food stamp household or an AFDC assistance unit means completion of only the following information on a free and reduced price application: the name(s) and appropriate food stamp or AFDC case number(s) for the child(ren); and the signature of an adult member of the household.

* * * * *

"Food Stamp household" means any individual or group of individuals which is currently certified to receive assistance as a household under the Food Stamp Program.

"Free meal" means a meal served under the Program to (a) a child from a family which meets the income standards for free school meals, or to (b) a child who is automatically eligible for free meals by virtue of food stamp of AFDC recipiency. Regardless of whether the child qualified for free meals by virtue of (a) or (b), neither the child nor any member of his family shall be required to pay or to work in the food service program in order to receive a free meal.

* * * * *

"Verification" means: (a) A review of the information reported by institutions to the State agency regarding the eligibility of enrolled children for free or reduced price meals; and (b) in addition, for a pricing program, confirmation of eligibility for free or reduced price benefits under the Program. Verification for a pricing program shall include confirmation of income eligibility and, at State discretion, any other information required on the application which is defined as documentation in § 226.2. Such verification may be accomplished by examining information (e.g., wage stubs, etc.) provided by the household or other sources of information as specified in § 226.23(h)(2)(iv). However, if a food stamp or AFDC case number is provided for a child, verification for such child shall include only confirmation that the child is included in a currently certified food stamp household or AFDC assistance unit.

§ 226.4 [Amended]

3. In § 226.4, paragraphs (b)(1) through (b)(3) and (b)(5) through (b)(9) are amended by removing the word "income" and adding in its place the word "eligibility".

§ 226.6 [Amended]

4. In § 226.6:

a. Paragraph (b)(2) is amended by removing the words "family size and income" and adding in their place the word "eligibility".

b. Paragraph (e)(7) is amended by removing the words "Secretary's income".

§ 226.9 [Amended]

5. In § 226.9, paragraph (b)(1) is amended by removing the phrase "family-size and income" and adding in its place the word "eligibility" both times the phrase appears.

§ 226.11 [Amended]

6. In § 226.11, paragraph (c)(1) is amended by removing the words "from families meeting the family-size and income standards for" and adding in their place the words "eligible to receive".

7. In § 226.15:

a. Paragraph (e)(2) is amended by adding a third sentence.

b. Paragraph (e)(3) is amended by adding a third sentence.

The additions specified above read as follows:

§ 226.15 Institution provisions.

* * * * *

(e) * * *

(2) * * * However, when a household applies for free meal eligibility on behalf of a child who is a member of a food stamp household or AFDC assistance unit in accordance with § 226.23(e)(1)(ii), such information shall consist of the food stamp or AFDC case number of the child(ren) for whom free meal benefits are being claimed.

(3) * * * However, when a provider's own child is a member of a food stamp household or an AFDC assistance unit and free meal benefits have been applied for in accordance with § 226.23(e)(1)(iii), such information shall consist of the child(ren)'s food stamp or AFDC case number.

* * * * *

7. In § 226.17, paragraph (b)(7) is amended by adding a second sentence to read as follows:

§ 226.17 Child care center provisions.

* * * * *

(b) * * *

(7) * * * However, for households applying for free meal eligibility on behalf of children from food stamp households or AFDC assistance units in accordance with § 226.23(e)(1)(iii), child care centers shall collect and maintain food stamp or AFDC case numbers in lieu of family-size and income information and social security numbers.

* * * * *

§ 226.18 [Amended]

8. In § 226.18, paragraph (e)(3) is amended by removing the words "meet the family-size income standards for" and adding in their place the words "are eligible to receive".

9. In § 226.19, paragraph (b)(9)(i) is revised to read as follows:

§ 226.19 Outside-school-hours care center provisions.

* * * * *

(b) * * *

(9) * * *

(i) Documentation of enrollment for all children, including information sufficient to establish the eligibility of children classified as free or reduced price meal recipients;

* * * * *

10. In § 226.23:

a. Paragraph (c)(2) is amended by changing the semi-colon to a period and adding a second sentence.

b. Paragraph (d) is amended by revising the fourth sentence.

c. Paragraph (e)(1)(i) is amended by adding a fifth sentence.

d. Paragraph (e)(1)(ii) is amended by adding the words, "Except as provided in paragraph (e)(1)(iii) of this section," at the beginning of the first sentence.

e. Paragraphs (e)(1)(ii)(D) and (e)(1)(ii)(G) are revised.

f. Paragraph (e)(1)(ii)(F) is amended by revising the first and fifth sentences.

g. Paragraph (e)(1)(iii) is revised.

h. Paragraphs (e)(2)(iii) and (e)(2)(vii) are revised.

i. Paragraph (h)(2) is revised.

j. Paragraph (h)(5) is amended by changing the words "paragraph (h)(2)(i)" to read "paragraph (h)(2)(vii)", and by changing the words "paragraph (h)(2)(ii)" to read "paragraph (h)(2)(viii)".

The revisions and additions specified above read as follows:

§ 226.23 Free and reduced price meals.

* * * * *

(c) * * *

(2) * * * Such methods will ensure that applications are accepted from households on behalf of children who are members of AFDC assistance units or food stamp households;

* * * * *

(d) * * * The release issued by institutions which charge separately for meals shall announce the availability of free and reduced price meals to children meeting the approved eligibility criteria, and shall also announce that children who are members of AFDC assistance units or food stamp households are automatically eligible to receive free meal benefits.* * *

(e)(1) * * *

(i) * * * However, such forms and materials shall state that, if a child is a member of a food stamp household or an AFDC assistance unit, the child is automatically eligible to receive free CCFP meal benefits, subject to completion of the application as described in § 226.23(e)(1)(iii) of this part.

(ii) * * * (D) the total current household income, and the income received by each household member identified by source of income (such as earnings, wages, welfare, pensions, support payments, unemployment compensation, social security, and other cash income received or withdrawn from any other source, including savings, investments, trust accounts, and other resources.) However, prior to October 1, 1988, collection of income information may, at the State agency's option, be limited to total household income. * * * (F) a statement which includes substantially the following information: "Section 9 of the National School Act requires that, unless you provide a food stamp or AFDC case number for your child, you must provide the social security numbers of all adult members of your household in order for your child to be eligible for free or reduced price meals. * * * These verification efforts may be carried out through program reviews, audits, and investigations and may include contacting employers to determine income, contacting a food stamp or welfare office to determine current certification for receipt of food stamps or AFDC benefits, contacting the State employment security office to determine the amount of benefits received, and checking the documentation produced by household members to prove the amount of income received. * * * (G) the signature of an adult member of the household which appears immediately below a statement that the person signing the application certifies that all information furnished is true and correct; that the application is being made in connection with the receipt of Federal funds; that Program officials may verify the information on the application; and that the deliberate misrepresentation of any of the information on the application may subject the applicant to prosecution under applicable State and Federal criminal statutes. However, prior to October 1, 1988, the requirement in paragraph (e)(1)(ii)(D) of this section may, at the State agency's option, be limited to the signature of an adult member of the household.

(iii) If they so desire, households applying on behalf of children who are members of food stamp households or AFDC assistance units may apply for

free meal benefits under this paragraph rather than under the procedures described in paragraph (e)(1)(ii) of this section. Households applying on behalf of children who are members of food stamp households or AFDC assistance units shall be required to provide: (A) The names and food stamp or AFDC case numbers of the child(ren) for whom automatic free meal eligibility is claimed; and (B) the signature of an adult member of the household as provided for in § 226.23(e)(1)(ii)(G). In accordance with § 226.23(e)(1)(ii)(F), if a food stamp or AFDC case number is provided, it may be used to verify the current food stamp or AFDC certification for the child(ren) for whom free meal benefits are being claimed. Whenever households apply for benefits for children not receiving food stamp or AFDC benefits, they must apply in accordance with the requirements set forth in § 226.23(e)(1)(ii).

(2) * * *

(iii) An explanation that an application for free or reduced price benefits cannot be approved unless it contains complete "documentation" as defined in § 226.2.

* * * * *

(vii) An explanation that households receiving free and reduced price meals must notify appropriate institution officials during the year of any decreases in household size or increases in income of over $50 per month or $600 per year or, in the case of households that provided a food stamp or AFDC case number to establish a child's eligibility for free meals, any termination in the child's certification to participate in the Food Stamp or AFDC Programs.

* * * * *

(h) * * *

(2) *Verification procedures for pricing programs.* (i) For pricing programs, in addition to the verification procedures described in paragraph (h)(1) of this section, State agencies shall also conduct verification of the income information provided on the approved application for free and reduced price meals and, at State agency discretion, verification may also include confirmation of other information required on the application. However, if a food stamp or AFDC case number is provided for a child, verification for such child shall include only confirmation that the child is included in a currently certified food stamp household or AFDC assistance unit.

(ii) State agencies shall perform verification on a random sample of no less than 3 percent of the approved free and reduced price applications in an institution which is a pricing program.

(iii) Households shall be informed in writing that they have been selected for verification and that they are required to submit the requested verification information to confirm their eligibility for free or reduced price benefits by such date as determined by the State agency. Those households shall be informed of the type or types of information and/or documents acceptable to the State agency and the name and phone number of an official who can answer questions and assist the household in the verification effort. Households selected for verification shall also be informed that if they are currently certified to participate in the Food Stamp or AFDC Program, they may submit proof of that certification in lieu of income information. In these cases, such proof shall consist of a current "Notice of Eligibility" for Food Stamp or AFDC Program benefits or equivalent official documentation issued by a food stamp or welfare office which shows that the children are members of households or assistance units currently certified to participate in the Food Stamp or AFDC Programs. An identification card for either program is not acceptable as verification unless it contains an expiration date. All households selected for verificaton shall be advised that failure to cooperate with verification efforts will result in a termination of benefits.

(iv) Sources of information for verification may include written evidence, collateral contacts, systems of records. In addition, prior to October 1, 1988, institution conferences may, at the State agency's option, be used as a source of information for verification.

(A) *Written evidence* shall be used as the primary source of information for verification. Written evidence includes written confirmation of a household's circumstances, such as wage stubs, award letters, letters from employers, and current certification to participate in the Food Stamp or AFDC Program. Whenever written evidence is insufficient to confirm eligibility, the State agency may use collateral contacts.

(B) *Collateral contact* is a verbal confirmation of a household's circumstances by a person outside of the household. The collateral contact may be made in person or by phone and shall be authorized by the household. The verifying official may select a collateral contact if the household fails to designate one or designates one which is unacceptable to the verifying official. If the verifying official designates a collateral contact, the contact shall not be made without providing written or oral notice to the household. At the time of this notice, the household shall be informed that it may consent to the contact or provide acceptable verification in another form. The household shall be informed that its eligibility for free or reduced price meals shall be terminated if it refuses to choose one of these options. Termination shall be made in accordance with paragraph (h)(2)(vii) of this section. Collateral contacts could include employers, social service agencies, and migrant agencies.

(C) *Systems of records* to which the State agency may have routine access are not considered collateral contacts. Information concerning income, family size, or food stamp/AFDC certification which is maintained by other government agencies and to which the State agency can legally gain access may be used to confirm a household's eligibility for CCFP meal benefits. One possible source could be wage and benefit information maintained by the State unemployment agency, if that information is available. The use of any information derived from other agencies must be used with applicable safeguards concerning disclosure.

(D) *Institution conferences.* Prior to October 1, 1988, the adult member(s) of the household may be asked to visit the institution for a discussion of the information on the application. Households shall be provided sufficient opportunity to schedule the conference.

(v) Verification by State agencies of receipt of food stamps or AFDC benefits shall be limited to a review to determine that the period of Food Stamp or AFDC Program eligibility is current. If the food stamp or AFDC certification period is found to have expired, or if the household's certification has been terminated, the household shall be required to document their income eligibility.

(vi) The State agency may work with the institution to verify the documentation submitted by the household on the application; however, the responsibility to complete the verification process may not be delegated to the institution.

(vii) If a household refuses to cooperate with efforts to verify, or the verification of income indicates that the household is ineligible to receive benefits or is eligible to receive reduced benefits, the State agency shall require the pricing program institution to terminate or adjust eligibility in accordance with the following procedures. Institution officials shall immediately notify families of the denial

of benefits in accordance with paragraphs (e)(4) and (e)(5) of this section. Advance notification shall be provided to families which receive a reduction or termination of benefits 10 calendar days prior to the actual reduction or termination. The 10-day period shall begin the day the notice is transmitted to the family. The notice shall advise the household of: (A) The change; (B) the reasons for the change; (C) notification of the right to appeal the action and the date by which the appeal must be requested in order to avoid a reduction or termination of benefits; (D) instructions on how to appeal; and (E) the right to reapply at any time during the year. The reasons for ineligibility shall be properly documented and retained on file at the institution.

(viii) When a household disagrees with an adverse action which affects its benefits and requests a fair hearing, benefits shall be continued as follows while the household awaits the hearing:

(A) Households which have been approved for benefits and which are subject to a reduction or termination of benefits later in the same year shall receive continued benefits if they appeal the adverse action within the 10-day advance notice period; and

(B) Households which are denied benefits upon application shall not received benefits.

[FR Doc. 87-22825 Filed 9-30-87; 9:23 am]

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 1068

[Docket No. AO-178-A41]

Milk in the Upper Midwest Marketing Area; Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This order amends the Upper Midwest milk order to allow the operator of one or more distributing plants and one or more soft-products plants (processing cream items, cottage cheese and yogurt, but excluding ice cream) located within the marketing area to treat such plants as one plant, or unit, for pooling purposes.

The amendment, which is based on an industry proposal considered at a public hearing held in Minneapolis, Minnesota on July 7-8, 1987, is necessary to reflect current marketing conditions and to assure orderly marketing in the Upper Midwest marketing area. Cooperative associations representing more than the required two-thirds of the producers supplying milk for the market during the representative period of June 1987 have approved issuance of the amended order.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-7183.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued June 19, 1987; published June 25, 1987 (52 FR 23843).

Emergency Partial Final Decision: Issued September 2, 1987; published September 9, 1987 (52 FR 33943).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the Upper Midwest order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings Upon the Basis of the Hearing Record. Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Upper Midwest marketing area.

Upon the basis of the evidence introduced as such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area; and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) Additional Findings. It is necessary in the public interest to make this order amending the order effective not later than October 1, 1987. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The decision of the Assistant Secretary containing all amendment provisions of this order was issued September 2, 1987 (52 FR 33943). The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective October 1, 1987, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the **Federal Register**. (Section 553(d), Administrative Procedure Act, 5 U.S.C. 551 through 559).

(c) Determinations. It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) or more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order amending the order is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

List of Subjects in 7 CFR Part 1068

Milk marketing orders, Milk, Dairy products.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Upper Midwest marketing area shall be in conformity to and in compliance with the terms and

conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

PART 1068—MILK IN THE UPPER MIDWEST MARKETING AREA

1. The authority citation for CFR Part 1068 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. In § 1068.7, Pool plant, add a new paragraph (a)(3) as follows:

§ 1068.7 Pool plant.

* * * * *

(a) * * *

(3) A unit consisting of at least one pool distributing plant and one or more additional plants of a handler shall be considered as one plant for the purpose of meeting the requirements of this paragraph, subject to the following conditions:

(i) For each plant within the unit which does not qualify as a pool distributing plant pursuant to paragraphs (a) (1) and (2) of this section, the combined disposition of skim milk and butterfat in products specified in § 1068.40(a), § 1068.40(b)(1) in packaged form, and § 1068.40(b)(4)(i) is 50 percent or more of the total Grade A fluid milk products received in bulk form at such plant or diverted therefrom by the plant operator;

(ii) All plants within the unit are located within the marketing area; and

(iii) The operator of the unit has filed a written request with the market administrator prior to the first day of the month for which such status is desired to be effective. The unit shall continue from month-to-month thereafter without further notification. The handler shall notify the market administrator in writing prior to the first day of any month for which termination or any change of the unit is desired.

BILLING CODE 3410–02–M

Farmers Home Administration

7 CFR Part 1930

Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) revises its regulations to provide relief to rural rental housing projects that are experiencing high vacancy rates due to local rental market conditions. Currently, some existing and prospective tenants are not willing to pay 30 percent of adjusted income or market rent because the rental rates would exceed those of other rental properties in the community. The intended effect of this action is to allow borrowers to reduce their "market" or maximum rents, to be comparable with those in the local market, so as to avoid the failure of rural rental housing projects because of extreme unforeseen changes in a local economy.

EFFECTIVE DATE: November 2, 1987.

FOR FURTHER INFORMATION CONTACT: Laurence R. Anderson or Arlene Halfon, Senior Loan Officers, Multiple Family Housing Servicing and Property Management Division, Room 5321–S Farmers Home Administration, USDA, 14th and Independence Avenue, SW., Washington, DC 20250, Telephone: (202) 382–1599.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "nonmajor." This action will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of enterprises based in the United States to compete with foreign based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed according to 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Intergovernmental Review

This program/activity is listed in the Catalog of Federal Domestic Assistance under numbers 10.405, 10.415 and 10.427 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, 48 FR 29112, June 24, 1983).

Regulatory Flexibility Act

The Adminstrator, Farmers Home Administration, USDA, has determined that this action will not have a significant economic impact on a substantial number of small entities because it contains normal business recordkeeping requirements and minimal essential reporting requirements.

General Information

Background and Statutory Authority

The regulation, 7 CFR Part 1930 Subpart C, interprets the authority of The Housing Act of 1949 to establish ranges of rental rates to be paid by eligible tenants in rural rental housing projects. The revision will reduce the maximum rate in those projects experiencing distress from high vacancy due to the local market conditions.

Tenants whose incomes require that they pay more than basic rent would not have to pay higher rents in FmHA projects than they would for comparable housing elsewhere in the community. This should ultimately increase occupancy of FmHA projects and so help to make the project fiscally sound.

The proposed rule published January 5, 1987 (52 FR 296) referred to a Special Servicing Market Rent. This is being changed to read Special Servicing Market Rate Rent (SMR) to make it clear that the interest rate used to compute the market rent is being adjusted to make rent compatible with those in the community. Minor modifications had to be made throughout the proposed procedure to adjust for this change. For the sake of simplicity, the acronym has been changed to SMR.

Another minor change has been made to clarify that in order to qualify for an SMR, a borrower must have obtained approval from FmHA to rent to ineligibles at least 3 months earlier.

A total of 44 comments were received from the public. Thirteen of these were identical sets of comments from local organizations which are members of a national organization. One of these organizations also submitted an additional set of comments. No tenant groups were represented and only one

comment may have been from a tenant. Thirty-eight responses came from project owners, managers, national, and local industry organizations and attorneys representing the housing industry. Five comments were received from FmHA employees. Twenty-four comments expressed favorable opinions of the proposed regulations either as the sole comment or in conjunction with some suggestions. Only two commenters were opposed to the regulations or raised serious concerns. These concerns involved public relations with the community, competition with the private housing industry, encouraging vacancies, and encouraging rentals to ineligible tenants. The Agency feels there are sufficient constraints on the granting of SMR's that these will not be major issues. The Agency feels that large numbers of ineligible tenants would not wish the occupy the project since FmHA regulations do not allow them long term occupancy.

The issue addressed most dealt with the length of time projects had to be in operation in order to receive an SMR without National Office approval. Many felt that the recent change in regulations requiring tenants to pay 30 percent of their adjusted incomes for rent, made projects which would have been feasible under the 25 percent rent formula in effect when the application was made, to not be feasible by the time the project was completed. Suggestions ranged from making SMR's available immediately to making them available after 12 months of operation. It was felt that this argument was valid at this time but would not be valid for projects being developed in the future. In addition, most projects currently eligible for an SMR would have already been in operation more than 24 months. We, therefore, decided to allow projects in operation for over 6 months to receive an SMR during a transition period but to retain the 24-month period for SMR's after the transition. It is incumbent on applicants to be certain that market surveys justifying the projects are accurate. In the event that market conditions do change significantly between application and rentup, a National Office exception can be granted.

Comments suggested that a State Office exception should be allowed. It was determined that the National Office should maintain this control in order to monitor the extent to which these waivers are necessary and to be certain that market surveys are being adequately performed.

The next most commonly addressed issue was that dealing with the vacancy rate and period for which the vacancy rate was maintained in order to qualify for an SMR. The proposed rule stated that the vacancy rate must have been at least 25 percent for the most recent 6-month period. It was felt by all who commented on this issue that the required vacancy rate was too high; at the point at which a project has had a 25 percent vacancy rate for 6 months, it would no longer be salvageable. Several commenters also felt that the length of time for the vacancy rate was too long. Comments ranged from the suggestion that vacancies required should be reduced to "5–10 percent" to "15 percent" and the time period from as low as 2 months to the suggestion of a graduated rate and period of 25 percent for 3 months or 15 percent for 6 months.

The Agency decided to reduce the vacancy rate necessary to qualify for an SMR to 15 percent for each month of the preceding 6-month period. A 10 percent vacancy is normal in many functional projects for the first year and for occasional periods thereafter; in fact, most operating budgets assume a 5 to 10 percent vacancy rate. Setting the vacancy rate for eligibility that low would provide little incentive to borrowers to try to restore the project without these emergency measures. The 15 percent figure was recommended as sufficient in virtually all the independently written comments. This figure would allow the entire vacancy allowance and the owner's return to be exhausted prior to the emergency measure being granted.

The Agency is not changing the length of time for the vacancy rate to be at the set level. We want to be certain that vacancies have not just increased due to temporary market conditions and it would take at least the 6-month period for borrowers to exhaust all efforts to alleviate vacancy problems without this solution.

A number of commenters noted that the plan to cancel an SMR when the vacancy rate dropped below 10 percent did not specify the length of time this condition must exist. Suggestions for this time period ranged from 6 months to 2 years. The duplicated comments also suggested that the SMR remain in place until a 5 percent vacancy is reached and that it not be cancelled if more than 10 percent of the tenants are on SMR's. We also discovered from these comments that the regulation did not provide adequate direction for transitioning out of an SMR.

The Agency decided to have the transition begin when the vacancy rate drops and is sustained at the below-10 percent level for a 6-month period. For simplicity's sake and to keep the rents for new tenants consistent with those of existing tenants, the rent itself and not the individual tenant contribution will be the basis for the increase. It is also made clear that the SMR is not completely terminated until the market rent is again set at the note rate. This is important to know because return to owner is not available to the owner until the SMR is completely terminated. It was felt that following the other suggestions could keep an SMR in place indefinitely even when no longer needed.

A substantial number of commenters suggested that FmHA rents may be inflated. Several commenters sent lists of comparisons showing that FmHA basic rents, in many cases, approached market rents in their communities. Since the major variable in costs between FmHA and non-FmHA projects should be interest rates, the costs for some FmHA projects are apparently inflated. If conventional owners cut costs, forego profit, and/or invest additional funds to keep their units marketable, FmHA borrowers should be willing to do so with FmHA units.

The Agency felt that many commenters thought the maximum rents were set arbitrarily, losing sight of the fact that it was set at the note rate of interest at which loans were made. Proposals included establishing no minimum rent, a minimum rent set at 1 percent interest rate, and charging no overage for any tenant at any FmHA project. Commenters are reminded that the market rent is based on the note rate of interest for the loan that funded the project. This interest rate, although subsidized for needy tenants, should allow for a realistic market rental rate at which projects can operate and the FmHA loan can be repaid, for all but the most distressed projects.

The Agency, therefore, adds the provision that budgeted O&M be set at a minimum before a project qualifies for an SMR. However, the reserve account and FmHA payments, as reduced by the interest credit agreement, should be maintained in accordance with the loan agreement/resolution.

Several of the comments indicated that a brief explanation of how an SMR is established would be helpful. To begin, projects eligible for an SMR have two rents, the minimum, or "basic rent" which pays for project expenses and repays the FmHA loan at a 1 percent subsidized rate; and the maximum or "market rent" which pays project expenses and repays the FmHA loan at its full note or unsubsidized rate. When an SMR is established, the maximum or

market rent is lowered to be comparable to rents in the local community. The basic rent for the project will be calculated in the same manner as when an SMR is not in effect except that operations and maintenance costs will be held to an absolute minimum and no return to owner will be budgeted. Budgeted vacancy rates are to remain unchanged. In accordance, to FmHA policy, the vacancy and contingency allowance on the project budget should generally not exceed 10 percent under any circumstances. In other words, the SMR should anticipate that occupancy rates will be increased to at least 90 percent.

To establish an SMR, three key changes to the budget are required: (a) Market rents are set at the SMR level as determined by comparable rents in the community; (b) the maximum amount of the FmHA payment to be collected at the SMR level is determined as described in item 3 of the example below, and (c) the interest rate that corresponds to the funds available to make the FmHA payment is calculated.

For example:

1. Project with 48 units before an SMR:

Rents	FmHA Payment
Basic (at 1% subsidized rate) $225	$33,840
Market (at 11.875% note rate) $441	$157,772

2. The market rent is set at an SMR level by review and analysis of rents in the community, the SMR in this case is $325.

3. The FmHA payment to be entered on the project budget is determined as follows:

a. Find the difference between SMR and Basic Rent–$100

b. Multiply the difference by the number of units–$4,800

c. Multiply the amount for twelve months–$57,600

d. Add the amount to the FmHA payment at Basic rent–$91,440

4. Using a business calculator, determine the interest rate that supports the SMR rent.

5. Project with an SMR:

Rents	FmHA Payment
Basic (at 1% subsidized rate) $225	$33,840
SMR (at 6.65% SMR rate) $325	$91,440

There were comments that new projects designed for a different market (e.g. elderly vs. family) should continue to be funded in communities in which SMR's are granted. However, attempting to rent to all potential tenants is an avenue that should have been explored in any project with substantial vacancies. One commenter suggested a comment period during which applicants for other housing in the area could comment on a proposed SMR. The Agency does not believe this is necessary since a good market study should reveal these problems. An SMR should only be approved when there is clearly no market for the units at the current rents. The regulation is revised to include a provision that the District Director review any current market studies on file to determine if conflicting evidence is available. Conflicts will lead to close scrutiny of both requests.

Several commentors felt we should state more clearly that tenants already living in the project would receive the benefits of the SMR. The regulations now state that the new rate will be for the entire project.

Several commenters felt that use of the entire 2 percent contribution prior to implementation of the SMR would leave the project in a financially precarious position. In recognition of this comment, we revised this provision, to now allow a balance in the general operating account (which includes any remaining 2 percent initial operating capital) to an amount sufficient to provide for 3 months (25 percent) budgeted O&M expenses; or 1.2 months (10 percent) if no initial operating capital remains. It is important to note that any 2 percent money does not have to be separately identified and is to be included in unrestricted cash on a borrower's annual budget report to FmHA.

There were comments that borrowers should not have to forego their return to owner during an SMR and that they should not be asked to contribute any of their own funds to the project. These are actions that any owner of a distressed conventional project would take. The Agency expects borrowers to take responsbility for financial management of their projects. Incentives such as these are needed to induce borrowers to use innovative approaches other than SMR to increase occupancy. Borrowers agreed in their loan agreement/regulations to forego their return to owner if the project was not providing sufficient funds to pay it. One commenter stated that the SMR costs the Government nothing. This is not true since with an SMR the Government is paying additional subsidy through the interest credit program.

Two commenters, on the other hand, felt that foregone interest should be recaptured at sale of the project. The Agency decided not to require this because the requirements for obtaining SMR's are so restrictive that there would be no alternative left to the borrower. While it's true that an SMR is a potential expense to the Government, an SMR is less expensive than leaving the units vacant. The SMR will bring tenants into otherwise vacant units, who will be paying some overage.

One comment suggested that tenants should be allowed to pay less than 30 percent of income if 30 percent would set the rent too high to qualify for tax credit. The Agency cannot establish regulations to meet the financial needs of borrowers, other than within the program parameters. The SMR is intended to address vacancy problems of troubled projects, not resolve questions of eligibility for tax credits as provided by sec. 42 of the Internal Revenue Code.

We were asked to define "community" and "comparable" as they are not clearly understood. Definitions of "community" and "market area" are referenced to paragraph 2 of Exhibit A–6 of Subpart E of Part 1944. Agency employees would be aware, by virtue of having been trained to make appraisals, that "comparable" means essentially similar or financially adjusted for disimilarities. Exhibit A–2 of Subpart E of Part 1944 of this chapter may be used to organize comparables for obtaining an SMR. If original judgments based on inappropriate comparables do not provide an SMR that correctly reflects the market situation, adjustments can be made to the SMR.

There were other suggestions which we believe did not fall within the scope of this regulation. This included issues dealing with recent tax legislation, providing additional rental assistance, better servicing of projects and changing the 30 percent rule for rent calculations.

List of Subjects in 7 CFR Part 1930

Accounting, Administrative practice and procedure, Grant programs—housing and community development, Loan programs—housing and community development, Low- and moderate-income housing—rental, Reporting and recordkeeping requirements.

Accordingly, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1930—GENERAL

1. The authority citation for Part 1930 continues to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

2. Section 1930.138 is added to read as follows:

§ 1930.138 Supervisory actions for distressed projects.

Multiple Family Housing projects experiencing high vacancy rates which could lead to project failure can apply for a special servicing market rate rent (SMR) change in accordance with paragraph X of Exhibit C of this subpart.

3. Exhibit C is amended by redesignating current paragraph X as paragraph XI and adding a new paragraph X to read as follows:

Exhibit C of Subpart C—Rent Changes

* * * * *

X. Special Servicing Market Rate Rent (SMR) Change

When a Plan II or Plan II RA RRH project is experiencing severe vacancies due to poor local market conditions, an SMR change may be implemented to attract and keep tenants who could pay more than basic rent. An SMR addresses the situation where some existing and prospective tenants are not willing to pay 30 percent of adjusted income or market rent because the rental rates would exceed those of other rental properties in the community. This action may only be taken after supervisory efforts by FmHA and management efforts by the borrower have not produced an acceptable level of occupancy. For the purposes of this paragraph, market area and community are used as defined in paragraph 2 of Exhibit A–6 of Subpart E of Part 1944.

A. *Eligibility for SMR.* Based on borrower documentation and FmHA servicing records, the District Director will prepare a written recommendation for borrower eligibility for an SMR.

1. Based on borrower documentation and District Office verification:

a. The vacancy rate was at least 15 percent for each month for the most recent 6 month period.

b. Comparable market rents in the community are lower than the previously approved FmHA market rents. Exhibit A–2 to Subpart E of Part 1944 can be used to document comparable market rents.

c. The borrower has aggressively marketed the project including the following actions:

(i) Significant outreach efforts in the community, including (but not limited to) contacts listed in the Affirmative Fair Housing Marketing Plan (AFHMP).

(ii) The borrower had obtained approval from FmHA at least 3 months earlier to rent to ineligible tenants in accordance with paragraph VI B 6 of Exhibit B of this subpart.

d. The borrower complies with FmHA regulations and encourages occupancy through good maintenance and positive relations with tenants.

e. The borrower has provided a signed statement agreeing to forego, without provision to recoup, the return on initial investment while operating with an SMR.

f. The borrower has submitted a project budget on Form FmHA 1930–7, "Statement of Budget and Cash Flow," with only minimally sufficient operation and maintenance expenses. The project budget should continue to fund other cash expenditures such as FmHA payments and the reserve account, except for the return on initial investment which the borrower has agreed to forego according to paragraph X A 1 e of this exhibit.

2. Based on Distric Office servicing actions and documentation:

a. The project has been operational for at least 24 months, except that projects obligated prior to October 1, 1986, must have been operational for at least 6 months. The National Office may make exceptions to these requirements on a case-by-case basis for extreme hardship.

b. No more than 10 percent of budgeted operation and maintenance expenses are reflected in unrestricted cash, or 25 percent if any funds remain from the 2 percent initial operating capital, and reserve account balances do not exceed required levels minus authorized withdrawals.

c. The District Director has reviewed and discussed with the borrower the feasibility of using borrower contributed funds, including advances, in accordance with paragraph XII C of Exhibit B of this subpart.

d. The District Director has reviewed and approved a project budget with only minimally sufficient operation and maintenance expenses and other expenses as specified in paragraph X A 1 f of this exhibit.

e. The District Director has reviewed any market studies or surveys received from MFH loan applicants for the market area and considered any information that may conflict with the request for an SMR.

B. *Approval of SMR.* 1. The State Director may approve the use of an SMR when the conditions listed above in paragraph X A of this exhibit are met.

2. While an SMR is in effect, no initial RRH loan may be obligated for the same market area if existing units can be used to serve the unmet need.

C. *Implementing an SMR.* 1. After the use of an SMR has been approved by the State Director, the District Director will establish an SMR for the project with the borrower.

a. The SMR will be obtained by adjusting Item 3, "FmHA Payment (Principal and Interest) Including Overage," on column 4 of Form FmHA 1930–7, to reflect a payment to FmHA amortized at an interest rate which is less than the full note rate on the borrower's promissory note. The interest rate chosen may never be less than 2 percent.

b. The interest rate of the SMR budget will be set at a level that will make project market rents comparable with community rental rates. This rate will remain constant except as provided in paragraph D of this exhibit.

2. The initial change to SMR rents or a decrease in SMR rents will be accomplished in accordance with paragraph VI B of this exhibit.

D. *Changing an SMR.* 1. An SMR may be increased or decreased whenever the local market conditions warrant, but must be reviewed at least annually.

2. An SMR must be increased by a minimum of 10 percent per year (or a higher amount if mutually agreed to by the borrower and FmHA) when the:

a. Vacancy rate drops to 10 percent or below for 6 consecutive months, or

b. The borrower does not continue to satisfy the conditions of paragraphs X A 1 c (i) and (ii), d, e, or f of this exhibit.

3. An SMR is completely terminated when the market rent is again based on the note interest rate.

4. An increase in an SMR will be accomplished in accordance with paragraph IV of this exhibit.

BILLING CODE 3410–07–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-CE-17-AD; Amdt. 39-5740]

Airworthiness Directives; Cessna Models T303, 310, 320, 335, 340, 401, 402, 404, 411, 414 and 421 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Cessna Aircraft Company Models T303, 310, 320, 335, 340, 401, 402, 404, 411, 414 and 421 Series airplanes, equipped with reciprocating engines, herein referred to as 300 and 400 Series airplanes, which requires the modification of the fuel filler ports to prevent inadvertent filling of the fuel tanks with jet fuel. The NTSB has reported six accidents or incidents where airplane misfueling was found to have contributed to these occurrences. The modification is necessary to prevent further misfueling and thereby preclude inflight engine failure.

DATES: *Effective Date:* November 2, 1987.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Cessna Aircraft Company Service Information Letter ME84–31 dated July 20, 1984, applicable to this AD may be obtained from Cessna Aircraft Company, Customer Services, Post Office Box 1521, Wichita, Kansas 67201. This information may be examined in the Rules Docket, Federal

Aviation Administration, Central Region, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Riddle, ACE-140W, Aerospace Engineer, Wichita Aircraft Certification Office, Federal Aviation Administration, 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone 316-946-4427.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring modification of the fuel filler port to prevent inadvertant filling of the fuel tanks with jet fuel on certain Cessna 300 and 400 Series airplanes equipped with reciprocating engines was published in the **Federal Register** on June 8, 1987, (52 FR 21572).

This proposal resulted from a recommendation by the NTSB reporting that there have been six accidents or incidents on Cessna 300 and 400 Series airplanes equipped with reciprocating engines in which misfueling with jet fuel was the cause. Further the board indicated that most cases of misfueling occur with light, twin-engine, piston-powered airplanes which are similar in appearance to turbine engine-powered airplanes.

In recent years, the frequency of accidents involving misfueling with jet fuel has increased significantly despite efforts of the FAA and other interested parties. On September 17, 1982, and October 5, 1984, the FAA issued two Advisory Circulars (ACs) Nos. 20-116 and 20-122, "Marking Aircraft Fuel Filler Openings with Color Decals," and "Anti-Misfueling devices: Their Availability and Uses." Both recommend methods to prevent airplane misfueling. However, the level of response to these AC's has been low considering the nature of the problem and the number of airplanes involved. Therefore, in the interest of aviation safety, the modification of the fuel filler port, recommended by the NTSB, was proposed.

Interested persons have been afforded an opportunity to comment on the proposal. Nine commenters responded. Three of these concurred with the proposal. However, one of these commenters stated that the AD should apply to all turbocharged, single engine piston powered airplanes. The FAA does not agree. Including other manufacturer's airplanes is beyond the scope of this rulemaking action. However, the FAA will consider the commenters suggestion and initiate separate rulemaking actions if appropriate.

The remaining six commenters disagreed with the proposed rule. Three of these commenters felt that the Cessna 336, 337 and P337 Models should not be included in the proposed rule since these airplanes do not resemble any other turbine powered airplanes. In addition, one commenter also objected to the inclusion of the Cessna T303, 310 and 320 Models since these models have had no misfueling accidents. The FAA agrees with the comments on the Cessna 336, 337 and P337 airplanes. Therefore, the proposed rule has been changed by removing these airplanes from the list of those affected. The FAA does not agree with the commenter regarding the T303, 310 and 320 airplanes. There has been one instance of a T310Q airplane being misfueled with Jet-A fuel. The FAA has determined that these models could be mistaken for a turbine powered airplane and therefore, the proposed rule has not been changed in this regard.

Another commenter felt that his 310 did not look like a turbo-prop and should not be affected. He also suggested that the filler ports of turbine powered airplanes be changed to unique configuration that only a matching nozzle would fit.

As stated above the Model 310 can be mistaken for a turbine powered airplane and be misfueled. Further, changing the filler ports on turbine powered airplanes and changing the turbine fuel nozzles would still require a change to the fuel filler ports of piston powered airplanes to prevent the redesigned turbine fuel nozzle from fitting into the fuel port of a piston powered airplane. The FAA has determined that proposed rule is the most economical way to prevent airplane misfueling. Two commenters felt that training of the line personnel doing the refueling is the only acceptable method to prevent misfueling. The FAA agrees that education and training would certainly help in preventing misfueling. However, promulgating requirements with respect to those areas is beyond the scope of this rulemaking. The FAA, has determined that the proposed rule is the best means for preventing misfueling at this time.

One commenter questioned the estimated cost to modify the affected airplanes as compared to the benefit obtained from that modification. The estimated cost was based upon the information currently available in the manufacturers service bulletin. The benefits obtained from this modification is a reduction in the number of accidents involving misfueling with jet fuel. The frequency of this type of accident has increased significantly in recent years. Therefore, in the interest of aviation safety the FAA proposed modification of the fuel filler ports.

Accordingly, the proposal is adopted with the changes noted above. The FAA has determined there are approximately 12,112 airplanes affected by the AD. The estimated cost of modifying these airplanes would depend on the number of fuel filler caps on the airplane. Many of the above airplanes have optional wing or wing locker tanks. The estimated cost to modify the Cessna fleet is $4,933,286. This cost assumes that the optional fuel tanks are installed on those airplanes on which they were offered. The average cost per airplane is $350.

The cost of complying with AD therefore will not have a significant financial impact on any small entities owning affected airplanes.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291, (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation has been prepared for this action and has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Cessna: Applies to the following airplanes equipped with reciprocating engines certificated in any category:

Model and Serial Number

T303
T30300001 thru T30300301
310 thru 310R

310–39032 thru 310R2140
320 thru 320F
320–0001 thru 320F0045
335
335–0001 thru 335–0065
340 thru 340A
340–0001 thru 340A1543
401 thru 401B
401–0001 thru 401B0221
402 thru 402C
402–0001 thru 402C0653
404
404–0001 thru 404–0859
411 thru 411A
411–0001 thru 411A0300
414 thru 414A
414–0001 thru 414A0858
421 thru 421C
421–0001 thru 421C1257

Compliance: Required as indicated in the body of the AD, unless already accomplished.

To preclude misfueling of the airplane resulting in engine failure, accomplish the following:

(a) Within the next 12 calendar months after the effective date of this AD, unless already accomplished, modify all fuel filler opening(s) in accordance with the instructions contained in Cessna Service Information Letter ME84–31 dated July 20, 1984.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(c) In accordance with FAR Part 43, Appendix A, Item (c) 29, the modifications required by this AD (except installation of the SK303–29 kit) are preventative maintenance and may be performed by the holder of a pilot certificate issued under FAR Part 61 on airplanes owned or operated by him subject to the limitations of FAR 43.3(g). The maintenance record entries required by FAR 43.9 and FAR 91.173 must be accomplished.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Wichita Aircraft Certification Office, Federal Aviation Administration, 1801 Airport Road, Room 100, Wichita, Kansas 67209.

All persons affected by this directive may obtain copies of the document(s) referred to herein upon request to Cessna Aircraft Company, Customer Services, Post Office Box 1521, Wichita, Kansas 67201; or the FAA, Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on November 2, 1987.

Issued in Kansas City, Missouri, on September 17, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

[Rel. No. IA–1083; File No. S7–24–86]

Financial and Disciplinary Information That Investment Advisers Must Disclose to Clients

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of rule.

SUMMARY: The Commission is adopting a rule under the Investment Advisers Act of 1940 to codify an investment adviser's fiduciary obligation to disclose material financial and disciplinary information to clients. The rule sets forth the general disclosure obligation and provides guidance on disciplinary information required to be disclosed. The rule is intended to help ensure that clients receive information material to their decision whether to hire or continue to engage an adviser.

EFFECTIVE DATE: December 1, 1987.

FOR FURTHER INFORMATION CONTACT: Debra Kertzman, Attorney, or Robert E. Plaze, Special Counsel, Office of Disclosure and Adviser Regulation, (202) 272–2107, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is adopting Rule 206(4)–4 under the Investment Advisers Act of 1940 [15 U.S.C. 80b–1 *et seq.*] ("Advisers Act"). The rule, which was proposed for public comment on September 19, 1986,[1] codifies the Commission's interpretation that section 206 of the Advisers Act [15 U.S.C. 80b–6] requires (1) advisers with custody or discretionary authority over client funds or securities or who require substantial prepayment of advisory fees to disclose precarious financial conditions to clients, and (2) all advisers to disclose material disciplinary events to clients. In addition, the rule specifies certain legal or disciplinary events (referred to hereafter as "disciplinary events") involving the adviser or key advisory personnel as presumptively material. While providing guidance on the types of material disciplinary information required to be disclosed, the rule makes clear that additional disclosure may be required under the Advisers Act.

[1] Investment Advisers Act Rel. No. 1035 (September 19, 1986) [51 FR 34229 (September 26, 1986)].

Discussion

Section 206 of the Advisers Act prohibits investment advisers from engaging in fraudulent and deceptive acts and practices and provides the Commission with rulemaking authority to define and prescribe means reasonably designed to prevent such acts and practices.[2] Fraudulent and deceptive acts and practices under section 206 include the failure to disclose certain facts.[3] The Commission proposed Rule 206(4)–4 to remind advisers of their obligation to disclose to clients material facts about precarious financial conditions and certain disciplinary events, and to provide guidance on some of the disciplinary events required to be disclosed.

Thirty-one comments were received on the proposed rule.[4] Most commenters supported the general purpose of the rule. Many, however, suggested modifications to either clarify the disclosure obligation under the rule or narrow its scope. After reviewing the comments, the Commission has decided to adopt the rule with several modifications. Rule 206(4)–4, as adopted: (1) Limits the requirement to disclose precarious financial conditions to advisers with custody or discretionary authority over client funds or securities, or that require substantial prepayment of advisory fees, (2) requires all advisers to disclose material disciplinary events to clients, and (3) sets forth those disciplinary events that are presumptively material.

1. Financial Information

As proposed, paragraph (a)(1) of the rule would require all advisers to disclose to clients material facts with respect to a financial condition of the adviser that is reasonably likely to impair the adviser's ability to meet contractual commitments to clients ("precarious financial conditions").

[2] Section 206 of the Advisers Act, in relevant part, states that: It shall be unlawful for any investment adviser, by use of the mails or any means or instrumentality of interstate commerce, directly or indirectly: (1) to employ any device, scheme, or artifice to defraud any client or prospective client; (2) to engage in any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client; * * * (4) to engage in any act, practice, or course of business which is fraudulent, deceptive, or manipulative. The Commission shall, for purposes of this paragraph (4) by rules and regulations define, and prescribe means reasonably designed to prevent such acts, practices, and courses of business as are fraudulent, deceptive, or manipulative.

[3] *SEC v. Capital Gains Research Bureau*, 375 U.S. 180, 198 (1963).

[4] File No. S7–24–86 contains these public comment letters as well as a summary of comments prepared by the Commission staff.

VOL
52

2
1987
UMI

Fourteen commenters recommended limiting financial disclosures under the rule to advisers that either have custody of client assets or require substantial prepayment of advisory fees.[5] These commenters stated that an adviser's financial condition is material to a client or prospective client only when client assets or prepaid services may be jeopardized.[6]

The Commission agrees that the financial condition of all advisers may not be material to their clients and has modified the rule accordingly. As adopted, the rule requires only those advisers with custody or discretionary authority [7] over client funds or securities, or that require prepayment of advisory fees of more than $500 per client and six months or more in advance, to disclose a precarious financial condition to clients.[8] Several commenters urged the Commission not to impose this financial disclosure obligation on advisers solely because they have discretionary authority over client assets. They asserted that a client's decision whether to hire an adviser and give it discretionary authority is due primarily to the services the adviser is able to provide, rather than the adviser's financial background. The Commission believes, however, that this information is material to these clients and should be disclosed because of the risk of investment loss resulting from the disruption or discontinuance of active investment management.[9]

[5] These are the circumstances under which an adviser must include a balance sheet in Part II of its Form ADV [17 CFR 279.1]. Form ADV is the registration form for investment advisers. Part II of which specifies disclosures to clients and prospective clients required by Rule 204–3 under the Advisers Act [17 CFR 275.204–3] ("brochure rule")

[6] In addition, several of these commenters requested the Commission to clarify what constitutes a "financial condition reasonably likely to impair the adviser's ability to meet contractual commitments to clients" under the rule. Such a determination is inherently factual in nature but, as noted by two commenters, would generally include insolvency or bankruptcy.

[7] "Discretionary authority" under the rule includes both express and implied discretionary authority. *See Follansbee v. Davis, Skaggs & Co., Inc.*, 681 F.2d 673 (9th Cir. 1982); *Carras v. Burns*, 516 F.2d 215 (4th Cir. 1975).

[8] Under the rule, advisers required to disclose a precarious financial condition need only make such disclosures to those clients over whose securities they have custody or discretionary authority, or from whom they accept substantial prepayment of advisory fees, and not to other clients.

[9] The risk of investment loss is especially acute where the client's portfolio requires constant supervision because it contains volatile, high risk investments, or where clients, such as an investment company or a pension plan, must overcome legal hurdles (shareholder votes, etc.,) to replace the adviser.

2. Material Disciplinary Information

Paragraph (a)(2) of the proposed rule would require an adviser to disclose material facts about any disciplinary event material to an evaluation of the adviser's integrity or ability to meet contractual commitments to clients. Paragraph (b) of the proposed rule defined certain disciplinary events involving the adviser or its management persons and occurring within the past ten years as material.

A number of commenters urged the Commission to revise this paragraph to narrow the definition of material disciplinary events. They stated that this provision of the rule would require advisers to disclose information that they believed to be immaterial. For example, several commenters argued that the rule would require disclosure of a violation of a technical state insurance regulation by an insurance holding company parent of an adviser, although such a violation might not be material to a client's evaluation of the advisory subsidiary's integrity or ability to meet contractual commitments to clients.

Because of these commenters' concerns, the Commission has decided to substantially modify paragraph (b). As adopted, paragraph (b) creates a rebuttable presumption of materiality rather than a determination of materiality. The Commission acknowledges that there are circumstances where some of the disciplinary events set forth in paragraph (b) may not be material to clients. This may be due to differences in the size and organizational structure of an adviser, the broad range of investment-related laws, and/or the length of time which has passed since the disciplinary event occurred.

One option some commenters suggested, and the Commission considered, would be to simply codify the general duty to disclose material disciplinary events and allow case law to determine which events are material and thus required to be disclosed. However, the Commission believes that it is desirable to provide advisers with guidance in complying with their disciplinary disclosure obligation under Section 206. By creating a presumption of materiality, Rule 206(4)–4 will provide this guidance while preserving flexibility for advisers able to rebut the presumption based upon a particular fact situation. To determine whether a disciplinary event falling within the terms of paragraph (b) overcomes the presumption of materiality, an adviser should carefully weigh each of the following four factors: the distance of the entity or individual involved in the disciplinary event from the advisory function, the nature of the infraction that led to the disciplinary event, the severity of the disciplinary sanction, and the time elapsed since the date of the disciplinary event. While there may be particular instances where a single factor is dispositive, all four factors should be considered because in most instances no single factor will be controlling.

a. Pending Criminal Proceedings

Paragraph (b), as proposed, would define certain civil and criminal court actions, agency proceedings, and self-regulatory organization ("SRO") proceedings as material disciplinary events.[10] Included within the definition of material court actions were pending criminal proceedings relating generally to fraud or theft. Several commenters urged the Commission not to define pending criminal proceedings as material disciplinary events under the rule because this would, in their opinion, have the effect of imposing a penalty on the adviser before a finding of guilt is made or, if the case is ultimately dismissed or a finding of innocence is made, unfairly penalize the adviser. The rule has not been modified in this respect. The Commission believes that a pending criminal proceeding against an adviser or its management person is material and should be disclosed because it reflects upon the degree of trust and confidence clients would place in their adviser. Moreover, the requirement to disclose pending criminal proceedings is no different than the disclosure required of directors and executive officers of companies issuing securities,[11] registrants in their annual

[10] The Commission has modified the definition of "investment-related" in paragraph (d)(3) of the rule to conform to the 1986 amendments to section 203(e)(2)(B) of the Advisers Act [15 U.S.C. 80b-3(e)(2)]. Pub. L. 99–571, section 101, 100 Stat. 3208, 3220 (1986). The amendments expanded the circumstances under which an adviser could be disqualified from registration to include felony or misdemeanor convictions involving government securities brokers or dealers or entities or persons required to register under the Commodity Exchange Act [17 U.S.C. 1 *et seq.*].)

[11] *See* Item 11 of Form S–1 [17 CFR 239.11]; Item 18 of Form S–4 [17 CFR 239.25]; Item 21 of Form S–11 [17 CFR 259.18]; Item 10 of Form S–18 [17 CFR 239.28]; Item 9 of Form N–1A [17 CFR 274.11A]; Item 10 of Form N–2 [17 CFR 274.11a-1]; Item 13 of Form N–3 [17 CFR 274.11b]; Item 13 of Form N–4 [17 CFR 274.11c]; Item 6 of Form N–5 [17 CFR 274.5]; and Item 17 of Form N–8B–4 [17 CFR 274.14].

or semi-annual reports,[12] persons soliciting proxies,[13] or persons making a tender offer.[14]

b. Management Persons

Paragraph (b), as adopted, requires disclosure of disciplinary events involving the adviser or its management persons. As defined in paragraph (d), management persons include any person with the power to exercise, directly or indirectly, a controlling influence over the management or policies of an adviser or to determine the general investment advice given to clients. Seven commenters urged the Commission to narrow this definition, asserting it would include too many persons or entities not directly involved in giving investment advice, particularly in the context of a large diversified financial firm. The adoption of the presumptive materiality standard in paragraph (b) effectively limits the breadth of the definition of management person. As discussed above, the distance of the entity or person involved in the disciplinary event from the advisory function is one factor in determining whether the presumption of materiality of a disciplinary event listed under paragraph (b) may be overcome.

One commenter asked the Commission to clarify whether an adviser would have to disclose the disciplinary history of a person no longer employed or affiliated with the investment advisory firm. Under the definition of "management person," an adviser is only required to disclose the disciplinary history of persons currently employed or affiliated with it, regardless of whether the disciplinary event occurred prior to the person's employment or affiliation with the adviser.

c. Time Period

Paragraph (b) of the proposed rule would define certain disciplinary events as material unless more than ten years had elapsed from the time of the event. This ten-year period is based upon the time period specified in section 203(e)(2) of the Advisers Act [15 U.S.C. 80b-3(e)(2)][15] and Item 11 of Form ADV.[16] In the proposing release, the Commission requested comment on whether a different time period should be used, such as the five-year period specified in Item 401(f) of Regulation S-K [17 CFR 229.401(f)].[17]

Several commenters urged the Commission to reduce the time period from ten to five years. According to these commenters, reducing the time period would not eliminate the adviser's obligation to disclose disciplinary events occurring before a five-year period, because paragraph (e) of the rule states that the period specified in paragraph (b) is only a minimum disclosure requirement.

The Commission has decided to adopt the rule with a ten-year period to measure the presumptive materiality of disciplinary events. Because section 203(e)(2) of the Advisers Act reflects a congressional determination that the materiality of disciplinary events involving investment advisers extends back, at a minimum, to events occurring within a ten-year period, a ten-year period is appropriate. The length of this period is mitigated somewhat by the presumptive materiality standard in paragraph (b). As previously discussed, the amount of time that has elapsed is one factor in determining whether the presumption of materiality of a disciplinary event listed under paragraph (b) may be overcome.

Thus, under the rule, disciplinary events involving the adviser or its management person occurring within the ten-year period may, under certain circumstances, not be material to clients and would not have to be disclosed.

3. Integration with Form ADV

Finally, eight commenters recommended that the Commission integrate the disclosure required under Rule 206(4)-4 into Part II of Form ADV (the "brochure"). Use of the brochure to comply with Rule 206(4)-4 would, in their view, make compliance for registered advisers easier and less expensive than a separate disclosure document. The Commission agrees with these commenters and has added a note to Rule 206(4)-4 and an instruction to Form ADV stating that advisers may use their brochure to make the required disclosures,[18] provided that the timing of disclosure provision in paragraph (c) of Rule 206(4)-4 is satisfied.[19]

Regulatory Flexibility Act Analysis

A summary of the Initial Regulatory Flexibility Act Analysis, which the Commission prepared in accordance with 15 U.S.C. 603, regarding proposed Rule 206(4)-4 was published in Investment Advisers Act Release No. 1035. No comments were received on this analysis. The Commission has prepared a Final Regulatory Flexibility Analysis, a copy of which may be obtained by contacting Debra J. Kertzman, Esq., Division of Investment Management, Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549, (202) 272-2107.

Statutory Authority

The Commission is adopting Rule 206(4)-4 and the instruction of Form ADV under the authority set forth in sections 204, 206(4), and 211(a) of the Advisers Act [15 U.S.C. 80b-4, 80b-6(4) and 80b-11(a)].

List of Subjects in 17 CFR Parts 275 and 279

Investment adviser, Fraud, Securities.

Text of Rule

Parts 275 and 279 of Chapter II of Title 17 of the Code of Federal Regulations is amended as shown:

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

1. The authority citation for Part 275 continues to read as follows:

Authority: Sec. 203, 54 Stat. 850, as amended, 15 U.S.C. 80b-3; sec. 204, 54 Stat. 852, as amended, 15 U.S.C. 80b-4; Sec. 206A, 84 Stat. 1433, as added, 15 U.S.C. 80b-6A; sec. 211, 54 Stat. 855, as amended, 15 U.S.C. 80b-11.

2. By adding § 275.206(4)-4 as follows:

---

[12] *See* 10 of Form 10-K [17 CFR 249.310]; and sub-item 77e of Form N-SAR [17 CFR 274.101]. *Cf.* Item 11 of Form ADV [17 CFR 279.1].

[13] *See* Item 7 of Schedule 14A [17 CFR 240.14a-10]. *See also* Item 1 of Schedule 14C [17 CFR 240.14C-101] with respect to issuers transmitting information statements.

[14] *See* Item 2 of Schedule 14D-1 [17 CFR 240.14d-100].

[15] Section 203(e)(2) sets forth a list of disciplinary events involving an adviser which can be used to deny, suspend, or revoke an adviser's registration. *See also* Rule 206(4)-3(a)(1) [17 CFR 275.206(4)-3(a)(1)] which prohibits registered investment advisers from using solicitors that have been convicted during the previous ten years of any felony or misdemeanor involving conduct described in section 203(e) of the Advisers Act.

[16] The ten-year period is the minimum disclosure period for disciplinary events in Item 11 of Part I of Form ADV.

[17] Item 401(f) requires issuers to disclose material legal proceedings involving management of the issuer.

[18] One commenter suggested that the Commission allow "insolvent" advisers to give clients a balance sheet to comply with the financial disclosure requirements of Rule 206(4)-4. Under the rule, inclusion of an audited balance sheet in the brochure would not be sufficient to disclose a precarious financial condition: an affirmative statement disclosing such a condition is required.

[19] Under Rule 204-3, registered advisers are required only to offer to deliver a brochure to existing clients. In contrast, under Rule 206(4)-4 disclosure of precarious financial conditions and material disciplinary events must be made promptly to clients.

VOL 52 ISS 191 OCT 2 1987 UMI

§ 275.206(4)–4 Financial and disciplinary information that investment advisers must disclose to clients.

(a) It shall constitute a fraudulent, deceptive, or manipulative act, practice, or course of business within the meaning of section 206(4) of the Act for any investment adviser to fail to disclose to any client or prospective client all material facts with respect to:

(1) A financial condition of the adviser that is reasonably likely to impair the ability of the adviser to meet contractual commitments to clients, if the adviser has discretionary authority (express or implied) or custody over such client's funds or securities, or requires prepayment of advisory fees of more than $500 from such client, 6 months or more in advance; or

(2) A legal or disciplinary event that is material to an evaluation of the adviser's integrity or ability to meet contractual commitments to clients.

(b) It shall constitute a rebuttable presumption that the following legal or disciplinary events involving the adviser or a management person of the adviser (any of the foregoing being referred to hereafter as "person") that were not resolved in the person's favor or subsequently reversed, suspended, or vacated are material within the meaning of paragraph (a)(2) of the rule for a period of 10 years from the time of the event:

(1) A criminal or civil action in a court of competent jurisdiction in which the person—

(i) Was convicted, pleaded guilty or nolo contendere ("no contest") to a felony or misdemeanor, or is the named subject of a pending criminal proceeding (any of the foregoing referred to hereafter as "action"), and such action involved: an investment-related business; fraud, false statements, or omissions; wrongful taking of property; or bribery, forgery, counterfeiting, or extortion;

(ii) Was found to have been involved in a violation of an investment-related statute or regulation; or

(iii) Was the subject of any order, judgment, or decree permanently or temporarily enjoining the person from, or otherwise limiting the person from, engaging in any investment-related activity.

(2) Administrative proceedings before the Securities and Exchange Commission, and other federal regulatory agency or any state agency (any of the foregoing being referred to hereafter as "agency") in which the person—

(i) Was found to have caused an investment-related business to lose its authorization to do business; or

(ii) Was found to have been involved in a violation of an investment-related statute or regulation and was the subject of an order by the agency denying, suspending, or revoking the authorization of the person to act in, or barring or suspending the person's association with, an investment-related business; or otherwise significantly limiting the person's investment-related activities.

(3) Self-Regulatory Organization (SRO) proceedings in which the person—

(i) Was found to have caused an investment-related business to lose its authorization to do business; or

(ii) Was found to have been involved in a violation of the SRO's rules and was the subject of an order by the SRO barring or suspending the person from membership or from association with other members, or expelling the person from membership; fining the person more than $2,500; or otherwise significantly limiting the person's investment-related activities.

(c) The information required to be disclosed by paragraph (a) shall be disclosed to clients promptly, and to prospective clients not less than 48 hours prior to entering into any written or oral investment advisory contract, or no later than the time of entering into such contract if the client has the right to terminate the contract without penalty within five business days after entering into the contract.

(d) For purposes of this rule:

(1) "Management person" means a person with power to exercise, directly or indirectly, a controlling influence over the management or policies of an adviser which is a company or to determine the general investment advice given to clients.

(2) "Found" means determined or ascertained by adjudication or consent in a final SRO proceeding, administrative proceeding, or court action.

(3) "Investment-related" means pertaining to securities commodities, banking, insurance, or real estate (including, but not limited to, action as or being associated with a broker, dealer, investment company, investment adviser, government securities broker or dealer, municipal securities dealer, bank, savings and loan association, entity or person required to be registered under the Commodity Exchange Act [7 U.S.C. 1 *et seq.*], or fiduciary).

(4) "Involved" means acting or aiding, abetting, causing, counseling, commanding, inducing, conspiring with or failing reasonably to supervise another in doing an act.

(5) "Self-Regulatory Organization" or "SRO" means any national securities or commodities exchange, registered association, or registered clearing agency.

(e) For purposes of calculating the 10-year period during which events are presumed to be material under paragraph (b), the date of a reportable event shall be the date on which the final order, judgment, or decree was entered, or the date on which any rights of appeal from preliminary orders, judgments, or decrees lapsed.

(f) Compliance with paragraph (b) of this rule shall not relieve any investment adviser from the disclosure obligations of paragraph (a) of the rule; compliance with paragraph (a) of the rule shall not relieve any investment adviser from any other disclosure requirement under the Act, the rules and regulations thereunder, or under any other federal or state law.

Note: Registered investment advisers may disclose this information to clients and pospective clients in their "brochure," the written disclosure statement to clients under Rule 204–3 [17 CFR 275.204–3]; *provided*, that the delivery of the brochure satisfies the timing of disclosure requirements described in paragraph (c) of this rule.

PART 279—FORMS PRESCRIBED UNDER THE INVESTMENT ADVISERS ACT OF 1940

1. The authority citation for Part 279 continues to read as follows:

Authority: The Investment Advisers Act of 1940, 15 U.S.C. 80b–1, *et seq.*

2. By amending instruction 1 to Form ADV, which is described in § 279.1, by adding a new sub-paragraph.

§ 279.1 Form ADV, for Application for Registration of Investment Adviser and for Amendment to Such Registration Statement.

Instruction to Form ADV

1. This is a Uniform Form for use by investment advisers to:

* * * * *

• Comply with their obligation under SEC Rule 206(4)–4 to disclose material financial and disciplinary information to clients. When using Part II of this form to disclose this information to clients, advisers must satisfy the timing of disclosure requirements described in paragraph (c) of SEC Rule 206(4)–4. Note that SEC Rule 206(4)–4(c) requires an adviser to disclose this information promptly to clients, while SEC Rule 204–3(b) only requires an adviser to annually offer to deliver its brochure to existing clients.

* * * * *

By the Commission.
September 25, 1987.
Shirley E. Hollis,
Assistant Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2 and 284

[Docket No. RM87-34-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol

Issued: September 28, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Interim rule; order granting rehearing solely for purposes of further consideration.

SUMMARY: The Federal Energy Regulatory Commission is granting rehearing of Order No. 500 solely for the purpose of affording sufficient time to consider the numerous issues raised in the forty-four requests for rehearing which have been filed. This action does not constitute a grant or denial of rehearing, either in whole or in part.

EFFECTIVE DATE: September 28, 1987.

FOR FURTHER INFORMATION CONTACT: Richard Howe, Jr., Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8274.

SUPPLEMENTARY INFORMATION:

[Docket Nos. RM87-34-001 through RM87-34-045]

Order Granting Rehearing Solely for Purposes of Further Consideration

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G Stalon, Charles A. Trabandt and C. M. Naeve.

On August 7, 1987, the Federal Energy Regulatory Commission issued Order No. 500[1] responding on an interim basis to the decision of the United States Court of Appeals for the District of Columbia Circuit concerning Order No. 436 in *Associated Gas Distributors v. FERC.*[2] On August 28 and September 3, 4, and 8, 1987, the Commission received forty-four timely requests for rehearing of Order No. 500.

In order to afford sufficient time to consider the numerous issues raised in the rehearing requests, it is necessary to grant rehearing of Order No. 500 for the limited purpose of further consideration.

The Commission orders:

Rehearing of Order No. 500 is hereby granted for the limited purpose of further consideration. This action does not constitute a grant or denial of rehearing, either in whole or in part. As provided in § 385.713(d) of the Commission's Rules of Practice and Procedure, no answers to the requests for rehearing will be entertained by the Commission.

By the Commission.
Kenneth F. Plumb,
Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Parts 230, 633, and 635

Required Contract Provisions

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The FHWA is amending regulations pertaining to required contract provisions for Federal-aid construction contracts. The purpose of this final rule is to eliminate duplicative provisions of 23 CFR Part 633 that merely restate requirements contained in other existing regulations. This consists of removing the text of Form PR-1273, Required Contract Provisions, from the Appendix to Part 633 and amending Part 635 to include several requirements which were previously addressed only in the Appendix to Part 633. Form PR-1273 is essentially a convenient collection of contract provisions already required by regulations promulgated by the Federal Highway Administration (FHWA) and other Federal agencies. This action is intended to eliminate the need to amend the regulation through repetitive rulemaking procedures each time the form is revised to incorporate a new or amended requirement duly promulgated by the responsible agency.

EFFECTIVE DATE: This final rule is effective October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. William A. Weseman, Chief, Construction and Maintenance Division, (202) 366-0392, or Mr. Paul Brennan, Office of Chief Counsel, (202) 366-1394, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., E.T., Monday through Friday.

SUPPLEMENTARY INFORMATION: The regulations currently contained in 23 CFR Part 633, Subpart A require certain contract provisions to be incorporated in each highway construction contract that involves the expenditure of Federal funds (other than direct Federal and Appalachian construction contracts). These provisions which are set forth in Appendix A of the regulation, contain the conditions attached to participation of Federal funds and are imposed under authority administered by the FHWA and several other Federal agencies.

Since Appendix A primarly restates requirements contained in regulations promulgated by the Environmental Protection Agency, Department of Labor, Department of Transportation (DOT), or Office of Management and Budget (OMB), the FHWA has determined that it is an unnecessary procedural burden to revise 23 CFR Part 633 by rulemaking whenever the substantive regulations are revised or amended by the responsible agencies. In order to reduce this paperwork burden and to eliminate the redundancy of regulations, Appendix A, Required Contract Provisions, is being removed from Title 23 of the CFR.

To ensure that all conditions of Federal-aid contracts continue to be authorized pursuant to regulation, it is necessary to amend 23 CFR Part 635 to include the following existing requirements which were previously addressed only in 23 CFR Part 633 and Appendix A: provisions for termination of contract, provisions for subcontracting, provisions for final certification of a project concerning wages and labor classifications, and provisions for record of materials, supplies, and labor. Relative to the record of material, supplies, and labor, the FHWA is also increasing the reporting threshold for the submission of Form PR-47, "Statement of Materials and Labor Used by Contractor of Highway Construction Involving Federal Funds" from $500,000 to $1,000,000 for final construction cost for roadway and bridge projects. This change to the reporting threshold will reduce the burden of data collection on contractors and result in only minor changes in the reported construction usage factors.

In the future, the Required Contract Provisions, presently designated as Form PR-1273, will be redesignated as Form FHWA-1273 and distributed periodically through FHWA's division offices located in each State. This process will keep the contract

VOL 52 ISS 191 OC 2 1987 UMI

provisions current with the underlying regulatory requirements.

The following table sets forth the source regulation for each provision contained within redesignated Form FHWA–1273.

Provision table	Regulation reference
1. Nondiscrimination	41 CFR Part 60 49 CFR Part 21
2. Nonsegregated Facilities	41 CFR Part 41
3. Payment of Predetermined Minimum Wage	29 CFR Parts 1, 3, and 5
4. Statement and Payrolls	29 CFR Parts 3 and 5
5. Record of Materials, Supplies, and Labor	23 CFR Part 635
6. Subletting or Assigning the Contract	23 CFR Part 635
7. Safety: Accident Prevention	23 CFR Part 635
8. False Statements Concerning Highway Projects	23 CFR Part 635
9. Implementation of Clear Air Act and Federal Water Pollution Control Act	40 CFR Part 15

The FHWA has determined that this action does not contain a major rule under Executive Order 12291 or a significant regulation under the regulatory policies and procedures of the DOT. It is anticipated that the economic impact of this rulemaking will be minimal, since the FHWA is merely eliminating duplicative procedures and is making no substantive changes. The procedural and editorial revisions in this document will eliminate repetitive efforts and simplify the contract solicitation and award process. Accordingly, a separate regulatory evaluation is not required.

For the foregoing reasons and under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities.

With regard to the information collection requirements contained in this regulation, the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq., Pub. L. 96–511) has assigned the control numbers of 1215–0140 and 2125–0033. These recordkeeping requirements are mainly attributable to requirements imposed by regulations issued by the Department of Labor and the Department of Transportation (Office of the Secretary).

The procedural elimination and editorial revisions impose no additional burdens on the States or the construction industry. For these reasons, the FHWA finds good cause to make this regulation effective without prior notice and opportunity for comment and without a 30-day delay in effective date. Furthermore, neither a general notice of proposed rulemaking nor a 30-day delay in effective date is required under the Administrative Procedure Act because the matters affected relate to grants, benefits, or contracts pursuant to 5 U.S.C. 553(a)(2). Accordingly, this regulation is effective upon publication.

List of Subjects in 23 CFR Parts 230, 633, and 635

Grant programs—transportation, Government contracts, Highways and roads, Reporting requirements.

Issued on: September 18, 1987.

R.A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

The FHWA is amending 23 CFR Parts 230, 633, and 635 as follows:

1. In consideration of the foregoing, the FHWA hereby amends Chapter I of Title 23, Code of Federal Regulations, Part 633, by revising Subpart A, consisting of §§ 633.101–633.104, as set forth below.

PART 633—REQUIRED CONTRACT PROVISIONS

Subpart A—Federal-Aid Construction Contracts (Other Than Appalachian Contracts)

Sec.

633.101 Purpose.
633.102 Applicability.
633.103 Regulatory authority.
633.104 Availability.

Authority: 23 U.S.C. 114 and 315; 49 CFR 1.48.

Subpart A—Federal-Aid Construction Contracts (Other Than Appalachian Contract)

§ 633.101 Purpose.

To prescribe for Federal-aid highway proposals and construction contracts the method for inclusion of required contract provisions of existing regulations which cover employment, nonsegregated facilities, record of materials and supplies, subletting or assigning the contract, safety, false statements concerning highway projects, termination of a contract, and implementation of the Clean Air Act and the Federal Water Pollution Control Act, and other provisions as shall from time-to-time be required by law and regulation as conditions of Federal assistance.

§ 633.102 Applicability.

(a) The required contract provisions and the required proposal notices apply to all Federal-aid construction contracts other than Appalachian construction contracts.

(b) Form FHWA–1273, "Required Contract Provisions, Federal-aid Construction Contracts," contains required contract provisions and required proposal notices that are required by regulations promulgated by the FHWA or other Federal agencies. The required contract provisions of Form FHWA–1273 shall be physically incorporated in each Federal-aid highway construction contract other than Appalachian construction contracts (see § 633.104 for availability of form).

(c) For contracts authorized under certification acceptance procedures, an alternate format for inclusion of required contract provisions may be used pursuant to 23 CFR Part 640.

(d) The required contract provisions contained in Form FHWA–1273 shall apply to all work performed on the contract by the contractor's own organization and to all work performed on the contract by piecework, station work, or by subcontract.

(e) The contractor shall insert in each subcontract, except as excluded by law or regulation, the required contract provisions contained in Form FHWA–1273 and further require their inclusion in any lower tier subcontract that may in turn be made. The required contract provisions of Form FHWA–1273 shall not be incorporated by reference in any case. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the requirements contained in the provisions of Form FHWA–1273.

(f) The State highway agency (SHA) shall include the notices concerning certification of nonsegregated facilities and implementation of the Clean Air Act and Federal Water Pollution Control Act, pursuant to 40 CFR Part 15, in all bidding proposals for Federal-aid highway construction projects. As the notices are reproduced in Form FHWA–1273, the SHA may include Form FHWA–1273 in its entirety to meet this requirement.

§ 633.103 Regulatory authority.

All required contract provisions contained in Form FHWA–1273 are requirements of regulations promulgated by the FHWA or other Federal agencies. The authority for each provision will be cited in the text of Form FHWA–1273.

§ 633.104 Availability.

(a) Form FHWA–1273 will be maintained by the FHWA and as regulatory revisions occur, the form will be updated.

(b) Current copies of Form FHWA–1273, Required Contract Provisions, will be made available to the SHAs by the FHWA.

PART 635—CONSTRUCTION AND MAINTENANCE

Subpart A—Contract Procedures

2. The authority citation for Part 635 is revised to read as follows:

Authority: 23 U.S.C. 112, 113, 114, 117, 128 and 135; 31 U.S.C. 6506; 42 U.S.C. 3334, 4601 *et seq.*; 49 CFR 1.48(b).

3. Part 635 is amended by revising §§ 635.113 and 635.126 and by adding §§ 635.129 and 635.130 to read as follows:

§ 635.113 Subcontracting.

(a) Contracts for projects shall specify the minimum percentage of work that a contractor must perform with its own organization. This percentage shall be not less than 30 percent of the total original contract price excluding any identified specialty items. Specialty items may be performed by subcontract and the amount of any such specialty items so performed may be deducted from the total original contract price before computing the amount of work required to be performed by the contractor's own organization. The contract amount upon which the above requirement is computed includes the cost of materials and manufactured products which are to be purchased or produced by the contractor under the contract provisions.

(1) "Its own organization" shall be construed to include only workers employed and paid directly by the prime contractor and equipment owned or rented by the prime contractor, with or without operators. Such term does not include employees or equipment of a subcontractor, assignee, or agent of the prime contractor.

(2) "Specialty Items" shall be construed to be limited to work that requires highly specialized knowledge, abilities, or equipment not ordinarily available in the type of contracting organizations qualified and expected to bid on the contract as a whole and in general are to be limited to minor components of the overall contract.

(b) Upon the request of an SHA, the requirements of paragraph (a) of this section may be modified in whole or in part by the FHWA to such extent as the FHWA determines to be in the public interest.

(c) The SHA shall not permit any of the contract work to be performed under a subcontract, unless such arrangement has been authorized by the SHA in writing. Prior to authorizing a subcontract, the SHA shall assure that each subcontract is evidenced in writing and that it contains all pertinent provisions and requirements of the prime contract.

(d) To assure that all work is performed in accordance with the contract requirements, the contractor shall be required to furnish (1) a competent superintendent or supervisor who is employed by the firm, has full authority to direct performance of the work in accordance with the contract requirements, and is in charge of all construction operations (regardless of who performs the work) and (2) such other of its own organizational resources (supervision, management, and engineering services) as the SHA contracting officer determines is necessary to assure the performance of the contract.

§ 635.126 Termination and default of contract.

(a) All contracts exceeding $10,000 shall contain suitable provisions for termination by the State, including the manner by which the termination will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(b) When a Federal-aid contract is terminated by the SHA, the extent of Federal-aid participation in the contract costs, including final settlement, will depend upon the merits of the individual case. In no event will Federal funds participate in any allowance for anticipated profit on work not performed.

(c) Normal Federal-aid plans, specifications, and estimates, advertising, and award procedures are to be followed when an SHA awards the contract for completion of a defaulted or previously terminated Federal-aid contract. Under this procedure, the construction amount eligible for Federal participation on the project should not exceed either:

(1) The amount representing the payments made under the original contract plus payments made under the new contract or

(2) The amount representing what the cost would have been if the construction had been completed as contemplated by the plans and specifications under the original contract, whichever amount is the lesser.

(d) If the surety awards a contract for completion of a defaulted Federal-aid contract or completes it by some other acceptable means, the FHWA would then consider the terms of the original contract to be in effect and that the work will be completed in accordance with the approved plans and specifications included therein. No further FHWA approval or concurrence action will therefore be needed in connection with any defaulted Federal-aid contract awarded by a surety. Under this procedure, the construction amount eligible for Federal participation on the project should not exceed the amount representing what the cost would have been if the construction had been completed as contemplated by the plans and specifications under the original contract.

§ 635.129 Record of materials, supplies, and labor.

(a) The provisions in this section are required to facilitate FHWA's efforts to compile data on Federal-aid contracts for the establishment of highway construction usage factors.

(b) On all Federal-aid primary, urban, and Interstate System contracts, except those which provide solely for the installation of protective devices at railroad crossings, those which are constructed on a force account or direct labor basis, highway beautification contracts, and contracts for which the total final construction cost for roadway and bridge is less than $1,000,000 the SHA's shall require the contractor:

(1) To become familiar with the list of specific materials and supplies contained in Form FHWA–47, "Statement of Materials and Labor Used by Contractors of Highway Construction Involving Federal Funds," prior to the commencement of work under this contract;

(2) To maintain a record of the total cost of all materials and supplies purchased for and incorporate in the work, and also the quantities of those specific materials and supplies listed on Form FHWA–47, and in the units shown;

(3) To furnish, upon the completion of the contract, to the SHA on Form FHWA–47 together with the data required in paragraph (b)(2) of this section relative to materials and supplies a final labor summary for all contract work indicating the total hours worked and the total amount earned.

(c) Upon receipt from the contractor, the SHA shall promptly transmit the Form FHWA–47 to the Division

BEST COPY AVAILABLE

VOL 52 ISS 191 OCT 2 1987 UMI

Administrator in accordance with the instructions printed in the form.

(Approved by the Office of Management and Budget under control number 2125–0033)

§ 635.130 Payroll, weekly statement, and final labor certificate.

(a) For all projects, copies of payrolls and statements of wages paid, filed with the State as set forth in the required contract provisions for the project, are to be retained by the SHA for the period set forth in 23 CFR Part 17 for review as needed by the FHWA, the Department of Labor, the General Accounting Office, or other agencies.

(b) Upon completion of the contract, the contractor shall submit to the SHA contracting officer, for transmission to the FHWA with the voucher for final payment for any work performed under the contract, a certificate concerning wages and classifications for laborers, mechanics, watchmen, and guards employed on the project, in the following form:

The undersigned contractor on

_____

(Project No.)

hereby certifies that all laborers, mechanics, apprentices, trainees, watchmen, and guards directly employed or employed by any subcontractor performing work under the contract on the project have been paid wages at rates not less than those required by the contract provisions, and that the work performed by each such laborer, mechanic, apprentice, trainee, watchmen, or guard conformed to the classifications set forth in the contract or training program provisions applicable to the wage rate paid.

Signature and title: _____

(Approved by the Office of Management and Budget under control number 1215–0140)

Technical Amendment

Due to the removal of Form PR–1273 from 23 CFR Part 633, Subpart A, Appendix A, and redesignation of the form as Form FHWA–1273, it is necessary to make a minor technical correction to the footnote in another part of Title 23, CFR, as follows:

PART 230—[AMENDED]

4. The authority citation for 23 CFR Part 230 continues to read as follows:

Authority: 23 U.S.C. 140 and 315; E.O. 11246; 49 CFR 1.48(b)(24), unless otherwise noted.

§ 230.204 [Amended]

5. Part 230, Subpart B is amended by revising footnote number one in § 230.204 to read as follows:

[1] Form FHWA–1273 is available for inspection and copying at the locations given in 49 CFR Part 7, Appendix D, under Document Inspection Facilities and at all State highway agencies.

[FR Doc. 87–22527 Filed 10–1–87; 8:45 am]

BILLING CODE 4910–22–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 936

Surface Mining Control and Reclamation Act; Return of Full Regulatory Authority to the State of Oklahoma

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: In accordance with the provisions of 30 CFR 936.19, OSMRE is announcing the Director's decision to terminate direct Federal enforcement of the Oklahoma permanent regulatory program, hereinafter referred to as the Oklahoma program, and to return full authority to the State of Oklahoma. Since Oklahoma has met the requirements for restoration of full authority, this notice also amends 30 CFR Part 936 to delete those portions which address direct Federal enforcement of parts of the State program, the remedial actions required of the State to regain full authority and the requirements and procedures for terminating direct Federal enforcement.

EFFECTIVE DATE: October 2, 1987.

ADDRESSES: Copies of the Director's decision and the administrative record documents referred to in this notice are available for public inspection and copying during regular business hours at:

Office of Surface Mining Reclamation and Enforcement, Room 5131, 1100 "L" Street NW., Washington, DC 20240, Telephone: (202) 343–5492.

Office of Surface Mining Reclamation and Enforcement, Tulsa Field Office, 5100 E. Skelly Drive, Suite 550, Tulsa, OK 74135, Telephone: (918) 581–6430.

Oklahoma Department of Mines, Suite 107, 4040 N. Lincoln, Oklahoma City, OK 73105, Telephone: (405) 521–3659.

FOR FURTHER INFORMATION CONTACT: Jack Carson, (918) 581–6430.

SUPPLEMENTARY INFORMATION:

I. Background

On January 19, 1981, the State of Oklahoma received conditional approval of its permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). On March 10, 1983, the Director of OSMRE notified the Governor of Oklahoma that OSMRE had reason to believe that serious problems existed in the implementation of Oklahoma's approved regulatory program. After a public hearing and opportunity for public comment, the Director found that the Oklahoma Department of Mines (ODM) was not adequately implementing certain aspects of its approved program. On April 12, 1984, the Director of OSMRE, in accordance with the provisions of 30 CFR 733.12(f), announced his decision, effective April 30, 1984, to institute direct Federal enforcement of those parts of Oklahoma's program that the State had not adequately enforced and to restrict funding of the State's abandoned mine lands reclamation (AMLR) program until regulatory program improvements were made (49 FR 14674). The Director also outlined the process by which the State could regain full authority for its inspection and enforcement program.

On May 15, 1985, Oklahoma submitted a permitting plan and inspection and enforcement plan in partial satisfaction of these requirements (Administrative Record No. OK–666). After considering these documents, the progress made by the State in resolving other deficiencies, and accomplishing the remedial measures required in 30 CFR 936.18, and comments received from the public, the Director decided to initiate a phased return of inspection and enforcement authority to the State.

In the December 2, 1985, **Federal Register** announcing this decision, as codified in 30 CFR 936.17, 936.18, and 936.19, the Director established requirements and a schedule for full resumption of program authority by the State of Oklahoma and withdrew restrictions on the AMLR program (50 FR 49376). The Director based his decision, in part, on the agreement of ODM to officially submit detailed information on its policies, procedures, guidelines and forms, and on its plans and commitments to address the backlog of bond forfeiture actions and injunctive relief proceedings. As specified in 30 CFR 936.17(b), upon satisfactory submission of the above items, OSMRE agreed to return inspection and enforcement authority to ODM, for all mines where mining had

been completed or the sites had been abandoned and no further mining was intended.

ODM also agreed to reevaluate and revise permits for active and temporarily closed operations with emphasis on relevant permitting deficiencies identified in the OSMRE 1985 Oklahoma State Program Annual Evaluation Report and on adequancy of bond amounts. OSMRE required ODM to submit quarterly reports updating the State's progress in these and other areas.

As set forth in 30 CFR 936.17(c), OSMRE agreed to return inspection and enforcement authority for active and temporarily inactive operations on an individual permit basis upon ODM's affirmative demonstration that the reevaluated permit, including the reclamation bond, was in compliance with the approved program.

OSMRE continued to be responsible for outstanding Federal enforcement actions, including necessary follow-up inspections on those operations for which inspection and enforcement authority had been returned to ODM.

II. Director's Findings on Current Status of Required Remedial Actions

The regulation at 30 CFR 936.19 requires the Director to return full program authority to Oklahoma and to terminate procedures initiated under 30 CFR 733.12 when he determines that the state has satisfied the remedial action requirements of 30 CFR 936.18(a-f). The Director has reviewed the current status of Oklahoma's remedial actions and makes the following findings.

1. Remedial Action No. 1 (30 CFR 936.18(a))

To minimize the potential for confusion and misunderstanding about ODM's Permitting and Inspection and Enforcemet Plans during the resumption of authority, ODM was required to identify or provide to OSMRE, by December 16, 1985, copies of policy statements, guidelines, procedures, and forms that were then in use; policy statements, guidelines, procedures, and forms that were changed since submission of the plans; and policy statements, guidelines, procedures, and forms that were being proposed, including time frames for projected implementation.

On May 15, 1985, ODM submitted a detailed Permitting Plan consisting of permitting processes, procedural changes relating to permitting and bonding, staff changes, and training procedures (Administrative Record No. OK–666), which it subsequently updated on June 24, 1985 (Administrative Record No. OK–670). ODM simultaneously submitted an Inspection and Enforcement Plan (Administrative Record No. OK–671) with the detailed policy statements, guidelines, procedures, and forms required to implement Oklahoma's program. On December 24, 1985, ODM submitted further information pertaining to plans, policy statements, guidelines, procedures, and forms for permitting, bond forfeiture, and inspection and enforcement activities (Administrative Record No. OK–723).

Following a detailed review, the Director finds the documents submitted to OSMRE on May 15, 1985, June 24, 1985, and December 24, 1985, are sufficiently comprehensive to enable ODM personnel to implement the inspection and enforcement requirements of the approved program, review permit applications in accordance with all approved program procedures, and make calculations of bond amounts and bond release determinations in accordance with approved program procedures.

2. Remedial Action No. 2 (30 CFR 936.18(b))

ODM was required to prepare and provide to OSMRE, by December 16, 1985, lists identifying the current backlog of bond forfeiture actions and of injunctive relief proceedings regarding State-issued violations and a plan including necessary commitments from the Attorney General's office as to how Oklahoma intended to address this backlog.

On December 24, 1985, ODM submitted lists identifying the backlog of bond forfeiture actions and injunctive relief proceedings regarding State-issued violations and plans for reducing the backlog of bond forfeiture and injunctive relief cases (Administrative Record No. OK–723). A revised plan specifying the procedures for ODM and the Attorney General's office to address the backlog of bond forfeiture actions and injunctive relief proceedings was submitted to OSMRE on August 13, 1987 (Administrative Record No. OK–817).

OSMRE's most recent review of State bond forfeiture efforts, as conducted for the 1987 Oklahoma State Program Annual Evaluation Report, found that, although there are forfeited bonds from previous years awaiting collection, the number of bonds collected and forfeiture actions initiated during 1986 and 1987 represents a significant improvement by ODM (Administrative Record No. OK–822).

Therefore, based on the documents provided to OSMRE, the progress made in collection of forfeited bonds and the results of the annual program evaluation, the Director finds that ODM has adequate capability to effectively pursue collection of forfeited bonds and to seek and pursue relief.

3. Remedial Action No. 3 (30 CFR 936.18(c))

ODM was required to carry out permitting and bonding processes in accordance with the Permitting Plan and the approved Oklahoma program. Specifically ODM was required to implement procedures to calculate and set bonds sufficient to cover the cost of third-party reclamation; process bond forfeiture actions in a timely manner; assure against after-the-fact revisions to permits; prevent issuance of permits to operators with outstanding enforcement actions or unpaid Federal reclamation fees; and assure against inappropriate incidental boundary changes.

On December 24, 1985, ODM submitting plans (Administrative Record No. OK–723) that outlined procedures to correct the problems listed above. OSMRE has monitored implementation of the bond calculation procedures and the 1987 data indicate that bond amounts and procedures are adequate. ODM has submitted reports every 90 days outlining the progress in bond forfeitures, which is discussed under Finding No. 2 above. OSMRE reviews conducted for the 1987 Annual Evaulation Report indicate that after-the-fact revisions have been approved by Oklahoma only in cases where the revision was a more appropriate action than on-the-ground correction (Administrative Record No. OK–822). OSMRE has monitored the State's progress in screening applicants for outstanding violations and unpaid Federal reclamation fees, and no permits have been issued to such applicants. ODM has revised its policy and procedures governing incidental boundary revisions to set appropriate limits on incidental boundary changes.

Therefore, the Director finds that the Permitting Plan and the approved State program are being followed, that the specific permitting and bonding problems listed above have been corrected, and that ODM has met the requirements of Remedial Action No. 3.

4. Remedial Action No. 4 (30 CFR 936.18(d))

ODM was required to reevaluate and revise permits for active and temporarily closed operations with emphasis being placed on those relevant permitting deficiencies identified in the 1985 Annual Evaluation Report and those operations that had not received a

VOL 52 ISS 191 OC 2 1987 UMI

permanent program permit. After reevaluation, ODM was to require additional reclamation bond for those active and temporarily closed operations that were found to be underbonded.

ODM has reevaluated the 40 permitted operations, which OSMRE and ODM agreed were in need of review. ODM required permittees to update the permits and correct the deficiencies identified in the reevaluation. ODM then prepared new written findings for each of the 40 permits. Upon review and acceptance of each reevaluated permit, OSMRE returned inspection and enforcement authority for that particular permit to ODM, as provided in 30 CFR 936.17(c).

Two of the 40 permits were found to have residual reclamation issues sufficiently serious to justify continued OSMRE involvement. However, because mining has been completed on both of these operations, on August 25, 1987, OSMRE and ODM executed a written agreement to return inspection and enforcement authority to ODM and work cooperatively to achieve adequate reclamation (Administrative Record OK–820).

Therefore, the Director finds that the State has corrected or is in the process of correcting the permitting deficiencies on the existing active and temporarily closed operations and that this action satisfies the requirements of Remedial Action No. 4. The State now has resumed inspection and enforcement authority for all individual permits as described in 30 CFR 936.18(c).

5. Remedial Action No. 5 (30 CFR 936.18(e))

ODM was required to conduct joint inspections with OSMRE inspectors on a monthly basis for the first 3 months (one complete inspection and two partial inspections) on those permits described in 30 CFR 936.17(c) for which inspection and enforcement authority had been returned. Beginning August 1, 1986, with the return of authority of the first permits and continuing as permits were returned, ODM has conducted joint inspections with OSMRE inspectors on a monthly basis for the first 3 months.

Therefore, the Director finds that ODM has met the requirements of Remedial Action No. 5.

6. Remedial Action No. 6 (30 CFR 936.18(f))

ODM was required to submit quarterly reports to OSMRE showing State activities in permitting, setting bond amounts, bond releases and processing of petitions to designate lands unsuitable for surface coal mining.

ODM began submitting quarterly reports to OSMRE in November 1984, and has continued to provide an updated report every three months. The reports document the State's progress in (1) reevaluating existing permits, including bond adequacy, (2) reevaluating bond release actions since August 10, 1982, (3) notifying operators of additional permit application and/or bond information requirements, (4) processing applications for new permits or permit revisions, and (5) processing petitions to designate lands as unsuitable for surface coal mining.

Therefore, the Director finds that ODM has satisfied the reporting requirements of Remedial Action No. 6.

III. Director's Decision

After a review of all available information on ODM's implementation of the Oklahoma program, including policies, procedures, guidelines, forms and plans; the results of OSMRE's oversight activities; and ODM's periodic progress reports, the Director has determined that Oklahoma has sufficiently addressed and corrected the problems identified in the State's implementation of its program and has demonstrated that it has resources, capability, policy, procedures and commitment necessary to assure proper implementation of the program. As discussed in the section of this notice entitled "Director's Findings on Current Status of Required Remedial Actions", the State of Oklahoma has met the requirements specified in 30 CFR 936.18. Therefore, in accordance with 30 CFR 936.19, the Director hereby returns full program authority to Oklahoma and terminates the procedures initiated under 30 CFR 733.12 (49 FR 14674). However, as specified by 30 CFR 843.1, OSMRE will continue to be responsible for any outstanding Federal enforcement actions, including any necessary followup inspections.

IV. Procedural Determinations

1. Compliance with the National Environmental Policy Act

The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a regulatory impact analysis statement and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310–05–M

DEPARTMENT OF THE TREASURY

Office of Revenue Sharing

31 CFR Part 51

Wind-Down of Revenue Sharing Program

AGENCY: Office of Revenue Sharing, Treasury.

ACTION: Interim rule.

SUMMARY: In view of the repeal of the Revenue Sharing Act and the expiration of the one year authorization of funds for the wind-down of the Office of Revenue Sharing, the regulations need amendment to reflect the disestablishment of the Office of Revenue Sharing and the termination of the Revenue Sharing Program.

EFFECTIVE DATE: October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas P. O'Malley, Director, Office of Procurement, Room 1458, 1500 Pennsylvania Ave., NW., U.S. Treasury, Washington, DC 20220 Tel.: (202) 566–2586.

SUPPLEMENTARY INFORMATION:

Background

Title XIV of the Consolidated Omnibus Budget Reconciliation Act of 1985, Pub. L. 99–272 (COBRA), provides for the repeal of the Revenue Sharing Act (31 U.S.C. 6701–6724) effective October 18, 1986. An authorization for appropriations to carry out the provisions of COBRA was provided for the fiscal year beginning October 1, 1986 and ending September 30, 1987. Accordingly, the operations of the Office of Revenue Sharing will cease on the last day of that fiscal year. Any remaining activities that need to be taken by the Department of the Treasury will be accomplished under the supervision of the Assistant Secretary of the Treasury (Management) pursuant to Treasury Order No. 101–17 (March 24, 1987).

Special Analysis

No notice of proposed rulemaking is required for interim regulations. Accordingly, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601) do not apply to this regulation. Because the regulation concerns agency organization and management, the provisions of Executive Order 12291 and the notice and delayed effective date provision of the Administrative Procedure Act (5 U.S.C. 553) do not apply.

List of Subjects in 31 CFR Part 51

Accounting, Administrative Practice and Procedure, Civil rights, Handicapped, Aged, Indians, Revenue sharing.

Kent A. Peterson,

Acting Director, Office of Revenue Sharing.

Dated: September 17, 1987.

For the reasons set forth in the preamble, 31 CFR Part 51 is amended as follows:

PART 51–FINANCIAL ASSISTANCE TO LOCAL GOVERNMENTS

1. The authority citation for Part 51 is revised to read as follows:

Authority: Sec. 14001, Consolidated Omnibus Reconciliation Act of 1985 (Pub. L. 99–272); Treasury Department Order No. 224, dated January 26, 1973, as amended, and Treasury Department Order No. 101–17, dated March 24, 1987.

2. Section 51.0 is hereby revised to read as follows:

§ 51.0 Scope and application of regulations.

The rules and regulations in this subpart are prescribed for carrying into effect the termination of the Revenue Sharing Program as required by Title XIV of Pub. L. 99–272. The provisions of this part are intended to be implemented by the Assistant Secretary of the Treasury (Management) in a manner that most efficiently resolves any remaining issues pertaining to the Revenue Sharing Program. Any obligations under this part of the Department of the Treasury shall be operative after September 30, 1987 only to the extent that the Assistant Secretary deems necessary to carry out the requirements of Title XIV of Pub. L. 99–272.

3. Section 51.1 is hereby revised to read as follows:

§ 51.1 Wind-down authority for revenue sharing.

The Assistant Secretary of the Treasury (Management) shall perform the functions, exercise the powers and carry out the duties vested in the Secretary of the Treasury by Title XIV of Pub. L. 99–272 with regard to the activities necessary for the termination of the Revenue Sharing Program. The authority and duties under this part of the Director of the Office of Revenue Sharing shall cease at the discretion of the Assistant Secretary pursuant to the authority provided by the Secretary of the Treasury for that purpose.

BILLING CODE 4810–25–M

VETERANS ADMINISTRATION

38 CFR Part 8

National Service Life Insurance

AGENCY: Veterans Administration.

ACTION: Final regulatory amendment.

SUMMARY: The Veterans Administration (VA) is amending its National Service Life Insurance (NSLI) policy loan regulation to provide that the rate of interest on all loans applied for on and after the effective date of this regulation may be periodically adjusted. This is a change from the VA's prior policy of issuing loans with interest rates which are fixed for the term of the loan. The variable loan rate will be based on the level of an economic indicator, and after October 1, 1988, may not be adjusted more frequently than once a year. Notice of the prevailing variable loan rate will be provided at the time a policyholder applies for a loan. Notice of changes to the loan rate will be published in the **Federal Register**, and notice of increases will be provided directly to existing variable loan borrowers. The variable loan rate established as of the effective date of this regulation is 8 percent. The interest rates on United States Government Life Insurance (USGLI) policy loans and existing fixed rate NSLI policy loans will not be changed by this admendment. Policyholders with existing 11 percent fixed rate loans will be offered the opportunity to exchange their 11 percent loans for variable rate loans.

EFFECTIVE DATE: November 2, 1987.

FOR FURTHER INFORMATION CONTACT: Paul F. Koons, Assistant Director for Insurance, Veterans Administration Regional Office and Insurance Center, P.O. Box 8079, Philadelphia, PA 19101, (215) 951–5360.

SUPPLEMENTARY INFORMATION: On pages 22350 and 22351 of the **Federal Register** of June 11, 1987, a proposed regulatory amendment was published providing that the interest rate on NSLI policy loans applied for on and after the effective date of the regulation may be periodically adjusted. Interested parties were given 30 days within which to submit written comments, suggestions, or objections regarding the proposed regulatory amendment.

Two comments to the proposed regulations were filed. The first comment was dated June 26, 1987. The commentator recommended that the ceiling to the variable loan rate be fixed at 11 percent, rather than 12 percent as provided in the regulation. The commentator stated that "this would follow past practice by effectively 'grandfathering' over 81,000 veterans who have National Service Life Insurance policy loans at the 11 percent rate."

The 12 percent variable rate ceiling, which is based on recent interest rate trends in the Federal securities market, will effectively protect borrowers from excessive interest rates during periods of high inflation. Under this proposal, 11 percent borrowers have the option of switching to the variable rate, which is initially set at 8 percent, or retaining the 11 percent fixed rate. We believe that most borrowers will recognize the advantages of the variable rate and will elect this option. Nonetheless, borrowers with 11 percent loans are provided the option of retaining those loans and thus assuring that their loan interest rate will never be increased. In

this way; the interests of existing loan holders are protected under the amended regulation and no modification of the 12 percent interest rate cap is required.

The second comment was dated July 7, 1987, and supports the proposed regulation.

A rate change will be triggered by movement of the economic indicator to a level which is higher or lower than the existing rate. If a rate change is necessary, it will be made effective on the first of October following a determination that a rate change is required. The new rate will be set at the level of the economic indicator rounded down to the next whole number, unless this would result in a rate which is above 12 percent or below 5 percent. In that event, the rate would be set at the closest whole percentage within the permitted range—either 12 or 5 percent—depending on the level of the indicator. The upper and lower level rate limits are provided to protect borrowers from potentially high interest rates, while at the same time ensuring the financial integrity of the NSLI program. By tracking an economic indicator which reflects current economic conditions, the loan rate will remain consistent with other new NSLI trust fund interest earnings, thereby avoiding any significant impact on dividends to policyholders. After October 1, 1988, rate changes may not be made more frequently than once a year.

The Administrator hereby certifies that this final regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this final regulatory amendment is, therefore, exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that this rule will affect only certain NSLI policyholders. It will, therefore, have no significant direct impact on small entities in terms of compliance costs, paperwork requirements or effects on competition.

The Agency has also determined that this final regulatory amendment is nonmajor in accordance with Executive Order 12291, Federal Regulation. This regulation will not have a large effect on the economy, will not cause an increase in costs or prices, and will not otherwise have any significant adverse economic effects.

The Catalog of Federal Domestic Assistance Program Number is 64.103.

List of Subjects in 38 CFR Part 8

Life insurance, Veterans.

Approved: September 15, 1987.

Thomas K. Turnage,

Administrator.

PART 8—[AMENDED]

In 38 CFR Part 8, National Service Life Insurance, § 8.28 is revised to read as follows:

§ 8.28 Policy loans.

(a) At any time after the premiums for the first policy year have been paid and earned and before default in payment of any subsequent premium, and upon the execution of a loan agreement satisfactory to the Administrator, the United States will lend to the insured on the security of his or her National Service Life Insurance policy, any amount which will not exceed 94 percent of the reserve, and any indebtedness on the policy shall be deducted from the amount advanced on such loan. At any time before default in the payment of the premium, the loan may be repaid in full or in amounts of $5 or more. Failure to pay either the amount of the loan or the interest thereon shall not make the policy voidable unless the total indebtedness shall equal or exceed the cash value. When the amount of the indebtedness equals or exceeds the cash value, the policy shall become voidable. On loans applied for before the effective date of this regulation (November 2, 1987) and not exchanged pursuant to paragraph (b) of this section, the policy loan interest rate in effect when the loan was applied for shall not be increased for the term of the loan.

(b) Loans applied for or exchanged on and after the effective date of this regulation (November 2, 1987) shall bear interest at a rate which may be varied during the term of the loan, not more frequently than once a year, as provided by paragraphs (c) and (d) of this section. After October 1, 1988, the policy loan rate shall not be varied more frequently than once a year. Notification of the initial rate of interest on new loans will be forwarded at the time the loan is made. Policyholders with existing variable rate loans will be forwarded reasonable advance notice of any increase in the rate. Reasonable advance notice of any change in the variable loan rate will be published in the **Federal Register**. A notice pertaining to variable loans which is sent to the policyholder's last address of record will constitute sufficient evidence of notice.

(c) Subject to the provisions of paragraph (d) of this section, loan rates established pursuant to paragraph (b) of this section shall equal the yield on the Ten-Year Constant Maturities Index for U.S. Treasury Securities for the month of June of the year of calculation rounded down to the next whole percentage. Such loan rate shall be effective on the first day of October following a determination that a rate change is required, and after October 1, 1988, shall remain in effect for not less than one year after the date of establishment. The prevailing variable loan rate shall apply to all loans granted under paragraph (b) of this section.

(d) The variable loan rate is established at the rate of 8 percent percent per annum as of November 2, 1987. This rate is subject to adjustments on and after October 1, 1988, under the provisions of paragraph (b) of this section. Notwithstanding any other provisions of this section, the variable loan rate shall not exceed 12 percent or be lower than 5 percent per annum.

(Authority: 38 U.S.C. 706)

BILLING CODE 8320–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

[BERC–434–F]

Medicare Program; Standards for the Reuse of Hemodialyzer Filters and Other Dialysis Supplies

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule contains standards and conditions for safe and effective hemodialyzer reuse and reprocessing, enforceable as Medicare conditions for coverage. It incorporates by reference voluntary guidelines and standards adopted by the Association for the Advancement of Medical Instrumentation in July 1986 (i.e., "Recommended Practice for Reuse of Hemodialyzers"). In addition, the rule provides standards for reuse of dialyzer caps and prohibits reuse of transducer filters in ESRD facilities. As provided in section 9335(k) of Pub. L. 99–509, the Omnibus Budget Reconciliation Act of 1986, failure of facilities to comply with these conditions could result in suspension of payment or removal of the facility from coverage under the Medicare program.

EFFECTIVE DATES: With the exception of recordkeeping and reporting requirements listed in §§ 405.2136(b), 405.2138(a), 405.2139(a), and 405.2140 (b) and (c), these regulations are effective October 1, 1987. The incorporation by reference of the publication listed in the regulations is approved by the Director of the Federal Register as of October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Rita McGrath, (301) 594–6719.

SUPPLEMENTARY INFORMATION:

I. Background

A. Program Description

Section 1881 of the Social Security Act (the Act) authorizes Medicare coverage for the treatment of end-stage renal disease (ESRD) in approved facilities that provide dialysis and transplantation services to ESRD patients. Approval is granted by HCFA after a State survey agency determines that the facility is in compliance with conditions for coverage of suppliers of end-stage renal disease services.

Rules relating to certification of suppliers are found in 42 CFR Part 405, Subpart S. The decision as to whether a facility complies with a particular condition for coverage depends on the manner and degree to which the supplier satisfies the various standards within each condition. A supplier is not in compliance, if, after completion of a survey, a State survey agency determines that the supplier fails to comply with one or more of the standards within the conditions for coverage, and the deficiencies are of such character as to limit substantially the supplier's capacity to furnish adequate care or to affect adversely the health and safety of patients.

Section 1881(b) of the Act authorizes the Secretary to limit Medicare reimbursement for kidney transplantation and dialysis services to facilities meeting such requirements as may be prescribed in regulations. The requirements are set forth at 42 CFR Part 405, Subpart U-Conditions for Coverage of Suppliers of End-Stage Renal Disease (ESRD) Services. Facility compliance is determined by an on-site facility survey.

The conditions and standards prescribe the services which must be provided and the qualifications of staff who provide those services. The conditions do not specify performance standards for equipment used in dialysis, other than to require its good repair, disinfection, and use in accordance with acceptable medical standards of practice.

In the process of hemodialysis, the patient's blood is cleansed of impurities by passing the blood through the filter (hemodialyzer) of a hemodialysis machine. Although the filter is labeled by manufacturers for single use, techniques exist that allow these devices to be reused. We understand that some manufacturers are modifying their labeling practices to indicate that reuse is permissible if proper procedures are used.

The multiple use of hemodialyzers has had its proponents and practitioners in this country and most parts of Europe for over 20 years. Reuse involves the cleaning, disinfecting and preparation of disposable hemodialysis devices for subsequent use for the same patient. The practice of reuse is estimated to be occurring in about 60 percent of dialysis facilities eligible under Medicare. Studies by the Public Health Service (PHS) and others in the clinical community indicate that, although the potential exists for adverse patient outcomes from reuse, when done properly reprocessing and reuse of dialyzers is safe. The new regulations are intended to provide dialysis personnel with information necessary to perform reuse adequately and to require conformance with these procedures in order to minimize patient risks.

Current regulations at 42 CFR 405.2100 through 405.2171 provide the health and safety requirements that facilities furnishing ESRD services to beneficiaries are required to meet. They do not specifically address the issue of hemodialyzer reuse, nor do they provide criteria relating to the reuse process, namely the cleaning, disinfection and preparation of disposable hemodialysis devices for subsequent use. Under our present requirements, the ESRD facility and the physician determine if devices will be reprocessed and reused by particular patients. Currently, surveyors only verify that facilities that reuse devices have a reprocessing procedure that does not jeopardize the health and safety of patients and staff.

B. New Legislation on Reuse of Dialysis Filters and Other Dialysis Supplies

Section 9335(k) of the Omnibus Budget Reconciliation Act of 1986 (OBRA '86), Pub. L. 99–509, amended section 1881(f)(7) of the Act by requiring the Secretary to establish protocols on standards and conditions for reuse of hemodialyzer filters for those facilities that voluntarily elect to reuse such filters. The protocols must be incorporated into the conditions for coverage no later than October 1, 1987. Thereafter, failure of a facility to follow such protocols may result in a finding of noncompliance as described in 42 CFR 405.1905. Consequences of noncompliance are termination of coverage under the Medicare and Medicaid programs or denial of payment for services. Section 9335(k) of OBRA '86 further requires, on or after January 1, 1988, that no dialysis facility may reuse blood lines, transducer filters, caps and other dialysis supplies unless the Secretary has established protocols for their reuse.

C. Proposed Regulations

On June 17, 1987, we published in the **Federal Register**, at 52 FR 23055, a Notice of Proposed Rulemaking to solicit comments on proposed changes to the regulations. We proposed to incorporate the OBRA '86 provisions into several existing conditions and standards in our regulations (requirements for governing body of an ESRD facility, patients' rights and responsibilities, and physical environment) and to add a new condition on requirements for reuse of dialyzers and other dialysis supplies. The new condition incorporates by reference the guidelines on reuse of hemodialyzers adopted by the Association for the Advancement of Medical Instrumentation (AAMI), dated July 1986.

II. Response to Public Comments

In response to our request for public comments in the **Federal Register** on June 17, 1987, we received 204 letters, of which 18 were from organizations representing patients. The remaining comments were from professional organizations, many of which represent dialysis facilities, and from health care providers and patients. The comments ranged from full support for the proposal to strong opposition. Following are a summary of comments received and our responses.

Patient Information Requirements

Comment: Numerous commenters believed that patients should not only be informed that a dialysis facility reuses hemodialyzers and other supplies, but that patients should also have the right to refuse reused supplies.

Response: These comments appear to be based on a lack of confidence in the performance of reused hemodialyzers and established procedures for cleaning and disinfecting them and other supplies for subsequent use by the same patient. As noted in the proposed rule, studies by PHS and others in the clinical community indicate that reprocessing and reuse of hemodialyzers are safe procedures when properly performed by trained staff. We believe that the regulations provide dialysis personnel with the information they need to safely

VOL 52 ISS 191 OCT 2 1987 UMI

reprocess hemodialyzers for reuse. Further, the attending physician and the medical director of the dialysis facility determine whether a reused hemodialyzer may not be in the best interest of an individual patient and take appropriate action. Patients who disagree with that determination, as patients who disagree with other aspects of their treatment, are free to seek services from another provider. Since reuse is a widely chosen option for facilities, we suggest that dialysis facilities assist patients by identifying whether there are nearby facilities that do not practice reuse of dialyzers, if the patient seeks a transfer to avoid reuse of items.

Comment: One commenter suggested that, because the attending physician may not be familiar with dialyzer reprocessing, the interdisciplinary patient care team should advise and discuss with the patient the facility's practice of reusing dialyzers.

Response: Section 405.2138(a)(4) of the proposed regulations requires that the facility fully inform the patient regarding the facility's reuse of dialysis supplies, including hemodialyzers. We do not believe it appropriate to prescribe who in the facility must advise the patient. The informing may be oral or through printed material and should identify components routinely reused. We are not requiring that patient information encompass technical aspects of dialyzer reprocessing or the reuse procedure.

Comment: One commenter objected to what the commenter perceived as regulating the contents of all printed materials issued by a dialysis facility.

Response: As explained above, it is not the intent of these regulations to control the content of printed materials, such as brochures that explain a facility's dialysis program. Facilities have considerable latitude over actual content as long as the patients are informed of reuse practices.

Comment: Commenters suggested that medical records specify whether a patient received treatment with reused dialyzyers.

Response: We agree. We do not believe that it would be an additional burden on the facility to make such an entry into each record for all patients, since facilities routinely either reuse all dialyzers or use only new ones. Further, it is our understanding that it has been accepted general practice to make such entries in the patient's medical record. We have, therefore, revised § 405.2139 to require this documentation.

Comment: Some commenters argued that each patient should receive a copy of, or have an opportunity to review in detail, a facility's hemodialyzer reuse policy and procedures manuals or a summary of policy and procedures.

Response: These regulations require that the patient be fully informed, through brochures or discussions with the physician, about the risks as well as the benefits associated with reuse of hemodialyzers and other dialysis devices. However, we believe that it would be brudensome for facilities to give each patient a copy of its policy and procedure manuals, but manuals should be available for review upon request. For a patient who wants detailed information about his or her specific treatment, including the facility's reuse procedures, we suggest that the patient request this information from his or her physician.

Inspection and Monitoring

Comment: Fifteen commenters recommended that we inspect and monitor all facilities that reuse hemodialyzers to verify that the standards on reuse are followed by the facilities.

Response: State survey agencies perform onsite inspections of dialysis facilities and monitor their compliance with the conditions of participation specified in 42 CFR Part 405 Subpart U. The requirements in these regulations are included in Part 405 Subpart U and will be added to surveys performed beginning on the effective date of these regulations.

Comment: Several commenters suggested alternatives to the requirement in AAMI standard 3.2.1, concerning dialyzer reprocessing training, that the facility's physician director establish a training course. Alternatives suggested include requiring the training be established by a physician, by an interdisciplinary group or by specially trained technical personnel.

Response: We interpret this standard to mean that the facility's physician director must assure that persons performing hemodialyzer reprocessing are adequately trained, not that he or she personally establish the program. The information to be included in the curriculum is set forth in AAMI standard 3.2 and was not questioned by the commenters. Consequently, a facility may establish its own training course or use any other mechanism, such as a cooperative arrangement among facilities or a uniformly developed training course, provided it includes the information required by the AAMI standard.

Comment: Some commenters suggested that we specifically train personnel to survey facilities and enforce the standards.

Response: We believe it is unnecessary to provide extensive training to State surveyors on these guidelines because the AAMI held extensive training sessions after the publication of the guidelines in July 1986. Further, some States have already incorporated the guidelines in their surveys of dialysis facilities. However, arrangements have been made with the U.S. Food and Drug Administration (FDA) to provide technical assistance and training sessions when necessary with respect to the AAMI guidelines and the additional standards specified in these regulations.

Comment: Commenters inquired what violations of the numerous AAMI standards of dialyzer reuse would result in noncompliance with the conditions of participation and result in termination of the facility's option to reuse dialyzers.

Response: If, in the judgment of the State survey agency, a facility violates any aspects of the standard on dialyzer reuse in §405.2150 which adversely affect the health and safety of patients, the survey agency will find that the standard is not met. The facility must then submit a corrective action plan to either correct the deficiencies, or discontinue reuse of dialyzers.

Reuse Procedures

Comment: Several commenters opposed the use of reprocessed dialyzers under any circumstances because they were concerned that the products used to reprocess dialyzers may be hazardous to the health of patients.

Response: As we noted in an earlier response, we are convinced that use of reprocessed hemodialyzers is safe and effective when properly performed. Comprehensive reviews of the available data have been conducted by the AAMI and components of the PHS including the FDA, the National Institutes of Health, the National Center for Health Sciences Research. Congress, after intensive review, chose to require regulation of hemodialyzer reuse, rather than to eliminate the practice.

We believe that these regulations promote the safety of dialyzer reuse procedures by clearly defining the standards of good reuse practice by trained personnel and providing a mechanism for enforcement of those standards through regular facility surveys.

Comment: Several commenters contend that AAMI guidelines have no basis in scientific practice, are inadequate, lack sufficient detail and have not been tested or validated.

Response: The AAMI guidelines were developed through a lengthy process of consultation between all elements of the hemodialysis community including physicians, providers, manufacturers of dialyzers and reprocessing equipment, researchers, patients and government agencies. The final AAMI standards contain only those elements upon which the participants reached consensus and which were believed to have the highest scientific merit. Furthermore, it was not the intent of the AAMI nor the Department's Task Force on Dialyzer Reuse to create uniform universal protocols, but rather a set of procedures that will ensure safe dialyzer reprocessing for patients and a set of procedures that will provide a framework for documentation and validation of the procedures. The AAMI standards contain sufficient detail to ensure safe and effective procedures when properly conducted.

Comment: Some commenters recommended that we strengthen the AAMI guidelines by incorporating in them regulations on good manufacturing practice in 21 CFR Part 820. These regulations apply to the manufacutre of medical devices.

Response: Under Medicare, payment is not made for any medical device that is subject to approval. The FDA has concluded that non-commercial reuse by dialysis facilities is separate and distinct from the manufacture of finished medical devices and is thus outside FDA's legal jurisdiction. Since dialysis facilities are not considered to be manufacturers, they should not be subjected to provisions regarding good manufacturing practices or be responsible for the type of documentation and validation that a manufacturer is responsible for in the production of large lots of sterile items. The FDA has determined that labeling a health care facility, such as a dialysis center, as a manufacturer simply because it cleans and disinfects a medical device that may be labeled "for one-time use" is not valid. We believe that the AAMI guidelines, together with effective review of facilities by the State survey agencies to determine that the facilities are in compliance with conditions for coverage, will provide sufficient guidance to enable a facility to process a device for reuse in a safe and effective manner.

Comment: Commenters noted that AAMI guidelines do not address the issue of how many times a dialyzer can be reused.

Response: The commenters are correct. There are no data upon which a maximum number of reuses can be based. The consensus of the AAMI experts was that the performance testing criteria used to judge properly functioning dialyzers may be applied to both new and reused dialyzers. A dialyzer that does not perform adequately should be discarded, whether it is used once or for multiple dialyses.

Comment: One commenter was concerned that the AAMI guidelines do not specify when reprocession must begin after a dialyzer is used.

Response: We are not aware of any problems that have arisen due to delays in reprocessing dialyzers. The consensus of the AAMI group was that timing of the procedure is not important; hence, there is no particular reason to make a specific recommendation governing the amount of time between the end of dialyzer use on a patient and the initiation of the reprocessing procedure.

Comment: One commenter recommended that in addition to the AAMI guidelines, we include in the regulations modifications recommended by the National Kidney Foundation Report on Dialyzer Reuse of July 11, 1987. (Copies may be obtained from the National Kidney Foundation, Inc., 2 Park Avenue, New York, N.Y., 10016.)

Response: Many of the National Kidney Foundation experts that developed the report were part of the expert group that developed the AAMI guidelines. While we realize that there are some differences in approach, especially with regard to criteria for determining whether a dialyzer is functioning properly, we do not believe that these differences are great and we consider both guidelines to be compatible.

Comment: Commenters stated that the AAMI guidelines were overly specific with regard to staff surveillance of patient reactions to reused dialyzers, and argued that physicians should perform this function.

Response: We do not agree. The AAMI recognizes, and we agree, that the reuse of medical devices is the sole responsibility of the patient's physician and has therefore directed the "Recommended Practice for the Reuse of Hemodialyzers" to the physician responsible for the hemodialyzer reprocessing program. In addition, the AAMI document has suggested that training programs for persons performing hemodialyzer reprocessing be established under the direction of the facility's physician/director and that each person performing procedures for the multiple use of dialyzers satisfactorily complete the appropriate training program. We believe that the physician's delegation of authority to persons adequately trained is consistent with current practice and proper.

Comment: Commenters noted that the AAMI quidelines failed to specify the chemical quality of water.

Response: The chemical quality of water used in reprocessing systems does not appear to play a role in any adverse effects associated with the process. The lack of consensus on this issue, expressed in the AAMI guidelines related more to a practical issue. Some individuals believed that water for reprocessing dialyzers should be the same water that is used to prepare dialysis fluid (see § 405.2140(a)(5)). There are both microbiologic and chemical specifications for water used in dialysis fluid. The majority of the AAMI group, however, believed that, although many facilities do use the same water for dialysis and for reprocessing, some facilities may wish to use only water that is of good microbiologic and endotoxin quality for reprocessing. This type of water is less expensive to produce. We have no basis for differing from this point of view. There is no evidence that the chemical quality of water plays any role in adverse effects on patients who are dialyzed with reprocessed dialyzers.

Comment: Commenters questioned the AAMI recommendation that water used to rinse dialyzers or to prepare dilutions of the chemical germicide (used to disinfect dialyzers) have less than one nanogram per milliliter of endotoxin or less than 200 bacteria per milliliter.

Response: The primary reason for this recommendation is to prevent water with a relatively high level of bacterial endotoxin from reaching membranes of the hemodialyzer during the rinsing period or disinfection period. The PHS advises us that the bacterial endotoxin can attach to the membranes and remain there during the reprocessing cycle and subsequently be relased during dialysis. The PHS also advises us that techniques used to measure bacterial endotoxin in water by means of the Limulus lysate (LAL) test have been shown to be specific and sensitive with very few instances of false positive results. Similarly, techniques for the enumeration of bacteria in water are straightforward, precise and accurate.

Comment: Commenters noted that the AAMI guidelines do not contain standards for automated hemodialyzer reprocessing machines, which are used by 40% of dialysis facilities.

Response: We agree that the AAMI guidelines do not contain specific "standards" for automated reprocessing machines, but point out that automated reprocessing machines are clearly

included in the scope of the document. Specific reference to automated reprocessing machines is made throughout the document (see sections 1.1, 5, 5.2, 5.2.2, 5.2.3, etc.). We believe that facilities that use automated reprocessing machines operate them according to the manufacturer's instructions. When automatic reprocessing machines are used, a copy of the manufacturer's instructions should be included in the master file. As specified in standard 5.2 and 5.2.3 of the AAMI guidelines, if the facility chooses to deviate from those instructions, the reason for that deviation should be supported by expert opinion, documented, and new instructions placed in the master file of the facility. In addition, the new instructions should be attached to, or located near the equipment.

Comment: Commenters observed that the AAMI guidelines contain no requirement that facilities report morbidity and mortality rates associated with reused dialysis filters.

Response: The AAMI guidelines do not contain a specific requirement that facilities report morbidity and mortality rates associated with reused dialyzers. However, they do require a complaint investigation file containing information about failures of reprocessed dialyzers or adverse reactions to reprocessed dialyzers, the results of the investigation, and corrective action taken, if appropriate. It is reviewed periodically for trends that may contribute to patient morbidity and mortality. Further, information relative to reuse morbidity and mortality is obtained by the Department through the HCFA survey process and by the FDA through the medical device reporting system.

Comment: Commenters recommended that State law prevail when there is a conflict between the AAMI guidelines and State law.

Response: The Medicare conditions are merely minimum standards. States may impose more stringent or extensive standards, and, in accordance with 42 CFR 405.2135(c), facilities would be required to meet those standards as well.

Comment: Commenters noted that the AAMI guidelines fail to distinguish between single-use versus multiple-use products.

Response: We agree that the AAMI guidelines do not distinguish between single-use versus multiple-use products. Nevertheless, the document does describe the essential elements of good practices for reprocessing hemodialyzers (regardless of the labeling) that facilities can use in order to help assure that the device processed for reuse is safe and effective. Extensive dialyzer reuse today indicates that those who process medical devices for reuse are influenced little, if at all, by a "single use only" label placed on the device. We understand that two manufacturers are modifying their labeling practice to indicate that reuse is permissible, if proper procedures are used. We therefore believe the AAMI guidelines are adequate for the purposes intended and do not need to be modified.

Comment: One commenter stated that it is not necessary that dialyzer (blood port) caps be disinfected with the same disinfectant used for the hemodialyzer.

Response: The intent of the provision is that dialyzer caps that are exposed to blood (i.e., blood port caps) be disinfected so that they do not contaminate the blood input and output side of the reprocessed dialyzers. Our requirement that the same germicide that is used for dialyzer disinfection also be used for caps was based on the assumption that this coincides with the practice of most dialysis centers. As the commenter points out, this assumption may not be correct.

Because the PHS informs us that there is no known risk to the integrity of the blood port caps by using a different germicide from that used for disinfecting the dialyzer, an alternative disinfecting protocol may be used. We believe that an equally acceptable technique would be to disinfect the dialyzer cap with a chemical germicide that has a high level of activity. In practice, this would include all of the currently available commercial chemical germicides that have been approved by FDA for dialyzer disinfection or chemical germicides approved by the EPA as a sterilant/sporicide. These latter chemical germicides can be used for purposes of high level disinfection specified by the manufacturer of the chemical germicide.

Caps that are used on the dialysate input and output ports can be simply cleaned with soap and water or sanitized and dried. Further, blood port caps that are supplied from the manufacturer can also be used.

Accordingly, we are revising § 405.2150(b) of the regulations to specify, as noted in the AAMI's guidelines, that the ports of hemodialyzers can be capped with new or disinfected caps. If dialyzer blood port caps are reused, they will be disinfected with the chemical germicide that is used for disinfecting the hemodialyzer or any other chemical germicide approved by EPA as a sterilant/sporicide.

Comment: One commenter objected to the recommendation in the AAMI guidelines that the staff note the cosmetic appearance of the dialyzer. The commenter pointed out that cosmetic appearance is a visual reference point and is unimportant in terms of safety and effectiveness of the dialyzer. In addition, the commenter stated that the recommendation is vague and unenforceable.

Response: We agree. We point out, however, that the guidelines recommend a visual inspection be a part of a quick check. Such an inspection should not be considered the definitive measurement of dialyzer performance. The performance measurements listed in section 9.3 of the AAMI document include specific guidelines for additional performance tests.

Comment: One commenter noted that there is not a consensus on what performance tests should be used to determine if a dialyzer is functioning. Some scientists believe that ultrafiltration rate, as well as fiber bundle volume and air pressure leak tests should be performed.

Response: We realize that there is not unanimous agreement on this subject. However, it was the consensus of the experts convened by AAMI that, at a minimum, fiber bundle volume and leak tests of each dialyzer are important criteria to assure function. On advice of the PHS, ultrafiltration rate is not included as a test that needs to be performed after each reprocessing procedure on each dialyzer, although the facility may choose to do so if it wishes.

Comment: Commenters objected to the requirement that transducer filters not be reused because they may be a health hazard.

Response: We are aware that these devices are not actually reused in the sense that they are reprocessed between patient use, but rather are left in place and used from one patient to the next. We also realize that these types of filters function primarily to prevent patients' blood from contaminating the dialysis machine. However, it is the consensus of infection control experts at CDC as well as the American Nephrology Nurses Association that these devices can represent a potential vehicle for cross-contamination for the hepatitis B virus (HBV). Individuals who have hepatitis B infection contain extraordinarily high amounts of the virus, i.e., 10^8–10^9 infectious virus particles per milliliter, in the blood. It is the consensus of these groups that casual visual inspection of these filters is not sufficient to ensure that serum or blood have not contaminated the devices, which in turn, could transmit HBV from one patient to the next.

Therefore, we have provided that transducer filters should be changed between patients.

Chemical Germicides

Comment: Commenters suggested that the AAMI guidelines be revised to include the strength of germicides.

Response: The concentrations of commercially available chemical germicides are not listed in the guidelines because we believe that the user should refer to the manufacturer's recommendations on the use of the chemical germicide. These recommendations and procedures may change periodically.

Comment: One commenter objected to the AAMI guideline concerning formaldehyde concentrations and contact time on the basis that the AAMI guideline lacks specificity and allows the facility to use any kind of germicide it might choose without regard to effectiveness or safety, as long as the facility follows the manufacturer's instructions.

Response: Specific concentrations of formaldehyde are recommended (4 percent), but we recognize that facilities also may achieve an equivalent effect by using lower germicide concentrations at a higher temperature. The PHS informs us that there are valid scientific studies that clearly document the effectiveness of lower concentrations of formaldehyde at higher temperatures during storage. Concentrations of commercially available chemical germicides are specified by the manufacturer.

Comment: One commenter suggested that there is no scientific rationale for the provision in proposed § 405.2150(a)(1) that would prohibit dialyzers disinfected with one generic type of chemical germicide from being reused if a different germicide is introduced as part of the dialysis facility's reprocessing system.

Response: We disagree with the commenter. In 1986, the CDC investigated an outbreak of pyrogenic reactions and found strong epidemiologic evidence that a major factor in the outbreak was the reprocessing of the dialyzers with different types of chemical germicides.

We agree that there are no published reports on this phenomenon, but on the other hand, there are also no evaluations of the combined effect of chemical germicides on certain types of dialyzer membranes. The PHS has clearly demonstrated that minute breaks in dialyzer membranes can be associated with bacteremia in patients and that leaks are not always detected by an air pressure leak test.

Comment: Commenters were concerned that the language of § 405.2150(a)(1), requiring the use of only one chemical germicide in dialyzer reprocessing, is imprecise, confusing, and subject to misinterpretation.

Response: We agree that the language could be misconstrued and should be changed. The requirement that only one type of chemical germicide be used on a hemodialyzer as it is reprocessed multiple times was based on concern that two germicides may have a combined adverse effect on the membranes of the dialyzers. For example, if a dialyzer were reused four times with formaldehyde and then the facility changed its procedure and used glutaraldehyde, the combination may produce an effect on the membrane. This situation does not occur often at a dialysis center. Usually protocols for this type of operation are stable and change very infrequently.

Furthermore, the requirement is intended to focus on those specific chemical germicides that are used by a facility to disinfect the dialyzer and which remain in the dialyzer for relatively long periods of time (1 to 3 days). It was not intended to refer to any chemical germicide that was used by the manufacturer to sterilize the dialyzer originally; thus, the regulation would not require that, if originally ethylene oxide were used to sterilize the dialyzer, that formaldehyde or other chemical germicides cannot be used in a facility's reprocessing program.

In addition, some chemical reagents such as sodium hypochlorite and hydrogen peroxide, which in other settings can be used for the purposes of disinfection, are used as part of a cleaning protocol for the hemodialyzers. For example, if the dialyzer were cleaned with sodium hypochlorite or hydrogen peroxide, disinfection could be accomplished using 4 percent formaldehyde or a glutaraldehyde or peracetic acid-based chemical germicide.

To clarify the regulations, we are revising § 405.2150(a)(1) to specify that dialyzers should be exposed to only one chemical germicide during the reprocessing procedure. If a facility decides to use a different chemical germicide, the reprocessed dialyzer should be discarded rather than be exposed to a second germicide to prevent a hypothetical risk of dialyzer membrane leaks due to the combined action of different chemical germicides. If sodium hypochlorite or hydrogen peroxide are used in the cleaning step of a reprocessing procedure and used for short exposures as cleaners and not chemical germicides, then a chemical germicide of a different generic type could be used for dialyzer disinfection.

Potential Patient Reactions to the Reprocessing Procedure

Comment: A commenter objected to the requirement that blood cultures be taken during a suspected pyrogenic reaction on the basis that a culture does not prove conclusively that patient reactions were a result of facility reprocessing techniques.

Response: Taking blood cultures during a suspected pyrogenic reaction is part of a series of tests meant to differentiate between a pyrogenic reaction and a bacterial infection. We agree that there are a number of factors that may either mimic a pyrogenic reaction or cause occasional pyrogenic reaction or pyrogenic-like reactions to occur in patients. Our intent is that the physician director of the dialysis facility or chief nurse have the responsibility for determining whether pyrogenic reactions are occurring, if they are occurring in clusters and if they are associated with the reprocessing procedures. These are decisions and determinations that are based on the broad medical and clinical experience of the health care professionals, and ones that cannot be listed specifically in any regulation.

In this same context, if the director of a dialysis facility, or that person's designate reaches the conclusion that either a chemical germicide used in reprocessing or a commercially available reprocessing system in any way is associated with pyrogenic reactions, it is the responsibility of that individual to contact the manufacturer of the germicide regarding this problem. It is the responsibility of the manufacturer under FDA regulations to notify the FDA. In addition, reuse of hemodialyzers should be terminated until the problems associated with pyrogenic reactions are solved.

Comment: Commenters questioned the need to terminate dialyzer reuse in the facility when only one individual experiences a pyrogenic reaction, bacteremia, or an unexplained reaction.

Response: We believe that this requirement safeguards all patients by preventing the spread of organisms that could contaminate all dialyzers. Our intent is explained in the previous comment. We would expect that the physician, after analyzing all the evidence associated with untoward reactions in a single patient or in several patients in the facility, would take whatever action is needed, including the termination of reuse, not only to protect the individual patient, but all patients if

it were determined that these reactions resulted from improper processing.

Comment: One group commented that requiring surveillance for bacteremia and unexplained reactions is inadequte because it implies that pyrogenic and bacteremic reactions are the only major complications of exposure to reprocessed hemodialyzers.

Response: We disagree that these regulations imply that pyrogenic reactions and bacteremia as major complications are only associated with hemodialyzer reuse. However, there have been documented instances of pyrogenic reactions and bacteremia due to inadequate dialyzer reuse procedures, and surveillance for them is part of a proper protocol. We have discussed the actions to be taken as a result of surveillance as a response to a previous comment.

Comment: One commenter noted that AIDS and hepatitis are associated with the reuse of hemodialyzers.

Response: The PHS advises us that since 1976 there is no excess risk of hepatitis B infection among patients or staff members in facilities that do and those that do not reuse hemodialyzers. We believe that the same precautions used to prevent the spread of hepatitis B will be effective in reducing the spread of the AIDS virus.

Comment: Commenters suggested that the AAMI guidelines be more specific with regard to the quality of water to prevent pyrogenic reactions in patients.

Response: The AAMI does have standards for water used to prepare dialysis fluid, but we do not believe that the entire set of AAMI standards are necessary for water that is used as part of a reprocessing procedure. The PHS advises us that the endotoxin level in reprocessing water should not exceed one nanogram per milliliter. To accomplish this, the AAMI guidelines include either an endotoxin test or microbiologic assay. We believe that these procedures are sufficient to prevent pyrogenic reactions associated with water used in the reprocessing procedure.

General Comments

Comment: One provider association objected to the AAMI guidelines being incorporated by reference in the regulations. Among the problems they cite are that the guidelines do not mandate specific tasks and, thus, make interpretation and compliance difficult, and that the guidelines provide too much flexibility and an absence of requirements in some areas and too much specificity in other areas in which technological advances may quickly outdate the instructions.

Response: We think that these guidelines constitute a framework for documentation, validation, and surveillance of reprocessing procedures. We believe that if the guidelines are followed and adherence to the guidelines is evaluated by State agency surveyors, they will enhance the quality of practice of dialyzer reuse.

Comment: Commenters noted that AAMI guidelines are not scheduled for revision until 1991 and asked what we would do if revisions are necessary before 1991. One commenter noted that improvements to, or development of new dialysis techniques occur continuously and recommended that we perform an ongoing reevaluation of the guidelines.

Response: The commenters are correct that the AAMI intends to update the voluntary standards every 5 years. If we find that revisions need to be made to the standards regarding dialyzer reuse procedures at that time or at any time, we will propose revisions through the Department's usual rulemaking procedures. With regard to technical modifications and improvements that occur, we believe that State survey agencies are unlikely to find that standards are not met if the equipment, materials and processes used provide health and safety protection that is the same as, or greater than the AAMI recommended practice. For example, if techniques are developed that are more specific or more sensitive than the Limulus amoebocyte lysate assay, with as few instances of false positives, we expect use of such techniques to be interpreted by the State survey agency as meeting or exceeding the standard regarding bacterial lipopolysaccharide concentration in dialyzer rinsing fluid.

Comment: A number of commenters were concerned that the proposed requirement in § 405.2138(a)(5) that patients be fully informed regarding their suitability for transplantation and home dialysis will be burdensome to facilities if we impose rigid implementation and unnecessary and duplicative recordkeeping to establish that information was actually imparted. One commenter, on the other hand, recommended that we specify that the assessment concerning whether a patient is suitable for a transplant be made only by a transplant surgeon.

Response: The requirement that patients be fully informed about their suitability for transplantation and home dialysis does not require a new evaluation by the facility. This requirement already exists as part of the long term care plan specified in § 405.2137(a). We are merely requiring that facilities document in the medical record the fact that they have informed patients about the selection of treatment modality specified in the long term care plan. This requirement does not duplicate any other requirements, and we do not believe that the recordkeeping requirement is unnecessarily burdensome or onerous for facilities.

Regarding the recommendation that only a transplant surgeon conduct the assessment of whether a patient is suitable for a transplant, existing regulations specify that this determination is to be made by a professional team. Section 405.2137(a) specifies that the long term care program representing the selection of dialysis or transplantation is developed by a professional team that includes, but is not limited to the physician director of the facility, a transplant surgeon, a qualified nurse, a qualified dietitian and a qualified social worker.

Comment: Several commenters suggested revisions to the physical environment condition, § 405.2140. Commenters suggested adding provisions to ensure safe reuse of hemodialyzers, sufficient space and storage capacity for processing of hemodialyzers, a definition of "sanitary, comfortable and well-lighted area," and quality assurance with respect to contamination and infection control.

Response: Paragraphs (b)(1) and (c) of proposed § 405.2140 contain cross references to § 405.2150, which is the standard for reuse of hemodialyzers. We believe that the AAMI guidelines referenced in § 405.2150 will ensure safe reuse of dialyzers including contamination and infection control and that no revision to the physical environment condition is necessary.

We have not accepted the suggestion that we define "sanitary, comfortable and well-lighted area" in the regulations. Any clarification or detailed explanation of the term would, instead, be included in survey guidelines.

With regard to space and storage capacity for reprocessing hemodialyzers, we believe existing requirements in § 405.2140(b)(2) with respect to sufficient space for treatment, storage and maintenance of equipment are adequate.

III. Final Rule

After consideration of the public comments, and for the reasons stated in our responses to those comments, we have decided to finalize the regulations as proposed, except for revisions to § 405.2139(a) on documentation of medical records, § 405.2150(a)(1) on

chemical germicides, and § 405.2150(b) on dialyzer caps.

IV. Waiver of 30-Day Delay in Effective Date

Section 9335(k) of OBRA '86 requires that we establish standards for reuse of hemodialyzer filters. Those standards must be incorporated into the conditions for coverage of suppliers of end stage renal disease services no later than October 1, 1987. If regulations containing the standards are not effective by October 1, 1987, we can no longer pay for reused hemodialyzers, a practice that has been an option for facilities for many years. We ordinarily provide a 30-day delay in effective date following publication of a regulation to allow time for affected entities to comply with the new requirements. However, in this case, the usual 30-day delay in effective date would effectively require facilities to temporarily stop reusing hemodialyzers and use only new ones. To suddenly terminate payment for reused dialyzers to allow for a 30-day delay in effective date would be disruptive and administratively burdensome to dialysis facilities, and disruptive to the continuity of patient care. We therefore, find good cause for waiving the 30-day delay in effective date and find that such waiver is in the public interest.

V. Regulatory Impact Statement

A. Introduction

Executive Order (E.O.) 12291 requires us to prepare and publish a final regulatory impact analysis for any final regulation that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in: an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, we generally prepare a final regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a final regulation will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we treat all ESRD facilities as small entities.

B. Comments and Responses

In the proposed rule we gave an extended discussion of our reasons for not providing an impact analysis or regulatory flexibility analysis. Various commenters addressed that decision and the issues touched upon in our discussion.

Provider Impact

Comment: One commenter stated that the impact statement failed to analyze the true economic impact of reuse and the implications for dialysis facilities of meeting "an adequate single standard" [sic]. Further, the commenter stated that HCFA's conclusion that there would be a negligible effect was an erroneous conclusion based on inadequate data and improper assumptions and that there should have been a full-fledged analysis.

Response: Even though we had little data, we did provide an estimate of the prevalence of reuse and gave our reasons for believing that the economic impact would be small and that the effects on beneficiaries would be beneficial.

We are uncertain what the commenters meant to imply by referring to "an adequate single standard." The commenter, in referring to the proposed standard as adequate, seems to presume that many facilities now observe only lesser, inadequate, reuse standards. The main point we made is that most facilities have been following reasonable standards for reuse already. If standards were inadequate in a facility, then costs would be incurred to bring the facility into compliance and assure the quality of services to the beneficiary. With regard to the request that we fully analyze the economic impact before adopting a standard, we do not have data or a model to isolate just those reuse-associated costs that may differ from facility to facility, nor to relate costs to facility-specific reuse practices. The commenter did not offer any more data than the data presented in the preamble, nor did anyone contest our estimates of the prevalence of reuse.

Comment: One commenter stated that with the adoption of AAMI standards concerning patient surveillance and reporting to the manufacturer, reuse costs could be affected.

Response: It is likely that some standards and reporting requirements could increase costs for those facilities with reuse practices significantly different from those required by this rule, but aggregate costs for all facilities are not expected to rise. We expect that any rise in cost in a specific facility would be more than offset by the value of establishing additional safeguards to insure the health and safety of the patients.

An increase in dialysis costs, whether for one or many facilities, would not result in increased payments to affected facilities unless those costs increased the average cost per dialysis session in a way that was later reflected in the level at which composite rate payments were set. Because it appears that many facilities are currently following reasonable standards in reuse of dialyzers, similar to the requirements in this regulation, this rule is not expected to result directly in any increases or reductions in Medicare program expenditures in the aggregate.

Comment: One commenter, quoting the regulatory impact statement in the proposed rule, concluded that there are financial incentives for dialysis facilities to practice reuse and a disincentive for a pure medical judgment on the issue of reuse. The commenter further stated that it was not clear whether in promoting reuse the Department was concerned primarily with the financial advantage to the government or savings to dialysis facilities.

Response: First, we wish to state clearly that it is not our policy or intent to promote reuse. The section of the initial regulatory impact statement quoted by the commenter was intended merely to explain the interaction between the proposed standards, facility costs, and Medicare payments. It was not a statement of objectives, but an attempt to help reviewers of the proposed rule assess its consequences. We grant that one major reason facilities elect to encourage reuse is to save money. Our position is not to encourage or discourage reuse, but rather to ensure that patient health and safety are protected when it is practiced.

Beneficiary Impact

Comment: One commenter, expressing concern about the impact on beneficiaries, believed that the rule, if adopted without provisions for informed consent and the right of refusal, will leave the patient unprotected and at unnecessary risk.

Response: We believe that this is a misinterpretation of the regulation. This regulation requires that the patient be fully informed about reuse. In addition, the regulation would require that each patient be fully informed regarding his or her suitability for kidney transplantation and home dialysis. Furthermore, the medical record must contain evidence that each patient was informed regarding his or her suitability for transplantation and home dialysis.

These facts, in combination with the expected benefit to patients of establishing standards for reuse, make it clear that the intended and expected results of this rule are to increase patient protections.

C. Conclusion

Because we are unable to predict the decisions that facilities will make in response to this regulation, we are unable to quantify the potential effect it will have. We continue to believe adoption of these standards for reuse of dialysis supplies will help ensure beneficiary health and safety. In response, we expect some beneficiaries will be reassured that their rights have been safeguarded. However, we expect that there will be a negligible effect on most beneficiaries and facilities, due to the fact that it appears that many facilities are currently following standards for reuse of dialyzers that are similar to those in this final regulation. This final rule is not expected to result directly in any increases or reductions in Medicare program expenditures, nor will it result in a decline nor a deterioration of patient rights or protections.

For these reasons, we have determined that a regulatory impact analysis is not required. Further, we have determined and the Secretary certifies that this final rule will not have a significant economic impact on a substantial number of small entities. We have therefore not prepared a regulatory flexibility analysis.

Paperwork Reduction Act of 1980

Sections 405.2136(b), 405.2138(a), 405.2139(a), and 405.2140(b) and (c) of this rule contain information collection requirements that are subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1980. The recordkeeping and reporting requirements are not effective until they have been approved by OMB under the Paperwork Reduction Act of 1980. The requirements have been submitted to OMB for review. Comments on the requirements should be sent to:

Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503, Attention: Allison Herron

When clearance is obtained, we will publish a notice in the **Federal Register** announcing that clearance.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Health facilities, Health maintenance organizations (HMO), Health professions, Incorporation by reference, Kidney diseases, Laboratories, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 405 Subpart U is amended as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart U—Conditions for Coverage of Suppliers of End-Stage Renal Disease (ESRD) Services

1. The authority citation for Part 405 Subpart U continues to read as follows:

Authority: Secs. 1102, 1862(a), 1871, 1874, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395x, 1395y(a), 1395hh, 1395kk, and 1395rr), unless otherwise noted.

2. The table of contents for Subpart U is amended by adding a new § 405.2150 to read as follows:

Subpart U—Conditions for Coverage of Suppliers or End-Stage Renal Disease (ESRD) Services

* * * * *

Sec.

405.2150 Condition: Reuse of hemodialyzers and other dialysis supplies

* * * * *

3. Section 405.2136(b) introductory text is revised to read as follows:

§ 405.2136 Condition: Governing body and management.

* * * * *

(b) *Standard: operational objectives.* The operational objectives of the ESRD facility, including the services that it provides, are established by the governing body and delineated in writing. The governing body adopts effective administrative rules and regulations that are designed to safeguard the health and safety of patients and to govern the general operations of the facility, in accordance with legal requirements. Such rules and regulations are in writing and dated. The governing body ensures that they are operational, and that they are reviewed at least annually and revised as necessary. If the ESRD facility is engaged in the practice of hemodialyzer reuse, the governing body ensures that there are written policies and procedures with respect to reuse, to assure that recommended standards and conditions are being followed, and requires that patients be informed of the policies and procedures.

* * * * *

4. In § 405.2138, paragraph (a) introductory text is republished, paragraph (a)(3) is revised, and new paragraphs (a)(4) and (a)(5) are added, to read as follows:

§ 405.2138 Condition: Patients rights and responsibilities.

* * * * *

(a) *Standard: informed patients.* All patients in the facility:

* * * * *

(3) Are fully informed by a physician of their medical condition unless medically contraindicated (as documented in their medical records);

(4) Are fully informed regarding the facility's reuse of dialysis supplies, including hemodialyzers. If printed materials such as brochures are utilized to describe a facility and its services, they must contain a statement with respect to reuse; and

(5) Are fully informed regarding their suitability for transplantation and home dialysis.

5. Section 405.2139(a) is revised to read as follows:

§ 405.2139 Condition: Medical records.

* * * * *

(a) *Standard: medical record.* Each patient's medical record contains sufficient information to identify the patient clearly, to justify the diagnosis and treatment, and to document the results accurately. All medical records contain the following general categories of information: Documented evidence of assessment of the needs of the patient, whether the patient is treated with a reprocessed hemodialyzer, of establishment of an appropriate plan of treatment, and of the care and services provided (see § 405.2137(a) and (b)); evidence that the patient was informed of the results of the assessment described in § 405.2138(a)(5); identification and social data; signed consent forms referral information with authentication of diagnosis; medical and nursing history of patient; report(s) of physician examination(s); diagnostic and therapeutic orders; observations, and progress notes; reports of treatments and clinical findings; reports of laboratory and other diagnostic tests and procedures; and discharge summary including final diagnosis and prognosis.

* * * * *

6. Section 405.2140(b) introductory text, (b)(1) and (c) are revised to read as follows:

§ 405.2140 Condition: Physical environment.

* * * * * *

(b) *Standard: favorable environment for patients.* The facility is maintained and equipped to provide a functional sanitary, and comfortable environment

with an adequate amount of well-lighted space for the service provided.

(1) There are written policies and procedures in effect for preventing and controlling hepatitis and other infections. These policies include, but are not limited to, appropriate procedures for surveillance and reporting of infections, housekeeping, handling and disposal of waste and contaminants, and sterilization and disinfection, including the sterilization and maintenance of equipment where dialysis supplies are reused, there are written policies and procedures covering the rinsing, cleaning, disinfection, preparation and storage of reused items which conform to requirements for reuse in § 405.2150.

* * * * * *

(c) *Standard contamination prevention.* The facility employs appropriate techniques to prevent cross-contamination between the unit and adjacent hospital or public areas including, but not limited to, food service areas, laundry, disposal of solid waste and blood-contaminated equipment, and disposal of contaminants into sewage systems. Waste storage and disposal are carried out in accordance with applicable local laws and accepted public health procedures. The written patient care policies (see § 405.2136(f)(1)) specify the functions that are carried out by facility personnel and by the self-dialysis patients with respect to contamination prevention. Where dialysis supplies are reused, records are maintained that can be used to determine whether established procedures covering the rinsing, cleaning, disinfection, preparation and storage of reused items, conform to requirements for reuse in § 405.2150.

* * * * * *

7. A new § 405.2150 is added to Subpart V to read as follows:

§ 405.2150 Condition: Reuse of hemodialyzers and other dialysis supplies.

An ESRD facility that reuses hemodialyzers and other dialysis supplies meets the requirements of this section.

(a) *Standard: Hemodialyzers.* If the ESRD facility reuses hemodialyzers, it meets the voluntary guidelines adopted by the Association for the Advancement of Medical Instrumentation (A.A.M.I.) July 1986 (i.e., "Recommended Practice for Reuse of Hemodialyzers") which is incorporated by reference. Incorporation of the Association for the Advancement of Medical Instrumentation 1986 edition of the "Recommended Practice for Reuse of Hemodialyzers" was approved by the Director of the Federal Register in accordance with 5 U.S.C. 562(a) and 1 CFR Part 51 which governs the use of incorporations by reference.[1]

In addition to the A.A.M.I. 1986 edition criteria on hemodialyzer reuse, the ESRD facility conforms to the following procedures:

(1) *Chemical germicides.* To prevent any risk of dialyzer membrane leaks due to the combined action of different chemical germicides, dialyzers are exposed to only one chemical germicide during the reprocessing procedure. If a dialyzer is exposed to a second germicide, the dialyzer must be discarded.

(2) *Staff exposure to chemical germicides.* Chemical germicides are handled in a manner to minimize exposure to staff members who are involved in the reprocessing. The following exposure limits for a number of active ingredients contained in formulations of chemical germicides utilized in dialysis facilities have been set by the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA) (see 29 CFR 1910.1000). Staff exposure to any material in the table is consistent with these limits.

TABLE

Substance/material	Limits
Formaldehyde	3 ppm TWA. 5 ppm Ceiling. (1 ppm TWA proposed by OSHA).
Glutaraldehyde	None developed.
Phenol	5 ppm TWA.
Glutaraldehyde-Phenol	Individual standards of recommendations should apply.
Peracetic Acid	None developed.
Chlorine Dioxide Syn: Chlorine Oxide.	100 ppb TWA.
Hydrogen Peroxide	1 ppm TWA.
Chlorine	1 ppm Ceiling.

TWA = Time weighted average.
Ceiling = Maximum exposure ceiling.
ppm = Parts per million.
ppb = Parts per billion.

[1] The "Recommended Practice for Reuse of Hemodialyzers" is available for inspection at the Office of the Federal Register Information Center, Room 8301, 1100 L Street NW., Washington, DC. Copies may be obtained from the Association for the Advancement of Medical Instrumentation, 1901 North Fort Myers Drive, Suite 602, Arlington, Va. 22209–1699.

If any changes in the "Recommended Practice for Reuse of Hemodialyzers" are also to be incorporated by reference, a notice to that effect will be published in the **Federal Register.**

(3) *Surveillance of patient reactions.* In order to detect bacteremia, to maintain patient safety when unexplained events occur, and to provide the manufacturer with information so that prompt remedial action can be taken, the facility—

(i) Takes appropriate blood cultures at the time of a febrile response in a patient;

(ii) If pyrogenic reactions, bacteremia, or unexplained reactions associated with ineffective reprocessing are identified, terminates reuse of hemodialyzers in that setting and does not continue reuse until the entire reprocessing system has been evaluated; and

(iii) Notifies the manufacturer, if these reactions appear to be associated with any commercially available germicide or a reprocessing device.

(b) *Standard: Dialyzer caps.* The ports of hemodialyzers may be capped with new or disinfected caps. If dialyzer blood port caps are reused, they are disinfected with the chemical germicide that is used for disinfecting the hemodialyzer or any other chemical germicide approved by the Environmental Protection Agency as a sterilant/sporicide.

(c) *Standard: Transducer filters.* To control the spread of hepatitis, transducer filters are changed after each dialysis treatment and are not reused.

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare Hospital Insurance.)

Dated: September 21, 1987.

William L. Roper,

Administrator, Health Care Financing Administration.

Approved: September 23, 1987.

Otis R. Bowen,

Secretary.

BILLING CODE 4120–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6764]

List of Communities Eligible for the Sale of Flood Insurance

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the

program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The dates in the third column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 457, Lanham, Maryland 20706, Phone: (800) 638–7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fourth column of the table. In the communities listed where a flood map has been published, section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et. seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Current effective map date
Texas: Burleson County, unincorporated areas	481169	July 6, 1987, Emerg.	June 17, 1977.
California: San Benito County, unincorporated areas	060267	July 7, 1987, Emerg.	Aug. 2, 1977.
Pennsylvania: *Limeston, township of, Warren County	422547	Feb. 28, 1977, Emerg.; June 1, 1987, Reg.; June 1, 1987, Susp.; July 7, 1987, Rein.	June 1, 1987.
Iowa: *Eldora, city of, Hardin County	190139	Apr. 14, 1975, Emerg.; May 1, 1987, Reg.; May 1, 1987, Susp.; July 8, 1987, Rein.	Do
Ohio: Enon, village of, Clark County	390795	Sept. 12, 1975, Emerg.; Apr. 17, 1987, Reg.; Apr. 17, 1987, Susp.; July 8, 1987, Rein.	Apr. 17, 1987.
North Carolina: Pineville, town of, Mecklenburg County	370160	May 6, 1975, Emerg.; May 18, 1987, Reg.; May 18, 1987, Susp.; July 8, 1987, Rein.	Mar. 18, 1987.
Iowa: *Kellogg, city of, Jasper County	190164	June 3, 1977, Emerg.; June 1, 1987, Reg.; June 1, 1987, Susp.; July 9, 1987, Rein.	June 1, 1987.
New York: Webster, town of, Monroe County	360436	Mar. 9, 1973, Emerg.; June 4, 1987, Reg.; June 4, 1987, Susp.; July 9, 1987, Rein.	June 4, 1987
Arkansas: Franklin County, unincorporated areas	050432	July 15, 1987, Emerg.	Do

Note.—The City of South Flomaton; Florida (No. 120084) has recently changed their name to the City of Century, Florida. The City of South Flomaton should be deleted from the Eligibility Status Book as a separate entry. The City of Century should be listed with the footnote "formerly the City of South flomaton". Note that the City of Century is in the conversion process and is scheduled to convert to the Regular Program on August 4, 1987 provided appropnate ordinances are adopted by then.

The City of Ward Ridge (Gulf County), Florida has merged into the City of Port St. Joe. Therefore, the City of Ward Ridge should be deleted from all records as a separate entity. The community number for Ward Ridge is 120622. The City of Port St. Joe has been participating in the Regular Program since June 15, 1983. The City of Port St. Joe's Community number is 120099. The Regular Program conversion scheduled for Ward Ridge on August 4, 1987, should be suspended

BILLING CODE 6718–03–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 301

[Docket No. 70885–7202]

Pacific Halibut Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of final rule.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, on behalf of the International Pacific Halibut Commission, publishes notice of regulations promulgated by that Commission and approved by the United States Government to govern the Pacific halibut fishery. These regulations are intended to allow full harvest, within conservation constraints, of available Pacific halibut stocks in the northern Pacific Ocean.

EFFECTIVE DATE: September 29, 1987.

FOR FURTHER INFORMATION CONTACT: J. Craig Hammond, Special Agent in Charge, Law Enforcement, Alaska Region, NMFS, P.O. Box 02–1668, Juneau, AK 99802, telephone 907–586–7225; or Executive Director, International Pacific Halibut Commission, P.O. Box 5009, University Station, Seattle, WA 98105, telephone 206–624–1838.

SUPPLEMENTARY INFORMATION: The International Pacific Halibut Commission (IPHC), under the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and the Bering Sea (signed at Ottawa Ontario, on March 2, 1953), as amended by a Protocol Amending the Convention (signed at Washington, DC , on March 29, 1979), has promulgated new regulations governing the Pacific halibut fishery. These regulations have been approved by the Secretary of State of the United States. On behalf of the IPHC, these regulations are published in the **Federal Register** to provide notice of their effectiveness and to inform persons subject to the regulations of their restrictions and requirements.

The current IPHC regulations (52 FR 16268, May 4, 1987), are amended by establishing a catch limit of 20,000 pounds per vessel for the 24-hour fishing period commencing noon ADT September 30, 1987, in Regulatory Area 3A and Regulatory Area 3B.

Because approval by the Secretary of State of the IPHC regulations is a foreign affairs function, Jensen v. National Marine Fisheries Service, 512 F.2d 1189 (9th Cir. 1975), 5 U.S.C. 553 of the Administrative Procedure Act, Executive Order 12291, and the Regulatory Flexibility Act do not apply to this notice of the effectiveness and content of the regulations.

These regulations do not contain collection of information requirements subject to the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 301

Fisheries, Treaties, Reporting and recordkeeping requirements.

Dated: September 28, 1987.

Bill Powell,

Executive Director, National Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 301 is amended as follows:

PART 301—[AMENDED]

1. The authority citation for Part 301 continues to read as follows:

Authority: 5 U.S.T. 5; T.I.A.S. 2900, 16 U.S.C. 773–773k.

2. Section 301.9 is amended by adding paragraph (c) to read as follows:

§ 301.9 Trip limits.

* * * * *

(c) Vessels fishing in Regulatory Area 3A of Regulatory Area 3B during the fishing period commencing September 30, 1987 shall be limited to a maximum catch of 20,000 pounds (9.07 mt) of halibut.

50 CFR Part 654

[Docket No. 70995-7195]

Stone Crab Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NOAA issues this final rule implementing a technical amendment revising the definition of stone crab to conform to the recent taxonomic description of a previously unrecognized species and a hybrid. The recognition of this new species and hybrid does not alter any other aspects of the Fishery Management Plan for the Stone Crab Fishery of the Gulf of Mexico (FMP). The intent of this rule is to broaden the definition of stone crab to recognize that two species and their congeneric hybrid now occupy the management area instead of one species as originally believed, thereby closing a potential avenue for evasion of the regulations.

EFFECTIVE DATE: October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Michael E. Justen, 813-893-3722.

SUPPLEMENTARY INFORMATION: The stone crab fishery is managed under the FMP its implementing regulations at 50 CFR Part 654. At the time the FMP was prepared, fishery scientists recognized a single species of stone crab, *Menippe mercenaria*, occurring in the Gulf of Mexico and in the area managed under the FMP, i.e., the exclusive economic zone seaward of the west coast of Florida and the Florida Keys. It is the inient of the FMP to manage all stone crabs taken in that management area. Recently, taxonomists described a second species of stone crab, *M. adina*, from the northern and western Gulf and ranging into northwest Florida (Williams, A. B., and D. L. Felder, 1986. Analysis of stone crabs: *Menippe mercenaria* (Say), restricted, and a previously unrecognized speices described (Decapoda: Xanthidae). Proc. Biol. Soc. Wash. 99: 517-543). The two species overlap in the Apalachee Bay region of Florida and hybridize. Consequently, the Gulf stone crab population that is managed under the FMP and described there as a single species is now identified as comprising two species and a hybrid: *Menippe mercenaria; M. adina;* and *M. adina* X *M. mercenaria*. Distinguishing characteristics are coloration, carapace morphometry, and differences in striation patterns and teeth on the claws. The differences are subtle and superficial; therefore, the recognition of this additional species and hybrid does not alter the intent of the FMP to manage all stone crabs found in the management area, the definition of optimum yield, or any of the management measures designed to achieve optimum yield from the fishery.

Accordingly, in order to maintain technical consistency between the intent of the FMP and the text of its implementing regulations, § 654.2 is revised to expand the definition of stone crab to include *Menippe adina* and the hybrid *M. adina* X *M. mercenaria*. This will ensure continued enforcement of all management measures with respect to all stone crabs in the management area, as the FMP intends.

Other Matters

This action is taken under the authority of the FMP and is in compliance with Executive Order 12291.

The Assistant Administrator for Fisheries, NOAA, has determined that it is unnecessary to provide for prior public comment on this rule or to delay for 30 days its effective date. Prior public comment and delay of the effective date are unnecessary because this final rule merely corrects the definition section's scientific description of the population managed under the FMP to incorporate the latest scientific understanding of the composition of that population; it does not increase the population under management, nor have any effect on any fishing practice.

List of Subjects in 50 CFR Part 654

Fisheries, Fishing.

Dated: September 28, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 654 is amended as follows:

PART 654—STONE CRAB FISHERY OF THE GULF OF MEXICO

1. The authority citation for Part 654 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 654.2, the definition for *Stone Crabs* is revised to read as follows:

§ 654.2 Definitions.

* * * * *

Stone crab means *Menippe mercenaria, M. adina,* or the hybrid, *M. adina* X *M. mercenaria.*

* * * * *

Proposed Rules

Federal Register
Vol. 52, No. 191
Friday, October 2, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 35

Basic Quality Assurance in Radiation Therapy

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations concerning the medical use of byproduct material to require its medical licensees to implement certain quality assurance steps that will reduce the chance of therapy misadministrations. This proposed action is necessary to provide better patient safety and a basis for enforcement action in cases of therapy misadministration. The amendment is intended to reduce the chance and severity of therapy misadministrations. The proposed regulations would primarily affect hospitals, clinics, and individual physicians. In an advance notice of proposed rulemaking published elsewhere in this issue of the **Federal Register**, the NRC is also requesting comments on the need for a comprehensive quality assurance program requirement.

Comments: Comments must be received by December 1, 1987. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Submit written comments and suggestions to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Copies of the regulatory analysis and the comments received on this rule may be examined at the Commission's Public Document Room at 1717 H Street NW., Washington, DC. Single copies of the regulatory analysis are available from Norman L. McElroy, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 427–4108.

FOR FURTHER INFORMATION CONTACT: Norman L. McElroy, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 427–4108.

SUPPLEMENTARY INFORMATION:

I. Byproduct Material in Medicine

Use for Patient Care

Radioactive materials are used in drugs in the field of nuclear medicine. Drugs labeled with radioisotopes are known as radiopharmaceuticals. In diagnostic nuclear medicine, patients receive these materials by injection, inhalation, or oral administration. Physicians use radiation detection equipment to visualize the distribution of a radioactive drug within the patient. Using this technology, it is possible to locate tumors, assess organ function, or monitor the effectiveness of a treatment. An estimated 10 million diagnostic nuclear medicine procedures are performed in this country annually. In therapeutic nuclear medicine, larger quantities of radiopharmaceuticals are administered to treat hyperactive thyroid conditions and certain forms of cancer. An estimated 30,000 procedures are performed each year.

Sealed radioactive sources that produce high radiation fields are used in radiation therapy primarily to treat cancer. A radioactive source in a teletherapy machine can be adjusted to direct a radiation beam to the part of the patient's body to be treated. An estimated 100,000 patients receive cobalt-60 teletherapy treatments from NRC and Agreement State licensees each year. Smaller sealed sources with less radioactivity are designed to be implanted directly into a tumor area or applied on the surface of an area to be treated. This procedure is known as brachytherapy. Licensees perform approximately 50,000 brachytherapy treatments annually.

Sealed radioactive sources can also be used in machines that are used for diagnostic purposes. The source provides a beam of radiation that is projected through the patient. A device on the other side of the patient detects the amount or spatial distribution of radiation that goes through the patient. This can provide information about tissues within the patient. This is a relatively new development in the field of medicine and the NRC has no estimate of the number of these diagnostic procedures performed annually.

State and Federal Regulation

Many states, known as Agreement States, have assumed responsibility for regulating certain radioactive materials within their respective borders by agreement with the NRC. (This kind of agreement is authorized by the Atomic Energy Act.) They issue licenses for the medical use of byproduct material, and currently regulate about 5,000 licensees. In non-Agreement States, the NRC has licensed 2,200 medical institutions (mostly hospitals and clinics) and 300 physicians in private practice. These licenses authorize certain diagnostic and therapeutic uses of radioactive materials.

II. NRC's Regulatory Program

NRC's Policy Regarding the Medical Use of Byproduct Material

In a policy statement published February 9, 1979 (44 FR 8242), the NRC stated:

1. The NRC will continue to regulate the medical uses of radioisotopes as necessary to provide for the radiation safety of workers and the general public.
2. The NRC will regulate the radiation safety of patients where justified by the risk to patients and where voluntary standards, or compliance with these standards, are inadequate.
3. The NRC will minimize intrusion into medical judgments affecting patients and into other areas traditionally considered to be a part of the practice of medicine.

The NRC has the authority to regulate the medical use of byproduct material to protect the health and safety of patients, but also recognizes that physicians have the primary responsibility for the protection of their patients. NRC regulations are predicated on the assumption that properly trained and adequately informed physicians will make decisions in the best interest of their patients.

NRC's Responsibilities in the Medical Use of Byproduct Material

The NRC draws a line between the unavoidable risks attendant to purposefully prescribed and properly performed clinical procedures and the unacceptable risks of improper or careless use of byproduct material in medicine. The NRC is obliged, as part of its public health and safety charge, to establish and enforce regulations that protect the public from the latter.

Reports of Misadministrations in Radiation Therapy

The NRC has published a study of the twenty-seven therapy misadministrations that were reported over the period November 1980 through July 1984.[1] The following NRC analysis of these events provides the basis for determining that a need exists for this rulemaking.

The specific causes of the misadministrations, detailed in Table 1, are, of course, related to the treatment modality. Nonetheless, three basic themes run through the reports: inadequate training, inattention to detail, and lack of redundancy.

Table 1.—Therapy misadministrations reported to NRC from November 1980 to July 1984

Teletherapy

Prescription
- Total daily dose was delivered from each port (2) *
- Oral and written prescriptions were different (1)
- Boost dose of 500 rad/3 da was interpreted as 500 rad x 3 da (1)
- Proper body side was not clear (1)

Treatment planning
- Tumor depth was incorrectly measured (1)
- Tumor depth was incorrectly recorded (1)
- Dosimetrist used wrong computer program (1)
- Dosimetry tables for wrong unit were used (1)
- Arithmetic mistakes were made (3)

Records
- Arithmetic mistakes were made (1)
- Poor handwriting of numerals caused misunderstanding (1)

Physical measurements
- Wedge factors were measured incorrectly (1–53 patients affected)

Application
- Field blocks were not used (1)

Brachytherapy

Treatment planning
- Dose rate was much higher than first estimated (1)

Application
- Wrong sources were loaded in applicator (2)
- Source fell out of applicator (1)
- Source was improperly seated in applicator (1)

Radiopharmaceutical Therapy

- Wrong Radiopharmaceutical was administered (2)
- Assay date on unit dosage was not read (3)
- Patient was improperly identified (1)

Improved training of medical personnel who handle and administer byproduct material can reduce the potential for error. Thorough training should also clearly impress on each individual involved in the medical use of byproduct material that a clear communication of concepts and quantities as well as systematic checks for revealing mistakes early in the process are both essential for the delivery of quality care. All information integral to the process, whether specific to the patient or to the clinic, should be carefully examined for clarity, applicability, and correctness. Each individual involved in the process should be strongly encouraged to ask for clarification if there is any unclear or unexpected step or if an expected step is missing.

Inattention to detail is often the medium in which a misadministration event germinates. NRC recognizes that this problem is not specific to the medical use of byproduct material. Computerized radiation therapy treatment planning may reduce the chance of mistakes in sealed source treatment planning, and "record and verify" systems that check teletherapy unit orientations and settings may reduce the chance of mistakes in teletherapy administration. But even these systems must ultimately rely on quantities that are initially measured, recorded, and entered into memory by individuals.

Lack of redundancy means that there exist no independent mechanism for detecting errors. An independent verification requires examination by a second individual of each data entry, whether a physical measurement or a number copied from a table of values, as well as a check of arithmetic operations for correctness. Redundancy requires that two separate systems produce the same result. For purposes of planning radiation therapy, the best method of early detection of mistakes may be a simple independent check. Independent verification may also need to be incorporated into procedures for measuring radiation parameters, using those measurements for treatment planning, and applying radiation to patients. In radiation therapy or any other endeavor, an independent outside auditor can detect mistakes in both process design and process application as well as cite where a change in the process might reduce the chance for future error.

These observations have led the NRC to some general conclusions regarding quality assurance.

The radiation therapy process should be planned with the realization that individuals are likely to make mistakes. Some simple aids may include using tables and graphs that are clearly titled and easy to read, and use of a uniform written prescription format. NRC inspections have revealed that about ten percent of teletherapy unit calibrations and sopt-checks are incomplete. Checklists could be used to assure completeness.

Independent verification must be made integral to the design of the radiation therapy process. All entries and calculations in a treatment plan should be checked by an individual who did not construct the treatment plan. Each patient's chart should be reviewed weekly to check for accumulated dose and implementation of prescription changes. A quality assurance program for the teletherapy unit should include a periodic check of the teletherapy unit output and an occasional detailed examination of the complete teletherapy process, including physical measurements, by an outside expert with an eye towards systematic errors and system improvements.

A program that requires a physical measurement of the dose or amount of radioactivity actually administered to the individual patient would provide assurance that the given dose is the same as the prescribed dose. Such measurements are now done for radiopharmaceutical therapy and occasionally for some teletherapy cases, but because of expense or unavailability of equipment are not commonplace in sealed source therapy.

Reports of Diagnostic Misadministrations That Result in Doses in the Therapy Range

The NRC has also published a report on misadministrations of diagnostic dosages of iodine-131 that lead to doses in the therapy range.[2] The report was a

[1] For a copy of this report, write to Kathleen M. Black, Office for Analysis and Evaluation of Operational Data, Nuclear Regulatory Commission, Washington, DC 20555. Ask for report AEOD/C505.

* Numbers in parentheses indicate number of events of the type described.

[2] For a single copy, submit a request for report number AEOD/N701 to the address in footnote 1.

review of fourteen recent misadministration events in which patients were administered one to ten millicuries of iodine-131 with a resulting thyroid dose of several thousand rads. Many of the events demonstrated that the physician authorized user failed to review the medical history of the referred patient to determine the suitability of a particular clinical procedure. In many cases the referring physician, who is not a nuclear medicine expert, and the nuclear medicine technologist, who is not a medical expert, determine which radiopharmaceutical should be administered. Furthermore, in some events technologists unfamiliar with the clinical procedure prescribed by the authorized user mistakenly administered a dosage that was not requested. It is apparent, therefore, that whenever radiopharmaceuticals capable of producing therapy doses are used, clear nomenclature, independent verification, and adequate training are essential.

Earlier NRC Efforts

This is not the first time the NRC has examined the matter of quality assurance in the medical use of byproduct material. In 1979 the NRC issued some basic quality assurance requirements for teletherapy (see 44 FR 1722, published January 8, 1979). This rulemaking was precipitated by the inaction of a single licensee. The output of a teletherapy unit was incorrectly calculated and the licensee made no physical measurements to determine whether the calculation was correct. This inaction resulted in cobalt-60 teletherapy being misadministered to 400 patients. The 1979 rule addressed the circumstances surrounding that event but did not critically examine the entire radiation therapy process.

Voluntary Initiatives

The Commission is aware of voluntary initiatives to improve quality assurance. A notable example is the Patterns of Care study managed by the American College of Radiology. In addition to comparing prescriptions, methods of applying radiation, and survival rates for certain diseases at various therapy facilities across the nation, methods of calculating and measuring applied dose rates are examined for accuracy. Such an examination can detect whatever procedural flaws may be present as well as determine the precision and accuracy of day-to-day service.

It is NRC's position that voluntary programs alone may not provide adequate assurance of public health and safety. Serious misadministrations continue to occur. The NRC would be remiss in its responsibilities were it to fail to examine thoroughly all avenues available to reduce unnecessary exposure from licensed material.

Summary

The NRC believes many misadministrations could reasonably be avoided if certain basic quality assurance steps were included in the radiation therapy process.

Other Actions

The NRC recognizes that the medical use of byproduct material is a complex field, and that preparing regulations to reduce the likelihood of misadministrations must be done carefully. However, the NRC cannot allow the complexity of medical use to prevent it from taking regulatory action when patients are harmed by the incorrect application of byproduct material. The NRC has balanced these competing desiderata by preparing two rulemaking actions for contemporary publication.

This Notice of Propose Rulemaking (NRC) will provide the foundation for a basic quality assurance program that addresses some simple sources of error that have come to light under NRC's misadministration reporting program. Elsewhere in this issue of the **Federal Register**, the NRC has published an Advance Notice of Proposed Rulemaking (ANPR) that provides the foundation for a comprehensive quality assurance program requirement that addresses broad areas where error can lead to a misadministration.

The NRC believes this two-pronged approach to the problem of misadministrations provides the best balance between the need to assure public health and safety without inadvertently interfering in the delivery of quality medical care.

III. Discussion of Proposed Regulatory Text

The NRC staff has examined literature on the radiation therapy process and consulted with experts practicing in the field of radiation therapy to discuss these quality assurance steps. The NRC believes that the following steps are basic to the radiation therapy process. The regulations that would require implementation of these steps will provide guidance for improved patient safety and will also provide a basis for NRC enforcement action should these steps not be followed.

Section 35.2 Definitions.

The NRC has added several definitions to the regulations to ensure that the regulatory requirements are clear. The definitions are intended to be similar to those already in use in radiation therapy.

Section 35.39 Ordering, prescribing, and administering certain radiopharmaceuticals.

There have been a number of misadministrations in which an unclear oral prescription by the authorized user resulted in the licensee ordering the wrong radiopharmaceutical. Confusing colloidal and soluble phosphorus-32 is a common mistake. The NRC is particularly concerned with the medical use of iodine-131 because of the high thyroid dose that results when a patient with a normal thyroid is misadministered an iodine-131 dosage intended for a patient whose thyroid has been removed.

These misadministrations appear to be precipitated by unclear instructions. This section would require close participation of the nuclear medicine physician in those cases involving the use of radio-pharmaceuticals that are clearly hazardous to the patient if misadministered.

In drafting this section the Commission considered applying these requirements to all licensees when using any diagnostic radiopharmaceutical. For the following reasons the scope of the section was limited to therapy radiopharmaceuticals and radiopharmaceuticals of iodine.

There is a clear history of misadministration of these two groups of radiopharmaceuticals, and medical experts generally agree that there is clear potential for harm to patients that receive these misadministrations. For the other radiopharmaceuticals identified in 35.100 and 35.200, the record shows that most misadministrations involve either the conventional administration of a radiopharmaceutical to the wrong patient, or the conventional administration of the wrong radiopharmaceutical to the patient (see "NCR Reports on Misadministrations and Unannounced Safety Inspections," Journal of Nuclear Medicine, v27, n7, p1102, July 1986). Neither of these types of misadministration pose a clear hazard to the patient. To misadminister a diagnostic radiopharmaceutical other than iodine in a manner that would pose a hazard to the patient would, in the most likely circumstance, require administration of at least a full day's

inventory of the radiopharmaceutical to the patient.

However, the absence of additional quality assurance requirements for diagnostic radiopharmaceuticals other than iodine should not be interpreted as Commission lack of interest in this matter. The Commission would appreciate public comment on how it might address future diagnostic applications of radioisotopes which, if misadministered, could produce doses in the therapy range.

Section 35.43 Prescriptions and records of medical use for therapy.

The NRC has received one therapy misadministration report in which radiation was administered to a patient who had not been referred for medical use of byproduct material. The NRC believes that a physician with special training and experience is needed to consult with the primary care physician in cases of referral, and make a determination that a clinical procedure that requires radiation dose to the patient is indicated.

When a decision has been made to treat a patient for any malady, whether with radiation, surgery, or drugs, a physician makes a patient chart that includes information about the care provided for the patient. The chart is made for medical and legal reasons. All charts contain the patient's name, the results of laboratory tests and physical examinations, a statement of diagnosis, and a prescription. Charts for teletherapy patients usually indlude: (1) Photographs of the patient's face and the treatment area; (2) the treatment plan (which is comprised of: (a) Diagrams of physical measurements of the patient, portal arrangements used to administer the radiation dose, and devices used to midify the radiation beam, (b) calculations made to determine how long the beam must be applied each day to deliver the prescribed dose, and (c) the number of days radiation is to be administered); (3) a record of each daily application of radiation made at the time of application; and (4) records of any physical measurements of radiation or portal verification films made specifically for the patient. Charts for brachytherapy patients include the same type of information, but the diagrams and calculations refer to implanted radiation sources rather than externally applied radiation beams. Each entry in a chart is dated and signed or initialed.

The NRC considered preparing prescriptive recordkeeping requirements for the application of therapeutic amounts of radiation, but believes that the patient charts and calibration records that licensees make and retain usually contain the information needed to demonstrate that the licensee has implemented a quality assurance program. However, the NRC would appreciate public comment on this matter.

Several therapy misadministrations have been precipitated by unclear prescriptions. In radiation therapy, a different dose is prescribed for each patient, depending on the type and extent of the malady. Therefore, requiring a legible handwritten or typed prescription on the patient's chart appears to be the most efficient way of ensuring clear communication between the prescribing physician and the dosimetrist who makes the calculations to determine how long radiation must be applied to deliver the prescribed dose.

The NRC believes that it is possible that some dosimetrists or technologists may be disinclined to request clarification of instructions and this may lead to misadministrations. Therefore, the NRC would require licensees to specifically instruct workers to request clarification in cases where there may be ambiguity or error.

The NRC is considering prescribing what documentation is needed to demonstrate that an independent check of data transfers and calculations had been made. The NRC has not included such a requirement in the proposed rule, but would appreciate comment on this matter.

Section 35.65 Discrepancies in records and observations.

On occasion licensees have complied with required safety measures, such as performing surveys, yet not taken nitigating or corrective actions that the NRC believes were obviously necessary to assure public health and safety. The purpose of this section is to clearly require licensees to resolve discrepancies in records and observations.

The NRC foresees the possibility of many kinds of discrepancies. The licensee's measurement of the source strength of a brachytherapy source may differ from the manufacturer's reported source strength. A thin patient may present a surface lesion, yet the patient's record may refer to a deep-seated lesion with extensive overlying tissue. A post-mastectomy patient may be referred for a prophylactic treatment with no clear statement prescribing whether the tissue surrounding the site of surgery or the remaining breast tissue is to be treated. The prescription in the chart may not be in accord with the prescription agreed to by the physician, physicist, technologist, and dosimetrist during a treatment planning meeting. Daily tallies of administered dose may not agree with projections made by multiplying the daily dose by the number of treatment days.

If, when faced with an obvious discrepancy, a licensee, physician, physicist, technologist, dosimetrist or other individual fails to take reasonable clarifying, mitigating, or corrective action and the discrepancy results in a misadministration, then a citation will issue under this section.

Section 35.432 Source strength measurements.

The radiation dose rate from a sealed source, which is known as source strength, depends on the amount of radioactivity in the source and the material used to encapsulate it. (See National Council on Radiation Protection and Measurements Report Number 41, "Specification of Gamma-Ray Brachytherapy Sources," Chapter 4.) [3] Manufacturers usually provide source strength information with sources, but the NRC believes that an independent measurement is needed to ensure that the information relates specifically to the source under consideration.

However, the NRC would not require licensees to use these measurements in dose calculations. In some cases, manufacturers are able to provide more accurate measurements of source strength than licensees; the licensee must be free to use the source strength that it believes is the most accurate.

Sections 35.452 and 35.652 Physical measurements of patients.

The NRC knows that does rates depend to some extent on the tissue volume to be treated and its depth within the patient. These parameters may be determined by physical examination or examination of images such as radiographs, or images from computerized tomography, ultrasound, nuclear medicine, or nuclear magnetic resonance. The NRC considered requiring that two individuals independently make the physical measurements of the patient that are needed for dosimetry purposes, and believes that such a requirement may reduce the chance of misadministrations. The NRC would like comment on this matter.

[3] Copies of this report may be purchased by contacting NCRP Publications, P.O. Box 30175, Washington, DC 20014.

Section 35.454 Check of dose calculations, and § 35.654 Checks and measurements of dose.

Dose calculations are made for each teletherapy and brachytherapy patient before radiation is administered to determine how long the source must be used to deliver the prescribed radiation dose to the treatment volume. Several therapy misadministrations have been precipitated by arithmetic mistakes or incorrect assumptions in dose calculations. An independent check will likely uncover many of these mistakes.

Ideally, teletherapy dose calculations should be checked before radiation is administered, and the NRC expects that most licensees already do this. However, a second person may not always be available to check the dose calculations before therapy begins. The NRC believes that requiring the check to be made before 20 percent of the dose has been administered provides a proper balance between patient safety and administrative flexibility for the license.

For most brachytherapy cases, final dose calculations cannot be performed until the sources are implanted in the patient because the exact location of the sources with respect to certain tissues cannot be predetermined. Brachytherapy sources are typically left in place for two to three days. Thus, a 20 percent criterion may be difficult to meet in many cases, because the check would have to be made within hours after the sources are implanted. Thus, the NRC has selected a dose calculation check criterion of 50 percent.

Public comments are invited on the workability of these 20 percent and 50 percent criteria.

There are two usual methods for performing checks of manual dose calculation. Two individuals may independently calculate treatment times and compare results. Alternatively, one individual may make the calculation and then a second individual can examine each entry and arithmetic operation to verify its accuracy.

The NRC considered requiring that licensees perform a manual check of the dose to a single point in the treatment volume predicted by computer-generated dose calculations. However, checks of computer-generated dose calculations pose difficult problems. It is not clear whether nomograms or manual algorithms are available that can be used to check the accuracy of computer-generated dose calculations. Many computer programs that are used contain steps for calculating the effect on the dose caused by tissue density differences, organ and tissue contours, and radiation field contours. The NRC believes that a manual check of a computer calculation with that many physical correction factors may be beyond the reasonably expected means of many licensees, and may adversely affect the delivery of medical care. Therefore, the NRC has only drafted a requirement that a second individual assure that the correct parameters, such as radionuclide, dose, and physical measurements of patients, were used in the computer-generated dose calculation printout to information in the patient's chart, and examining each relevant piece of information on the calculation printout.

The NRC would appreciate comments on the best method for documenting that these checks have been made.

Regarding the concept of "independent check," the NRC would particularly appreciate comments on whether a second individual should begin with only the prescription, independently calculate the dosimetry and treatment plan, and then compare those results with those of the first individual.

In teletherapy, the arithmetic that sums the daily administration of radiation must also be checked. Radiation is usually administered in daily doses over several days or weeks and each dose is recorded in the patient's chart. A weekly check will assure the daily doses have been summed correctly. In contrast, brachytherapy is administered continuously until the prescribed dose has been given; thus, there is no need for a comparable requirement.

One recent teletherapy misadministration occurred in a case in which an unusual treatment configuration of the teletherapy unit, the beam collimators, and the patient was required. Whereas an arithmetic mistake would likely be obvious in a commonly used configuration because certain calculated values for patients usually fall within small ranges, an unexpected treatment time in an uncommon configuration would likely be attributed to the uncommonness of the configuration rather than triggering an examination of calculations for a dosimetry mistake. Therefore, the NRC believes that a physical measurement of the dose rate should be made if the teletherapy unit settings or beam modifying devices used for a patient fall outside the ranges examined during the last set of full calibration measurements.

The NRC considered requiring physical measurements for brachytherapy but believes the methodolgy (comprised of a comparison of calculated and measured dose rates) that is needed to make such measurements has not been fully developed. The NRC also considered requiring that two individuals verify that the correct sources were being implanted. This would clearly add to workers' radiation dose, but it is not clear that this would reduce the number of brachytherapy misadministrations.

The NRC knows that some treatments must be administered within hours after a decision has been made to administer radiation therapy. These cases usually involve compression of the spinal cord or superior vena cava, respiratory distress, brain metastases, or severe vaginal bleeding. In such cases, it may not be possible for the licensee to perform an independent check of calculations.

The NRC believes the prescribing physician is best situated to determine whether the time needed to make normal quality assurance checks might jeopardize the patient's health. This provision is not intended to give licesees a basis for not providing the required quality assurance steps in a timely fashion.

Section 35.632 Full calibration measurements.

In one misadministration event, 53 patients received doses of radiation different from the doses that were prescribed because to mistake was made when measuring the effect of certain bean modifying devices on the teletherapy unit output. The NRC believes the revalidation of the effect of these devices on the output is just as important as the annual full calibration itself.

Section 35.633 Independent check of full calibration measurements.

All teletherapy dose calculations are based on the output of the teletherapy unit, which is measured each year as part of the full calibration. If a mistake were made in that measurement, all dose calculations would be incorrect. Therefore, the NRC believes there should be an independent check of the output that we determined during the full calibration. The check should be made by a teletherapy physicist because that individual has special training and experience in the measurement of therapeutic radiation.

The check should be made using a measuring system other than the system used in the full calibration. This will better assure that any mistake made in the methodolgy or the calibration of dosimetry equipment will not go unnoticed. (The term "measuring system" is used in a broad sense here to

mean not just the dosimetry equipment, but the personnel, records, site-specific methodolgy, and even origin of dosimetry equipment calibration when possible. However, the NRC is not certain that this would be available to all licensees and requests comment on this matter.) The device used to make the output measurement could be one described in § 35.630 "Dosimetry equipment." Alternatively, it could be made using a specialized dosimetry service available by mail. Some organizations supply licensees with precisely calibrated thermoluminescent dosimeters within a device made of "tissue-equivalent" material. The licensee irradiates the device, calculates the given dose, and returns the dosimeters to the organization by mail. By processing the thermoluminescent dosimeters, the organization can measure the given dose and compare that measure to the calculated given dose. This provides assurance that the output has been correctly measured.

IV. Administrative Statements

Environmental Impact: Categorical Exclusion

The NRC has determined that this regulation is the type of action described in categorical exclusion 10 CFR 51.22(c)(3) and (c)(14). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this proposed regulation.

Paperwork Reduction Act Statement

This proposed rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et seq.). Existing requirements were approved by the Office of Management and Budget under approval number 3150–0010.

Regulatory Analysis

The Commission has prepared a regulatory analysis on this regulation. The analysis examine the costs and benefits of the alternatives considered by the Commission. The analysis is available for inspection in the NRC Public Document Room, 1717 H Street NW., Washington, DC. Single copies may be obtained from Mr. McElroy (see "FOR FURTHER INFORMATION CONTACT" heading).

Regulatory Flexibility Certification

Based on the information available to date, in accordance with the Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b)), the Commission certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The NRC has issued approximately 2,500 medical licenses under 10 CFR Part 35. Of these, approximately 2,200 are held by institutions, and approximately 300 physicians in private practice. Most of the institutional licensees are community hospitals. The size standards adopted by the NRC (50 FR 50241, December 9, 1985) classify a hospital as a small entity if its average gross annual receipts do not exceed $3.5 million, and a private practice physician as a small entity if the physician's annual gross receipts do not exceed $1 million. Under these size standards, some NRC medical licensees could be considered "small entities" for purposes of the Regulatory Flexibility Act.

The number of medical licensees that would fall into the small entity category does not constitute a substantial number for purposes of the Regulatory Flexibility Act.

The primary objective of the rule is to require licensees that provide radiation therapy service to implement certain quality assurance steps that will reduce the chance of therapy misadministrations. The NRC believes that most licensees already perform these steps in order to assure the provision of quality medical care. Therefore, there should not be a significant economic impact on these small entities.

The Commission has prepared a preliminary regulatory analysis for this regulation which contains information concerning the anticipated economic effect of this regulation on licensees and presents the basis for the Commission's belief that the regulation will not result in significant additional costs to any licensees. It is available for public inspection in the NRC Public Document Room, 1717 H Street NW., Washington, DC. Single copies are available from Mr. McElroy.

Because of the widely differing conditions under which licensees covered by this proposed regulation operate, the Commission specifically seeks public comment from small entities. Any small entity subject to this regulation which determines that, because of its size, it is likely to bear a disproportionate adverse economic impact should notify the Commission of this in a comment that indicates: (1) The licensee's size in terms of annual income or revenue, number of employees and, if the licensee is a treatment center, the number of beds and patients treated annually; (2) how the regulation would result in a significant economic burden on the licensee as compared to that on a large licensee; (3) how the regulations could be modified to take into account the licensee's differing needs or capabilities; (4) the benefits that would be gained or the detriments that would be avoided to the licensee, if the regulations were modified as suggested by the Commenter; and (5) how the regulation, as modified, would still adequately protect public health and safety. The Commission is particularly interested in comments on whether individuals with special training and experience (such as treatment technologists, dosimetrists, and radiation therapy physicists) are readily available in the marketplace, either as full-time employees or as a contract service.

Backfit Analysis

The staff has determined that a backfit analysis is not required for this rule because these amendments do not apply to 10 CFR Part 50 licensees.

V. List of Subjects in 10 CFR Part 35

Byproduct material, Drugs, Health devices, Health professions, Incorporation by reference, Medical devices, Nuclear materials, Occupational safety and health, Penalty, Radiation protection, Reporting and recordkeeping requirements.

VI. Text of Proposed Regulations

Under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1954, as amended, and 5 U.S.C. 553 the NRC is proposing to adopt the following amendments to 10 CFR Part 35.

PART 35—MEDICAL USE OF BYPRODUCT MATERIAL

1. The authority citation for Part 35 is revised to read as follows:

Authority: Secs. 81, 161, 182, 183, 68 Stat. 935, 948, 953, 954, as amended (42 U.S.C. 2111, 2201, 2232, 2233); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273): §§ 35.11, 35.13, 35.20 (a) and (b), 35.21 (a) and (b), 35.22, 35.23, 35.25, 35.27 (a), (c) and (d), 35.31(a), 35.39, 35.43, 35.49, 35.50(a)–(d), 35.51(a)–(c), 35.53 (a) and (b), 35.59 (a)–(c), (e)(1), (g) and (h), 35.60, 35.61, 35.70(a)–(f), 35.75, 35.80(a)–(e), 35.90, 35.92(a), 35.120, 35.200(b), 35.204 (a) and (b), 35.205, 35.220, 35.302, 35.310(a), 35.315, 35.320, 35.400, 35.404(a) 35.406 (a) and (c), 35.410(a), 35.415, 35.420, 35.432, 35.454, 35.500, 35.520, 35.605, 35.606, 35.610 (a) and (b), 35.615, 35.620, 35.630 (a) and (b), 35.632(a)–(f), 35 633, 35.634(a)–(i), 35.636 (a) and (b), 35.641 (a) and (b), 35.643 (a) and (b), 35.645 (a) and (b), 35.654, 35.900, 35.910, 35.920, 35.930, 35.932, 35.934, 35.940, 35.941, 35.950, 35.960, 35.961, 35.970, and 35.971 are issued under sec. 161b., 68 Stat. 948 as amended (42 U.S.C. 2201(b)); and §§ 35.14, 35.21(b), 35.22(b), 35.23(b), 35.27 (a) and (c), 35.29(b), 35.33(a)–(d), 35.36(b),

VOL 52 ISS 191 OC 2 1987 UMI

35.39, 35.43 (b) and (d), 35.50(e), 35.51(d), 35.53(c), 35.59 (d) and (e)(2), 35.59 (g) and (i), 35.70(g), 35.80(f), 35.92(b), 35.204(c), 35.310(b), 35.315(b), 35.404(b), 35.406 (b) and (d), 35.410(b), 35.415(b), 35.610(c), 35.615(d)(4), 35.630(c), 35.632(g), 35.634(j), 35.636(c), 35.641(c), 35.643(c), 35.645, and 35.647(c) are issued under sec. 161o., 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In Subpart A—General Information, § 35.2, the following terms are added in alphabetical order:

§ 35.2 Definitions.

* * * * *

"Beam modifying devices" means items such as trays, wedges, compensators, boluses, and blocks that are used to change the radiation dose profile within the patient.

* * * * *

"Computer-generated dose calculation" means a dose calculation that has been made by a computer program with no human action necessary other than the input of patient data, selection of a certain computer program, and the instruction to the computer to begin calculation.

* * * * *

"Manual dose calculation" means a calculation made by an individual using patient data, tabulated data or graphs, nomograms, and a calculator that was not specifically designed or programmed for radiation therapy calculations.

* * * * *

"Patient chart" means a record of the diagnosis and radiation treatment applied to a patient. It may be part of the hospital admission chart prepared for each patient and kept with the patient, or a chart prepared primarily as a result of radiation treatment and kept in the clinic.

* * * * *

"Prescription" means the written instruction to make medical use of byproduct material for the benefit of a specific patient.

* * * * *

"Source strength" means the exposure rate at a specified distance from a source (usually expressed as roentgens per hour at one meter), the amount of radioactivity in source (usually expressed as millicuries), or the amount of a different radionuclide that produces the same dose rate (usually expressed as milligrams of radium equivalent).

* * * * *

3. In Subpart B—General Administrative Requirements, § 35.39 is added to read as follows:

§ 35.39 Ordering, prescribing, and administering certain radiopharmaceuticals.

(a) A license may not order any radiopharmaceutical of iodine for diagnosis or therapy or any radiopharmaceutical for therapy without the approval of the authorized user.

(b) A physician may not prescribe administration of a radiopharmaceutical of iodine for diagnosis or therapy or any radiopharmaceutical for therapy without personally examining the patient and the patient's chart, and consulting with the referring physician if reasonably available. Prescriptions for these byproduct materials must be in writing, and must include the patient's name, the radiopharmaceutical, dosage, and route of administration.

(c) A licensee may not administer a radiopharmaceutical of iodine for diagnosis or therapy or any radiopharmaceutical for therapy without comparing the radiopharmaceutical label and dosage on hand with the physician's prescription.

4. In Subpart B—General Administrative Requirements, § 35.43 is added to read as follows:

§ 35.43 Prescriptions, records, and checks of medical use for therapy.

(a) The authorized user or a physician under supervision of the authorized user shall ensure that, if there is a primary care physician, the patient has been referred for a therapeutic clinical procedure that requires the medical use of byproduct material.

(b) Before beginning a patient's treatment, the licensee shall verify that the authorized user or a physician working under supervision of the authorized user has personally made, dated, and signed a written prescription in the patient's chart that identifies the body part to be treated. Any change in the prescription must also be made in writing in the patient's chart, and must be dated and signed.

(1) For radiopharmaceutical therapy, the prescription must also identify the radiopharmaceutical, the amount of activity to be administered, and the route of administration.

(2) For brachytherapy, the prescription must also identify the sources of radiation and the total tumor dose.

(3) For teletherapy, the prescription must also identify the teletherapy unit to be used, the prescribed dose, and the treatment plan.

(c) Prescriptions and other records made regarding the medical use of byproduct material must be legible and unambiguous.

(d) The licensee shall instruct all workers involved in the radiation therapy process orally and in writing to request clarification from the prescribing physician if any element of a prescription or other record is unclear, ambiguous, or apparently erroneous.

5. In Subpart C—General Technical Requirements, § 35.65 is added to read as follows:

§ 35.65 Discrepancies in records and observations.

A licensee may not use byproduct material for medical use on a patient if there is a discrepancy in records, observations, or physical measurements that may result in a misadministration. A licensee may resume use after resolving the discrepancy.

6. In Subpart F—Radiopharmaceuticals for Therapy, § 35.302 is added to read as follows:

§ 35.302 Administration of radiopharmaceutical dosages.

A licensee shall verify that the prescribed radiopharmaceutical is being administered by comparing the written prescription and the container label.

7. In Subpart G—Sources for Brachytherapy, § 35.432 is added to read as follows:

§ 35.432 Source strength measurements.

(a) A licensee shall measure the source strength of sources before first use and annually thereafter. Sources that are in storage and not being used do not have to be measured; they must be measured before they are placed in service again. For sources manufactured and supplied in lots of nominally identical sources, a sample from each lot may be selected rather than measuring each source.

(b) When performing dose calculations, a licensee may use the source strength reported by the manufacturer rather than using the source strength measured by the licensee.

8. In Subpart G—Sources for Brachytherapy, § 35.452 is added to read as follows:

§ 35.452 Physical measurements of patient. [Reserved]

9. In Subpart G—Sources for Brachytherapy, § 35.454 is added to read as follows:

§ 35.454 Check of dose calculations.

A licensee shall check dose calculations for accuracy before 50 percent of the prescribed dose has been administered. The check must provide assurance that the final treatment plan will provide the dose prescribed in the patient's chart.

(a) Manual dose calculations must be checked for accuracy by an individual who did not make the calculations.

(b) Computer-generated dose calculations must be checked by examining the calculation printout to assure that the correct parameters and parameter values were used in the calculation. The check must be made by an individual who did not enter the patient data or prescription into the computer.

(c) If the prescribing physician makes a determination to delay treatment in order to perform the checks of dose calculations required by this section would jeopardize the patient's health because of the emergent nature of the patient's condition, the licensee may provide the prescribed treatment without performing the checks; the prescribing physician shall make a notation of this determination on the patient's chart, and the licensee shall perform the checks as soon as practicable.

10. In Subpart I—Teletherapy, § 35.632, the introductory text of paragraph (b) and paragraph (b)(1) are revised to read as follows:

§ 35.632 Full calibration measurements.

* * * * *

(b) To satisfy the requirement of paragraph (a) of this section, full calibration measurements must include determination of:

(1) The output within ±3 percent for the range of field sizes, range of distances, and selection of beam modifying devices (for example: trays, wedges, and the stock material that is used for making compensators and boluses) used for medical use;

* * * * *

11. In Subpart I—Teletherapy, § 35.633 is added to read as follows:

§ 35.633 Independent check of full calibration measurements.

(a) A licensee shall have an independent check of the output determined within one month after completion of the full calibration required by § 35.632.

(b) The independent check must be performed by a teletherapy physicist who did not perform the full calibration and made using a dosimetry system other than the one used to measure the output during the full calibration. The teletherapy physicist does not have to be listed as a teletherapy physicist on an NRC or Agreement State license. The dosimetry system may be one described in § 35.360, or it may be another system that provides a similar level of accuracy and precision.

12. In Subpart I—Teletherapy, § 35.652 is added to read as follows:

§ 35.652 Physical measurements of patient. [Reserved]

13. In Subpart I—Teletherapy, § 35.654 is added to read as follows:

35.354 Checks of dose calculations and measurements of dose.

A licensee shall check dose calculations for accuracy before 20 percent of the prescribed dose has been administered. The check must provide assurance that the final treatment plan will provide the dose prescribed in the patient's chart.

(a) Manual dose calculations must be checked for accuracy by an individual who did not make the calculations.

(b) Computer-generated dose calculations must be checked by examining the calculation printout to assure that the correct parameters and parameter values were used in the calculation. The check must be made by an individual who did not enter the patient data or prescription into the computer.

(c) A licensee shall make a weekly accuracy check of daily arithmetic calculations that have been made in patient's charts.

(d) If the patient's dose calculations include parameters or parameter values that fall outside the range of those measured in calibrating the teletherapy unit, the licensee shall make a physical measurement of the dose rate to be administered to the patient. This measurement must be made before 20 percent of the prescribed dose has been administered.

(e) If the prescribing physician makes a determination that to delay treatment in order to perform the checks of dose calculations or physical measurements required by this section would jeopardize the patient's health because of the emergent nature of the patient's condition, the licensee may provide the prescribed treatment without performing the checks of dose calculations or physical measurement; the prescribing physician shall make a notation of this determination on the patient's chart, and the licensee shall perform the checks of calculations or physical measurements as soon as practicable.

Dated at Washington, DC, this 29th day of September, 1987.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 87-22826 Filed 10-1-87; 8:45 am]

BILLING CODE 7590-01-M

10 CFR Part 35

Comprehensive Quality Assurance in Medical Use and a Standard of Care

AGENCY: Nuclear Regulatory Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Nuclear Regulatory Commission (NRC) is considering amendment to its regulations that apply to the use of byproduct material for radiation therapy and diagnostic uses involving large radiation dosages. In addition to the current requirements for quality assurance, the contemplated amendments would require licensees that offer teletherapy or brachytherapy services to implement a comprehensive quality assurance program to reduce the chance of misadministrations. The NRC requests public comment on the extent to which additional radiopharmaceutical quality assurance requirements are needed, and invites advice and recommendations on several questions that will have to be addressed in the rulemaking process. The NRC is also requesting comments on some basic quality assurance program requirements set out in a proposed rule published elsewhere in this issue.

DATE: Submit comments by 12/31/87. Comments received after this date will be considered if it is practical to do so but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Mail comments to: The Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Deliver comments to: Room 1121, 1717 H Street NW., Washington, DC, between 7:30 am and 4:15 pm on Federal workdays.

Examine copies of comments received at: The NRC Public Document Room 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Norman L. McElroy, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 427-4108.

SUPPLEMENTARY INFORMATION:

Therapy Use of Byproduct Material

Teletherapy is the application of a beam of radiation emanating from a cobalt-60 source to a patient for a therapeutic purpose, usually curative, prophylactic, or palliative cancer therapy. (High energy x-ray machines

are also used for the same purposes.) As an example, a treatment might be comprised of daily treatments of 200 rads to the tumor volume for five weeks, yielding a total tumor dose of 5000 rads.

Brachytherapy is the insertion of small sealed sources such as cesium-137, iridium-192, gold-198, or iodine-125 into the tumor volume for curative or prophylactic cancer therapy. As an example, a treatment might require insertion of 50 millicuries for 48 to 72 hours, resulting in a tumor dose of 5000 rads.

Radiopharmaceutical therapy is the administration of a radioactive drug for therapeutic purposes. The most common clinical proecedure involves the oral administration of liquid or gelatin-capsuled iodine-131 as sodium iodide. For hyperthyroidism, 5 to 30 millicuries might be administered; for thyroid cancer, 70 to 200 millicuries might be administered.

Most diagnostic uses result in whole body doses of about 0.1 rem and target organ doses of about 2.0 rem. Occasionally, however, as much as 5 millicuries of iodine-131 is administered as a diagnostic dosage for patients who have been treated for thyroid cancer. If this dosage were mistakenly administered to a patient who has no thyroid disease, the thyroid dose would be several thousand rads.

NRC's Policy Regarding the Medical Use of Byproduct Material

In a policy statement published February 9, 1979 (44 FR 8242), the NRC stated:

1. The NRC will continue to regulate the medical uses of radioisotopes as necessary to provide for the radiation safety of workers and the general public.
2. The NRC will regulate the radiation safety of patients where justified by the risk to patients and where voluntary standards, or compliance with these standards, are inadequate.
3. The NRC will minimize intrusion into medical judgments affecting patients and into other areas traditionally considered to be a part of the practice of medicine.

The NRC has the authority to regulate the medical use of byproduct material to protect the health and safety of patients, but also recognizes that physicians have the primary responsibility for the protection of their patients. NRC regulations are predicated on the assumption that properly trained and adequately informed physicians will make decisions in the best interest of their patients.

NRC's Responsibilities in the Medical Use of Byproduct Material

The NRC draws a lien between the unavoidable risks attendant to purposefully prescribed and properly performed clinical procedures and the unacceptable risks of improper or careless use of byproduct material in medicine. The NRC is obliged, as part of its public health and safety charge, to establish and enforce regulations that protect the public from the latter.

Reports of Misadministrations in Radiation Therapy

The NRC has published a study of the twenty-seven therapy misadministrations that were reported over the period November 1980 through July 1984.[1] The following NRC analysis for these events provides the basis for determining that a need exists for this rulemaking.

The specific causes of the misadministrations, detailed in Table 1, are, of course, related to the treatment modality. Nonetheless, three basic themes run through the reports: inadequate training, inattention to detail, and lack of redundancy.

Table 1.—Therapy Misadministrations Reported to NRC From November 1980 to July 1984

Teletherapy

Prescription
- Total daily dose was delivered from each port (2)[1]
- Oral and written prescriptions were different (1)
- Boost dose of 500 rad/3 da was interpreted as 500 rad X 3 da (1)
- Proper body side was not clear (1)

Treatment planning
- Tumor depth was incorrectly measured (1)
- Tumor depth was incorrectly recorded (1)
- Dosimetrist used wrong computer program (1)
- Dosimetry tables for wrong unit were used (1)
- Arithmetic mistakes were made (3)

Records
- Arithmetic mistakes were made (1)
- Poor handwriting of numerals caused misunderstanding (1)

Physical measurements
- Wedge factors were measured incorrectly (1–53 patients affected)

Application
- Field blocks were not used (1)

Brachytherapy

Treatment planning
- Dose rate was much higher than first estimated (1)

Application
- Wrong sources were loaded in applicator (2)
- Source fell out of applicator (1)
- Source was improperly seated in applicator (1)

Radiopharmaceutical Therapy

- Wrong radiopharmaceutical was administered (2)
- Assay date on unit dosage was not read (3)
- Patient was improperly identified (1)

[1] Numbers in parentheses indicate number of events of the type described.

Improved training of medical personnel who handled and administer byproduct material can reduce the potential for error. Thorough training should also clearly impress on each individual involved in the medical use of byproduct material that a clear communication of concepts and quantities as well as systematic checks for revealing mistakes early in the process are both essential for the delivery of quality care. All information integral to the process, whether specific to the patient or to the clinic, should be carefully examined for clarity, applicability, and correctness. Each individual involved in the process should be strongly encouraged to ask for clarification if there is any unclear or unexpected step or if an expected step is missing.

Inattention to detail is often the medium in which a misadministration event germinates. NRC recognizes that this problem is not specific to the medial use of byproduct material. Computerized radiation therapy treatment planning may reduce the chance of mistakes in sealed source treatment planning, and "record and verify" systems that check teletherapy unit orientations and settings may reduce the chance of mistakes in teletherapy administration. But even these systems must ultimately rely on quantities that are initially measured, recorded, and entered into memory by individuals.

[1] For a copy of this report, write to Kathleen M. Black, Office for analysis and Evaluation of Operational Data, Nuclear Regulatory Commission, Washington, DC 20555. Ask for report AEOD/C505.

VOL 52 ISS 191 OC 2 1987 UMI

Lack of redundancy means that there exists no independent mechanism for detecting errors. An independent verification requires examination by a second individual of each data entry, whether a physical measurement or a number copied from a table of values, as well as a check of arithmetic operations for correctness. Redundancy requires that two separate systems produce the same result. For purposes of planning radiation therapy, the best method of early detection of mistakes may be a simple independent check. Independent verification may also need to be incorporated into procedures for measuring radiation parameters, using those measurements for treatment planning, and applying radiation to patients. In radiation therapy or any other endeavor, an independent outside auditor can detect mistakes in both process design and process application as well as cite areas where a change in the process might reduce the chance for future error.

These observations have led the NRC to some general conclusions regarding quality assurance.

The radiation therapy process should be planned with the realization that individuals are likely to make mistakes. Some simple aids may include using tables and graphs that are clearly titled and easy to read, and use of a uniform written prescription format. NRC inspections have revealed that about ten percent of teletherapy unit calibrations and spot-chesks are incomplete. Checklists could be used to assure completeness.

Independent verification must be made integral to the design of the radiation therapy process. All entries and calculations in a treatment plan should be checked by an individual who did not construct the treatment plan. Each patient's chart should be reviewed weekly to check for accumulated dose and implementation of prescription changes. A quality assurance program for the teletherapy unit should include a periodic check of the teletherapy unit output and an occasional detailed examination of the complete teletherapy process, including physical measurements, by an outside expert with an eye towards systematic errors and system improvements.

A program that requiries a physical measurement of the dose or amount of radioactivity actually administered to the individual patient would provide assurance that the given dose is the same as the prescribed dose. Such measurments are now done for radiopharmaceutical therapy and occasionally for some teletherapy cases, but because of expense or unavailability of equipment are not commonplace in sealed source therapy.

Reports of Diagnostic Misadministrations That Result in Doses in the Therapy Range

The NRC has also published a report on misadministrations of diagnostic dosages of iodine-131 that lead to doses in the therapy range.[2] The report was a review of fourteen recent misadministration events in which patients were administered one to ten millicuries of iodine-131 with a resulting thyroid dose of several thousand rads. Many of the events demonstrated that the physician authorized user failed to review the medical history of the referrred patient to determine the suitability of a particular clinical procedure. In many cases the referring physician, who is not a nuclear medicine expert, and the nuclear medicine technologist, who is not a medical expert, determine which radiopharmaceutical should be administered. Furthermore, in some events technologists unfamiliar with the clinical procedure prescribed by the authorized user mistakenly administered a dosage that was not requested. It is apparent, therefore, that whenever radiopharmaceuticals capable of producing therapy doses are used, clear nomenclature, independent verification, and adequate training are essential.

Earlier NRC Efforts

This is not the first time the NRC has examined the matter of quality assurance in the medical use of byproduct material. In 1979 the NRC issued some basic quality assurance requirements for teletherapy (see 10 CFR 35.632 and 10 CFR 35.634). This rulemaking was precipitated by the inaction of a single licensee. The output of a teletherapy unit was incorrectly calculated and the licensee made no physical measurements to determine whether the calculation was correct. This inaction resulted in cobalt-60 teletherapy being misadministered to 400 patients. The 1979 rule addressed the circumstances surrounding that event but did not critically examine the entire radiation therapy process.

Voluntary initiatives

The Commission is aware of voluntary initiatives to improve quality assurance. A notable example is the Patterns of Care study managed by the American College of Radiology. In addition to comparing prescriptions, methods of applying radiation, and survival rates for certain diseases at various therapy facilities across the nation, methods of calculating and measuring applied dose rates are examined for accuracy. Such an examination can detect whatever procedural flaws may be present as well as determine the precision and accuracy of day-to-day service.

It is NRC's position that voluntary programs alone may not provide adequate assurance of public health and safety. Serious misadministrations continue to occur. The NRC would be remiss in its responsibilities were it to fail to thoughly examine all avenues available to reduce unnecessary exposure from licensed material.

Summary

The NRC believes many misadministrations could reasonably be avoided if certain quality assurance steps were included in the radiation therapy process.

Other Actions

The NRC recognizes that the medical use of byproduct material is a complex field, and that preparing regulations to reduce the likelihood of misadministrations must be done carefully. However, the NRC cannot allow the complexity of medical use to prevent it from taking regulatory action when patients are harmed by the incorrect application of byproduct material. The NRC has balanced these competing desiderata by preparing two rulemaking actions for contemporary publication.

This Advance Notice of Proposed Rulemaking (ANPR) will provide the foundation for a comprehensive quality assurance program requirement that will address each source of error that can lead to a misadministration. The NRC elected to prepare the ANPR because of the complexity of medical use. Elsewhere in this issue of the **Federal Register**, the NRC has published a Notice of Proposed Rulemaking (NPR) that provides the foundation for a basic quality assurance program that addresses some simple sources of error that have come to light under NRC's misadministration reporting program.

The NRC believes this two-pronged approach to the problem of misadministrations provides the best balance between the need to assure public health and safety without inadvertently interfering in the delivery of quality medical care.

Effect on the Agreement States Program

Many States, known as Agreement States, have assumed responsibility for regulating certain radioactive materials within their respective borders by agreement with the NRC. (This kind of agreement is authorized by the Atomic Energy Act.) They issue licenses for the use of byproduct material, and currently regulate about 5,000 medical licensees. Because the NRC will request the Agreement States, as a matter of compatibility, to implement regulations equivalent to those that it implements on this matter, state regulatory agencies are asked to comment.

Request for Comments

The NRC has prepared the following questions to elicit comments on methods of preventing misadministrations. Comments need not be confined to these questions alone, discussion of other related topics or alternatives is welcome if the commenter believes this will help to resolve issues related to this rulemaking.

Quality Assurance

General

The following questions apply to the provision of all types of medical use:

1. How can the Commission most effectively implement requirements for comprehensive quality assurance? The Commission has the authority to adopt existing national standards. The Commission, in concert with medical experts, could identify and adopt by rulemaking the key elements in a quality assurance program. The Commission could impose a performance requirement under which licensees would be required to implement a quality assurance program that would provide absolute assurance that there would be no misadministrations. What other mechanisms should be considered?

2. Should the definition of misadministration in 10 CFR 35.2 be changed? Is it clear and complete? Is the definition sufficiently broad to include all approrpiate activities? Is it so broad as to include inappropriate activities? Is the term "misadministration" appropriately descriptive of the activities? Should some more descriptive term be used?

3. The NRC knows of one instance in which radiation was administered to a patient without a request from the primary care physician. Should the NRC require that the authorized user actively consult with the primary care physician before prescribing radiation or deciding that radiation is not needed? How can the chance of miscommunication be reduced? What improvements can be made in terminology, prescription format, and orders?

4. What methods should be considered to provide assurance that the patient to whom radiation is administered is the patient for whom radiation was intended?

5. What current standards exist to ensure the adequacy and uniformity of training of all individuals who participate in the administration of radiation to patients? Should NRC require certification or prescribe specific training criteria for technologists, dosimetrists, and others who participate in the application of radiation to patients, or should NRC have a performance requirement that requires licensees to provide each individual whatever training is necessary? In either case, how can NRC ensure the adequacy and consistency of this training throughout the radiation therapy community? Should the NRC require licensees to administer written examinations to workers and evaluate them before allowing the workers to participate in radiation therapy? Should periodic retraining and re-examination be required?

6. What other regulatory, certifying, accrediting, or inspecting organizations examine medical quality assurance programs? Describe the purpose, objectives, and rigor of these examinations.

7. Should the NRC require physicians to provide patients, upon request, a record of the radiation dose prescribed and/or given? What information should or should not be provided?

8. Apart from increased NRC oversight, what changes in industry practice or standards could improve the quality of performance and minimize human error?

Teletherapy and Brachytherapy

The following questions apply to the provision of teletherapy and brachytherapy services.

1. What performance criteria could be adopted to assure appropriate care, minimize the chance of human error, and mitigate the consequences of potential error?

2. To assure adequacy of continued experience, some organizations recommend that certain surgical or test-tube procedures only be performed if the practitioner has a sufficient case-load to assure that dexterity and familiarity with the procedure are retained. Should NRC require that licensees have a certain minimum case-load to assure that their employees retain their expertise in performing radiation therapy clinical and quality assurance procedures?

3. What fraction of licensees already have a quality assurance program? What are its key elements?

4. The Regulatory Flexibility Act requires that regulatory agencies examine the cost of compliance with regulations. How much does a quality assurance program cost per patient or per year? What fraction of staff time, including physicians, physicists, dosimetrists, technologists, and nurses, is currently budgeted for quality assurance work?

5. Are there complete model quality assurance programs already available that address every step of the radiation therapy process, or will model programs have to be developed? Should physical measurements, redundant calculations, or both be required to assure that the dose given is the same as the dose prescribed? What other areas are, or should be, covered in a complete quality assurance program?

6. Are the staff and equipment that are needed to implement a complete quality assurance program available in the marketplace, or would new training programs and equipment development be needed?

7. Computers are used in radiation therapy to calculate dose distributions and to control the operation of equipment. How could quality assurance of software accuracy and validity be improved? Should licensees be required to verify them? How can user skill and knowledge of the inherent assumptions and limitations of a computer program be assured? Should additional quality assurance requirements be developed to ensure that users understand the algorithms on which the programs are based?

8. What additional methods are available for reducing the frequency or impact of human error?

Radiopharmaceutical Therapy

The NRC requires that licensees use only certain radiopharmaceuticals for specified therapy clinical procedures, measure the radioactivity in radiopharmaceutical dosages before administration, and have a measurement quality assurance program for the dose calibrator used to make that measurement. These requirements appear to encompass the steps in a radiopharmaceutical therapy physical quality assurance program. However, the NRC invites public comment on this position.

There have been cases in which, due to procedural failure, a radiopharmaceutical other than that

intended has been ordered and administered. Many of these cases began with miscommunication between the referring physician and the licensee. Some began with miscommunication between the physician's authorized user and the nuclear medicine technologist. The NRC expects that all licensees have procedural requirements for clear statements of prescription and verification before administration of any pharmaceutical. The NRC would appreciate suggestions on methods to assure that the clinical procedure (including radiopharmaceutical, dosage, and route of administration) intended by the authorized user is prescribed, and that the prescribed clinical procedure is the clinical procedure that is performed. The NRC has observed several cases of miscommunication of the referring physician's request. What improvements can be made to minimize such errors? Are there special needs regarding patient identification in radiopharmaceutical therapy that go beyond the information regarding patient identification that was requested in question 4 of the *General* subsection?

Standards of Care

The following questions apply to the medical use of byproduct material.

1. Is there a clear, generally accepted standard of care that the NRC can adopt? If yes, please describe it. If not, please describe a standard that NRC could adopt. Is a standard needed if NRC has comprehensive prescriptive requirements?

2. What effect would such a standard or comprehensive, prescriptive requirements have on provisions of radiation therapy care?

3. What kinds of penalties should be imposed on licensees, their employees, or both, if the standard or the comprehensive, prescriptive requirements are not met? Should penalties be imposed on employees? Should NRC's Enforcement Policy (see 10 CFR Part 2, Appendix C) be changed, and if so, how?

BILLING CODE 7590-01-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Parts 29, 30, and 34

[Docket No. 87-10]

Adjustable-Rate Mortgages, Real Estate Lending, Due-on-Sale Clauses

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency is publishing for comment amendments to its real estate lending regulations that would consolidate and simplify the Office's rules governing real estate lending by national banks. In particular, important revisions are being proposed for the OCC's adjustable-rate mortgage (ARM) regulation (12 CFR Part 29). This proposed rule would implement recommendations of the Federal Financial Institutions Examination Council to achieve greater uniformity among the regulations of the several depository institution regulatory agencies. The current disclosure provision (12 CFR 29.7) would be rescinded. However, national banks will continue to be subject to the disclosure requirements contained in the Federal Reserve Board's Truth in Lending regulation. In addition, the authority of national banks to deal in ARMs would be broadened to ease the regulatory burden of lenders and eliminate regulatory impediments to the secondary market for ARMs. Certain revisions would be made for greater clarity, and obsolete or unnecessary provisions would be eliminated. Finally, obsolete portions of 12 CFR Part 30, dealing with due-on-sale clauses, would be rescinded and the remaining sections of Part 30 as well as the revised ARM regulation would be transferred to Part 34. This would being all of the Office's substantive real estate regulations together in one place.

DATE: Comments must be received on or before November 2, 1987.

ADDRESSES: Comments should be sent to Docket No. 87-10, Communications Division, Office of the Comptroller of the Currency, 5th Floor, 490 L'Enfant Plaza East SW., Washington, DC 20219. Attention: Lynnette Carter. Comments will be available for inspection and photocopying at the same location.

Pursuant to the Paperwork Reduction Act of 1980, the collection of information requirements in the proposed rule have been submitted to the Office of Management and Budget (OMB). Comments specifically addressing those requirements should be directed to the Comptroller's Office at the above address and should also be submitted to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for Comptroller of the Currency.

FOR FURTHER INFORMATION CONTACT: Roland G. Ullrich, Deputy Director, Consumer Activities Division, (202) 287-4265, or Ellen Starr, Attorney, Legal Advisory Services Division, (202) 447-1880.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal drafter of this document was Christopher Manthey, Attorney, Legal Advisory Services Division.

Background and Analysis

An adjustable-rate mortgage is a mortgage loan in which the interest rate is subject to change at agreed intervals according to changes in a designated independent index of market interest rates. Changes in the interest rate on ARM loans may result in changes in monthly payment amounts or changes in the rate of amortization of principal (changes in the maturity of the loan or the amount of the final payment).

Designed in response to the inflation and high interest rates which prevailed in the late 1970s and early 1980s, ARMs came into widespread use after the various federal depository institution regulatory agencies promulgated regulations governing them. This Office's ARM rules, contained in 12 CFR Part 29, were adopted on March 27, 1981. 46 FR 18932. The Federal Home Loan Bank Board and National Credit Union Administration followed suit in April and July 1981, respectively. Because of the disclosure requirements contained in 12 CFR 29.7, national banks have been exempted from compliance with certain disclosure provisions of the Federal Reserve Board's Truth-in-Lending regulation (Regulation Z) dealing with variable-rate, closed-end credit. 12 CFR 226.18(f) n.43.

Some concerns regarding ARMs have developed in recent years. For instance, there has been considerable congressional and industry interest in

developing uniform disclosures for ARM consumers. In particular, members of Congress have urged that such disclosures contain a "worst case" payment scenario, *i.e.*, a provision that spells out the maximum payment for which the borrower may become liable under the adjustable-rate loan to which he or she is agreeing. This is to prevent "payment shock," which can occur when the consumer finds that, following a payment adjustment, the payments are much larger than anticipated.

Another concern has been the secondary market, in which lenders buy and sell ARM contracts. Such a market has arisen, but its development has been hampered in part by the fact that the different agencies' regulations have dissimilar requirements, especially in the content and timing of disclosures that must be made to consumers. National banks that desire to purchase ARMs in the secondary market have been limited to buying loans that conform to the OCC's rules. This is undersirable since limiting the marketability of ARMs limits the incentive to provide residential mortgage loans in the first instance, causing a needless restriction in the availability of consumer credit. ARM originators who wish to have full access to the secondary market must make multiple disclosures to their borrowers to comply with all of the agencies' requirements. However, providing multiple disclosures is both burdensome for lenders and potentially confusing for consumers.

To address these problems, the Federal Financial Institutions Examination Council (FFIEC), composed of representatives of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, the Federal Home Loan Bank Board, and the National Credit Union Administration, has recommended uniform initial disclosure requirements for ARMs.

In a statement issued August 12, 1986, the FFIEC recommended to the Federal Reserve Board, the Federal Home Loan Bank Board, and the Office of the Comptroller of the Currency that they require the following initial disclosures be given to prospective ARM borrowers: (1) "The Consumer Handbook on Adjustable-Rate Mortgages" (published jointly by the Federal Reserve Board and the Federal Home Loan Bank Board), or a suitable substitute; and (2) disclosures which demonstrate how any particular ARM loan program offered by a creditor may affect borrowers when interest rates change. The later includes up to 14 specific elements, depending upon applicability to the specific loan program involved. The FFIEC's recommendations are similar to the initial disclsoures required by the OCC's current ARM regulation.

The Federal Reserve Board has already moved to implement the FFIEC's recommendations. In a Notice of Proposed Rulemaking published November 24, 1986 at 51 FR 42241, the Board is proposing to amend 12 CFR Part 226 (Regulations Z) to incorporate the FFIEC proposals. At the same time, the Board will add to Regulation Z most of the subsequent disclosure requirements presently contained in the OCC's ARM regulation at 12 CFR 29.7. Since no benefit will be derived from duplicating the rules that the Federal Reserve Board will have in place, the Office believes that it would be more efficient simply to rescind the present disclosure requirements in 12 CFR 29.7. However, to the extent they become incorporated into Regulation Z, the Office will continue to enforce these requirements with respect to national banks.

Beyond the FFIEC recommendations, the Office has concluded that portions of its ARM regulation are no longer necessary and should be rescinded. The regulation has two purposes when originally proposed in 1980. First, it sought to increase the availability of mortgage credit to the public by clarifying that national banks were authorized to make adjustable-rate mortgage loans. In the inflationary environment of the time, it was believed that this would encourage national banks to make and hold residential mortgage loans and promote competition among residential mortgage lenders. Second, it provided protection for consumers by placing restrictions on permissible ARM products and by requiring substantial disclosure. *See generally*, preamble to proposed 12 CFR Part 29, 45 FR 64196, 64198–99, September 29, 1980.

Based on the early experience with ARMs, the regulation was revised substantially in 1983. 48 FR 9506. Implicitly recognizing that market forces were developing products that were prudent for both the lender and the consumer, this revision removed most, but not all, of the original regulation's restrictions on design of the product. It continued to prohibit national banks from purchasing nonconforming loans and retained the disclosure requirements.

The amendments now being proposed would change the types of loans covered, change the disclosure requirements for national banks, and eliminate certain provisions that are believed to be redundant or unnecessary. The revised regulations, together with certain portions of 12 CFR Part 30, would be added to Part 34 so that all of the Office's substantive real estate regulations would be found in one place under the general heading of "Real Estate Lending."

Revisions to 12 CFR Part 30

Another area of concern in the early 1980s was "due-on-sale" clauses in real estate loans. These are clauses that give a lender the right to declare the entire debt payable at once if the property securing the loan is transferred. Many states had restricted or prohibited due-on-sale clauses either by statute or judicial decision. These states reasoned that such provisions discouraged homeowners from selling their property and, therefore, constituted an unreasonable restraint on the sale of housing. The Office, on the other hand, believed that in the volatile interest rate climate of the time, a rule ensuring the enforceability of due-on-sale clauses could encourage banks to offer fixed-rate, long-term mortgage loans with relatively lower interest rates, because of the reduced market risk. *See generally*, 46 FR 46964–65, September 23, 1981.

The debate was resolved with the passage of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, 96 Stat. 1469 ("the Garn-St Germain Act" or "the Act"). Section 341 of the Act, codified at 12 U.S.C. 1701j–3, provided generally that, notwithstanding state law, due-on-sale clauses in real estate loans, regardless of when originated, would be enforceable as to transfers occurring after the date the Act became effective (October 15, 1982). However, this general rule was not applicable during the "window period," *i.e.*, the period beginning with the date of a state rule of law restricting the enforceability of due-on-sale clauses and ending with the effective date of the Act. Due-on-sale clauses in window-period loans were to be enforceable only after the passage of three years from the effective date of the Act, unless a different rule was established by the appropriate regulatory authority. (The OCC did, in fact, establish an earlier cutoff date of April 15, 1984. 12 CFR 30.1(b)(1).) In addition, due-on-sale clauses in certain types of transactions were prohibited.

The Office implemented the Garn-St Germain Act by publishing its due-on-sale regulation, 12 CFR Part 30, on November 8, 1983. 48 FR 51283. Major

portions of the regulation are concerned with the so-called window period which, as noted above, ened on April 15, 1984. Since that time, national banks have been free to enforce due-on-sale provisions without restriction, except in the transactions exempted by the Garn-St Germain Act.

Accordingly, the Office believes that it would be beneficial to simplify this regulation by rescinding the obsolete portions dealing with the window period. These are paragraphs (b) and (d) of § 30.1. Since this constitutes the bulk of the regulation, it is proposed to transfer the remaining valid portions, paragraphs (a) and (c) of § 30.1, to Part 34, "Real Estate Lending," where they would become new § 34.4. The present text would remain unchanged except for minor, nonsubstantive revisions.

Effective Date

National banks will have a six-month transition period, beginning with the effective date of the final rules, in which they may choose to follow either the current regulations in Part 29 or the new regulations in Part 34. At the end of the six-month period Part 29 will be rescinded and compliance with the new Part 34 will be mandatory.

Section-by-Section Analysis

Section 34.4 | Due-on-sale clauses.

This section would be drawn from the present paragraphs (a) and (c) of § 30.1, which would remain unchanged except for minor, technical revisions. In the proposed paragraph (a), the cross reference would be changed to conform to the new arrangement of this section; the phrase "the effective date of this part" would be changed to "December 8, 1983" (the effective date of the present Part 30) to avoid confusion; and the reference to the Trust Territory of the Pacific Islands would be eliminated as obsolete. *See* Compact of Free Association Act of 1985, section 201, 48 U.S.C. 1681 note. In paragraph (b), citations to the United States Code would be added for ease of reference.

Section 34.5 | Definition.

This proposal would revise the definition of an adjustable-rate mortgage loan. An ARM is now defined as any loan to finance or refinance the purchase of, and secured by a lien on, a one- to four-family dwelling where the loan agreement permits the lender to adjust the interest rate after consummation. The definition also includes certain fixed-rate mortgage loan agreements that implicitly permit interest rate adjustments by having the note mature on demand or at the end of an interval shorter than the term of the amortization schedule.

This proposal would amend the present definition of "adjustable-rate mortgage" to cover only extensions of consumer credit to natural persons. The phrase "consumer credit" is drawn from Regulation Z (12 CFR Part 226), and is intended to have the same meaning that it has there. Similarly, the exclusions contained in paragraph (b) of the proposed definition are drawn from the exemptions in Regulation Z, 12 CFR 226.3. The Office expects that, to the extent the terms and concepts in this definition are drawn from Regulation Z, relevant portions of the Official Staff Commentary on that regulation would become persuasive authority in its interpretation. See, *e.g.*, paragraph 3(a) of the Commentary concerning loan purposes.

The purpose of this revision is to clarify that the Offices's ARM regulation is not intended to apply to purchase-money mortgage loans for investment, commercial, business or agriculture purposes. Although the purpose of the original regulation was, in part, to promote the availability of mortgage funds for residential purposes, the language used was broad enough to cover those other types of loans. This has caused confusion in the past, and the Office therefore wishes to take this opportunity to sharpen the focus of the definition. The exclusions contained in proposed paragraph (b)(1) of the definition section are intended as further reinforcement of this position.

The Office is also proposing to eliminate the requirement for a disclosure notice for short-term and demand loans, which would, therefore, be excluded from the proposed definition. Henceforth, these loans would be governed by the disclosure requirements of Regulation Z. Regulation Z requires disclosure of the fact that the loan contains a demand feature and a payment schedule that shows a balloon payment when the loan matures prior to the end of the amortization schedule. In most cases, national banks that offer such loans must give both the Part 29 notice and the Regulation Z disclosure. The Office is not aware of any reported dissatisfaction with Regulation Z's simpler disclosure requirement for these loans and believes it should be guided by the Federal Reserve Board's extensive experience with disclosure in this area.

The Office believes that both borrowers and lenders would benefit from making our regulations more consistent with Regulation Z. However, we are especially interested in receiving comments concerning these proposed changes in the scope of the regulation.

One further adjustment to the definition is being proposed, which would substitute the term "residential manufactured home" for "mobile home" in the types of housing units covered. This term includes both mobile homes and prefabricated homes and better describes today's technology.

Section 34.6 General rule.

The general rule would be changed to eliminate the restriction that national banks can make, sell, purchase, participate, or deal in ARM loans "only if they conform to the conditions and limitations in this part." This change is intended to enhance the ability of national banks to participate in the nationwide secondary market in ARM loans by permitting them to purchase or participate in loans that were made in accordance with another regulatory agency's requirements. Since the various financial regulatory agencies have had dissimilar ARM regulations in the past, especially in the area of disclosure requirements, the effect of the present regulation has been that national banks have been prohibited from purchasing ARM loans simply because they were originated by lenders who were governed by less comprehensive regulations. Typically, other lenders who wish to sell their loans to national banks may be forced to make disclosures required by both OCC and another regulatory agency. This is both burdensome to the lender and potentially confusing to the borrower. Either way, these difficulties have impaired the marketability of ARM loans between different types of financial institutions. Ultimately, it is the consumer who has suffered from reduced availability of mortgage credit. Accordingly, the Office believes it desirable to eliminate this restriction.

It should be noted that this change would not mean that national banks would be free to ignore the remaining substantive requirements of this part or the proposed revisions to Regulation Z when they make ARM loans. New §§ 34.7, 34.8, 34.9 and the disclosure requirements in Regulation Z incorporated in new § 34.10, are applicable by their own terms to ARM loans originated by national banks, without the necessity of so stating in this section. However, to prevent evasion through the use of affiliates, the Office is proposed to add that ARM loans or participations purchased from affiliates must comply with this regulation. Also, a reference to the Northern Mariana Islands would be

added to paragraph (a), to make this section consistent with proposed § 34.4.

Section 34.7 Index.

The index section would be reworded in an effort to achieve greater clarity, but no substantive change from the present regulation is intended.

Section 34.8 Rate changes.

The present section on rate changes would be deleted. In its place would be a provision requiring ARM loans originated on or after December 8, 1987 to include a limitation on the maximum interest rate that may apply during the term of the loan. Such an interest rate cap is required by section 1204 of the Competitive Equality Banking Act of 1987, Pub. L. No. 100–86, 100 Stat. 552. The present section requires that loan documents contain various rules concerning the implementation of the rate changes. However, this requirement would be superfluous since loan documents would need to contain such provisions if the lender wants to make such changes. Moreover, the FFIEC guidelines, proposed to be incorporated into Regulation Z, will include disclosures for the subjects presently covered in § 29.4. See paragraphs 2 e–g of the FFIEC proposals, above.

The present section also contains a requirement that any interest rate changes must be based on the most recent index value as of the date of the change or the date of notification of the change, whichever is earlier. The purpose of this requirement was to ensure that lenders could not arbitrarily choose an advantageous index value. However, it is the Office's view that if a lender followed such a practice, the interest rate would not truly be tied to the index and the loan would not comply with the requirements of the proposed regulation. Accordingly, it is our view that the loss of index provision, through rescission of §29.4, will not harm consumers. However, the Office desires public comments on this point.

Section 34.9 Prepayment fees.

The present § 29.6 on prepayment fees would be renumbered § 34.8.

Section 34.10 Disclosure.

Under this proposal, the Office's present disclosure section would be deleted. The Federal Reserve Board's proposed amendments to Regulation Z, would implement the FFIEC recommendations. The net result is that the OCC would rescind its present disclosure requirements and adopt the FFIEC recommendations by deferring to Regulation Z.

In its August 1986 proposal, the FFIEC recommended to the regulatory agencies that their regulations be amended to require the following initial disclosures, when applicable:

1. "The Consumer Handbook for Adjustable-Rate Mortgages," prepared by the Federal Reserve Board and the Federal Home Loan Bank Board, or a suitable substitute.

2. A "loan program" disclosure (prepared for each adjustable-rate loan program) containing the following information, if applicable:

a. The fact that the interest rate, payment, or term can change.

b. The index or formula to be used and a source of information about the index.

c. How the interest rate and payment will be determined.

d. A statement that the interest rate will be discounted.

e. How the index is adjusted to determine the interest rate, *i.e.*, the margin—and a statement that the consumer should ask about the current margin value and current interest rate.

f. The frequency of interest rate and payment changes.

g. Any rules relating to changes in the index, interest rate, payment amount, and outstanding loan balance (for example, interest rate or payment limitations, negative amortization, and interest carryover).

h. A statement of the maximum interest rate and payment amount under the program if a $10,000 loan had originated at the most recent interest rate shown in the hypothetical example in "j". The example should assume that the interest rate increases as rapidly as possible under the program.

i. If there are no limitations on payment or interest rate increases, a statement to that effect.

j. An example, based on a $10,000 loan amount, of how payments and the loan balance would be affected by changes implemented according to the terms of the loan program. The example should be based on index values beginning in 1977 and be updated annually until a 15-year history is shown. Thereafter, the example should reflect the most recent 15 years of index values. The example shall reflect all significant loan program terms, such as caps, a discounted interest rate, and negative amortization, that are triggered by index movements during the years shown.

k. An explanation of how to calculate the consumer's payment amounts for loans based on multiples of $10,000, with an example using the recent monthly payment shown in the hypothetical example in "j".

l. The fact that a loan program contains a demand feature.

m. What information will be contained in the required notice of an adjustment and how far in advance such notice will be provided.

n. A notice that disclosure forms are available on other ARM loan programs.

In general, the initial disclosure requirements recommended by the FFIEC (and proposed to be adopted by the OCC through reference to the proposed revisions to Regulation Z) are patterned after the OCC's present requirements. The principal differences between the FFIEC proposal and OCC's present requirements include:

- OCC's present disclosure requirements apply to any open-end or closed-end loan to finance or refinance the purchase of a one- to four-family dwelling, including business and agricultural credit. The narrower definition proposed herein would mean that business, investment, and agricultural loans would no longer be subject to comprehensive consumer protection disclosures. Loans to other than a natural person would not be covered.
- The FFIEC proposal would require that a potential borrower be given "The Consumer Handbook for Adjustable-Rate Mortgages," prepared by the Federal Reserve Board and the Federal Home Loan Bank Board, or a suitable substitute. OCC presently requires a brief description of the general nature of ARM loans.
- The FFIEC proposal covers only loans secured by the borrower's principal dwelling. The OCC currently covers any loan to finance or refinance the purchase of a one- to four-family dwelling. (All consumer loans not covered by the FFIEC proposal would continue to be covered by the general requirements of Regulation Z.)
- The FFIEC proposal covers non-purchase-money closed-end credit secured by the borrower's principal dwelling. OCC presently does not unless it is a refinancing of an ARM.
- The FFIEC proposal would require disclosure of the maximum interest rate and payment amount for a $10,000 loan under the bank's program assuming a given interest rate or, if applicable, a statement that there is no limit. OCC presently requires disclosure of the maximum payment assuming a 10 percentage point increase in the index value. If there is no cap, no disclosure of this fact is required.
- The FFIEC proposal woud require disclosure of the effect of historic changes in the interest rate index on a hypothetical $10,000 loan over a 15-year

period. The OCC presently requires disclosure of the effect of increases in the interest rate index on a hypothetical $10,000 loan over a five-year period, with a separate disclosure of a 10-year history of the index.

• The FFIEC proposal would require disclosure of a demand feature, if applicable, but no specific language is mandated. The OCC currently requires a specific bold-face demand/balloon payment notice in addition to the payment schedule presently required by Regulation Z.

• FFIEC items k, m, and n, above, are not currently required by the OCC.

The Offfice solicits comments as to whether or not the FFIEC proposals place an increased disclosure burden on national banks compared to the OCC's present regulation.

The FFIEC recommendations have been incorporated in the proposed revisions to Regulation Z at 12 CFR 226.19(b) (51 FR 42246). Although the Office could amend Part 29 so that it contained the full text of the FFIEC proposals, it believes that it would serve no useful purpose to have duplicate rules and that it would be more convenient for lenders to look only to Regulation Z for disclosure requirements.

The present Regulation Z, unlike the present Part 29, does not contain any subsequent disclosure requirements. The Federal Reserve Board, however, is further proposing to revise Regulation Z to require subsequent ARM disclosures, even though this was not part of the FFIEC proposal. The new subsequent disclosure provisions will be found at 12 CFR 226.20(e) (51 FR 42246). The new provisions resemble this Office's present subsequent disclosure requirements (51 FR 42245). There are some differences between the Federal Reserve's proposals and OCC's present requirements.

Unlike present § 29.7(c), the revised Regulation Z would not require a prompt subsequent disclosure of interest rate changes unless they are coupled with payment changes. Under the amended Regulation Z, notice of interest rate changes that do not result in payment changes would need to be given only once a year instead of at the time of each change. Any negative amortization accruing over a maximum of one year would not be material in relation to the amount of the loan. Notice to the consumer of interest rate changes, accompanied by payment changes, would be increased from 25 days before a payment at the new level is due 30 days before the effective date of the interest rate adjustment. The balance of the proposed subsequent disclosures in Regulation Z are identical to the OCC's present requirements in § 29.7(b). Therefore, the Office believes that it can promote regulatory simplification by rescinding present §29.7(b) and (c) without compromising consumer protection.

Short-term and demand loans, which are defined respectively as mortgage loans that are not fully amortized by the end of the loan term and mortgage loans that are payable on demand, are presently regulated by § 29.7(d). This section requires a standard, boldfaced notice warning of the possibility that such loans may be called or not renewed at maturity of the note. This requirement is in addition to the existing requirements applicable to these loans contained in Regulation Z. *See* 12 CFR 226.18(g) and (i). The Office is not aware of any significant dissatisfaction with Regulation Z's present requirements and believes, particularly in the interests of uniformity, that it should be guided by the Federal Reserve Board's experience in this area. It therefore proposes to eliminate the notice now required for these types of loans. This does not mean that consumers will no longer be placed on notice when they take out such loans. For adjustable-rate short-term and demand loans, a notice requirement is contained in the FFIEC recommendations which are to be incorporated in Regulation Z (see paragraph *1*, above). Accordingly, the Office proposes to eliminate present § 29.7(d).

Section 29.7(e) currently requires lenders to inform borrowers of the initial index value upon which the initial interest rate is based, and to include this index value on the loan note. This requirement is superfluous since this information can be derived from the initial disclosure of the margin or other adjustment mechanism mandated by the proposed revisions to Regulation Z and the initial interest rate. The Office, therefore, proposes to eliminate this requirement. Comment on the desirability of this proposal is requested.

Section 34.11 Nonfederally chartered commercial banks.

Although this section merely repeats authority conferred by statute upon state commercial banks to make ARM loans in accordance with these regulations in lieu of state law, it will be retained for the convenient reference of banks in locating that authority. A citation to the United States Code would be added, and cross references would be changed to conform to the proposed new arrangement.

Section 34.12 Transition rule.

The present transition rule is obsolete and would be replaced with another. As discussed earlier under "Effective Date," national banks will have a 6-month transition period after these proposed rules become final in which they may choose to follow either the current regulations in Part 29 or the new ones in Part 34. At the end of that period, compliance with the new Part 34 will be required. This would mean that for existing adjustable-rate, purchase-money mortgage loans, the subsequent disclosure requirements of revised Regulation Z would apply following the transition period.

Regulatory Flexibility Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act, the Comptroller of the Currency certifies that this proposed regulation will not have a significant economic impact on a substantial number of small banks. All banks should benefit from regulatory simplification and the greater secondary market opportunities that will result from the proposal.

Executive Order 12291

The Office has determined that this proposed rule does not constitute a major rule within the meaning of Executive Order 12291. Accordingly, a Regulatory Impact Analysis will not be required on the grounds that this revision: (1) Would not have an annual effect on the economy of $100 million or more, (2) would not result in a major increase in the cost of bank operations or government supervision, nor would it be likely to generate substantially higher payments for borrowers, and (3) would not have a significant adverse effect on competition, employment, investment, productivity, innovation, or competition with foreign-based entities.

Paperwork Reduction Act

The collection of information requirements contained in this proposed rule have been submitted to the Office of Management and Budget under section 3504(h) of the Paperwork Reduction Act. (OMB Control No. *1557–0183.*)

12 CFR Part 34

Credit, Due-on-sale clauses, Mortgages, National banks, Real estate loans.

For the reasons set forth in the preamble, Title 12, Chapter I, Part 29 of the Code of Federal Regulations is proposed to be amended as follows:

PART 29—[AMENDED]

1. The authority citation for Part 29 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.;* 12 U.S.C. 93a; and 12 U.S.C. 371.

2. Part 29 is amended by adding the following "Effective Date Note:" "Subpart B of Part 34 of this chapter became effective on [insert 45 days after publication of this notice], but national banks have the option of continuing to comply with this Part 29 (in lieu of Part 34) until [insert six months after effective date]."

3. Part 29 is removed effective [insert six months after effective date, above].

For the reasons set forth in the preamble, Title 12, Chapter I, Part 30 of the Code of Federal Regulations is proposed to be amended as follows:

PART 30—[REMOVED]

1. Part 30 is removed.

For the reasons set forth in the preamble, Title 12, Chapter I, Part 34 of the Code of Federal Regulations is proposed to be amended as follows:

PART 34—[AMENDED]

1. The authority citation for Part 34 is revised to read as follows:

Authority: 12 U.S.C. 1 *et seq.;* 12 U.S.C. 93a; 12 U.S.C. 371; 12 U.S.C. 1701j–3.

2. Part 34 is amended by adding the following "Effective Date Note:" "Subpart B effective [insert 45 days after publication of this notice], but national banks have the option of continuing to comply with Part 29 of this chapter until [insert 6 months after effective date]."

3. Part 34 is amended by adding the heading *"Subpart A—General"* immediately before § 34.1.

4. Part 34 is amended by adding § 34.4

§ 34.4 Due-on-sale clauses.

(a) *General rule.* A national bank may make or acquire through purchase, assignment, pledge or otherwise, a loan, secured by a lien on real property, that includes a clause, known as a due-on-sale clause, giving the lender or any assignee or transferee of the lender the power to declare the entire debt payable if all or part of the legal or equitable title or an equivalent contractual interest in the property securing the loan is transferred to another person, whether by deed, contract, or otherwise. Except as set forth in paragraph (b) of this section, such clauses in loans, whenever originated, shall be valid and enforceable as to transfers of the secured property occurring after December 8, 1983, notwithstanding any contrary law or judicial decision of any state, including the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, and Guam, which laws and judicial decisions are hereby expressly preempted. For the purposes of this part, (1) real property shall also include such residential dwellings as condominium units, cooperative housing units, and residential manufactured homes and (2) the term "lender" means a government agency or person, including corporations, partnerships, trusts or associations making a real property loan or any assignee or transferee, in whole or in part, of such a person or agency.

(b) *Exceptions.* Due-on-sale clauses shall not be enforceable according to the terms of the contract in the case of transfers described in subsection (d) of section 341 of the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97–320), 12 U.S.C. 1701j–3(d), as interpreted by the Federal Home Loan Bank Board pursuant to the powers granted to it in paragraph (e) of that section, 12 U.S.C. 1701j–3(e).

5. Part 34 is amended by adding Subpart B consisting of §§ 34.5 through 34.12.

Subpart B—Adjustable-Rate Mortgages

Sec.
34.5 Definition.
34.6 General rule.
34.7 Index.
34.8 Rate changes.
34.9 Prepayment fees.
34.10 Disclosure.
34.11 Nonfederally chartered commercial banks.
34.12 Transition rule.

Subpart B—Adjustable-Rate Mortgages

§ 34.5 Definition.

(a)(1) Except as provided in paragraph (b), an adjustable-rate mortgage loan is any extension of consumer credit to a natural person made primarily to finance or refinance the purchase of and secured by a lien on a one-to-four-family dwelling, including a condominium unit, cooperative housing unit or residential manufactured home, where such loan is made pursuant to an agreement intended to enable the lender to adjust the rate of interest from time to time. (2) The phrase "consumer credit" means credit offered or extended to a consumer primarily for personal, family, or household purposes.

(b) Adjustable-rate mortgage loans do not include:

(1) Extensions of credit primarily for business, commercial, or agricultural purposes;

(2) Fixed-rate extensions of credit that are payable on demand; or

(3) Fixed-rate extensions of credit that are payable either without any interim amortization of the loan, or at the end of a term that, including any terms for which the bank has promised to refinance the loan, is shorter than the term of the amortization schedule.

§ 34.6 General rule.

(a) National banks and their subsidiaries may make, sell, purchase, participate, or otherwise deal in adjustable-rate mortgage loans without regard to any limitations imposed on adjustable-rate mortgage lending by the laws of any state, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, or Guam, which limitations are hereby expressly preempted.

(b) National banks are not prohibited from purchasing or participating in adjustable-rate mortgage loans which were not made in accordance with the regulations in this part, except that any such loans originated by and purchased, in whole or in part, from another national bank or an affiliate of a national bank shall comply with the regulations in this part. For purposes of this paragraph, the term "affiliate" shall have the same meaning that it has in 12 U.S.C. 371c.

§ 34.7 Index.

Loan documents shall specify an index to which changes in the interest rate charged on an adjustable-rate mortgage loan shall be linked. The index shall be readily available to and verifiable by the borrower, and beyond the control of the bank. A bank may use as an interest rate index any measure of market rates of interest which meets these requirements. The index for an adjustable-rate mortgage loan shall be either single values of the chosen measure or a moving average of the chosen measure calculated over a specified period.

§ 34.8 Rate changes.

All adjustable-rate mortgage loans originated on or after December 8, 1987

shall include a limitation on the maximum interest rate that may apply during the term of the loan.

§ 34.9 Prepayment fees.

Banks offering or purchasing adjustable-rate mortgage loans may impose fees for prepayments regardless of any state law prohibitions of, or limitations on, such fees, which prohibitions or limitations are hereby expressly preempted. For the purpose of this part, prepayments shall not include: (a) Payments that exceed the required payment amount to avoid or reduce negative amortization; or (b) principal payments in excess of those necessary to retire the outstanding debt over the remaining loan term at the then current interest rate that are made in accordance with rules governing the determination of monthly payments contained in the loan documents.

§ 34.10 Disclosure.

A national bank offering adjustable-rate mortgage loans shall make the disclosures required by regulations implementing the Truth in Lending Act as amended, Pub. L. 90–321, 82 Stat. 146 (1968), prescribed by the Board of Governors of the Federal Reserve System and commonly known as "Regulation Z."

§ 34.11 Nonfederally chartered commercial banks.

Under authority granted by section 804(a) of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, codified at 12 U.S.C. 3803(a), nonfederally chartered commercial banks may make adjustable-rate mortgage loans in accordance with the following provisions of this part: §§ 34.5, 34.7, 34.8, and 34.9.

§ 34.12 Transition rule.

If on the effective date of this rule a national bank has already made a loan or a binding commitment to lend under an adjustable-rate mortgage loan program which would violate any of the provisions of this subpart, the national bank may continue until [insert six months from effective date] to make loans or binding commitments to lend under the program before the program must be brought into conformity with all the provisions of this subpart.

Dated: September 29, 1987.

Robert L. Clarke,

Comptroller of the Currency.

BILLING CODE 4810–33–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Virginia Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing the receipt of proposed amendments to the Virginia permanent regulatory program (hereinafter referred to as the Virginia program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The amendments are intended to address seven conditions placed upon Virginia's program by the Secretary at 30 CFR 946.16 (a) through (g). These conditions were placed upon Virginia's program at the time of conditional approval of Virginia's regulatory reform effort in the November 25, 1986, **Federal Register** (51 FR 42548–42555).

This notice sets forth the times and locations that the Virginia program and proposed amendments to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m. on November 2, 1987, if requested, a public hearing on the proposed amendments will be held on October 27, 1987, and requests to present testimony at the hearing must be received on or before 4:00 p.m. October 19, 1987.

ADDRESSES: Written comments and requests to testify at the hearing should be directed to Mr. William R. Thomas, Director, Big Stone Gap Field Office, Office of Surface Mining Reclamation and Enforcement, P.O. Box 626, Room 220, Powell Valley Square Shopping Center, Route 23, Big Stone Gap, Virginia 24219; Telephone (703) 523–4303. If a hearing is requested, it will be held at the same address.

Copies of the proposed amendments, the Virginia program, the Administrative Record on the Virginia program, a listing of any scheduled public meeting, and all written comments received in response to this notice will be available for review at the locations listed below during normal business hours Monday through Friday, excluding holidays.

Each requester may receive, free of charge, one single copy of the proposed amendment by contacting the OSMRE Big Stone Gap Field Office.

Office of Surface Mining Reclamation and Enforcement, Administrative Record Office, Room 5131, 1100 "L" Street NW., Washington, DC 20240; Telephone (202) 343–5492.

Office of Surface Mining Reclamation and Enforcement, Eastern Field Operations, Building 10, Parkway Center, Pittsburgh, PA 15220; Telephone (412) 937–2907.

Office of Surface Mining Reclamation and Enforcement, Big Stone Gap Field Office, P.O. 626, Room 220, Powell Valley Square Shopping Center, Route 23, Big Stone Gap, Virginia 24219; Telephone (703) 523–4303.

Virginia Division of Mined Land Reclamation, P.O. Box Drawer U, 622 Powell Avenue, Big Stone Gap, Virginia 24219; Telephone (703) 523–2925.

FOR FURTHER INFORMATION CONTACT: Mr. William R. Thomas, Director, Big Stone Gap Field Office, Office of Surface Mining Reclamation and Enforcement, P.O. Box 626, Room 220, Powell Valley Square Shopping Center, Route 23, Big Stone Gap, Virginia 24219; Telephone (703) 523–4303.

SUPPLEMENTARY INFORMATION:

I. Background on the Virginia Program

The Secretary of the Interior approved the Virginia program on December 15, 1981. Information pertinent to the general background and revisions to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval can be found in the December 15, 1981 **Federal Register** (46 FR 61085–61115). Subsequent actions concerning the conditions of approval and proposed amendments are identified at 30 CFR 946.12, 946.13, 946.15, and 946.16.

II. Discussion of the Proposed Amendments

By letter dated September 1, 1987, (Administrative Record No. VA646), Virginia submitted proposed amendments to its permanent regulatory program. These amendments are intended to address seven conditions placed upon the Virginia program in the November 25, 1986, **Federal Regiser** (51 FR 42548–42555) when the Secretary conditionally approved a program amendment submitted by Virginia in response to OSMRE's regulatory reform efforts. The proposed amendments are briefly summarized below:

Condition 946.16(a) required that Virginia amend its coal surface mining reclamation regulations at section 480–

03–19.789.1(e) to provide for the award of appropriate costs and expenses (including attorney's fees) from the Commonwealth to any person who makes a substantial contribution to a full and fair determination of the issue in any administrative proceeding and who at least partially prevails on the merits of the issues. Virginia proposes to add section 480–03–19.789.1(e)(3) to its coal surface mining reclamation regulations to satisfy this condition.

Condition 946.16(b) required Virginia to revise its ground cover measurement techniques for small areas (as contained in Attachment number 2 of the portion of its August 14, 1986, submission concerning revegetation issues) to specify how many transects must be taken, how this number will be determined, and how the transects will be determined. Virginia proposes to withdraw its proposal for techniques for measuring ground cover on small areas.

Condition 946.16(c) required Virginia to submit materials detailing the sampling techniques to be used to measure the productivity of grazing land, pasture land and crop land. Virginia proposes to adopt those standards contained in OSMRE's "Technical Guides on Use of Reference Areas and Technical Standards for Evaluating Surface Mine Revegetation in OSM Regions I and II".

Condition 946.16(d) required Virginia to amend its coal surface mining reclamation regulations at 480–03–19.842.15 or otherwise amend its program to provide that the Director's decision on citizen requests for review of an inspector's decision not to inspect or take enforcement action with respect to any violation alleged by that citizen is formally appealable in accordance with section 9–6.14:12 of the Virginia Administrative Process Act. Virginia porposes to add section 480–03–19.842.15(d) to its coal surface mining reclamation regulations to satisfy this condition.

Condition 946.16(e) required Virginia to amend its coal surface mining reclamation regulations at section 480–03–19.843.12 or otherwise amend its program to specify that the Director's decision on whether to allow an extension of the abatement period for a violation beyond 90 days is formally appealable in accordance with the Virginia Administrative Process Act. Virginia proposes to add section 480–03–19.843.12(j) to its coal surface mining reclamation regulations to satisfy this condition.

Condition 946.16(f) required Virginia to amend its coal surface mining reclamation regulations at section 480–03–19.843.15 or otherwise amend its program to provide that a notice or order ceasing mining shall not expire after 30 days if the permittee or operator waives his or her right to an informal hearing or consents to holding the hearing more than 30 days after the issuance of the notice or order. Virginia proposes to amend section 480–03–19.843.15 of its coal surface mining reclamation regulations to satisfy this condition.

Condition 946.16(g) required Virginia to amend its coal surface mining reclamation regulations at sections 480–03–19.845.17(b) and 480–03–19.845.15(b)(1) or otherwise amend its program to specify tht the failure of the Division to serve any proposed assessment or to hold any requested assessment conference within the time limits prescribed by the Virginia program shall not be grounds for dismissal of all or part of an assessment unless the person against whom the proposed penalty is assessed can prove actual prejudice as a result of the delay and unless that person makes a timely objection to the delay. Virginia proposes to amend sections 480–03–19.845.17(b) and 480–03–19.845.18(b)(1) of its coal surface mining reclamation regulations to satisfy this condition.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17, OSMRE is now seeking comment on whether the amendments proposed by Virginia satisfy the requirements of 30 CFR 732.15 for the approval of State program amendments. If the amendments are deemed adequate, they will become part of the Virginia program.

Written Comments

Written Comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than the Big Stone Gap Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by close of business on October 19, 1987. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requeted as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

If only one person requests a hearing, a public meeting, rather than a public hearing, may be held. A summary of the meeting will be included in the Administrative Record.

Public Meeting

Persons wishing to meet this OSMRE representatives to discuss the proposed amendments may request a meeting at the Big Stone Gap Field Office by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made part of the Administrative Record.

IV. Procedural Determinations

1. Compliance with the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Compliance with Executive Order No. 12291

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

3. Compliance with the Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

4. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7-87-44]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of Martin County, the Coast Guard is considering a change to the regulations governing the Jensen Beach and Ernest Lyons drawbridges at Stuart, Florida by limiting the number of times the bridges are opened during certain periods. This proposal is being made because of complaints about vehicular traffic delays. This action should accommodate the needs of vehicular traffic and should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before November 16, 1987.

ADDRESSES: Comments should be mailed to Commander (oan), Seventh Coast Guard District, 51 SW. 1st Avenue, Miami, Florida 33130-1608. The comments and other materials referenced in this notice will be available for inspection and copying at 51 SW. 1st Avenue, Room 816, Miami, Florida. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments also may be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Walt Paskowsky, (305) 536-4103.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Seventh Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

Discussion of Proposed Regulations

Both bridges presently open on signal. Martin County has asked that the bridges open only on the hour and half hour from 6 a.m. to 6 p.m. weekdays from December 1 through May 1. The Coast Guard has carefully evaluated information about highway traffic volume, vessel safety, and drawbridge openings for these bridges. Although regulation changes may be needed to help reduce highway traffic delays, the data do not appear to justify a need for regulations before 7 a.m.

Both bridges have high traffic volumes, substandard lane widths, and inadequate lateral clearances all of which contribute to the relatively poor levels of service on both roadways. On the average, neither bridge opens twice an hour during the daytime, but openings sometimes do occur "back to back" within 15 minutes causing traffic delays. The proposed rule would separate openings by thirty minutes giving auto traffic ample time to clear before the next opening. Public vessels of the United States, tugs with tows, and vessels in a situation where a delay would endanger life or property would continue to be passed at any time.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g).

2. Section 117.261 is amended by adding paragraphs (o) and (p) to read as follows:

§ 117.261 Atlantic Intracoastal Waterway from St. Marys River to Key Largo.

* * * * *

(o) *Jensen Beach (SR 707a) bridge, mile 981.4 at Stuart.* The draw shall open on signal; except that from December 1 through May 1, from 7 a.m. to 6 p.m., Monday through Friday, except federal holidays, the draw need open only on the hour and half hour.

(p) *Ernest Lyons (SR A1A) bridge, mile 984.9 Stuart.* The draw shall open on signal; except that from December 1 through May 1, from 7 a.m. to 6 p.m., Monday through Friday, except federal holidays, the draw need open only on the hour and half hour.

The proposal regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

Discussion of Proposed Regulations

The Evans Crary bridge presently opens on signal except that from November 1 through May 1 weekdays from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m. the bridge opens on the quarter and three quarter hour. On weekends from November 1 through May 1 from 8 a.m. to 6 p.m. the bridge opens on the hour, 20 minutes after the hour, and 40 minutes after the hour. Martin County has asked that the bridge be opened only on the hour and half hour from 6 a.m. to 6 p.m. weekdays from December 1 through May 1. The Coast Guard has carefully evaluated information about highway traffic volume, vessel safety and drawbridge openings for this bridge. The data appear to justify restrictions which vary slightly from those requested by Martin County. The Roosevelt bridge presently opens on signal except weekdays from 7 a.m. to 9 a.m., 11 a.m. to 1 p.m., and 4 p.m. to 7 p.m. when it opens only on the hour and half hour. On weekends and holidays from 8 a.m. to 6 p.m. it opens on the hour, 20 minutes after the hour and 40 minutes after the hour. Martin County has asked that the Roosevelt bridge open only on the hour and half hour from 6 a.m. to 6 p.m. weekdays year round with no openings at 8 a.m., 8:30 a.m., 5 p.m. and 5:30 p.m. The Coast Guard has carefully evaluated information about highway traffic volume, vessel safety and drawbridge openings for this bridge. In this case, also, the data appear to justify additional restrictions which vary slightly from those requested by Martin County. Both bridges have high traffic volumes, substandard lane widths, and inadequate lateral clearances all of which contribute to the relatively poor levels of service on both roadways. On the average, neither bridge opens twice an hour during the daytime, but openings sometimes do occur "back to back" within 15 minutes causing major traffic delays. We are proposing that the bridges open at thirty minute intervals from 7 a.m. to 6 p.m. This would separate the openings to reduce the impact to vehicular traffic, while imposing only a slightly greater delay to boat traffic at the Roosevelt bridge than presently exists when the adjacent Florida East Coast Railroad bridge is down. That delay is now about 20 minutes. In addition, we are proposing to allow the Roosevelt bridge to remain in the closed position on weekdays from 7:30 to 9 a.m. and 4 to 5:30 p.m. to allow for uninterrupted flow of commuter traffic. The seasonal weekend regualtions for the Evans Crary bridge would not start until December 1 to coincide with the seasonal start of the proposed weekday rules. Public vessels of the United States, tugs with tows, and vessels in a situation where a delay would endanger life or property would continue to be passed at any time.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.317 is amended by revising paragraphs (b) and (d) to read as follows:

§ 117.317 Okeechobee Waterway.

* * * * *

(b) *Evans Crary (SR A1 A) bridge, mile 3.4 at Stuart.* The draw shall open on signal; except that, from December 1 through May 1 from 7 a.m. to 6 p.m., Monday through Friday, except federal holidays, the draw need open only on the hour and half hour. On Saturdays, Sundays, and federal holidays, December 1 through May 1, from 8 a.m. to 6 p.m., the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour. Exempt vessels shall be passed at any time.

* * * * *

(d) *Roosevelt (US 1) bridge, mile 7.4 at Stuart.* The draw shall open on signal; except that, Monday through Friday, except federal holidays, from 7 a.m. to 6 p.m. the draw need open only on the hour and half hour. However, the draw need not open at 8 a.m., 8:30 a.m., 4:30 p.m., and 5 p.m. On Saturdays, Sundays, and federal holidays, from 8 a.m. to 6 p.m. the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour. When the adjacent Florida East Coast Railways bridge is in the closed position at the time of a scheduled opening, the draw need not open, but it must then open immediately upon the opening of the railroad bridge to pass all accumulated vessels. Exempt vessels shall be passed at any time.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3271-7]

Approval and Promulgation of Implementation Plans; State of Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: In this document, EPA proposes to approve a revision to the Kansas state air pollution control regulations as part of the State Implementation Plan (SIP). The purpose of this revision is to require reasonably available control measures by sources which emit ozone precursors in the Kansas City ozone nonattainment area. These state regulations are required by the Clean Air Act. The purpose of this document is to advise the public of EPA's preliminary finding and to invite comments on EPA's proposed approval.

DATE: Comments must be received on or before November 2, 1987. Public comments on this document are requested and will be considered before taking final action of these SIP revisions.

ADDRESSES: Comments should be sent to Larry A. Hacker, Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas 66101. The state submission is available at the above address and at the Kansas Department of Health and Environment, Bureau of Air Pollution and Radiation Control, Forbes Field, Topeka, Kansas 66620.

FOR FURTHER INFORMATION CONTACT: Larry A. Hacker, (913) 236-2893, FTS 757-2893.

SUPPLEMENTARY INFORMATION: The Clean Air Act requires that all states have plans to implement the National Ambient Air Quality Standards in all areas of their states. These plans must contain control measures adequate to attain and maintain the standards in all areas of the state. In areas where the standards have not yet been attained, Part D of the Act requires states to submit new plan revisions with additional controls that will reduce air pollution to the levels of the air quality standards. These plans are to be evaluated by EPA and approved if they meet the requirements of the Act. Plans, or portions of plans, that are federally approved become enforceable by the federal government as well as by the state.

Background

On September 17, 1979, the state of Kansas submitted a Part D plan describing how the Kansas City ozone nonattainment area would attain the ozone air quality standard by December 31, 1982. This plan was conditionally approved on April 3, 1981 (46 FR 20170), with the last condition removed and full approval given on January 12, 1984 (49 FR 1492).

In spite of the reductions in emissions of the volatile organic compounds (VOC) that react in the atmosphere to form ozone, which were required and obtained by the 1979 plan, air quality monitoring in the Kansas City area continues to record violations of the ozone air quality standard. Therefore, on February 20, 1985, EPA formally notified the Governor of Kansas that the SIP was substantially inadequate to attain the ozone standard in the Kansas City area, and called for revisions to the SIP that would obtain additional emission reductions and demonstrate that the ozone standard would be attained.

On July 2, 1986, the Governor of Kansas officially submitted the revised plan demonstrating that the ozone standard will be attained in the Kansas City area by December 31, 1987, or shortly thereafter. EPA's review of this plan found that it meets all requirements of the Act except that it did not contain regulations requiring all reasonably available control measures as required by section 172(b)(2) of the Act. For a further discussion of the overall plan, the reader is referred to EPA's proposed approval of the remaining elements of the plan published elsewhere in today's **Federal Register.**

Current Submission

On April 22, 1987, the Kansas Department of Health and Environment submitted drafts of regulations that will require reasonably available control technology (RACT) on all VOC sources for which EPA has published a control techniques guideline (CTG) and all major VOC sources for which EPA has not yet published a CTG. (This submission was supplemented with additional revisions received on May 26, 27, and August 21, 1987.) If it is determined that these rules satisfy the requirement of section 172(b)(2) for the Kansas City area, the overall plan can be fully approved as meeting all the requirements of the Act.

The regulations proposed today are in draft form and have yet to be adopted by the state. The state has requested that EPA use parallel processing rulemaking procedures to act on these regulations on the federal level at the same time that action on the rules is taken on the state level. Under the parallel processing procedure, EPA works closely with the state as it develops major regulations and proceeds through the state rulemaking process. Both the state and EPA will provide for public participation by providing public comment periods. EPA will publish a final rulemaking on the rules as drafted if they are finally adopted by the state and submitted to EPA.

The state has evaluated 16 regulations to determine the problems which need to be corrected. There are several categories of potential problems including deviating from recommended applicability limits, deviating from the CTG provisions, or having vague and unenforceable language.

When the Kansas City ozone plan was first developed and approved, EPA policy required RACT only on major (100 tons of VOC emissions per year) CTG sources in areas where the 1979 plan demonstrated attainment of the ozone standard by 1982, as the Kansas City plan did at that time. Because Kansas City did not attain the standard by 1982, additional control measures are needed. In order to be approvable at this time, a state plan must require RACT on all sources for which there is a CTG and for all major non-CTG sources. This provision requires that existing rules be revised to remove 100 ton per year (TPY) applicability cutoffs for CTG sources and that new rules be developed to address major non-CTG sources.

Recently EPA has issued new guidance defining very specifically the kinds of provisions that may or may not be included in state plans. The state has evaluated its proposed rules against the new guidance and developed corrections where needed. The revised rules generally use the RACT cutoffs from the CTGs, correctly define how equivalent controls will be evaluated, have all the correct definitions, specify appropriate compliance averaging times, require source recordkeeping, update the state compliance testing methods, and generally close any previous loopholes and make the rules fully enforceable in ozone nonattainment areas. In the event that such areas were redesignated to attainment, the rules would remain in effect. Each of the state rules is discussed briefly below. For a more detailed evaluation of each rule against the applicable requirements, the reader is referred to the technical support document.

State Rule 28–19–8, Reporting Required, has been revised so that smaller VOC sources will be required to submit information. This is needed because these smaller sources will be subject to the revised control regulations and must be evaluated for compliance with their new limits.

Rule 28–19–61, Definitions, has had a number of definitions added, removed, or revised to ensure that all of the critical terms used in the regulations have the necessary explanations and requirements.

Rule 28–19–62, Testing Procedures, has been totally rewritten to require the most current compliance evaluation methods.

Rule 28–19–63, Automobile and Light-Duty Truck Surface Coating, has been revised to specify testing methods, provide for the consideration of transfer efficiency in coating operations, and require adequate recordkeeping and reporting.

Rule 28–19–64, Bulk Gasoline Terminals; Rule 28–19–70, Leaks from Gasoline Delivery Vessels and Vapor Collection Systems; and Rule 28–19–72, Gasoline Dispensing Facilities; have had extensive revisions in compliance testing and recordkeeping provisions. In Rule 28–19–64 the exemption level of 100 TPY has been removed, but no additional sources are expected to be regulated and no emission reductions are expected to result. However, the emission reductions due to the Stage I vapor recovery requirement of 28–19–72 are a major part of the July 2, 1986, control strategy for the Kansas City area. Unlike the other rules, it has not been approved by EPA previously. EPA's evaluation of the state proposal finds that it meets the criteria for controls on gasoline dispensing facilities.

Rule 28–19–65, Volatile Organic Liquid Storage in Permanent Fixed Roof Type Tanks, and Rule 28–19–66, Volatile Organic Liquid Storage in External Floating Roof Tanks, have been revised to clarify what levels of control are required when storing which liquids and to add current testing and recordkeeping requirements.

Rule 28–19–69, Cutback Asphalt, has been revised to make previously automatic exemptions now subject to state approval.

Rule 28–19–71, Printing Operations, has been extensively revised to address a number of enforcement issues relating to the testing of inks and the keeping of records of ink and solvent use and of control device performance. This rule was originally part of the July 2, 1986, SIP submission. However, this revised version would replace it in the approved SIP upon federal approval.

Rule 28–19–73, Surface Coating of Miscellaneous Metal Parts and Products and Metal Furniture, has been expanded to include furniture, which is a similar process but which was originally written as a separate rule. The rule has been rewritten in terms of solids applied rather than total amount of paint used to aid in calculating compliance when using methods other than compliance coastings. Transfer efficiency (TE) is also addressed and recordkeeping requirements are strengthened. This rule was originally adopted in 1986 with an effective date of May 1, 1987. The original version was not submitted for EPA approval. Today's proposed approval relates to the revised rule, not to the original version. EPA's evaluation of this revised version indicates that it meets all EPA requirements for approval as representing RACT.

Rule 28–19–75, Solvent Metal Cleaning, is another 1986 adoption with an effective date of May 1, 1987. This rule has had a 10 TPY exemption cutoff removed and more complete recordkeeping required. As with the above rule, EPA has evaluated the revised version and found it to meet all requirements. Therefore, the revised draft version of this rule is proposed for approval. The original version has not been submitted for EPA approval.

Also, the state had adopted Rule 28–19–74, Surface Coating of Metal Furniture, with an effective date of May 1, 1987. The state has now included the limits for this category with those for Miscellaneous Metal Coating. Rule 28–19–74 had not been submitted for federal approval and is not part of the SIP. This rule is being redesignated Wool Fiberglass Insulation Manufacturing, and totally rewritten to apply to the fiberglass manufacturing category. Kansas City has two manufacturers of wool fiberglass batt insulation which emit in excess of 100 TPY of VOC. There is no CTG for this industry. The resin used to form the hot glass fibers into the batting is a volatile compound that is driven into the air during the forming operation. The draft state regulation is based on the federal new source performance standard (NSPS) for this category which condenses VOC from the exhaust stream in the sampling equipment and calculates the result as particulate matter. (See 40 CFR 60.680 to 60.685 and Method 5E in Appendix A of Part 40.) This condensable catch has been used in the EPA Emission Factor book (AP–42) as representing VOC emissions, and those emission factors have been used to calculate that emissions from these two plants exceed 100 TPY. Source test results using this method show that, on average, about 47 percent of the total catch is condensed VOC. Thus, of the 11 pounds of particulate matter per ton of glass pulled allowed by the NSPS, approximately 5.15 is condensed VOC. Therefore, the level of control chosen by the state, 5 pounds of VOC per ton of glass pulled, represents very nearly the same level of control as the new source standard, when adjusted to consider only the condensed catch, rather than the total caught in the full particulate testing method. The draft rule also contains reporting and recordkeeping requirements. EPA's evaluation of this draft rule finds that it requires RACT for the two plants in Kansas City and is approvable.

In numerous instances, the rules allow the department to approve alternative compliance plans and test methods which are alternatives to the EPA-reference methods. EPA proposes approval of these rules with the understanding that all such alternative plans and test methods must be submitted and approved by EPA, as individual SIP revisions. In the absence of such approval, the enforceable requirements of the SIP would be the emission limits or reduction requirements stated in the rules, and compliance would be determined by the methods stated in the rules. Also, the rules contain provisions whereby testing is required when the facility intends to demonstrate compliance by improved operations or new controls, yet there are no test procedures. Examples of such provisions are TE and vapor processing systems. Test methods which are developed by the state must be approved by EPA before sources may demonstrate compliance through alternative control and TE.

The SIP also contains two EPA approved regulations applying to petroleum refinery sources, 28–19–67, Petroleum Refineries, and 28–19–68, Leaks from Petroleum Refinery Equipment. The only source to which these rules applied has been closed. Therefore, the state has not updated these rules.

The state submitted statements on April 16, 1987, and August 18, 1987, which certify that there are no sources in the nonattainment area in the other categories for which EPA has issued CTGs. Other than the two wool fiberglass manufacturers discussed herein, there are no other major non-CTG VOC sources in the nonattainment area. Based on the negative declarations and the rules submitted as discussed herein, EPA believes that the Kansas

City ozone plan will, upon final adoption and submittal of the regulations described above, require all reasonably available control measures, as required by section 172(b)(2) of the Act.

Summary

The draft state submission includes revisions to previously approved regulations, new regulations, and declarations that certain source categories need not be regulated. EPA is soliciting public comments on this notice and on issues relevant to EPA's proposed action. Comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the address above.

The revisions are being proposed under a procedure called "parallel processing" (47 FR 27073). If the proposed revisions are substantially changed, EPA will evaluate those changes and may publish a revised Notice of Proposed Rulemaking. If no substantial changes are made, EPA will publish a Final Rulemaking Notice on the revisions. The final rulemaking action by EPA will occur only after the SIP revisions have been adopted by Kansas and submitted to EPA for incorporation into the SIP.

Proposed Approval

This state submission constitutes a proposed revision to the Kansas SIP which EPA is proposing to approve. The Administrator's decision to approve or disapprove this proposed revision will be based on the comments received and on a determination of whether or not the revision meets the requirements of Section 110 and 172 of the Clean Air Act and of 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of State Implementation Plans, and of the 1982 SIP policy (46 FR 7184, January 22, 1981).

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Particulate matter, Hydrocarbons, Intergovernmental relations, and Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401—7642.

Date: May 29, 1987.

William Rice,

Acting Regional Administrator.

40 CFR Part 52

[FRL-3271-8]

Approval and Promulgation of Implementation Plans; State of Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: The Clean Air Act (CAA), as amended, requires that a state revise its state implementation plan (SIP) for all areas for which the SIP has been found substantially inadequate to attain the National Ambient Air Quality Standards (NAAQS).

On February 20, 1985, EPA advised the Governor of Kansas that based upon air quality data, the ozone SIP for the Kansas City Metropolitan Area (KCMA) was substantially inadequate to attain the NAAQS. The call for a SIP revision was made under section 110(a)(2)(H) of the Act, but under section 110(c)(1)(C) of the Act, EPA allowed the state one year to submit the ozone plan revision.

On July 2, 1986, the Governor of Kansas officially submitted a revised ozone SIP for Johnson and Wyandotte Counties, Kansas. On April 22, 1987, Kansas submitted a supplement to the SIP consisting of revised emission control requirements in draft form. For a complete discussion of the April 22 submittal, the reader is referred to EPA's proposed approval published elsewhere in today's **Federal Register.** The July 2 submittal in conjunction with the April 22 submittal comprise the overall ozone SIP package, which EPA is proposing to approve in today's **Federal Register** actions.

DATE: Comments must be received no later than November 2, 1987.

ADDRESSES: Copies of the state submission are available for inspection during normal business hours at the following locations: Environmental Protection Agency, Region VII, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101; and Kansas Department of Health and Environment, Bureau of Air Quality and Radiation Control, Forbes Field, Topeka, Kansas 66620.

FOR FURTHER INFORMATION CONTACT: Larry A. Hacker at (913) 236-2893; FTS 757-2893.

SUPPLEMENTARY INFORMATION:

A. Background

Part D of the CAA, as amended in 1977, required that a state revise its SIP for all areas that had not attained NAAQS at that time. Part D includes sections 171 through 178 of the Act. The requirements for an approvable nonattainment plan are listed in section 172. On September 17, 1979, and September 22 and 25, 1980, the state of Kansas submitted to EPA proposed revisions to the SIP for the attainment of the ozone standard in both Johnson and Wyandotte Counties. On April 3, 1981 (46 FR 20170), EPA conditionally approved the ozone SIP revision for Johnson and Wyandotte Counties. The SIP demonstrated attainment of the ozone standard by the end of 1982. From time to time, the state submitted revisions to its ozone SIP to satisfy the conditions of approval. The approval conditions were satisfied by the state and these conditions were subsequently removed. However, the ozone standard was not attained in the Kansas City area by the 1982 attainment date.

In its SIP revision policy for areas which did not attain a standard by the end of 1982 (48 FR 50697), EPA announced that where a fully approved Part D plan failed to bring about attainment, EPA will treat the plan as substantially inadequate to assure attainment under section 110(a)(2)(H) and call for a SIP revision. The November 2, 1983, policy announced that EPA will provide one year for submittal of the new revision under section 110(c)(1)(C). Revisions under this policy must provide for attainment as expeditiously as practicable. These requirements are contained in EPA's "Guidance Document for Correction of Part D SIPs for Nonattainment Areas" dated January 27, 1984.

On February 20, 1985, EPA advised the Governor of Kansas that based upon air quality data, the ozone SIP for the KCMA was substantially inadequate to attain the NAAQS. On July 2, 1986, the Governor of Kansas officially submitted the revised ozone SIP for Johnson and Wyandotte Counties.

B. Post 1982 Ozone SIP Revision Requirements

As explained in a General Preamble that EPA recently published (52 FR 26404), EPA believes that once an area has received full approval of its SIP as meeting the requirements of Part D, it has discharged its Part D planning obligations. This means that if the area's Part D plan subsequently is found substantially inadequate to attain the NAAQS, as in the case of the ozone SIP

for Johnson and Wyandotte Counties, any new plan revision developed to correct the nonattainment problem must meet the basic requirements of the Act contained in section 110. See section 110(a) (2) and (3).

Section 110(a)(2)(B) requires that the plan include "emission limitations, schedules, and timetables for compliance with such limitations, and such other measures as may be necessary to insure attainment and maintenance of such primary or secondary standard . . ." Although technically the Part D requirements do not govern new planning efforts in an area that once received full approval of its Part D plan, some of those requirements call for provisions that are in turn necessary to meet the requirement that the revision "insure attainment and maintenance". For example, EPA believes that an area cannot truly assure attainment as expeditiously as practicable, as required by sections 110(a)(2) (A) and (B), unless its plan includes all reasonably available control measures (defined as measures available at reasonable cost, considering the extent to which they are necessary to produce timely attainment) and produces enough progress toward attainment in the interim years to assure that attainment will in fact occur by the attainment date. For that reason, EPA's 1984 guidance on what the plan revisions for areas like Johnson and Wyandotte Counties must contain, includes references to several Part D requirements that are relevant to determining compliance with section 110. These requirements, and the extent to which the Kansas plan revision meets them, are summarized below.

The revised SIP must demonstrate attainment as expeditiously as practicable, and provide for the implementation of reasonably available control measures (RACM) needed to attain the NAAQS as expeditiously as practicable and assure reasonable further progress (RFP) toward attainment. The SIP revision must demonstrate that RFP toward attainment will be maintained and reported throughout the period leading to attainment. The plan must identify and quantify the emissions, if any, which will be allowed to result from the construction and operation of new and modified stationary sources in the nonattainment area. States and local agencies must identify to the extent possible the direct and indirect emissions associated with major Federal actions that are anticipated to take place during the period covered by the SIP. The SIP revision must contain the most recent three years of air quality monitoring data which have been reduced, validated, and summarized. The SIP must contain a baseline and projected emission inventories of sufficient accuracy and detail for a sufficient period to provide input to EPA-approved models and comply with EPA modeling guidelines. The SIP revision must contain a contingency plan to ensure continued progress toward attainment in situations where analyses of air quality and control measure effectiveness suggests RFP is not being maintained.

EPA's policy for ozone nonattainment areas having a significant ozone generating potential requires reasonably available control technology (RACT) for all sources of volatile organic compounds (VOC) covered by a control techniques guideline (CTG) document. Controls representing RACT are also required for all major non-CTG VOC sources. Generally, areas having a design value above 0.150 ppm must have a RACT inspection and maintenance (I/M) program. However, the policy states that if a state can demonstrate attainment before an I/M program can be implemented, the program then will not be required. The ozone SIP revisions must implement all reasonably available transportation control measures. The policy guidance requires use of the most recent modeling guidance for determining mobile source emissions and determining the amount of reductions of VOC needed to attain the ozone standard. Specifically, MOBILE3 is recommended for mobile source emissions calculations and level III modeling (city-specific empirical kinetic modeling approach (EKMA)) is the minimum requirement for ozone SIP attainment demonstrations.

C. State Submittal

Section 172 of the Act contains the statutory requirements for nonattainment plan provisions. The following is a listing of section 172 requirements as well as EPA policy requirements for post 1982 ozone plans, and a discussion of how the Kansas ozone SIP revision addresses each issue.

1. Demonstration of Attainment

Section 110(a)(2) requires a plan to provide for attainment of a NAAQS as expeditiously as practicable, but within three years of EPA's approval of the revision. As discussed in a General Preamble that EPA recently published (52 FR 2604, July 14, 1987), it is not clear whether this period applies to post-Part D plan revisions submitted in response to a notice of plan inadequacy under section 110(a)(2)(H). However, the legislative history of the Act does make it clear that any such revision must show attainment by a fixed, near-term date.

The ozone SIP revision of July 2, 1986, contains a demonstration of attainment by December 31, 1987. The attainment demonstration includes a new inventory of VOC emissions for the year 1984, including mobile source emission estimates based on EPA's motor vehicle calculation program, MOBILE3. The inventory was used as input into EKMA, which estimated that a 16.8 percent reduction in VOC emissions was necessary to meet the ozone standard.

The control strategy contained in the SIP revision projects VOC reductions of 9,145 kg/summer day from mobile sources, 3,028 kg/summer day from area sources, and 4,450 kg/summer day from point sources. These reductions total 16,623 kg/summer day; this amounts to a 17.9 percent reduction as compared to the required 16.8 percent. Mobile source reductions arise from emission reductions expected because of the Federal Motor Vehicle Pollution Control Program. Area source reductions are expected to result from the state's Stage I control regulation for gasoline stations (K.A.R. 28–19–72). This regulation requires submerged filling of gasoline storage tanks and a vapor balance system to return vapors to the delivery truck during the filling operation. Point source emissions reduction credits are obtained by offsetting emissions for a new GM plant with closure of an existing GM plant in Kansas City, Kansas. The new plant is to be in operation and the old plant closed by December 31, 1987. The remainder of the point source credits are obtained by applying CTG controls to three previously uncontrolled graphic arts facilities.

Because some of the draft Kansas rules that will produce the projected VOC reductions have not yet been finally adopted by the state, EPA questions whether the Kansas plan will actually produce the reductions necessary to bring about attainment by December 31, 1987. The draft rules on printing operations, in particular, specify that affected sources must comply within a year after final adoption of the rules. That date appears to be well beyond the December 31, 1987, date chosen for attainment in the Kansas plan. Even if the attainment date slips somewhat beyond that date, however, the plan still appears to be capable of producing attainment within the short-term, fixed period described in EPA's General Preamble of July 14, 1987 (52 FR 26404). EPA will monitor the state's

rulemaking process to see whether the required rules are adopted in final form soon enough to produce the required reductions within that timeframe.

2. Public Participation

Section 172(b)(1) requires the plan to be adopted after reasonable notice and a public hearing.

The state submitted evidence that public notice was published in newspapers in the affected areas which provided at least 30 days' notice of the public hearing conducted on June 5, 1986, in Kansas City, Kansas.

3. Reasonably Available Control Measures

Section 172(b)(2) requires implementation of all RACM as expeditiously as practicable.

The July 2, 1986, state submittal did not adequately address these requirements; however, the April 22, 1987, supplement to the SIP contains revised emission control requirements in draft form. This material supercedes all regulatory provisions in the July 2, 1986, submittal; nevertheless, all previously adopted state VOC rules, on which the attainment demonstration is based, remain in effect until such time that these draft revisions are adopted. EPA believes that these requirements, when adopted in final form by the state, will satisfy the requirements of section 172(b)(2). For a complete discussion of the April 22 submittal, the reader is referred to EPA's proposed approval published elsewhere in today's **Federal Register.**

4. Reasonable Further Progress

Section 172(b)(3) requires, in part, that the state demonstrate that it will make reasonable further progress toward attaining the standard by specified dates, including emission reductions which can be achieved by application of RACT. Section 171(1) defines RFP in terms of annual incremental reductions between the period of plan approval and the attainment date. For Kansas, all reductions necessary to attain the standard will occur within the next year. Therefore, the plan substantially meets this requirement.

5. Emission Inventory

Section 172(b)(4) requires the plan to include a comprehensive, accurate, and current inventory of all sources of each pollutant for which an area is nonattainment. It also requires the inventory to be updated as frequently as necessary to assure that RFP is being made and to assure that the standard will be attained.

Included in the plan submittal is an updated mobile source emission inventory using EPA's MOBILE3 model, and current and projected vehicle miles traveled. Also included is a current area and point source inventory with emission projections through the year 2000. The emission inventory is acceptable and satisfies the requirement of section 172(b)(4) of the Act.

6. Emission Growth

Section 172(b)(5) requires the plan to expressly identify and quantify the emissions, if any, which will be allowed to result from the construction and operation of major new or modified stationary sources in a nonattainment area.

The SIP contains an inventory based on 1984 stationary source emission reports, a contractor report of area source emissions, and a mobile source inventory based on the most recent traffic counts, registration data, and other data needed to run the MOBILE3 calculations. Future emission inventory estimates are projected through the year 2000.

Regulations governing construction and operation of new or modified sources in nonattainment areas are contained in K.A.R. 28–19–16 *et seq.* These rules were approved by EPA as part of the Kansas Part D plan for the Kansas City area on April 3, 1981. The ozone SIP contains projected area source VOC emissions. However, the ozone SIP revision contains projected VOC emissions reduction of approximately 1,000 kg/day in addition to that needed to meet the ozone standard, and states that additional new source growth must be accompanied by offsetting emissions. This should assure continued VOC emission reductions beyond the attainment date. The state plan satisfies the requirements of section 172(b)(5) of the Act.

7. Permit Requirements

Section 172(b)(6) requires plans to have a permit program for the construction and operation of new or modified sources in accordance with the permit requirements of section 173. As stated above, EPA approved the Kansas permit regulations that are applicable in nonattainment areas on April 3, 1981. The requirements of section 172(b)(6) are satisfied.

8. Resources

Section 172(b)(7) requires the state to identify and commit to financial and manpower resources necessary to carry out the plan provisions.

The Kansas City ozone plan approved by EPA on April 3, 1981, was found to satisfy the requirements of section 172(b)(7). The SIP revision does not clearly commit to financial and manpower resources, but the state agency has included such resource growth in its annual grant agreement. Thus, EPA believes that resources will be available to carry out the plan commitments.

9. Schedules

Section 172(b)(8) requires emission limitations, schedules of compliance, and other measures as may be necessary to meet the requirements of section 172.

The plan contains three new RACT rules, each of which contains a schedule for compliance.

10. Public, Local Government, and Legislative Involvement

Section 172(b)(9) requires evidence of involvement and consultation of the public, local government, and state legislature in the planning process. The section also requires an identification and analysis of various effects of the plan and a summary of public comments on the analysis.

The plan approved by EPA on April 3, 1981, was found to be consistent with the requirements of section 172(b)(9). Public involvement is documented for the ozone SIP revision by a submittal of the state's hearing officer's report. The hearing officer's report summarizes testimony at the June 5, 1986, hearing and identifies those attending the hearing.

11. Attainment Date Extension

Section 172(b)(11) is applicable to Part D plans which could not demonstrate attainment of ozone or carbon monoxide standards by December 31, 1982. This section establishes requirements for plans requiring an extension of the attainment date. Such extension plans were to include I/M of motor vehicle emission controls, alternate site analysis of new stationary sources, and other activities to insure attainment of the ozone or carbon monoxide standard. This section requires that extension areas attain the applicable standard by December 31, 1987.

The Kansas Ozone SIP for the KCMA as approved by EPA demonstrated attainment by December 31, 1982. Therefore, an extension was not requested. Thus, section 172(b)(11) is not applicable to the revised Kansas Ozone SIP.

12. Planning Procedures

In accordance with section 174 of the Act, the Mid America Regional Council

(MARC) is the designated lead planning agency for the Kansas City area. MARC is primarily responsible for transportation planning, but is active in other SIP elements. MARC developed the forecasts of population change used in the SIP revision to project growth.

13. Contingency Plan

Section 6 of the SIP revision contains the state's contingency plan. The contingency plan provides for consideration of Stage II vapor recovery, an anti-tampering program, an I/M program, and traffic control measures.

D. Conclusions

The Kansas submission of July 2, 1986, is based on a current emission inventory, has an emission reduction requirement developed using current guidance, will reduce actual emissions through implementation of new emission limits, and shows attainment of the ozone NAAQS by a near-term date. These basic requirements, along with the other elements described above, are necessary for a revision to be approved as part of the SIP. The July 2 submittal satisfies all applicable CAA requirements, except that it does not provide for all RACMs as required by section 172(b)(2). The April 22, 1987, submittal (discussed briefly herein and in detail elsewhere in today's **Federal Register**) explicitly addresses the section 172(b)(2) requirements. Thus, the overall SIP addresses all elements of a complete ozone plan.

PROPOSED ACTION: EPA proposes to approve the revised Kansas Ozone SIP for the Kansas metropolitan area as meeting the requirements of the CAA.

EPA intends to propose, in the near future, its policy on how areas that are not currently attaining the ozone and carbon monoxide standards should revise their SIPs after 1987. As a part of that policy, the Agency expects to issue notices under section 110(a)(2)(H) of the Act that the SIPs for various states are substantially inadequate to attain the standards in the near term. EPA will continue to monitor the air quality in Kansas City, as well as the state's progress in implementing the provisions of the Kansas City plan according to the schedule described above. Depending on the outcome of that review, EPA may or may not include Kansas City among the areas receiving section 110(a)(2)(H) notices under the post-1987 policy.

The Administrator's decision to approve or disapprove this proposed SIP revision will be based on the comments received and on a determination of whether or not the revision meets the requirements of sections 110 and 172 of the CAA; of 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of State Implementation Plans; and of the 1982 SIP policy.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a substantial impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this proposed rule from the requirements of section 3 of Executive Order 12291.

Program Fraud Civil Remedies

AGENCY: Office of the Secretary, DOT.

ACTION: Proposed Rule.

SUMMARY: This proposed rule would implement the Program Fraud Civil Remedies Act of 1986, which authorizes the Department of Transportation (and certain other federal agencies) to impose through administrative adjudication civil penalties and assessments against certain persons making false claims or statements.

DATE: To assure consideration, comments must be received on or before November 2, 1987. Late-filed comments will be considered to the extent practicable.

ADDRESSES: Comments should be addressed to Docket Clerk, Docket 45164, Department of Transportation, Room 4107, 400 7th Street, SW., Washington, DC 20590. Comments will be available for review by the public at this address from 9:00 a.m. through 5:30 p.m., Monday through Friday. Commenters wishing acknowledgment of their comments should include a stamped, self-addressed postcard with their comment. The Docket Clerk will date stamp and sign the card and return it to the commenter.

FOR FURTHER INFORMATION CONTACT: James R. Dann, Deputy Assistant General Counsel, at (202) 366–9154 (FTS 366–9154).

SUPPLEMENTARY INFORMATION:

I. Background

These proposed regulations would implement the Program Fraud Civil

Remedies Act of 1986 (the Act), which was enacted on October 21, 1986 as sections 6101–6104 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509, 100 Stat. 1874), and codified at 31 U.S.C. 3801–3812. The Act establishes an administrative remedy against anyone who makes a false claim or written statement to any of certain Federal agencies, including the Department of Transportation (the Department). In brief, any person who submits a claim or written statement to an affected agency knowing or having reason to know that it is false, fictitious, or fraudulent, is liable for a penalty of up to $5,000 per false claim or statement and, in addition, with respect to claims, for an assessment of up to double the amount falsely claimed.

The Act requires each affected Federal agency to promulgate rules and regulations necessary to implement the provisions of the Act. 31 U.S.C. 3809. The Senate Governmental Affairs Committee stated in its report on the Act that it "expects that the regulations would be substantively uniform throughout the government, except as necessary to meet the specific needs of a particular agency or program." S. Rep. No. 99–212, 99th Cong., 1st Sess. 12 (1985). In keeping with that expression, in November 1986 the President's Council on Integrity and Efficiency (PCIE) requested the Department of Health and Human Services (HHS) to form a task force to develop model regulations for implementation of the Act by all affected Federal agencies. HHS was asked to lead the task force because it has been administering since 1983 a statute similar to the Act, the Civil Monetary Penalty Law, 42 U.S.C. 1320a–7a. The task force completed a model set of regulations on March 6, 1987, and the PCIE recommended that all affected federal agencies adopt them.

The Department here proposes to adopt the final model regulations recommended by the PCIE, incorporating, where appropriate, definitions specific to the Department's organization and making a small number of minor changes. The more substantive of these are described below in this preamble.

II. General Description of the Statutory Scheme

The Act provides for administrative adjudication of cases where a person makes a claim or written statement to the Department that the person knows, or has reason to know, is false, fictitious, or fraudulent. Liabaility attaches under the Act for any false, fictitious, or fraudulent claim for property, services, or money and for any written statement that is false, fictitious, or fraudulent with respect to any claim, contract, bid, proposal for contract, grant, loan or benefit.

The claim or statement is actionable under the Act if it is submitted to the Department with actual knowledge or deliberate ignorance of its falsity, or with reckless disregard for the truth or falsity of the claim or statement. Where the Act is found to have been violated, each person found to be liable is subject to a penalty of up to $5,000 per claim or statement. In addition, with respect to claims, the person may be subject to an assessment of up to double the amount falsely claimed.

Role of Major Participants in Bringing Cases

The Act prescribes roles for four major participants within the Department in bringing cases under the Act: the investigating official, the reviewing official, the presiding officer, and the authority head.

The *investigating official* is vested with the authority to investigate all allegations of liability under the Act, including the power to subpoena documents and other information. If the investigating official concludes that an action under the Act is warranted, he or she submits a report of the investigation to the reviewing official.

The *reviewing official* must be someone within the Department independent of the investigating official. The reviewing official reviews the investigative report to determine whether there is adequate evidence to believe that the person named in the report is liable under the Act. If so, the reviewing official sends to the Department of Justice a written notice of intent to issue a complaint. The Act then gives the Attorney General, or a designated Assistant Attorney General, 90 days to approve or disapprove the issuance of a complaint.

If the appropriate Justice Department official approves a case, the reviewing official may serve a complaint on the defendant. The defendant may request a hearing by filing an answer within 30 days of receiving the complaint. If the defendant does so, the reviewing official sends the complaint and answer to a presiding officer, who in the Department, as in most affected agencies, will be an administrative law judge (ALJ).

The *presiding officer* serves a notice of hearing upon the defendant, supervises discovery, rules on motions, conducts the hearing, and issues an initial decision. The initial decision will contain findings of fact, conclusions of law, and the amount of any penalties and assessments imposed. Any defendant who is determined to be liable for a civil penalty or assessment in an initial decision and who has filed a timely answer may appeal that decision to the authority head.

When a defendant files a proper appeal, the *authority head* may affirm, reduce, reverse, compromise, remand, or settle any penalty or assessment. Should the authority head determine that the defendant is liable for a penalty or assessment, the defendant may obtain judicial review of such determination in an appropriate United States District Court.

These proposed regulations name as the investigation official the Inspector General of the Department. The Department's Deputy General Counsel will act as the reviewing official. Administrative Law Judges (ALJ) will be presiding officers, and the Department's Assistant Secretary or Deputy Assistant Secretary for Budget and Programs will function as the authority head.

III. Discussion of Major Issues

1. Definitions

Most of the proposed definitions set forth in section 31.2 of the proposed rule come directly from the Act. One exception is the proposed rule come directly from the Act. One exception is the proposed definition of "benefit," which is broad in scope for the purpose of describing "benefit" in the context of false statements. This definition stands in contrast to the "benefits" specifically listed in 31 U.S.C. 3803(c)(2) for the purpose of limiting liability under the Act with respect to recipients of certain Government benefits. (The Department administers none of the benefit programs named in 31 U.S.C. 3803(c)(2).) The proposed definition "person" follows the Act's definition.

2. Basis for Civil Penalties and Assessments

For the most part, proposed language contained in section 31.3 comes directly from the Act or the legislative history. However, the proposed regulation provides that liability for assessments is joint and several among all defendants, whereas each defendant may be held liable separately for a penalty of up to $5,000 per claim or statement.

3. Investigation

Section 31.4 includes the provision that the investigating official must submit a report to the reviewing official only where he or she concludes that action under the Act may be warranted. This section also would prescribe basic procedures for the investigating official

to follow in issuing investigatory subpoenas under the Act for documents or other information. In addition, this section would make it clear that the Act does not prevent the investigating official from exercising the subpoena powers that he or she may have under other authorities or from pursuing other remedies.

4. Review by Reviewing Official

Under 31 U.S.C. 3809, the reviewing official is required to determine that there is a reasonable prospect of collecting the amount of penalties and assessments for which a person may be liable. Section 31.5 would not interpret this to require the reviewing official to determine that a defendant could pay the statutory maximum, but rather that the defendant could pay an "appropriate amount."

5. Prerequisites for Issuing a Complaint

Most of the proposed language contained in § 31.6 is derived directly from the Act. Under 31 U.S.C. 3803(c)(1), the remedies provided in the Act do not apply with respect to any claim if the amount of money (or value of property or services) falsely demanded or requested in such claim or in a group of related claims submitted at the same time exceeds $150,000. This section interprets the term "related group of claims submitted at the same time" narrowly to prevent attempts to evade liability under the Act.

The proposed regulation also would make it clear that the reviewing official may join in a single complaint claims that are unrelated or that were not submitted at the same time, even if the total amount of money (or value of property or services) falsely claimed exceeds $150,000.

6. Issuance of Complaints

The proposed regulations would specify what must be included in a complaint (§ 31.7) and an answer by which a defendant requests a hearing (§ 31.9). Section 31.8 would specify the means by which service of the complaint is made.

7. Default upon Failure to Answer

Section 31.10 would require the ALJ (after another notice to the defendant) to impose penalties and assessments at the statutory maximum whenever the facts alleged in the complaint establish liability under the Act and the defendant fails to answer within the time prescribed. An initial decision of the ALJ would become the final decision of the Department unless the defendant would demonstrate to the ALJ or on appeal to the authority head that extraordinary circumstances prevented a timely answer.

8. Hearing

Sections 31.14 and 31.15 are designed to ensure the fairness of a hearing by providing for the separation of functions among those within the agency handling these cases, and prohibiting ex parte contacts with the ALJ on any matters at issue. In a slight variation from the model regulation, § 31.16 of the proposed regulation deletes the provision that if a motion for disqualification is made, the ALJ shall proceed no further in the case until the disqualification issue is resolved. The Department believes that permitting a party to stop all proceeding, even on the eve or in the middle of a hearing, by filing a disqualification motion and affidavit is unwise. The purpose of the deletion is merely to afford the ALJ the discretion to handle the matter as he or she deems appropriate in light of all the circumstances present.

9. Rights of Parties; Authority of the ALJ

Sections 31.17 and 31.18 would list the rights of the parties and the authorities of the ALJ not specifically provided in other sections of the regulations. To provide a clearer statement of what the Department perceives as the intent of the model regulation, proposed § 31.18(c), in a slight variation from the language of the model regulation, would read as follows: "The ALJ does not have authority to find Federal statutes or regulations invalid." The purpose of this minor change is to express better the legal principle that an agency and its personnel must presume the validity of the statutes and regulations under which it operates. The Department does not intend by this provision to restrict an ALJ from construing the language of statutes or regulations, or from considering even the constitutional implications of alternate interpretations of statutes and regulations.

10. Prehearing Conferences

Section 31.19 provides that the ALJ may order a prehearing conference at his or her discretion, but must order at least one on the request of either party. Prehearing conferences may be held over the telephone at the ALJ's discretion.

11. Disclosure of Documents

The Act requires the disclosure of certain types of materials to the defendant. 31 U.S.C. 3803(e)(1) and (2). Generally speaking, these materials consist of any relevant and material documents and other materials that relate to the allegations in the complaint and upon which the findings and conclusions of the investigating official under § 31.4(b) are based, unless such materials are subject to a privilege under Federal law. In addition, under § 31.20 the defendant may also obtain a copy of all exculpatory information in the possession of the reviewing official or investigating official relating to the allegations in the complaint.

12. Discovery

Congress provided for limited discovery in these proceedings. The Act provides only for such discovery as the ALJ determines is "necessary for the expeditious, fair, and reasonable consideration of the issues * * *." 31 U.S.C. 3803(g)(3)(B)(ii). In addition, the Senate Governmental Affairs Committee stated:

> In the ordinary case, the Committee anticipates that the timely exchange of proposed exhibits, witness lists and witness statements will constitute sufficient discovery. It is clearly the Committee's hope that this alternative administrative mechanism will not become entangled in the unchecked "discovery wars" that render many court cases excessively costly and time-consuming.

S. Rep. No. 99–212, *supra*, at 15.

In order to ensure that discovery is reasonably controlled, the proposed regulation (§ 31.21) provides that all discovery must be approved by the ALJ unless the parties agree otherwise. The burden of proof with respect to a discovery request is on the proponent of that request. Section 31.21(d)(1) includes some minor editorial changes from the model regulation to improve clarity.

13. Exchange of Witness Lists, Statements, and Exhibits

Section 31.22 would provide for the exchange of certain documents before the hearing, including witness lists, copies of prior statements of witnesses, and copies of hearing exhibits. The ALJ would be able to exclude witnesses and documents in instances where a party did not receive such documents before the hearing. In addition, any documents so exchanged would be deemed authentic for purposes of admissibility at the hearing unless a party objected before the hearing.

14. Subpoenas

Section 31.23 would prescribe procedures for the ALJ to issue, and for parties and prospective witnesses to contest, subpoenas to appear at the hearing, as authorized by 31 U.S.C. 3804(b). In a minor addition to the model regulation, the Department's regulation would require requests for the issuance

of a subpoena to be accompanied by a proposed subpoena. Section 31.24 would permit parties and prospective witnesses to seek protective orders to restrict discovery or to limit the disclosure of information at the hearing.

15. Filing Papers

In a minor supplementation of the model regulation, § 31.26(a) would require parties to submit the original and two copies of documents to the Docket Clerk, and two copies simultaneously to the ALJ or, if on appeal, to the authority head.

16. Motions

The Department proposes, in § 31.21(e)(3), 31.23(f), and 31.28(d), to include provisions not in the model regulation on the effect of motions on deadlines and return dates.

17. Sanctions

Section 31.29 would expressly recognize an ALJ's authority to sanction parties and their representatives for failing to comply with regulations or orders of the ALJ. These sanction provisions are modeled on those of the Merit Systems Protection Board at 5 CFR 1201.43. Section 31.29(b) contains a minor wording change from the model regulation to state more clearly that the list of sanctions in the regulation is not exhaustive.

18. The Hearing and Burden of Proof

Section 31.30 would recognize that the Department has the burden of proof on the issues of liability and the existence of any factors that might aggravate or increase the amount of penalties and assessments that may be imposed. Conversely, the defendant has the burden of proof on any affirmative defenses and any factors that might mitigate or reduce the amount of penalties and assessments.

19. Determining the Amount of Penalties and Assessments

The Act authorizes the imposition of penalties ranging up to $5,000 for each false claim or statement, and in addition, with respect to claims, an assessment ranging up to twice the amount falsely claimed. However, the Act is silent on how the appropriate amount of penalties or assessments should be determined. Section 31.31 would provide guidance to the ALJ and the authority head in exercising this discretion. The proposed regulation notes that because of the intangible costs of fraud, the expense of investigating such conduct, and the need to deter others, a significant penalty and double damage ordinarily should be imposed. It then lists factors that should be considered, but notes that the list is not exhaustive. The ALJ and the authority head remain free to consider other factors that may aggravate or mitigate the amount of penalties and assessments as such factors are presented in particular cases.

20. Location of Hearing

In a minor clarification of the model regulation, § 31.32(b) would permit each party to have the opportunity to present written and oral argument with respect to the location of the hearing. However, if a party desires to present oral argument on the location of the hearing, the Department anticipates that such argument will be presented at the prehearing conference, which may be held by telephone. No separate, in-person hearing is required.

21. Witnesses

Under § 31.33, the ALJ would allow testimony to be admitted in the form of a written statement or deposition so long as the opposing parties have a sufficient opportunity to subpoena the person whose statement is being offered. Cross-examination may, at the discretion of the ALJ, exceed the scope of direct examination. The provisions in paragraphs (c) and (e) are derived from Rule 611 of the Federal Rules of Evidence.

22. Evidence

Paragraphs (a) through (d) of § 31.34 were included to comply with the recommendations of the Administrative Conference of the United States in Recommendation 86–2, 1 CFR 305.86–2, 51 FR 25642 (July 16, 1986). The Federal Rules of Evidence are not, with some exceptions, generally binding on the ALJ. However, the ALJ may apply the Federal Rules of Evidence, for example, to exclude unreliable evidence.

23. Post-Hearing Briefs

Per § 31.36, it is within the ALJ's discretion to order post-hearing briefs, and any party may file one if so desired. The proposed regulation does not include the model regulation's 60-day maximum period for filing post-hearing briefs because the Department believes that the matter should remain subject to the ALJ's discretion and that parties might come to expect 60 days, which would often be too long a period.

24. Initial Decision

Section 31.37 would provide that the ALJ shall serve on the parties an initial decision based solely on the record, which shall contain specific findings of fact and conclusions of law on whether the claims or statements alleged in the complaint violate the Act and the appropriate amount of penalties and assessments considering any aggravating or mitigating factors in the case. The initial decision would become final 30 days after issuance unless an appeal is filed or a motion for reconsideration is made.

25. Reconsideration of Initial Decision

Section 31.38 would permit any party to file with the ALJ a motion to the ALJ for reconsideration of the initial decision, allowing the primary decisionmaker an opportunity to correct any errors in the initial decision. Sections 31.38 (f) and (g) are phrased slightly differently from the model regulation in order to improve clarity.

26. Appeal to Authority Head

Section 31.39 would prescribe procedures for a defendant who has been found liable for penalties and assessments in an initial decision to appeal that decision to the authority head, as guaranteed by 31 U.S.C. 3803(i)(2). The rule would provide that there is no appeal of an ALJ's interlocutory orders.

27. Miscellaneous

Sections 31.40 through 31.46 would largely reiterate statutory provisions, except § 31.41, which would provide that there will be no administrative stay of the authority head's final decision.

28. Limitations

The Act provides that the ALJ must serve a notice of hearing within 6 years of the date the claim or statement is made. The proposed regulation (§ 31.47) would provide that service of a notice of intent to issue an initial decision in the event of default would be deemed to meet this statutory requirement.

IV. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 requires the Department to prepare and publish an initial regulatory impact analysis for any proposed major rule. A major rule is defined as any regulation that is likely to: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or (3) result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Department has determined that these proposed regulations do not meet the criteria for a major rule as defined by section 1(b) of Executive Order 12291. In general, the proposed rule would establish procedures governing the scope and conduct of administrative adjudications to impose civil penalties and assessments upon persons who submit false claims or statements. As such, this proposed rule would have no direct effect on the economy or on Federal or State expenditures. Consequently, the Department has concluded that an initial regulatory impact analysis is not required.

B. Department of Transportation Regulatory Policies and Procedures

Because this NPRM proposes a rule that would affect all Departmental administrations and would provide important new tools for combating fraud in Departmental programs, it is a significant rule under the Department's regulatory policies and procedures. However, because the rule's economic impacts would be minimal, it has been determined that a regulatory evaluation is not needed.

C. Regulatory Flexibility Analysis

Consistent with the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 5 U.S.C. 604(a)), the Department prepares and publishes an initial regulatory flexibility analysis for proposed regulaltions unless the Secretary certifies that the regulation would not have a significant economic impact on a substantial number of small business entities. The analysis is intended to explain what effect the regulatory action by the agency would have on small businesses and other small entities and to develop lower cost or burden alternatives. As indicated above, these proposed regulations would not have a significiant economic impact. While some of the penalties and assessments the Department could impose as a result of these regulations might have an impact on small entities, the Department does not anticipate that a substantial number of these small entities would be significantly affected by this rulemaking. Therefore, the Secretary certifies that this proposed regulation would not have a significant economic impact on a substantial number of small entities.

D. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1980 (Pub. L. 96–511), all Departments are required to submit to the Office of Management and Budget for review and approval any reporting or recordkeeping requirements contained in both proposed and final rules. The Department has determined that this proposed rulemaking does not contain any information collection requirements and would not increase the Federal paperwork burden on the public and private sector.

V. Other Information

List of Subjects in 49 CFR Part 31

Administrative practice and procedure, Fraud, Investigations, Organizations and functions (Government agencies) Penalties.

Issued in Washington, DC, on September 29, 1987.

Elizabeth Dole,

Secretary of Transportation.

In consideration of the foregoing, the Department of Transportation proposes to add a new 49 CFR Part 31 to subtitle A to read as follows:

PART 31—PROGRAM FRAUD CIVIL REMEDIES

Sec.

31.1 Basis and purpose.
31.2 Definitions.
31.3 Basis for civil penalties and assessments.
31.4 Investigation.
31.5 Review by the reviewing official.
31.6 Prerequisites for issuing a complaint.
31.7 Complaint.
31.8 Service of complaint.
31.9 Answer.
31.10 Default upon failure to answer.
31.11 Referral of complaint and answer to the ALJ.
31.12 Notice of hearing.
31.13 Parties to the hearing.
31.14 Separation of functions.
31.15 Ex parte contacts.
31.16 Disqualification of reviewing official or ALJ.
31.17 Rights of parties.
31.18 Authority of the ALJ.
31.19 Prehearing conferences.
31.20 Disclosure of documents.
31.21 Discovery.
31.22 Exchange of witness lists, statements, and exhibits.
31.23 Subpoenas for attendance at hearing.
31.24 Protective order.
31.25 Fees.
31.26 Filing, form, and service of papers.
31.27 Computation of time.
31.28 Motions.
31.29 Sanctions.
31.30 The hearing and burden of proof.
31.31 Determining the amount of penalties and assessments.
31.32 Location of hearing.
31.33 Witnesses.
31.34 Evidence.
31.35 The record.
31.36 Post-hearing briefs.
31.37 Initial decision.
31.38 Reconsideration of initial decision.
31.39 Appeal to authority head.
31.40 Stays ordered by the Department of Justice.
31.41 Stay pending appeal.
31.42 Judicial review.
31.43 Collection of civil penalties and assessments.
31.44 Right to administrative offset.
31.45 Deposit in Treasury of United States.
31.46 Compromise or settlement.
31.47 Limitations.

Authority: 31 U.S.C. 3801–3812.

§ 31.1 Basis and purpose.

(a) *Basis.* This part implements the Program Fraud Civil Remedies Act of 1986, Pub. L. No. 99–509, Sections 6101–6104, 100 Stat. 1874 (October 21, 1986), to be codified at 31 U.S.C. 3801–3812. 31 U.S.C. 3809 of the statute requires each authority head to promulgate regulations necessary to implement the provisions of the statute.

(b) *Purpose.* The part—

(1) Establishes administrative procedures for imposing civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false, fictitious, or fraudulent claims or written statements to authorties or to their agents, and

(2) Specifies the hearing and appeal rights of persons subject to allegations of liability for such penalties and assessments.

§ 31.2 Definitions.

ALJ means an Administrative Law Judge in the authority appointed pursuant to 5 U.S.C. 3105 or detailed to the authority pursuant to 5 U.S.C 3344.

Authority means the Department of Transportation.

Authority head means the Assistant Secretary of Deputy Assistant Secretary for Budget and Programs, Department of Transportation.

Benefit means, except as the context otherwise requires, anything of value, including but not limited to any advantage, preference, privilege, license, permit, favorable decision, ruling, status, or loan guarantee.

Claim means any request, demand, or submission—

(a) Made to the authority for property, services, or money (including money representing grants, loans, insurance, or benefits);

(b) made to a recipient of property, services, or money from the authority or to a party to a contract with the authority—

(1) For property or services if the United States—

(i) Provided such property or services;

(ii) Provided any portion of the funds for the purchase of such property or services; or

(iii) Will reimburse such recipient or party for the purchase of such property or services; or

(2) For the payment of money (including money representing grants, loans, insurance, or benefits) if the United states—

(i) Provided any portion of the money requested or demanded; or

(ii) Will reimburse such recipient or party for any portion of the money paid on such request or demand; or

(c) Made to the authority which has the effect of decreasing an obligation to pay or account for property, services, or money.

Complaint means the administrative complaint served by the reviewing official on the defendant under § 31.7.

Defendant means any person alleged in a complaint under § 31.7 to be liable for a civil penalty or assessment under § 31.3.

Government means the United States Government.

Individual means a natural person.

Initial decision means the written decision of the ALJ required by §§ 31.10 or 31.37 and includes a revised initial decision issued following a remand or a motion for reconsideration.

Investigating official means the Inspector General of the Department of Transportation or an officer or employee of the Office of Inspector General designated by the Inspector General and serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

Knows or has reason to know, means that a person, with respect to a claim or settlement—

(a) Has actual knowledge that the claim or statment is false, fictitious, or fraudulent;

(b) Acts in deliberate ignorance of the truth or falsity of the claim or statement; or

(c) Acts in reckless disregard of the truth or falsity of the claim or statement.

Makes, wherever it appears, shall include the terms presents, submits, and causes to be made, presented, or submitted. As the context requires, *making* or *made*, shall likewise include the corresponding forms of such terms.

Person means any individual, partnership, corporation, association, or private organization, and includes the plural of that term.

Representative means an attorney who is a member in good standing of the bar of any State, Territory, or possession of the United States or of the District of Columbia or the Commonwealth of Puerto Rico.

Reviewing official means the Deputy General Counsel of the Department of Transportation, or other officer or employee of the Department who is designated by the Deputy General Counsel and eligible under 31 U.S.C. 3801(a)(8).

Statement means any representation, certification, affirmation, document, record, or accounting or bookkeeping entry made—

(a) With respect to a claim or to obtain the approval or payment of a claim (including relating to eligibility to make a claim); or

(b) With respect to (including relating to eligibility for)—

(1) A contract with, or bid or proposal for a contract with; or

(2) A grant, loan, or benefit from, the authority, or any State, political subdivision of a State, or other party, if the United States Government provides any portion of the money or property under such contract or for such grant, loan, or benefit, or if the Government will reimburse such State, political subdivision, or party for any portion of the money or property under such contract or for such grant, loan, or benefit.

§ 31.3 Basis for civil penalties and assessments.

(a) *Claims.* (1) Except as provided in paragraph (c) of this section, any person who makes a claim that the person knows or has reason to know—

(i) Is false, fictitious, or fraudulent;

(ii) Includes or is supported by any written statement which asserts a material fact which is false, fictitious, or fraudulent;

(iii) Includes or is supported by any written statement that—

(A) Omits a material fact;

(B) Is false, fictitious, or fraudulent as a result of such omission; and

(C) Is a statement in which the person making such statement has a duty to include such material fact; or

(iv) Is for payment for the provision of property or services which the person has not provided as claimed,

shall be subject, in addition to any other remedy that may be presecribed by law, to a civil penalty of not more than $5,000 for each such claim.

(2) Each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim.

(3) A claim shall be considered made to the authority, recipient, or party when such claim is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of the authority, recipient, or party.

(4) Each claim for property, services, or money is subject to a civil penalty regardless of whether such property, services, or money is actually delivered or paid.

(5) If the Government has made any payment (including transferred property or provided services) on a claim, a person subject to a civil penalty under paragraph (a)(1) of this section shall also be subject to an assessment of not more than twice the amount of such claim or that portion thereof that is determined to be in violation of paragraph (a)(1) of this section. Such assessment shall be in lieu of damages sustained by the Government because of such claim.

(b) *Statements.* (1) Except as provided in paragraph (c) of this section, any person who makes a written statement that—

(i) The person knows or has reason to know—

(A) Asserts a material fact which is false, fictitious, or fraudulent; or

(B) Is false, fictitious, or fraudulent because it omits a material fact that the person making the statement has a duty to include in such statement; and

(ii) Contains or is accompanied by an express certification or affirmation of the truthfulness and accuracy of the contents of the statement.

shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such statement.

(2) Each written representation, certification, or affirmation constitutes a separate statement.

(3) A statement shall be considered made to the authority when such statement is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of the authority.

(c) No proof of specific intent to defraud is required to establish liability under this section.

(d) In any case in which it is determined that more than one person is liable for making a claim or statement under this section, each such person may be held liable for a civil penalty under this section.

(e) In any case in which it is determined that more than one person is liable for making a claim under this section on which the Government has made payment (including transferred property or provided services), an assessment may be imposed against any such person or jointly and severally against any combination of such persons.

§ 31.4 Investigation.

(a) If an investigating official concludes that a subpoena pursuant to the authority conferred by 31 U.S.C. 3804(a) is warranted—

(1) The subpoena so issued shall notify the person to whom it is addressed of the authority under which the subpoena is issued and shall identify the records or documents sought;

(2) The investigating official may designate a person to act on his or her behalf to receive the documents sought; and

(3) The person receiving such subpoena shall be required to tender to the investigating official or the person designated to receive the documents a certification that the documents sought have been produced, or that such documents are not available and the reasons therefor, or that such documents, suitably identified, have been withheld based upon the assertion of an identified privilege.

(b) If the investigating official concludes that an action under the Program Fraud Civil Remedies Act may be warranted, the investigating official shall submit a report containing the findings and conclusions of such investigation to the reviewing official.

(c) Nothing in this section shall preclude or limit an investigating official's discretion to refer allegations directly to the Department of Justice for suit under the False Claims Act or other civil relief, or to defer or postpone a report or referral to avoid interference with a criminal investigation or prosecution.

(d) Nothing in this section modifies any responsibility of an investigating official or to report violations of criminal law to the Attorney General.

§ 31.5 Review by the reviewing official.

(a) If, based on the report of the investigating official under § 31.4(b), the reviewing official determines that there is adequate evidence to believe that a person is liable under § 31.3 of this part, the reviewing official shall transmit to the Attorney General a written notice of the reviewing official's intention to issue a complaint under § 31.7.

(b) Such notice shall include—

(1) A statement of the reviewing official's reasons for issuing a complaint;

(2) A statement specifying the evidence that supports the allegations of liability;

(3) A description of the claims or statements upon which the allegations of liability are based;

(4) An estimate of the amount of money or the value of property, services, or other benefits requested or demanded in violation of § 31.3 of this part;

(5) A statement of any exculpatory or mitigating circumstances that may relate to the claims or statements known by the reviewing official or the investigating official; and

(6) A statement that there is a reasonable prospect of collecting an appropriate amount of penalties and assessments. Such a statement may be based upon information then known or an absence of any information indicating that the person may be unable to pay such an amount.

§ 31.6 Prerequisites for issuing a complaint.

(a) The revising official may issue a complaint under § 31.7 only if—

(1) The Department of Justice approves the issuance of a complaint in a written statement described in 31 U.S.C. 3803(b)(1), and

(2) In the case of allegations of liability under § 31.3(a) with respect to a claim, the reviewing official determines that, with respect to such claim or a group of related claims is submitted at the same time such claim is submitted (as defined in paragpraph (b) of this section), the amount of money or the value of property or services demanded or requested in violation of § 31.3(a) does not exceed $150,000.

(b) For the purposes of this section, a related group of claims submitted at the same time shall include only those claims arising from the same transaction (*e.g.*, grant, loan, application, or contract) that are submitted simulataneously as part of a single request, demand, or submission.

(c) Nothing in this section shall be construed to limit the reviewing official's authority to join in a single complaint against a person claims that are unrelated or were not submitted simulaneously, regardless of the amount of money, or the value of property or services, demanded or requested.

§ 31.7 Complaint.

(a) On or after the date the Department of Justice approves the issuance of a complaint in accordance with 31 U.S.C. 3803(b)(1), the reviewing official may serve a compliant on the defendant, as provided in § 31.8.

(b) The complaint shall state—

(1) The allegations of liability against the defendant, including the statutory basis for liability, an identification of the claims or statements that are the basis for the alleged liability, and the reasons why liability allegedly arises from such claims or statements;

(2) The maximum amount of penalties and assessments for which the defendant may be held liable;

(3) Instructions for filing an answer to request a hearing, including a specific statement of the defendant's right to request a hearing by filing an answer and to be represented by a representative; and

(4) That failure to file an answer within 30 days of service of the complaint will result in the imposition of the maximum amount of penalties and assessments without right to appeal.

(c) At the same time the reviewing official serves the complaint, he or she shall serve the defendant with a copy of these regulations.

§ 31.8 Service of complaint.

(a) Service of a complaint must be made by certified or registered mail or by delivery in any manner authorized by Rule 4(d) of the Federal Rules of Civil Procedure.

(b) Proof of service, stating the name and address of the person on whom the complaint was served, and the manner and date of service, may be made by—

(1) Affidavit of the individual making service;

(2) An acknowledged United States Postal Service return receipt card; or

(3) Written acknowledgment of the defendant or his or her representative.

§ 31.9 Answer.

(a) The defendant may request a hearing by serving an answer on the reviewing official within 30 days of service of the complaint. Service of an answer shall be made by delivering a copy to the reviewing official or by placing a copy in the United States mail, postage prepaid and addressed to the reviewing official. An answer shall be deemed to be a request for hearing.

(b) In the answer, the defendant—

(1) Shall admit or deny each of the allegations of liability made in the complaint;

(2) Shall state any defense on which the defendant intends to rely;

(3) May state any reasons why the defendant contends that the penalties and assessments should be less than the statutory maximum; and

(4) Shall state the name, address, and telephone number of the person authorized by the defendant to act as defendant's representative, if any.

§ 31.10 Default upon failure to answer.

(a) If the defendant does not answer within the time prescribed in § 31.9(a), the reviewing official may refer the complaint to an ALJ filing the complaint and a statement that defendant has failed to answer on time.

(b) Upon the referral of the complaint, the ALJ shall promptly serve on

defendant in the manner prescribed in § 31.8, a notice that an initial decision will be issued under this section.

(c) In addition, the ALJ shall assure the facts alleged in the complaint to be true, and, if such facts establish liability under § 31.3, the ALJ shall issue an initial decision imposing the maximum amount of penalties and assessments allowed under the statute.

(d) Except as otherwise provided in this section, by failing to answer on time, the defendant waives any right to further review of the penalties and assessments imposed under paragraph (c) of this section, and the initial decision shall become final and binding upon the parties 30 days after it is issued.

(e) If, before such an initial decision becomes final, the defendant files a motion seeking to reopen on the grounds that extraordinary circumstances prevented the defendant from answering, the initial decision shall be stayed pending the ALJ's decision on the motion.

(f) If, on such motion, the defendant can demonstrate extraordinary circumstances excusing the failure to answer on time, the ALJ shall withdraw the intitial decision in paragraph (c) of this section, if such a decision has been issued, and shall grant the defendant an opportunity to answer the complaint.

(g) A decision of the ALJ denying a defendant's motion under paragraph (e) of this section is not subject to reconsideration under § 31.38.

(h) The defendant may appeal to the authority head the decision denying a motion to reopen by filing a notice of appeal in accordance with § 31.26 within 15 days after the ALJ denies the motion. The timely filing of a notice of appeal shall stay the initial decision until the authority head decides the issue.

(i) If the defendant files a timely notice of appeal, the Docket Clerk shall forward two copies of the record of the proceeding to the authority head.

(j) The authority head shall decide expeditiously whether extraordinary circumstances excuse the defendant's failure to answer on time based solely on the record before the ALJ.

(k) If the authority head decides that extraordinary circumstances excused the defendant's failure to answer on time, the authority head shall remand the case to the ALJ with instructions to grant the defendant an opportunity to answer.

(l) If the authority head decides that the defendant's failure to anwswer on time is not excused, the authority head shall reinstate the initial decision of the ALJ, which shall become final and binding upon the parties 30 days after the authority head issues such decision.

§ 31.11 Referral of complaint and answer to the ALJ.

Upon receipt of an answer, the reviewing official shall refer the matter to an ALJ by filing the complaint and answer in accordance with § 31.26.

§ 31.12 Notice of hearing.

(a) When the ALJ receives the complaint and answer, the ALJ shall promptly serve a notice of hearing upon the defendant in the manner prescribed by § 31.8. At the same time, the ALJ shall send a copy of such notice to the representative for the Government and to the Docket Clerk.

(b) Such notice shall include—

(1) The tentative time and place, and the nature of the hearing;

(2) The legal authority and jurisdiction under which the hearing is to be held;

(3) The matters of fact and law to be asserted;

(4) A description of the procedures for the conduct of the hearing;

(5) The name, address, and telephone number of the representative of the Government and of the defendant, if any; and

(6) Such other matters as the ALJ deems appropriate.

§ 31.13 Parties to the hearing.

(a) The parties to the hearing shall be the defendant and the authority.

(b) Pursuant to 31 U.S.C. 3730(c)(5), a private plaintiff under the False Claims Act may participate in these proceedings to the extent authorized by the provisions of that Act.

§ 31.14 Separation of functions.

(a) The investigating official, the reviewing official, and any employee or agent of the authority who takes part in investigating, preparing, or presenting a particular case may not, in such case or a factually related case—

(1) Participate in the hearing as the ALJ;

(2) Participate or advise in the initial decision or the review of the initial decision by the authority head, except as a witness or a representative in public proceedings; or

(3) Make the collection of penalties and assessments under 31 U.S.C. 3806.

(b) The ALJ shall not be responsible to, or subject to the supervision or direction of, the investigating official or the reviewing official.

(c) Except as provided in paragraph (a) of this section, the representative for the Government may be employed anywhere in the authority, including in the offices of either the investigating official or the reviewing official.

§ 31.15 Ex parte contacts.

No party or person (except employees of the ALJ's office) shall communicate in any way with the ALJ on any matter at issue in a case, unless on notice and opportunity for all parties to participate. This provision does not prohibit a person or party from inquiring about the status of a case or asking routine questions concerning administrative functions or procedures.

§ 31.16 Disqualification of reviewing official or ALJ.

(a) A reviewing official of ALJ in a particular case may disquality himself or herself at any time.

(b) A party may file a motion for disqualification of a reviewing official or an ALJ. Such motion shall be accompanied by an affidavit alleging personal bias or other reason for disqualification.

(c) Such motion and affidavit shall be filed promptly upon the party's discovery of reasons requiring disqualification, or such objections shall be deemed waived.

(d) Such affidavit shall state specific facts that support the party's belief that personal bias or other reason for disqualification exists and the time and circumstances of the party's discovery of such facts. It shall be accompanied by a certificate of the representative of record that it is made in good faith.

(e)(1) If the ALJ determines that a reviewing official is disqualified, the ALJ shall dismiss the complaint without prejudice.

(2) If the ALJ disqualifies himself or herself, the case shall be reassigned promptly to another ALJ.

(3) If the ALJ denies a motion to disqualify, the authority head may determine the matter only as part of his or her review of the initial decision upon appeal, if any.

§ 31.17 Rights of parties.

Except as otherwise limited by this part, all parties may—

(a) Be accompanied, represented, and advised by a representative;

(b) Participate in any conference held by the ALJ;

(c) Conduct discovery;

(d) Agree to stipulations of fact or law, which shall be made part of the record;

(e) Present evidence relevant to the issues at the hearing;

(f) Present and cross-examine witnesses;

(g) Present oral arguments at the hearing as permitted by the ALJ; and

VOL
52
ISS
1
9
1
OC
2
1987
UMI

(h) Submit written briefs and proposed findings of fact and conclusions of law after the hearing.

§ 31.18 Authority of the ALJ.

(a) The ALJ shall conduct a fair and impartial hearing, avoid delay, maintain order, and assure that a record of the proceeding is made.

(b) The ALJ has the authority to—

(1) Set and change the date, time, and place of the hearing upon reasonable notice to the parties;

(2) Continue or recess the hearing in whole or in part for a reasonable period of time;

(3) Hold conferences to identify or simplify the issues, or to consider other matters that may aid in the expeditious disposition of the proceeding;

(4) Administer oaths and affirmations;

(5) Issue subpoenas requiring the attendance of witnesses and the production of documents at depositions or at hearings;

(6) Rule on motions and other procedural matters;

(7) Regulate the scope and timing of discovery;

(8) Regulate the course of the hearing and the conduct of representatives and parties;

(9) Examine witnesses;

(10) Receive, rule on, exclude, or limit evidence;

(11) Upon motion of a party, take official notice of facts;

(12) Upon motion of a party, decide cases, in whole or in part, by summary judgment where there is no disputed issue of material fact;

(13) Conduct any conference, argument, or hearing on motions in person or by telephone; and

(14) Exercise such other authority as is necessary to carry out the responsibilities of the ALJ under this part.

(c) The ALJ does not have the authority to find Federal statutes or regulations invalid.

§ 31.19 Prehearing conferences.

(a) The ALJ may schedule prehearing conferences as appropriate.

(b) Upon the motion of any party, the ALJ shall schedule at least one prehearing conference at a reasonable time in advance of the hearing.

(c) The ALJ may use prehearing conferences to discuss the following:

(1) Simplification of the issues;

(2) The necessity or desirability of amendments to the pleadings, including the need for a more definite statement;

(3) Stipulations, admissions of fact or as to the contents and authenticity of documents;

(4) Whether the parties can agree to submission of the case on a stipulated record;

(5) Whether the party chooses to waive appearance at an oral hearing and to submit only documentary evidence (subject to the objection of other parties) and written argument;

(6) Limitation of the number of witnesses;

(7) Scheduling dates for the exchange of witness lists and of proposed exhibits;

(8) Discovery;

(9) The time and place for the hearing; and

(10) Such other matters as may tend to expedite the fair and just disposition of the proceedings.

(d) The ALJ may issue an order containing all matters agreed upon by the parties or ordered by the ALJ at a prehearing conference.

§ 31.20 Disclosure of documents.

(a) Upon written request to the reviewing official, the defendant may review any relevant and material documents, transcripts, records, and other materials that relate to the allegations set out in the complaint and upon which the findings and conclusions of the investigating official under § 31.4(b) are based, unless such documents are subject to a privilege under Federal law. Upon payment of fees for duplication, the defendant may obtain copies of such documents.

(b) Upon written request to the reviewing official, the defendant also may obtain a copy of all exculpatory information in the possession of the reviewing official or investigating official relating to the allegations in the complaint, even if it is contained in a document that would otherwise be privileged. If the document would otherwise be privileged, only the portion containing exclupatory information must be disclosed.

(c) The notice sent to the Attorney General from the reviewing official as described in § 31.5 is not discoverable under any circumstances.

(d) The defendant may file a motion to compel disclosure of the documents subject to the provisions of this section. Such a motion may only be filed following the filing of an answer pursuant to § 31.9.

§ 31.21 Discovery.

(a) The following types of discovery are authorized:

(1) Requests for production of documents for inspection and copying;

(2) Requests for admissions of the authenticity of any relevant documents or of the truth of any relevant fact;

(3) Written interrogatories; and

(4) Depositions.

(b) For the purpose of this section and §§ 31.22 and 31.23, the term "documents" includes information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence. Nothing contained herein shall be interpreted to require the creation of a document.

(c) Unless mutually agreed to by the parties, discovery is available only as ordered by the ALJ. The ALJ shall regulate the timing of discovery.

(d) *Motions for discovery.* (1) A party seeking discovery may file a motion. Such a motion shall be accompanied by a copy of the request for production of documents, request for admissions, or interrogatories, or in the case of depositions, a summary of the scope of the proposed deposition.

(2) Within ten days of service, a party may file an opposition to the motion and/or a motion for protective order as provided in § 31.24.

(3) The ALJ may grant a motion for discovery only if he or she finds that the discovery sought—

(i) Is necessary for the expeditious, fair, and reasonable consideration of the issues;

(ii) Is not unduly costly or burdensome;

(iii) Will not unduly delay the proceeding; and

(iv) Does not seek privileged information.

(4) The burden of showing that discovery should be allowed is on the party seeking discovery.

(5) The ALJ may grant discovery subject to a protective order under § 31.24.

(e) *Depositions.* (1) If a motion for deposition is granted, the ALJ shall issue a subpoena for the deponent, which may require the deponent to produce documents. The subpoena shall specify the time and place at which the deposition will be held.

(2) The party seeking to depose shall serve the subpoena in the manner prescribed in § 31.8.

(3) The deponent may file a motion to quash the subpoena or a motion for a protective order within ten days of service. If the ALJ has not acted on such a motion by the return date, such date shall be suspended pending the ALJ's final action on the motion.

(4) The party seeking to depose shall provide for the taking of a verbatim transcript of the deposition, which it shall make available to all other parties for inspection and copying.

(f) Each party shall bear its own costs of discovery.

§ 31.22 Exchange of witness lists, statements, and exhibits.

(a) At least 15 days before the hearing or at such other time as may be ordered by the ALJ, the parties shall exchange witness lists, copies of prior statements of proposed witnesses, and copies of proposed hearing exhibits, including copies of any written statements that the party intends to offer in lieu of live testimony in accordance with § 31.33(b). At the time the above documents are exchanged, any party that intends to rely on the transcript of deposition testimony in lieu of live testimony at the hearing, if permitted by the ALJ, shall provide each party with a copy of the specific pages of the transcript it intends to introduce into evidence.

(b) If a party objects, the ALJ shall not admit into evidence the testimony of any witness whose name does not appear on the witness list or any exhibit not provided to the opposing party as provided above unless the ALJ finds good cause for the failure or that there is no prejudice to the objecting party.

(c) Unless another party objects within the time set by the ALJ, documents exchanged in accordance with paragraph (a) of this section shall be deemed to be authentic for the purpose of admissibility at the hearing.

§ 31.23 Subpoenas for attendance at hearing.

(a) A party wishing to procure the appearance and testimony of any individual at the hearing may request that the ALJ issue a subpoena.

(b) A subpoena requiring the attendance and testimony of an individual may also require the individual to produce documents at the hearing.

(c) A party seeking a subpoena shall file a written request therefor not less than 15 days before the date fixed for the hearing unless otherwise allowed by the ALJ for good cause shown. Such request shall be accompanied by a proposed subpoena, which shall specify any documents to be produced and shall designate the witnesses and describe the address and location thereof with sufficient particularity to permit such witnesses to be found.

(d) The subpoena shall specify the time and place at which the witness is to appear and any documents the witness is to produce.

(e) The party seeking the subpoena shall serve it in the manner prescribed in § 31.8. A subpoena on a party or upon an individual under the control of a party may be served by first class mail.

(f) A party or the individual to whom the subpoena is directed may file a motion to quash the subpoena within ten days after service or on or before the time specified in the subpoena for compliance if it is less than ten days after service. If the ALJ has not acted on such a motion by the return date, such date shall be suspended pending the ALJ's final action on the motion.

§ 31.24 Protective order.

(a) A party or a prospective witness or deponent may file a motion for a protective order with respect to discovery sought by an opposing party or with respect to the hearing, seeking to limit the availability or disclosure of evidence.

(b) In issuing a protective order, the ALJ may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the following:

(1) That the discovery not be had;

(2) That the discovery may be had only on specified terms and conditions, including a designation of the time or place;

(3) That the discovery may be had only through a method of discovery other than that requested;

(4) That certain matters not be inquired into, or that the scope of discovery be limited to certain matters;

(5) That discovery be conducted with no one present except persons designated by the ALJ;

(6) That the contents of discovery or evidence be sealed;

(7) That a deposition after being sealed be opened only by order of the ALJ;

(8) That a trade secret or other confidential research, development, commercial information, or facts pertaining to any criminal investigation, proceeding, or other administrative investigation not be disclosed or be disclosed only in a designated way; or

(9) That the parties simultaneously file specified documents or information enclosed in sealed envelopes to be opened as directed by the ALJ.

§ 31.25 Fees.

The party requesting a subpoena shall pay the cost of the fees and mileage of any witness subpoenaed in the amounts that would be payable to a witness in a proceeding in United States District Court. A check for witness fees and mileage shall accompany the subpoena when served, except that when a subpoena is issued on behalf of the authority, a check for witness fees and mileage need not accompany the subpoena.

§ 31.26 Filing, form, and service of papers.

(a) *Filing and form.* (1) A party filing a document under this part shall submit:

(i) The original and two copies to the Docket Clerk, Documentary Services Division (C–55), Room 4107, Department of Transportation, 400 7th St., SW., Washington, DC 20590; and

(ii) Two copies simultaneously to the ALJ or, if on appeal, to the authority head.

(2) Every pleading and paper filed in the proceeding shall contain a caption setting forth the title of the action, the case number assigned by the ALJ, and a designation of the paper (*e.g.*, motion to quash subpoena).

(3) Every pleading and paper shall be signed by, and shall contain the address and telephone number of, the party or the person on whose behalf the paper was filed, or his or her representative.

(4) Papers are considered filed when they are mailed. Date of mailing may be established by a certificate from the party or its representative or by proof that the document was sent by certified or registered mail.

(b) *Service.* A party filing a document shall, at the time of filing, serve a copy of such document on every other party. Service upon any party of any documen. other than the complaint or noice of hearing shall be made by delivering or mailing a copy to the party's last known address. When a party is represented by a representative, service shall be made upon such representative in lieu of the actual party.

(c) *Proof of service.* A certificate of the individual serving the document by personal delivery or by mail, setting forth the manner of service, shall be proof of service.

§ 31.27 Computation of time.

(a) In computing any period of time under this part or in an order issued thereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed by the Federal government, in which event it includes the next business day.

(b) When the period of time allowed is less than seven days, intermediate Saturdays, Sundays, and legal holidays observed by the Federal government shall be excluded from the computation.

(c) Where a document has been served or issued, by mail, an additional five days will be added to the time permitted for any response.

§ 31.28. Motions.

(a) Any application to the ALJ for an order or ruling shall be by motion.

Motions shall state the relief sought, the authority relied upon, and the facts alleged, and shall be filed and served on all other parties.

(b) Except for motions made during a prehearing conference or at the hearing, all motions shall be in writing. The ALJ may require that oral motions be reduced to writing.

(c) Within 15 days after a written motion is served, or such other time as may be fixed by the ALJ, any party may file a response to such motion.

(d) The ALJ may not grant a written motion before the time for filing responses thereto has expired, except upon consent of the parties or following a hearing on the motion, but may overrule or deny such motion without awaiting a response.

(e) The ALJ shall make a reasonable effort to dispose of all outstanding motions prior to the beginning of the hearing.

(f) Except as provided by §§ 31.21(e)(3) and 31.23(f), which concern subpoenas, the filing or pendency of a motion shall not automatically alter or extend a deadline or return date.

§ 31.29. Sanctions.

(a) The ALJ may sanction a person, including any party or representative, for—

(1) Failing to comply with an order, rule, or procedure governing the proceeding;

(2) Failing to prosecute or defend an action; or

(3) Engaging in other misconduct that interferes with the speedy, orderly, or fair conduct of the hearing.

(b) Sanctions include but are not limited to those specifically set forth in paragraphs (c), (d), and (e) of this section. Any such sanction shall reasonably relate to the severity and nature of the failure or misconduct.

(c) When a party fails to comply with an order, including an order for taking a deposition, the production of evidence within the party's control, or a request for admission, the ALJ may—

(1) Draw an inference in favor of the requesting party with regard to the information sought;

(2) In the case of requests for admission, deem each matter of which an admission is requested to be admitted;

(3) Prohibit the party failing to comply with such order from introducing evidence concerning, or otherwise relying upon, testimony relating to the information sought; and

(4) Strike any part of the pleadings or other submissions of the party failing to comply with such request.

(d) If a party fails to prosecute or defend an action under this part commenced by service of a notice of hearing, the ALJ may dismiss the action or may issue an initial decision imposing penalties and assessments.

(e) The ALJ may refuse to consider any motion, request, response, brief or other document which is not filed in a timely fashion.

§ 31.30 The hearing and burden of proof.

(a) The ALJ shall conduct a hearing on the record in order to determine whether the defendant is liable for a civil penalty or assessment under § 31.3 and, if so, the appropriate amount of any such civil penalty or assessment considering any aggravating or mitigating factors.

(b) The authority shall prove defendant's liability and any aggravating factors by a preponderance of the evidence.

(c) The defendant shall prove any affirmative defenses and any mitigating factors by a preponderance of the evidence.

(d) The hearing shall be open to the public unless otherwise ordered by the ALJ for good cause shown.

§ 31.31 Determining the amount of penalties and assessments.

(a) In determining an appropriate amount of civil penalties and assessments, the ALJ and the authority head, upon appeal, should evaluate any circumstances that mitigate or aggravate the violation and should articulate in their opinions the reasons that support the penalties and assessments they impose. Because of the intangible costs of fraud, the expense of investigating such conduct, and the need to deter others who might be similarly tempted, ordinarily double damages and a significant civil penalty should be imposed.

(b) Although not exhaustive, the following factors are among those that may influence the ALJ and the authority head in determining the amount of penalties and assessments to impose with respect to the misconduct (*i.e.*, the false, fictitious, or fraudulent claims or statements) charged in the complaint:

(1) The number of false, fictitious, or fraudulent claims or statements;

(2) The time period over which such claims or statements were made;

(3) The degree of the defendant's culpability with respect to the misconduct;

(4) The amount of money or the value of the property, services, or benefit falsely claimed;

(5) The value of the Government's actual loss as a result of the misconduct, including foreseeable consequential damages and the costs of investigation;

(6) The relationship of the amount imposed as civil penalties to the amount of the Government's loss;

(7) The potential or actual impact of the misconduct upon national defense, public health or safety, or public confidence in the management of Government programs and operations, including particularly the impact on the intended beneficiaries of such programs;

(8) Whether the defendant has engaged in a pattern of the same or similar misconduct;

(9) Whether the defendant attempted to conceal the misconduct;

(10) The degree to which the defendant has involved others in the misconduct or in concealing it;

(11) Where the misconduct of employees or agents is imputed to the defendant, the extent to which the defendant's practices fostered or attempted to preclude such misconduct;

(12) Whether the defendant cooperated in or obstructed an investigation of the misconduct;

(13) Whether the defendant assisted in identifying and prosecuting other wrongdoers;

(14) The complexity of the program or transaction, and the degree of the defendant's sophistication with respect to it, including the extent of the defendant's prior participation in the program or in similar transactions;

(15) Whether the defendant has been found, in any criminal, civil, or administrative proceeding to have engaged in similar misconduct or to have dealt dishonestly with the Government of the United States or of a State, directly or indirectly; and

(16) The need to deter the defendant and others from engaging in the same or similar misconduct.

(c) Nothing in this section shall be construed to limit the ALJ or the authority head from considering any other factors that in any given case may mitigate or aggravate the offense for which penalties and assessments are imposed.

§ 31.32 Location of hearing.

(a) The hearing may be held—

(1) In any judicial district of the United States in which the defendant resides or transacts business;

(2) In any judicial district of the United States in which the claim or statement in issue was made; or

(3) In such other place as may be agreed upon by the defendant and the ALJ.

VOL 52 ISS 191 OCT 2 1987 UMI

(b) Each party shall have the opportunity to present written and oral argument with respect to the location of the hearing.

(c) The hearing shall be held at the place and at the time ordered by the ALJ.

§ 31.33 Witnesses.

(a) Except as provided in paragraph (b) of this section, testimony at the hearing shall be given orally by witnesses under oath or affirmation.

(b) At the discretion of the ALJ, testimony may be admitted in the form of a written statement or deposition. Any such written statement must be provided to all other parties along with the last known address of such witness, in a manner which allows sufficient time for other parties to subpoena such witness for cross-examination at the hearing. Prior written statements of witnesses proposed to testify at the hearing and deposition transcripts shall be exchanged as provided in § 31.22(a).

(c) The ALJ shall exercise reasonable control over the mode and order of interrogating witnesses and presenting evidence so as to—

(1) Make the interrogation and presentation effective for the ascertainment of the truth,

(2) Avoid needless consumption of time, and

(3) Protect witnesses from harassment or undue embarrassment.

(d) The ALJ shall permit the parties to conduct such cross-examination as may be required for a full and true disclosure of the facts.

(e) At the discretion of the ALJ, a witness may be cross-examined on matters relevant to the proceeding without regard to the scope of his or her direct examination. To the extent permitted by the ALJ, cross-examination on matters outside the scope of direct examination shall be conducted in the manner of direct examination and may proceed by leading questions only if the witness is a hostile witness, an adverse party, or a witness identified with an adverse party.

(f) Upon motion of any party, the ALJ shall order witnesses excluded so that that they cannot hear the testimony of other witnesses. This rule does not authorize exclusion of—

(1) A party who is an individual;

(2) In the case of a party that is not an individual, an officer or employee of the party designated by the party's representative; or

(3) An individual whose presence is shown by a party to be essential to the presentation of its case, including an individual employed by the Government engaged in assisting the representative for the Government.

§ 31.34 Evidence.

(a) The ALJ shall determine the admissibility of evidence.

(b) Except as provided in this part, the ALJ shall not be bound by the Federal Rules of Evidence. However, the ALJ may apply the Federal Rules of Evidence where appropriate, *e.g.*, to exclude unreliable evidence.

(c) The ALJ shall exclude irrelevant and immaterial evidence.

(d) Although relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or by considerations of undue delay or needless presentation of cumulative evidence.

(e) Although relevant, evidence may be excluded if it is privileged under Federal law.

(f) Evidence concerning offers of compromise or settlement shall be inadmissible to the extent provided in Rule 408 of the Federal Rules of Evidence.

(g) The ALJ shall permit the parties to introduce rebuttal witnesses and evidence.

(h) All documents and other evidence offered or taken for the record shall be open to examination by all parties, unless otherwise ordered by the ALJ pursuant to § 31.24.

§ 31.35 The record.

(a) The hearing will be recorded and transcribed. Transcripts may be obtained following the hearing from the ALJ at a cost not to exceed the actual cost of duplication.

(b) The transcript of testimony, exhibits and other evidence admitted at the hearing, and all papers and requests filed in the proceeding constitute the record for the decision by the ALJ and the authority head.

(c) The record may be inspected at the offices of the Docket Clerk (see § 31.26(a)(1) for address) and copied (upon payment of a reasonable fee) by anyone, unless otherwise ordered by the ALJ pursuant to § 31.24.

§ 31.36 Post-hearing briefs.

The ALJ may require the parties to file post-hearing briefs. In any event, any party may file a post-hearing brief. The ALJ shall fix the time for the filing such briefs. Such briefs may be accompanied by proposed findings of fact and conclusions of law. The ALJ may permit the parties to file reply briefs.

§ 31.37 Initial decision.

(a) The ALJ shall issue an initial decision based only on the record, which shall contain findings of fact, conclusions of law, and the amount of any penalties and assessments imposed.

(b) The findings of fact shall include a finding on each of the following issues:

(1) Whether the claims or statements identified in the complaint, or any portions thereof, violate § 31.3;

(2) If the person is liable for penalties or assessments, the appropriate amount of any such penalties or assessments considering any mitigating or aggravating factors that he or she finds in the case, such as those described in § 31.31.

(c) The ALJ shall promptly serve the initial decision on all parties within 90 days after the time for submission of post-hearing briefs and reply briefs (if permitted) has expired. The ALJ shall at the same time serve all parties with a statement describing the right of any defendant determined to be liable for a civil penalty or assessment to file a motion for reconsideration with the ALJ or a notice of appeal with the authority head. If the ALJ fails to meet the deadline contained in this paragraph, he or she shall notify the parties of the reason for the delay and shall set a new deadline.

(d) Unless the initial decision of the ALJ is timely appealed to the authority head, or a motion for reconsideration of the initial decision is timely filed, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued by the ALJ.

§ 31.38 Reconsideration of initial decision.

(a) Except as provided in paragraph (d) of this section, any party may file a motion for reconsideration of the initial decision within 20 days of receipt of the initial decision. If service was made by mail, receipt will be presumed to be five days from the date of mailing in the absence of contrary proof.

(b) Every such motion must set forth the matters claimed to have been erroneously decided and the nature of the alleged errors. Such motion shall be accompanied by a supporting brief.

(c) Responses to such motions shall be allowed only upon request of the ALJ.

(d) No party may file a motion for reconsideration of an initial decision that has been revised in response to a previous motion for reconsideration.

(e) The ALJ may dispose of a motion for reconsideration by denying it or by issuing a revised initial decision.

(f) If the ALJ denies a motion for reconsideration, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after the

ALJ denies the motion, unless the initial decision is timely appealed to the authority head in accordance with § 31.39.

(g) If the ALJ issues a revised initial decision, that decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued, unless it is timely appealed to the authority head in accordance with § 31.39.

§ 31.39 Appeal to authority head.

(a) Any defendant who has filed a timely answer and who is determined in an initial decision to be liable for a civil penalty or assessment may appeal such decision to the authority head by filing a notice of appeal in accordance with this section and § 31.26.

(b)(1) No notice of appeal may be filed until the time period for filing a motion for reconsideration under § 31.38 has expired.

(2) If a motion for reconsideration is timely filed, a notice of appeal must be filed within 30 days after the ALJ denies the motion or issues a revised initial decision, whichever applies.

(3) If no motion for reconsideration is timely filed, a notice of appeal must be filed within 30 days after the ALJ issues initial decision.

(4) The authority head may extend the initial 30-day period for an additional 30 days if the defendant files with the authority head a request for an extension within the initial 30-day period and shows a good cause.

(c) If the defendant files a timely notice of appeal, the Docket Clerk shall forward two copies of the record of the proceeding to the authority head.

(d) A notice of appeal shall be accompanied by a written brief specifying exceptions to the initial decision and reasons supporting the exceptions.

(e) The representative for the Government may file a brief in opposition to exceptions within 30 days of receiving the notice of appeal and accompanying brief.

(f) There is no right to appear personally before the authority head.

(g) There is no right to appeal any interlocutory ruling by the ALJ.

(h) In reviewing the initial decision, the authority made shall not consider any objection that was not raised before the ALJ unless a demonstration is made of extraordinary circumstances causing the failure to raise the objection.

(i) If any party demonstrates to the satisfaction of the authority head that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the authority head shall remand the matter to the ALJ for consideration of such additional evidence.

(j) The authority head may affirm, reduce, reverse, compromise, remand, or settle any penalty or assessment determined by the ALJ in any initial decision.

(k) The authority head shall promptly serve each party to the appeal with a copy of the decision of the authority head and with a statement describing the right of any person determined to be liable for a penalty or assessment to seek judicial review.

(l) Unless a petition for review is filed as provided in 31 U.S.C. 3805 after a defendant has exhausted all administrative remedies under this part and within 60 days after the date on which the authority head serves the defendant with a copy of the authority head's decision, a determination that a defendant is liable under § 31.3 is final and is not subject to judicial review.

§ 31.40 Stays ordered by the Department of Justice.

If at any time the Attorney General or an Assistant Attorney General designated by the Attorney General transmits to the authority head a written finding that continuation of the administrative process described in this part with respect to a claim or statement may adversely affect any pending or potential criminal or civil action related to such claim or statement, the authority head shall stay the process immediately. The authority head may order the process resumed only upon receipt of the written authorization of the Attorney General.

§ 31.41 Stay pending appeal.

(a) An initial decision is stayed automatically pending disposition of a motion for reconsideration or of an appeal to the authority head.

(b) No administrative stay is available following a final decision of the authority head.

§ 31.42 Judicial review.

Section 3805 of title 31, United States Code, authorizes judicial review by an appropriate United States District Court of a final decision of the authority head imposing penalties or assessments under this part and specifies the procedures for such review.

§ 31.43 Collection of civil penalties and assessments.

Sections 3806 and 3808(b) of title 31, United States Code, authorize actions for collection of civil penalties and assessments imposed under this part and specify the procedures for such actions.

§ 31.44 Right to administrative offset.

The amount of any penalty or assessment which has become final, or for which a judgment has been entered under § 31.42 or § 31.43, or any amount agreed upon in a compromise or settlement under § 31.46, may be collected by administrative offset under 31 U.S.C. 3716, except that an administrative offset may not be made under this subsection against a refund of an overpayment of Federal taxes, then or later owing by the United States to the defendant.

§ 31.45 Deposit in Treasury of United States.

All amounts collected pursuant to this part shall be deposited as miscellaneous receipts in the Treasury of the United States, except as provided in 31 U.S.C. 3806(g).

§ 31.46 Compromise or settlement.

(a) Parties may make offers of compromise or settlement at any time.

(b) The reviewing official has the exclusive authority to compromise or settle a case under this part at any time after the date on which the reviewing official is permitted to issue a complaint and before the date on which the ALJ issues an initial decision.

(c) The authority head has exclusive authority to compromise or settle a case under this part at any time after the date on which the ALJ issues an initial decision, except during the pendency of any review under § 31.42 or during the pendency of any action to collect penalties and assessments under § 31.43.

(d) The Attorney General has exclusive authority to compromise or settle a case under this part during the pendency of any review under § 31.42 or of any action to recover penalties and assessments under 31 U.S.C. 3806.

(e) The investigating official may recommend settlement terms to the reviewing official, the authority head, or the Attorney General, as appropriate. The reviewing official may recommend settlement terms to the authority head, or the Attorney General, as appropriate.

(f) Any compromise or settlement must be in writing.

VOL 52 ISS 191 OC 2 1987 UMI

§ 31.47 Limitations.

(a) The notice of hearing with respect to a claim or statement must be served in the manner specified in § 31.8 within 6 years after the date on which such claim or statement is made.

(b) If the defendant fails to file a timely answer, service of a notice under § 31.10(b) shall be deemed a notice of hearing for purposes of this section.

(c) The statute of limitations may be extended by agreement of the parties.

DEPARTMENT OF AGRICULTURE

Foreign Agricultural Service

Assessment of Fees for Dairy Import Licenses

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice of the fee for dairy import licenses for the 1988 quota year.

SUMMARY: This notice announces that the fee to be charged for the 1988 quota year for each license issued to a person or firm by the Department of Agriculture authorizing the importation of certain dairy articles which are subject to quotas proclaimed under the authority of section 22 of the Agricultural Adjustment Act of 1933, as amended, will be $66.00 per license.

EFFECTIVE DATE: January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Phillip J. Christie, Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Room 6616-South Building, U.S. Department of Agriculture, Washington, DC 20250 or telephone at (202) 447–5270.

SUPPLEMENTARY INFORMATION: Regulations promulgated by the Department of Agriculture and codified at 7 CFR 6.20–6.34 provide for the issuance of licenses to importers of certain dairy articles which are subject to quotas proclaimed by the President pursuant to section 22 of the Agricultural Adjustment Act of 1933, as amended (7 U.S.C. 624). Those dairy articles may only be entered into the United States by or for the account of a person or firm to whom such licenses have been issued and only in accordance with the terms and conditions of such licenses and the regulations.

The licenses are issued on a calendar year basis, and each license authorizes the license holder to import a specified quantity and type of dairy article from a specified country. The use of licenses by the license holder to import dairy articles is monitored by the Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, U.S. Department of Agriculture (the "Licensing Authority") and the U.S. Customs Service.

7 CFR 6.33(a) provides that a fee will be charged for each license issued to a person or firm by the Licensing Authority in order to reimburse the Department of Agriculture for the costs of administering the licensing system under this regulation. The fee is to be based upon the total costs to the Department of Agriculture of administering the licensing during the calendar year preceding the year for which the fee is to be charged, divided by the average number of licenses issued per year for the three years preceding the year for which the fee is to be assessed.

7 CFR 6.33(b) provides that the Licensing Authority will announce the annual fee for each license and that such fee will be set out in a notice to be filed with the **Federal Register.** Accordingly, this notice sets out the fee for the licenses tos be issued for the 1988 calendar year.

Notice

The total cost to the Department of Agriculture of administering the licensing system during 1987 has been determined to be $230,559. Of this amount, $168.559 represents the cost of the staff and supervisory hours devoted directly to administering the licensing system during 1987 (total personnel costs for the Import Licensing Group of the Foreign Agricultural Service equaled $141,810; a proportionate share of the supervisory costs devoted directly to administering the licensing system equaled $26,749); $38,000 represents the cost of the computer on-line entry system used to monitor the use of licenses during 1987; and $24,000 represents other miscellaneous costs, including travel, postage, and an in-house computer system. The average number of licenses issued per year for the three yers immediately preceding 1988 has been determined to be 3,510.

Accordingly, notice is hereby given that the fee for each license issued to a person or firm for the 1988 calendar year, in accordance with the regulations codified at 7 CFR 6.20–6.34, will be $66.00 per license.

Issued at Washington, DC, the 5th day of August, 1987.

Phillip J. Christie,

Licensing Authority.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 364]

Resolution and Order Approving The Application of The Massachusetts Port Authority, For a Special-Purpose Subzone For The General Motors Plant in Framingham, MA, Within The Boston Customs Port of Entry

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Massachusetts Port Authority, grantee of FTZ 27, filed with the Foreign-Trade Zones Board (the Board) on October 18, 1985, requesting special-purpose subzone status for the auto manufacturing plant of General Motors Corporation in Framingham, Massachusetts, within the Boston Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

GRANT To Establish a Foreign-Trade Subzone in Framingham, MA, Within The Boston Customs Port of Entry

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation,

and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the Massachusetts Port Authority, grantee of Foreign-Trade Zone 27, has made application (filed October 18, 1985, Docket No. 38–85, 50 FR 45446) in due and proper form to the Board for authority to establish a special-purpose subzone at the automobile manufacturing plant of General Motors Corporation in Framingham, Massachusetts, within the Boston Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied;

Now, Therefore, in accordance with the application filed October 18, 1985, the Board hereby authorizes the establishment of a subzone at the General Motors plant in Framingham, Massachusetts, designated on the records of the Board as Foreign-Trade Subzone No. 27D at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the Regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, any necessary permits shall be obtained from Federal, State, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In Witness Whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, DC, this 25th day of September 1987, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Paul Freedenberg,

Assistant Secretary of Commerce for Trade Administration, Chairman, Committee of Alternates.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–DS–M

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, and interested party as defined in section 771(9) of the Tariff Act of 1930 may request, in accordance with § 353.53a or § 355.10 of the Commerce Regulations, that the Department of Commerce ("the Department") conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity To Request a Review

Not later than October 31, 1987, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in October for the following periods:

ANTIDUMPING DUTY PROCEEDING AND PERIOD

Shop Towels of Cotton from the People's Republic of China
10/01/86—09/30/87
Steel Wire Rope from Japan
10/01/86—09/30/87
Barium Chloride from the People's Republic of China
10/01/86—09/30/87
Pressure Sensitive Plastic Tape from Italy
10/01/86—09/30/87

COUNTERVAILING DUTY PROCEEDING AND PERIOD

Agricultural Tillage Tools from Brazil
01/01/86—12/31/86
Certain Iron Metal Castings from India
01/01/86—12/31/86
Certain Carbon Steel Products from Sweden
01/01/86—12/31/86
Canned Tuna from the Philippines
01/01/86—12/31/86
Roasted Pistachios from Iran
08/21/86—12/31/86

Seven copies of the request should be submitted to the Deputy Assistant Secretary for Import Administration, International Trade Administration, Room B–099, U.S. Department of Commerce, Washington, DC 20230.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review," for requests received by October 31, 1987.

If the Department does not receive by October 31, 1987 a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute, but is published as a service to the international trading community.

Date: September 24, 1987.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

VOL 52 ISS 191 OCT 2 1987 UMI

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review; Correction

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation, correction.

In notice document 87–20058 beginning on page 32950 in the issue of Tuesday, September 1, 1987, some errors occurred in the table on page 32951. The table is corrected as follows:

1. Within the table under the title *Antidumping Duty Proceeding,* insert the period "09/01/86—08/31/87," opposite the entry for the Greige Polyester/Cotton Printcloth from the People's Republic of China;

2. Within the table under the title of *Countervailing Duty Proceeding:*

Portland Hydraulic Cement and Cement Clinker from Mexico, period "01/01/86—12/31/87," should read "01/01/86—12/31/86";

Fresh Cut Roses from Israel, period "01/01/86—09/30/86" should read "10/01/85—09/30/86."

3. At the bottom of the table add:

	Period
Suspended Investigations	
Steel Sheet Pilings from Canada	09/15/85–08/31/86

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

September 24, 1987.

[A–588–606]

Antidumping; Final Determination of Sales at Not Less Than Fair Value; Certain Forged Steel Crankshafts From Japan

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain forged steel crankshafts (CFSC) from Japan are not being, nor are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination.

EFFECTIVE DATE: October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Rick Herring, Ellie Shea, or Gary Taverman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–0187, 377–0184, or 377–0161.

SUPPLEMENTARY INFORMATION:

Final Determination

We determine that imports of CFSC from Japan are not being, nor are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). We have found that the weighted-average margin for the company being investigated is *de minimis.*

Case History

Since the last **Federal Register** publication announcing the postponement of the final determination and the rescheduling of the public hearing (52 FR 23707, June 24, 1987), the following events have occurred. We conducted verification of the questionnaire responses of Sumitomo Metal Industries, Ltd. (SMI) from May 20 through 29, 1987. Petitioner and respondent filed pre-hearing briefs on July 16, 1987, and rebuttal briefs on July 29, 1987. Sumitomo Corporation (Sumitomo Corp.) and Sumitomo Corporation of America (SCOA), interested parties in this investigation, filed a pre-hearing brief on July 16, 1987. A public hearing was held on July 21, 1987.

Scope of Investigation

The products covered by this investigation are forged carbon or alloy steel crankshafts with a shipping weight between 40 and 750 pounds, whether machined or unmachined. These products are currently classified under items 660.6713, 660.6727, 660.6747, 660.7113, 660.7127 and 660.7147 of the *Tariff Schedules of the United States Annotated* (TSUSA). Neither cast crankshafts nor forged crankshafts with shipping weights of less than 40 pounds or greater than 750 pounds are subject to this investigation.

Period of Investigation

CFSC are normally sold to the United States on the basis of long-term requirements contracts. Therefore, in order to capture the most recent sales of CFSC to the United States, we extended the period of investigation to encompass the 18 months from May 1, 1985 to October 31, 1985, as permitted by § 353.38(a) of our regulations.

Fair Value Comparisons

To determine whether sales of CFSC to the United States were made at less than fair value, we compared the United States price to the foreign market value for SMI, as specified below. We made comparisons on virtually all sales of CFSC during the period of investigation, May 1, 1985 through October 31, 1986. We divided the 18-month review period into three six-month periods for purposes of making our price to price comparisons.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of CFSC to represent the United States price for sales by SMI, because the merchandise was sold to an unrelated purchaser prior to its importation into the United States. We calculated the purchase price based on the packed FOB (free on board), CFS (container freight station), CY (container yard), or FAS (free alongside ship) price to unrelated purchasers.

All U.S. sales, as well as all home market sales of such or similiar merchandise, were made to Sumitomo Corp., a Japanese trading company. Because SMI knew the product was destined for the United States, and because SMI and Sumitomo Corp. are not related within the meaning of section 771(13) of the Act, we based the United States prices on the price SMI charged to Sumitomo Corp. We made deductions from these prices for inland freight and, where appropriate, other delivery charges. In the response, SMI deducted after-sale warehousing expenses from the gross price that it received from Sumitomo Corp. We consider this to be a circumstance of sale adjustment. Therefore, we have added this charge back into the gross price and made the appropriate adjustment to the foreign market value.

Foreign Market Value

In accordance with section 773(a)(1)(A) of the Act, we based foreign market value for CFSC on sales in the home market. We made deductions, where appropriate, from the home market price for inland freight. Since no packing costs were incurred on home market sales, we added only U.S. packing costs. We made adjustments under § 353.15 of the Commerce Regulations for differences in circumstances of sale for credit expenses, after-sale warehousing, and sales commissions in the United States and home markets. Pursuant to § 353.16 of our regulations, we made adjustments, where appropriate, to

account for differences in physical characteristics of the merchandise.

Petitioner's Comments

Comment 1: Petitioner contends that Sumitomo Corp. and SCOA, a wholly-owned subsidiary of Sumitomo Corp., are reselling SMI's crankshafts in the United States at below their acquisition cost and selling expenses (*i.e.*, "middleman dumping"), and, therefore, the Department should use end-user prices in the U.S. market and, for comparability's sake, the corresponding end-user prices in the home market. Petitioner cites the *Final Determination of Sales at Less Than Fair Value: Fuel Ethanol from Bruzil* (51 FR 5572, Feb. 14, 1986) (*Fuel Ethanol*) which states that "[w]here there is a specific allegation that a trading company is failing to recover its costs in transactions concerning the subject merchandise, we will investigate that allegation to determine whether there is 'middleman dumping'." In support of its middleman dumping allegation, petitioner maintains that the commission paid to Sumitomo Corp. by SMI is not adequate to cover Sumitomo Corp.'s selling expenses. Petitioner maintains also that the low level of Sumitomo Corp.'s reported profits is further indication that Sumitomo Corp. makes a substantial portion of its sales at below its acquisition cost and selling expenses.

DOC Position: Since trading companies typically operate at small mark-ups, and presumably do not take losses, we require timely and convincing evidence that the trading company is in fact dumping before initiating an investigation with respect to the trading company. In *Fuel Ethanol*, the middleman dumping allegation was supported by evidence which warranted an investigation into the pricing practices of the trading company.

In the current case, petitioner made the middleman dumping allegation on May 26, 1987, three months after the response was submitted, approximately three weeks after the preliminary determination was issued, and at the end of the verification in Japan. We will not initiate an investigation of alleged middleman dumping unless the allegation can be supported by pricing or cost data [see, *Final Determination of Sales at Less than Fair Value: Certain Stainless Steel Cooking Ware from Korea* (51 FR 42873, Nov. 26, 1986)]. Petitioner provided no price information or other substantiating evidence that Sumitomo Corp. is selling below its cost of acquisition and related selling expenses. With regard to petitioner's comment concerning Sumitomo Corp.'s low profit levels, we do not consider low profit levels to consititute adequate evidence to support an investigation of middleman dumping. Petitioner also did not provide any information to show that Sumitomo Corp. was not recovering all of its selling expenses.

Comment 2: Petitioner contends that the Department's decision to solicit Sumitomo Corp.'s end-user prices need not be contingent upon its agreement with petitioner's allegation that Sumitomo Corp. is engaging in middleman dumping. Petitioner maintains that Sumitomo Corp. is the actual exporter to the United States and, because it makes sales to end-users in both the U.S. and Japanese markets, it can engage in price discrimination at the end-user level, either in combination with or in lieu of SMI. Petitioner further contends that in *Roller Chain, Other Than Bicycle, from Japan; Final Results of Administative Review of Antidumping Finding* (48 FR 51801, Nov. 14, 1983) (*Roller Chain*), the Department used the middleman's prices when the middleman determined the sales price in both the United States and the home market, regardless of whether the manufacturer knew the destination of the exported merchandise.

DOC Position: We determined that it is appropriate to use the prices at which SMI sells crankshafts to Sumitomo Corp. as the U.S. price because, at the time of such sale, SMI knows that the merchandise is destined for the United States. This is in accordance with the legislative history of the 1979 amendments to section 772 of the Act and the Department's long-standing practice. For example, in the *Roller Chain* case cited by petitioner, for one of the manufacturers, Kaga Kogyo, we used the manufacturer's price to an unrelated exporter since, as here, the manufacturer was aware at the time of the sale to the exporter that those sales were destined for the United States. See also, *Final Determination of Sales at Less than Fair Value: Certain Stainless Steel Cooking Ware from Korea* (51 FR 42873, Nov. 26, 1986).

While for two of the companies in *Roller Chain*, Honda and Toyota, we did use the prices charged by non-producers as the basis of our price comparisons, we did so becasue we determined that they, not the producers controlled the prices at which roller chain was sold in both the U.S. and Japanese markets. In this investigation, by contrast, our extensive review of the correspondence files during the verification showed that Sumitomo Corp.'s price to the end-user is based on the price Sumitomo Corp. pays SMI. We also saw no evidence that would lead us to believe that Sumitomo Corp. is controlling prices.

Comment 3: Petitioner contends that SCOA should be deemed the agent of SMI within the meaning of section 771(13)(A) of the Act because SMI is extensively involved in SCOA's sales negotiations with U.S. customers and because SMI controls the prices charged by SCOA.

DOC Postion: We disagree. We found no evidence during verification that would lead us to conclude that SCOA acts as the agent of SMI. SMI's participation in the actual sales negotiation between SCOA and the U.S. end-user is limited to consultation on technical matters. With regard to petitioner's argument that SMI controls the prices charged by SCOA, during verification we found tht SCOA negotiates the end-user price.

Comment 4: Petitioner contends tht the Department should consider SMI and Sumitomo Corp. to be "related parties" within the meaning of section 771(13)(C) of the Act because SMI has a substantial level of direct ownership in Sumitomo Corp.

DOC Position: The level of ownership between SMI and Sumitomo Corp. is less than five percent. Department policy has been not to consider parties to be related within the meaning of section 771(13)(C) of the Act if the ownership interest of one party in the other is less than five percent [see, *Final Determination of Sales at Less Than Fair Value: Portland Hydraulic Cement from Japan* (48 FR 41059, Sept. 13, 1983)]. Petitioner has not provided convincing evidence to cause us to change this policy for purposes of this investigation.

Comment 5: Petitioner contends that the Department should consider SMI and Sumitomo Corp. to be "related parties" within the meaning of section 771(13)(D) of the Act because well over 20 percent of SMI and Sumitomo Corp. are owned by the same group of corporate entities, the majority of which are members of the Sumitomo Group.

DOC Position: We disagree with petitioner's interpretation of section 771(13)(D). Petitioner contends that SMI and Sumitomo Corp. are related by virtue of the fact that a number of companies, in aggregate, own over 20 percent of the stock of both SMI and Sumitomo Corp. We do not believe this interpretation to be the intent of Congress. The underlying purpose of section 771(13)(D) was to avoid circumvention of the antidumping duty law by foreign manufacturers capable of shifting selling expenses to related parties in the United States, thereby influencing prices. Here there is no

ability for the common shareholders of SMI and Sumitomo Corp. to influence prices. Of the six companies that have common ownership in SMI and Somitomo Corp. that in aggregate reach the level of 20 percent, three are banks and three are insurance companies. These six companies have stock holdings in a multitude of Japanese companies, including SMI and Sumitomo Corp., which touch almost every sector of the Japanese economy. The petitioner's interpretation of section 771(13)(D) would lead to absurd results in this instance where common shareholders are not capable of effecting what the provision intended to prevent—the shifting of selling expenses in order to influence prices. Under petitioner's interpretation, any two publicly traded companies would have to be considered related if any number of individuals or companies that owned shares in both, owned, in the aggregate, 20 percent of each company. Therefore, the Department does not agree that SMI and Sumitomo Corp. are related within the meaning of section 771(13)(D).

Comment 6: Petitioner contends that the Department should base foreign market value on the average home market price of all crankshafts within a 15 percent, plus or minus, weight range rather than comparing each U.S. sale to a single home market sale judged to be "most similar." Petitioner maintains that this "basket" approach to product comparisons offers the greatest potential for ensuring that the Department's final less than fair value calculations are based on comparable products, rather than on products similar only with respect to weight. Petitioner cites the following Department decisions in support of its position: *Preliminary Determination of Sales at Less Than Fair Value: Color Picture Tubes from Korea* (52 FR 24318, June 30, 1986) (*CPTs*); and the *Final Determination of Sales at Less Than Fair Value: Certain Iron Construction Castings from Canada* (51 FR 2412, Jan. 16, 1986) (*Iron Construction Castings*).

DOC Position: Pursuant to section 771(16), it is the Department's policy to use the most similar home market product for comparison purposes and not to average a number of similar home market products. Therefore, we selected the one crankshaft model sold in the home market which is most similar to the U.S. sale. We do not find that the number of adjustments to price resulting from our selection of comparable models in this case is so large as to require an averaging technique such as that proposed by petitioner, nor is there any evidence that petitioner's proposal would lead to a more accurate comparison than the models we have chosen.

In *Iron Construction Castings*, our "similar" model selections were based on the primary product characteristics of weight, shape, overall dimension, and certain production inputs. This is consistent with our "similar" model selections in the current case which are based on the primary product characteristics of weight, number of throws, and steel type. For one company in the above-cited case, we did employ a weight averaging technique to determine the price of value boxes sold in the Canadian market. This was because sales of value boxes were recorded in component form since the company's Canadian customers were invoiced by reference to component parts and prices. Therefore, the Department employed a weight averaging technique to determine the average price per pound for a completed value box sold by its parts.

The facts in *CPTs* differ from those presented in this case. For the preliminary determination in *CPTs*, we compared U.S. sales to home market sales of identical merchandise when there was an adequate number of home market sales. Only when home market sales of identical merchandise were inadequate did we use a basket of similar products sold in the home market. Such a basket was used in order to reach an amount equalling five percent of sales to the United States.

In this investigation of CFSC, sales of the most similar merchandise in the home market chosen for comparison purposes exceeded five percent of sales to the United States.

Comment 7: Petitioner contends that the Department should not employ the standard six-month rule of contemporaneity in comparing U.S. and home market sales. Such a departure from the traditional rule is justified by the prevalence of long-term contracts. In agreeing in advance to set a dollar price for crankshaft shipments to be made over as much as a three-year period, SMI is willing to leave itself open to the risk of exchange rate shifts over the contract period. In order to reflect this aspect of the crankshaft market, petitioner submits that U.S. sales should be compared to the average home market prices of all "similar" crankshafts sold in the 18-month period of investigation.

DOC Position: We disagree. Since crankshafts exported to the United States are sold on the basis of long-term contracts, we extended our period of investigation, normally six months, to 18 months. Because this period is three times longer than our usual period of investigation, we determined that it was not appropriate to follow our usual methodology of averaging home market sales prices over the entire period. Instead, in order to use home market sales prices which are roughly contemporaneous with the U.S. sales, as required by section 773(a)(1) of the Act, we divided the period of investigation into three six-month segments and used those home market sales that occurred during the six-month period of the U.S. sale.

Respondent's Comment

Comment 1: On sales to the United States, SMI receives a prepayment of a portion of the sales price from the trading company before shipment of the crankshaft. SMI pays interest on the prepayment which is based on the prevailing prime rate. SMI states that the interest rate paid to the trading company for the prepayment is less than the nominal interest rate it pays to commercial banks for short-term loans. Therefore, SMI requests that an additional credit adjustment be made to the foreign market value to reflect the benefit earned on the financing of U.S. sales due to the differences in interest paid to the trading company and the interest due to a commercial bank.

DOC Position: During verification, we found that SMI pays the same interest rate for the prepayment and for short-term loans from commercial banks. SMI contended that the effective interest rate on commercial borrowings was higher than the interest paid on the prepayment to the trading company because the banks require compensating balances. However, we could not verify the requirement of compensating balances, and SMI could not provide us with documentation to show that it placed compensating balances with commercial banks in order to secure short-term borrowings. Since we could not verify differences in the interest rate paid to the trading company on the prepayment and the interest SMI would have paid on commercial short-term lending, it is unnecessary to address this issue.

Currency Conversion

When calculating foreign market value, we made currency conversions from Japanese yen to U.S. dollars in accordance with § 353.56(a) of our regulations, using the certified daily exchange rates furnished by the Federal Reserve Bank of New York.

Verification

We verified the information used in making our final determination in

accordance with section 776(a) of the Act and followed standard verification procedures, including examination of relevant sales and financial records of SMI.

Final Results

The final results of our investigation are as follows:

Manufacturer/Producer Exporter	Weighted-average margin percentage
Sumitomo Metal Industries, Ltd.	05

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Paul Freedenberg,

Assistant Secretary for Trade Administration.

September 25, 1987.

BILLING CODE 3510-DS-M

[C-549-701]

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Certain Steel Wire Nails From Thailand

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Thailand of certain steel wire nails as described in the "Scope of Investigation" section of this notice. The estimated net bounty or grant is 1.00 *ad valorem* for all manufacturers, producers or exporters in Thailand of certain steel wire nails.

We are directing the U.S. Customs Service to continue suspension of liquidation of all entries of certain steel wire nails from Thailand that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit on entries of these products in the amount equal to the estimated net bounty or grant.

EFFECTIVE DATE: October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Roy Malmrose or Barbara Tillman, Office of Investigations, Import Adminstration, International Trade Administration , U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2815 or 377-2438.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Thailand of certain steel wire nails. For purposes of this investigation, the following programs are found to confer bounties or grants:

- Export Packing Credits
- Tax Certificates for Exports
- Assistance to Trading Companies Under the Investment Promotion Act (Double Deduction of Foreign Marketing Expenses and Foreign Taxes)

We determine the estimated net bounty or grant to be 1.00 percent *ad valorem* for all manufacturers, producers or exporters in Thailand or certain steel wire nails.

Case History

Since the last **Federal Register** publication pertaining to this investigation [*Perliminary Affirmative Countervailing Duty Determination Certain Steel Wire Nails from Thailand* (52 FR 27444, July 21, 1987)], the following events have occurred. We conducted verification in Thailand from July 30 through August 7, 1987, of the questionnaire responses of the Government of Thailand, K.Y. Intertrade Co., Ltd. (KYI), Thai Nail Works Co., Ltd., and Asoke International Trading Co. Ltd. (Asoke), a trading company through which KYI exported steel wire nails to the United States. Respondents submitted a supplemental response to our deficiency questionnaire and an amended response correcting certain errors in the initial response on August 12, 1987.

Respondents filed a case brief on September 9, 1987. Petitioners did not file a case brief. Both petitioners and respondents waived their respective rights to a hearing in this case.

Scope of Investigation

The products covered by this investigation are certain steel wire nails from Thailand. These nails are: One-piece steel nails made of round wire, as currently provided for in *Tariff Schedules of the United States Annotated* item numbers 646.2500, 646.2610-90, and 646.3040; two-piece steel wire nails as currently provided for in item number 646.3200; and nails with steel wire shanks and lead heads, as currently provided for in item number 646.3600. These products are currently classifiable under *Harmonized System* item numbers 7317.00.55, 7317.00.65, 7317.00.75 and 7616.10.10.

Analysis of Programs

Throughout this notice, we refer to certain principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* 49 FR 18006, April 26, 1984).

For purposes of this final determination, the period for which we are measuring bounties or grants ("the review period") is calendar year 1986, which corresponds to all three companies' most recently completed fiscal year.

Based upon our analysis of the petition, the responses to our questionnaire, verification, and written comments filed by respondents, we determine the following:

I. Programs Determined to Confer Bounties or Grants

We determine that bounties or grants are being provided to manufacturers, producers and exporters in Thailand of steel wire nails under the following programs.

A. Export Packing Credits

Export packing credits are short-term loans used for either pre-shipment or post-shipment financing. There have been several changes in this program since the Department's last investigation involving exports from Thailand [See *Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Rice from Thailand,* (50 FR 12356, April 10, 1986)]. Under the "Regulations Governing the Purchase of Promissory Notes Arising from Exports" (B.E. 2528), effective January 2, 1986, the Bank of Thailand will repurchase promissory notes issued by creditworthy exporters through commercial banks. The central

VOL

ISS
191
OC
2
1987
UMI

bank previously rediscounted promissory notes under this program.

Under the new regulations, exporters apply to commercial banks for export packing credits; the banks, in turn, must submit an application to the Bank of Thailand for approval. To qualify for the repurchase arrangement, promissory notes must be supported by a letter of credit, sales contract, purchase order, usance bill or warehouse receipt. The notes are available for up to 180 days, and interest is paid on the due date of the loan rather than the date of receipt. If the loan is not repaid on time, the commercial bank will automatically charge the exporter a commercial rare of interest on the outstanding principal beginning on the day after the original due date.

From January 2, 1986 to March 26, 1986, commercial banks charged a maximum interest rate of eight percent per annum for export packing credits, and the Bank of Thailand repurchased these loans from commercial banks at five percent per annum. Effective March 27, 1986, the interest rates changed to seven percent and four percent per annum, respectively.

When a company receives an export packing credit, it must present the commercial banks with evidence that the product was exported by the due date of the loan. If such evidence is not presented, the company is charged an 11 percent interest penalty in addition to the interest rate, retroactive to the date of issuance of the loan. If the company can prove the export has been shipped within 60 days after the due date, then the 11 percent interest penalty is refunded. If the company exports a portion of the amount for which the financing was obtained, then the penalty refund will be made in an amount proportionate to the value of the actual export shipment. If the company does not export within the 60 day time period, no refund is given. The purpose of the penalty changes is to ensure that companies only take out packing credits to finance actual export sales.

We verified that only KYI received or paid interest on export packing credit loans for exports of steel wire nails to the United States during the review period. Because only exporters are eligible for these loans, we determine that they are countervailable to the extent that they are provided at preferential rates. As the benchmark for short-term loans, it is our practice to use the national average commercial interest rate or the most comparable, predominant commercial interest rate for short-term financing. For purposes of this determination we are using the weighted-average interest rate charged by commercial banks on domestic loans, bills and overdrafts during 1986, and, where loans are issued in 1985 but repaid in 1986, the weighted average interest rate of the same composition for 1985. The data used to calculate these weighted-average interest rates was verified at the Bank of Thailand. Comparing the weighted-average interest rates to the rate charged on export packing credits, we find that the rate on export packing credits is preferential and, therefore, these loans confer bounties or grants on the subject merchandise. Applying the weighted-average commercial bank interest rates as benchmarks, and adjusting the benefit for loans on which penalties were paid but not fully refunded, we calculate an estimated net bounty or grant of 0.43 percent *ad valorem*.

B. Tax Certificates for Exports

The Government of Thailand issues tax certificates to exporters to rebate indirect taxes and import duties on inputs into exported products. This rebate program is provided for in the "Tax and Duty Compensation of Exported Goods Produced in the Kingdom Act" (hereinafter the Tax and Duty Act). The rebate rates under the Tax and Duty Act are computed on the basis of an input/output (I/O) study initially published in 1980, based on 1975 data, and updated in 1982 using 1980 data.

Using the I/O study, the Thai Ministry of Finance computes the value of total inputs (both imports and local purchases) at ex-factory prices. It also calculates the import duties and indirect taxes on each input. The Ministry then calculates two rebate rates. The "A" rate includes both import duties and indirect domestic taxes. The "B" rate includes only indirect domestic taxes. The "B" rate is claimed when firms participate in Thailand's individual customs duty drawback program or duty exemption program on imported raw materials. The "A" or "B" rate, as appropriate, is then applied to the FOB value of the export to detemine the amount of rebate that will be provided.

Under the Tax and Duty Act, the rebates are paid to companies through tax certificates which can be used to pay other tax liabilities. These tax certificates can also be transferred to other companies which can use them to pay their tax liabilities.

The rebate rates in effect from December 1, 1981 to February 4, 1986, were set forth in the Notification of the Ministry of Finance No. Or. 1/2524. These rates were based on the I/O study published in 1980. The "A" and "B" rates for nail exports based on the I/O study published in 1980 were 3.71 percent and 1.96 percent, respectively. A new I/O study based on 1980 data was completed in 1982. Notification of the Committee on Tax Rebates, No. Or. 1/2529 announced new rates effective February 5, 1986, based on the updated study completed in 1982. Since February 1986, the "A" rate is 7.19 percent and the "B" rate is 0.59 percent for nail exports. We verified that Thai Nail Works received tax certificates at the "A" rate and KYI at the "B" rate. We also verified that all certificates earned on nail exports to the United States by Asoke, a trading company used by KYI, on exports on nails produced by KYI, were transferred back to KYI.

To determine whether an indirect tax rebate system, which incorporates rebates of import duties confers a bounty or grant, we must apply the following analysis. First, we examine whether the system is intended to operate as a rebate of both indirect taxes and import duties. Next, we analyze whether the government properly ascertained the level of the rebate. This includes a review of the sample used in the study, including the documentation and the accuracy of the information gathered from the sample on input coefficients, import prices and rates of duty on imported inputs, the ratio of imported inputs to domestically produced inputs (when, for a given imported input, there is also domestic production of the input), and the exchange rates used to convert import prices denominated in a foreign currency to the local currency. Finally, we review whether the rebate schedules are revised periodically in order to determine if the rebate amount reflects the amount of duty and indirect taxes paid.

When the I/O study upon which the indirect tax and import duty rebate system is based meets these conditions, the Department will consider that the system does not confer a bounty or grant if the amount rebated for duties and indirect taxes on physically incorporated inputs does not exceed the fixed amount set in the rebate schedule for the exported product. When the system rebates duties and indirect taxes on both physically incorporated and non-physically incorporated inputs, we find a bounty or grant exists to the extent that the fixed rebate exceeds the allowable rebate on physically incorporated inputs. Based on these tests, we determine the following.

The Tax and Duty Act provides that the taxes and duties eligible for rebate include those on materials, equipment, spare parts, machinery, fuels and other

energy used in the production of exports. Direct taxes such as income tax and taxes which are otherwise refundable or exempt are excluded from the rebate. Thus, the program operates to rebate indirect taxes and import duties.

The eligibility criteria for the rebate program, when considered in conjunction with the government's response and the information obtained during verification on the methodology and sampling used in calculating the rebate rates based on the revised I/O study, lead us to conclude that the government employed an adequate methodology for establishing the rebate levels. Furthermore, after a thorough examination of the methodologies employed in revising the 1975 I/O study and in calculating new rebate rates based on the revised study, we find that the government of Thailand has a system in place to periodically update the rebate schedules.

We have reviewed the documentation submitted by the government in their response and at verification showing their detailed calculation of the rebate rates. Under the Tax and Duty Act, these calculations itemize the inputs and list ex-factory prices, import values, import duties and taxes, and domestic indirect taxes. The inputs itemized in the government's calculations include both physically incorporated items as well as non-physically incorporated items.

Since the indirect tax on non-physically incorporated items is also included in the government's rebate rate calculation, we must determine the extent to which the rebate rates confer an excessive remission of indirect taxes. First, we calculated the indirect tax incidence on physically incorporated inputs at FOB prices according to the most recent government rebate rate calculation. We then subtracted the percentage of indirect tax incidence attributable to physically incorporated inputs from the authorized rebate rate. Using this methodology, the overrebate on the "A" rate is 1.55 percent and the overrebate on the "B" rate is 0.20 percent.

To determine the country-wide estimated net bounty or grant, we weight-averaged the overrebates received by each producer under the current rebate rates by each company's proportion of the value of Thai exports of steel wire nails to the United States during the review period. On this basis, we calculate an estimated net bounty or grant of 0.26 percent *ad valorem*.

C. Assistance to Trading Companies Under the Investment Promotion Act: Double Deduction of Foreign Marketing Expenses and Foreign Taxes

Pursuant to section 16 of the Investment Promotion Act, the Board of Investment issued Announcement No. 40/2521. This announcement designated international trading companies as eligible for promotion through the receipt of an investment incentive license. Although this program was terminated for international trading companies not granted promotion prior to March 2, 1981, companies granted promotion before the termination continued to be eligible for benefits under the program. Asoke received its investment incentive license on February 20, 1980, prior to the termination date. Pursuant to this license, Asoke was eligible to receive each of the benefits listed in the announcement. These benefits include:

- Import duty exemptions for both raw and essential materials used in export production;
- Exemption of certain business taxes;
- Exemption of business taxes for suppliers;
- Exemption of business taxes for subcontractors;
- Permission to maintain foreign currency bank accounts;
- Entitlement to Export Packing Credits;
- A double deduction from taxable income of taxes paid by branch offices outside Thailand; and
- A double deduction from taxable income of foreign marketing expenses.

The first two benefits—import duty exemptions and exemption from certain business taxes—are discussed below under "Programs Determined Not To Confer Bounties or Grants." The next four benefits—exemption of business taxes for suppliers, exemption of business taxes for subcontractors, permission to maintain foreign currency accounts and entitlement to Export Packing Credits—are discussed below under "Programs Determined Not To Be Used."

We verified that Asoke used the two tax deduction sub-programs on its tax return filed during the review period. Because these programs provide a benefit contingent upon export performance, we determine that they both confer a bounty or grant. The benefit is the amount of tax savings realized as a result of the additional tax deductions allowed under the program.

We verified that the deduction for taxes paid by foreign branch offices may also be doubled and subtracted from gross income. Therefore, we included both deductions in the same benefit calculation. To calculate the estimated net bounty or grant, we first determined Asoke's tax savings based on the tax return filed during the review period by multiplying the value of the extra deduction by the corporate tax rate of 40 percent. We then multiplied the tax savings by the proportion of Asoke's steel wire nail exports to the United States (excluding exchange gains) over the invoice value of its total export sales (excluding exchange gains and commission fees charged separately). We divided the resulting amount by total steel wire nail exports to the United States to derive the estimated net bounty or grant of 0.31 percent *ad valorem*.

II. Progam Determined not to Confer Bounties or Grants

We determined that bounties or grants are not being provided to manufacturers, producers or exporters in Thailand of certain steel wire nails under the following program.

Assistance to Trading Companies Under the Investment Promotion Act: Import Duty Exemption and Exemption from Certain Businesss Taxes

Under the Board of Investment Announcement No. 40/2521 discussed above, eligible trading companies are entitled to import duty exemptions for both raw and essential materials used in export production.

We verified that the import duty exemption benefit functions in the same way as the duty drawback program in Thailand which we have determined does not confer a bounty or grant [See *Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Apparel from Thailand* (50 FR 9818, March 12, 1985)].

Announcement No. 40/2521 also provides business tax exemptions to producers who supply export commodities to promoted trading companies. Additionally, business tax exemptions are provided on the commission fees and export agency fees of promoted trading companies.

We verified that business taxes in Thailand are excise taxes paid on monthly gross receipts by the seller. As such, these taxes are indirect taxes. The taxes exempted under this program are also final stage taxes. Under the act, the non-excessive remission of, or exemption from, indirect taxes levied at the final stage is not considered a subsidy [See *Final Negative Countervailing Duty Determination: Oil Country Tubular Goods from Taiwan*

[51 FR 19583, May 30, 1986)]. Therefore, we determine that the exemptions from the business taxes described above do not confer a bounty or grant.

III. Programs Determined not to be Used

We determine, based on verified information, that the manufacturers, producers and exporters in Thailand of certain steel wire nails did not apply for, claim or receive benefits during the review period for exports of steel wire nails to the United States under the following programs which were listed in the *Initiation of Countervailing Duty Investigation: Certain Steel Wire Nails from Thailand* (52 FR 18591, May 18, 1987).

A. Repurchase of Industrial Bills
B. Electricity Discounts for Exporters
C. Investment Promotion Act (Sections 31, 33, 34 and 36)
D. Export processing Zones
E. International Trade Promotion Fund
F. Assistance to Trading Companies Under the Investment Promotion Act: Exemption of Business Taxes for Suppliers, Exemption of Businesss Taxes for Subcontractors, Export Packing Credits and Foreign Currency Accounts

We verified that under this program, Assistance to Trading Companies Under the Investment Promotion Act, the first three benefits listed were not used by Asoke for exports of steel wire nails to the United States.

With respect to foreign currency accounts, at verification, the government reported that contrary to the initial company response, Asoke did maintain a foreign currency account denominated in U.S. dollars during the review period. However, we verified that the account was not used to conduct transactions involving steel wire nail exports to the United States, nor was it used to import inputs for the production of steel wire nails.

IV. Programs Determined not to Exist

We determined, based on verified information, that the following programs listed in the *Initiation of Countervailing Duty Investigation: Certain Steel Wire Nails from Thailand* (52 FR 18591, May 18, 1987) do not exist.

A. Business Tax Exemption for Manufacturers of Construction Materials
B. Sales Tax Exemption for Promoted Industries

We verified that a sales tax exemption program for promoted industries, other than that provided under the Investment Promotion Act, does not exist (see "Program Determined Not To confer Bounties or Grants" and "Programs Determined Not To Be Used").

Comments

Comment 1: Respondents contend that the Department of Commerce (DOC) should not use a full-year weighted average commercial interest rate as a benchmark for calculating the benefit arising from the export packing credit program. Instead, they argue, six-month average interest rates should be used.

DOC Position: We disagree. We believe the use of a full-year benchmark neither overstates nor understates the benefit, but is the best measure of subsidization during the review period. Respondents have not provided sufficient rationale to convince us to depart from our standard short-term loan methodology. Using six-month benchmark rates, as respondents suggest, is not warranted in this instance, because no major fluctuation in the Thai economy occurred during the time the loans were obtained.

Comment 2: Respondents argue that, in calculating the benefit Asoke received from the double deduction of foreign marketing expenses and payment of foreign taxes, the DOC should not take into account for duty deposit purposes the tax loss carry-forward the company claimed on its 1986 tax return filed in 1987.

DOC Position: We agree. Asoke's tax loss carry-forward was created by the double deduction of foreign marketing expenses in previous tax years. Asoke was able to carry-forward this loss under a standard provision of Thai tax law. Therefore, we do not consider the use of that existing provision to constitute a program-wide change. Consequently, it is inappropriate to take into account the use of the provision for purposes of establishing a duty deposit rate. However, the tax loss carry-forward will be examined in a subsequent administrative review, if requested.

Comment 3: Respondents assert that permission to hold foreign currency accounts should not be considered a countervailable subsidy under U.S. law. Respondents further contend that Asoke's use of the foreign currency account did not confer a benefit on exports of steel wire nails to the United States.

DOC Position: While Asoke does maintain a dollar-denominated foreign currency account, we verified that the account was not used in conjunction with nail exports to the United States during the review period. Based on this information we determine that the program was not used; the question of countervailability is therefore moot.

Comment 4: Respondents argue that it is unnecessary to calculate the incidence of indirect taxes on non-physically incorporated inputs at stages of production prior to the final input stage to determine the benefit received under the tax certificate for export program. They contend that this program intends to rebate only those indirect taxes levied on inputs incorporated into the exported product at the final production stage, and that such a rebate is permissible under U.S. law.

DOC Position: We verified that the tax certificates for exports program only rebates the indirect taxes paid on the final stage inputs. The purpose of the program is not to rebate the amount of taxes paid on inputs at stages of production prior to the final input stage. Therefore, for purposes of our analysis, we have examined the indirect tax incidence only on inputs at the final stage of production.

Comment 5: Respondents point out that, for purposes of the final determination, the figure for total exports of steel wire nails to the United States should be adjusted. In the preliminary calculation, they contend, DOC erroneously used an export value for Asoke, a trading company, based on a cash receipt sales value reported by KYI, its supplier. Instead, Asoke's own records, which are kept on an accrual basis and include any mark-ups passed on to customers, should be used to calculate the export value. In calculating the proportion of KYI's shipments of nails to the United States, respondents suggest that KYI's shipments through Asoke be valued according to Asoke's accrual basis accounting records.

DOC Position: We agree. However, we further revised the figure for total export sales of nails to the United States by subtracting from it one very small export shipment of nails through Asoke produced by a non-responding company. We also subtracted exchange gains Asoke made on shipments of nails to the U.S. Likewise, we excluded these values when calculating the value of KYI's shipments through Asoke.

Verification

In accordance with section 776(a) of the Act, we verified the information used in making our final determination. During verification we followed standard verification procedures, including meeting with government and company officials, inspecting documents and ledgers, tracing information in the response to source documents, accounting ledgers, and financial statements, and collecting additional

information that we deemed necessary for making our final determination.

Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation on all entries of certain steel wire nails from Thailand which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. In accordance with section 706(a) of the Act (19 U.S.C. 1671e), we are directing the U.S. Customs Service to require a cash deposit equal to 1.00 percent *ad valorem* for each entry of the subject merchandise. This suspension of liquidation will remain in effect until further notice.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Lee W. Mercer,

Acting Assistant Secretary for Trade Administration.

September 28, 1987.

[FR Doc. 87-22832 Filed 10-1-87; 8:45 am]

BILLING CODE 3510-DS-M

[Docket No. 3642-05]

Actions Affecting Export Privileges; Joseph Lousky

Summary

In the matter of: Joseph Lousky, Respondent, Docket No. 3642-05.

Pursuant to the consent agreement reached by the Department of Commerce and Joseph Lousky in the above captioned proceeding, which agreement was approved by the Administrative Law Judge in his Recommended Decision and Order, Joseph Lousky, 63 Merton Road, Hampstead, Montreal, Quebec H3X 1M3, Canada is hereby denied all export privileges for three (3) years from the date of this Order and assessed a civil penalty in the amount of $25,000. As authorized by § 388.16(c) of the Export Administration Regulations (15 CFR Parts 368 through 399 (1986)) (Regulations), the last two years of the three year denial period are hereby suspended. The two year suspension will commence one year after entry of this Order. The final two years of the denial period will be waived provided that during the period of suspension Lousky: (1) Complies with the terms set forth in the Consent Agreement and (2) commits no violations of the Act, regulations, order or license issued under the Act.

Order

On August 27, 1987, the Administrative Law Judge (ALJ) issued his Recommended Decision and Order approving the consent proposal dated August 10, 1987 and submitted by the parties in this matter. The Recommended Decision and Order was referred to me pursuant to the Export Administration Amendments Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985) (the Act) and 15 CFR 388.17(a), for final action.

I hereby modify the third sentence in paragraph two of the ALJ's Decision by deleting that sentence and inserting in lieu thereof the following:

Lousky admits that certain of the facts stated in the charging letter are true. I find that those allegations, admitted by Lousky to be true, constitute violations of the Act and the Regulations. Lousky wishes to settle and dispose of all matters identified in the charging letter by entering into this consent agreement.

Paragraph V of the ALJ's Order is hereby modified by deleting that paragraph and inserting in lieu thereof the following:

V. All outstanding individual validated export licenses in which Lousky appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Lousky's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses are hereby revoked.

Paragraph VIII of the ALJ's Order is hereby modified by inserting after the words "specific authorization" the following:

* * * from the Office of Export Licensing * * *.

Having examined the record and based on the facts adduced in this case, I affirm the Recommended Decision and Order of the ALJ as thus modified and incorporate herein by reference the terms of the settlement agreement referred to above.

This constitutes final agency action in this matter.

Dated: September 28, 1987.

Paul Freedenberg,

Assistant Secretary for Trade Administration.

Decision and Order Affirming Settlement Agreement

In the matter of: Joseph Lousky, Respondent, Docket Number 364-05.

Appearance for Respondent: Mr. Kenneth F. Salomon, Esq., 800 Quest Boulevard, Dorchester, Suite 2890, Montreal, Quebec Canada H 3b 1X9.

Appearance for Agency: Thomas C. Barbour, Esq., Attorney-Advisor, U.S. Department of Commerce, Room H3845, Washington, DC 20230.

An administrative proceeding was initiated against Joseph Lousky (Lousky),[1] pursuant to section 13(c) of the Export Administration Act of 1979 (50 U.S.C.A. app. 2401 through 2420), as amended by the Export Administration Amendments Act of 1985, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985) (the Act), and the Export Administration Regulations (currently codified at 15 CFR Parts 368 through 399 (1986)), (the Regulations). The Office of Export Enforcement issued a charging letter on April 2, 1986, alleging that between April 1, 1981 through November 12, 1982, Lousky violated §§ 387.3, 387.4, 387.5 and 387.6 of the Regulations, in that:

(a) Between April 1, 1981 and November 12, 1982, Lousky conspired with Pierre A. Randin to bring about acts that constituted violations of the Act and the Regulations. The purpose of this conspiracy was to acquire U.S.-origin goods on the representation that Switzerland was the intended ultimate destination when, in fact, Lousky and Randin intended to, and did subsequently, divert the U.S.-origin goods to proscribed destinations without the required reexport authorization from the Department. In accomplishing this conspiracy, Lousky caused false and misleading statements of material fact to be submitted to the Department.

(b) Between April 1, 1981 and November 12, 1982, Lousky and others, in connection with these shipments indirectly caused false and misleading statements of material fact to be made to the Department on export control documents; and

(c) Lousky reexported U.S.-origin computers and computer components from Switzerland to proscribed destinations without obtaining reexport authorization from the Department which Lousky knew or had reason to know was required by § 374.1 of the Regulations.

Pursuant to 15 CFR 388.17, the Agency and Lousky have agreed to and submitted a consent proposal to this office whereby Agency counsel and Respondent have agreed that, although Lousky was charged individually and doing business as Eler Engineering S.A., that entity no longer exists. Therefore,

---

[1] The original proceeding was initiated by a Charging Letter addressed to Lousky, individually and doing business as Eler Engineering S.A., with addresses in both France and Switzerland. By letter dated May 26, 1986, the Agency was notified that Eler Engineering S.A. had, in fact, been liquidated. Accordingly, the Order is issued against Lousky only in his individual capacity.

the sanctions imposed shall apply only to Lousky, individually. Respondent Lousky admits that he violated the regulations as alleged in the charging letter and that this matter is being settled by: (1) Lousky's payment to the Agency of a civil penalty in the amount of $25,000; (2) a denial to Lousky of all export privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving the export of U.S.-origin commodities or technical data from the United States or abroad for a period of three years following the date of entry of this Order.

I find that these terms are sufficient to achieve effective enforcement of the Act and the Regulations. Therefore, pursuant to the authority delegated to me by Part 388 of the Regulations, It is ordered:

I. Respondent Joseph Lousky is assessed and shall pay to the Agency a civil penalty in the amount of $25,000. Such civil penalty shall be payable to the Agency in three installments: The first installment of $5,000 will be paid within 30 days from the service of the final Order of the Assistant Secretary; the second installment of $5,000 will be paid to the Agency on or before September 30, 1988; the third and final installment of $15,000 will be paid to the Agency on or before September 30, 1989. Each payment shall be made in accordance with the attached instructions.

II. For a period of 3 years from the date this Order becomes final, Respondent—

Joseph Lousky, 63 Merton Road, Hampstead Montreal, Quebec H3X IM3, Canada,

his successors of assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the regulations.

III. Commencing 1 year from the date on which this Order becomes final, in accordance with § 388.16(c) of the Regulations, the period of denial will be suspended for the balance of the remaining 2 year period and will be remitted without further action at the end of that period provided Respondent has committed no further violations of the Act, the regulations, or the final Order entered in this proceeding. During the 2-year suspension period, Respondent may participate in transactions involving the export of the U.S.-origin commodities or technical data from the United States or abroad in accordance with the requirements of the Act and the regulations. The provisions of Paragraph V of the Order are also suspended during the 2-year period.

IV. Respondent Lousky shall, during this suspension period, submit quarterly reports to the Director, Office of Export Enforcement, describing the reexport of U.S.-origin commodities, technical data, or equipment Lousky has made, as provided in the Consent Agreement. Each report shall cover successive quarters following the date of suspension. Lousky shall submit each of these reports after the close of each quarter.

V. All outstanding validated export licenses in which Lousky or any related party appears or participates, in any manner or capacity, are hereby revoked and shall be returned to the Office of Export Licensing for cancellation.

VI. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include but not be limited to, participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transportating, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to matters which are subject to the Act and the Regulations.

VII. After notice and opportunity for comment, such denial of export privileges may be made applicable to any person, firm, corporation, or business organization with which the Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection, in the conduct of export trade of related services.

VIII. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure and specific authorization, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported, by, to, or for any Respondent or related party denied export privileges, or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

IX. By the Order of March 11, 1983 (48 FR 11479, March 18, 1983), Joseph Lousky and others were temporarily denied all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data. The temporary denial order was to remain in effect until the final disposition of any administrative or judicial proceedings initiated as a result of the ten on-going investigation. Upon approval, this Order will constitute such final disposition of the administrative proceeding initiated by the Agency as a result of its investigation relating to the matters which gave rise to the temporary denial order. The Temporary Denial Order of March 11, 1983 (48 FR 11479–11480, March 11, 1983) will thereby be superceded and revoked. Review of the record relating to the 5 Respondents originally named in that Order reflect that all have now been addressed except Eler Engineering, S.A. and Suzanna Maas who was identified as a related party. As is stated in the footnote on page one, Eler Engineering has been liquidated and no longer exists. Since Suzanna Maas was named as a party related to Eler Engineering by virtue of her employment there, it appears that the basis for her being named no longer exists. The following entries will deleted from the said Table:

Eler Engineering, S.A. a/k/a Eler, S.A., P.O. Box 209, CH–1401 Yverdon, and CH–1040 Echallens, Switzerland

Eler, S.A.

Maas, Suzanna, Manager, Eler Engineering, S.A., P.O. Box 209, CH-1401 Yverdon, Switzerland.

VOL 52 ISS 191 OC 2 1987 UMI

From the effective date of this Order it alone will be the basis for any entry on the Table of Denial Orders until modified (15 CFR Part 388 (Supp. No. 1 1987)).

X. This Order shall become effective upon entry of the Secretary's action in this proceeding pursuant to the Export Administration Amendments Act (50 U.S.C.A. app. 2412(c)(1)).

Dated: August 27, 1987.

Hugh J. Dolan,

Administrative Law Judge.

BILLIN CODE 3510–DT–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustments of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

September 29, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements, (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 5, 1987. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535–9481. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the limit for cotton textile products in Category 347/348, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Background

A CITA directive dated November 28, 1986 was published in the **Federal Register** (51 FR 43960), as amended on April 7, 1987 (52 FR 12230), which established import restraint limits for certain cotton, wool and man-made fiber textile products, including Categories 347/348 and 647/648, produced or manufactured in Mexico and exported during the current agreement year which began on January 1, 1987 and extends through December 31, 1987. The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, between the Governments of the United States and the United Mexican States, under the terms of which these limits were established, also includes provisions for special shift between the specific limits for Categories 347/348 and 647/648. Under the foregoing provisions of the bilateral agreement and at the request of the Government of the United Mexican States, the limit established for Catetory 347/348 is being increased by application of special shift for goods exported during the tewlve-month period which began on January 1, 1987 and extends through December 31, 1987. The limit for Category 647/648 is being reduced to account for the special shift applied to Category 347/348.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709, as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register**.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

September 29, 1987.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee For The Implementation of Textile Agreements

September 29, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on November 28, 1986, as amended on April 7, 1987, by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 5, 1987, the directive of November 28, 1986, as amended, is hereby further amended to adjust the previously established limits for cotton and man-made fiber textile products in Categories 347/348 and 647/648, as provided under the terms of the bilateral agreement of February 26, 1979, as amended and extended [1]:

Category	*Adjusted 1987 Limit* [1]
347/348	1,571,185 dozen
647/648	1,635,050 dozen

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–22804 Filed 10–1–87; 8:45 am]

BILLING CODE 3510–DR–M

[1] The agreement provides, in part, that: (1) Specific limits and sublimits may be exceeded by not more than seven percent for swing in any agreement period; (2) these same limits may be adjusted for carryforward and carryover up to 11 percent of the applicable category limit or sublimit; (3) special shift of ten percent shall be available between the specific limits for Categories 347/348 and 647/648; an additional five percent special shift shall be available between sublimits 347 and 348 between 647 and 648; and (4) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

VOL 52 ISS 191 OCT 2 1987 UMI

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the Philippines

September 29, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on September 29, 1987. For further information contact Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535–6735. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the restraint limit for Category 443 for the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Background

A CITA directive dated March 11, 1987 (52 FR 7918) established limits for certain specified categories of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, including individual specific limits within Group I and a limit for categories in Group II which do not have specific limits, produced or manufactured in the Philippines and exported during the agreement year which began on January 1, 1987 and extends through December 31, 1987. Pursuant to a request from the Government of the Republic of the Philippines and under the terms of the Bilateral Textile Agreement of March 7, 1987, between the Governments of the United States and the Republic of the Philippines, Category 443 is being increased by application of swing and carryforward. The limit for Group II has been reduced to account for the swing applied to Category 443.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register**.

This letter and the actions take pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

September 29, 1987.

Committee for the Implementation of Textile Agreements

September 29, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on March 11, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on September 29, 1987, the directive of March 11, 1987 is amended to include adjustments to the following previously established restraint limits, under the terms of the Bilateral Textile Agreement of March 7, 1987: [1]

Category	Adjusted 12-month limit [1]
443	3,396 dozen.
Group II: 300–320, 330, 332, 349, 350, 353, 354, 359–O [2], 360–363, 369–O [3], 400–429, 432, 434–442, 444, 448–459, 464–469, 600–603, 605–627, 630, 632, 644, 653 654, 659–O [4], 665–670 and 831–859, as a group	67,184,970 square yards.

[1] The limit has not been adjusted to account for any imports exported after December 31, 1986.

[2] In Category 359–O, all TSUSA numbers except 384 0439, 384 0441, 384 0442, 384 0444, 384 0805, 384 0810, 384 0815, 384 0820, 384 0825, 384 3451, 384 3452, 384.3453, 384 3454, 384.5162, 384 5163, 384 5167, 384 5169 and 384 5172.

[3] In Category 369–O, all TSUSA numbers except 366 3840

[4] In Category 659–O, all TSUSA numbers except 384 2105, 384 2115, 384 2120, 384 2125, 384 2646, 384 2647, 384 2648, 384 2649, 384 2652, 384 8651, 384 8652, 384 8653, 384 8654, 384 9356, 384 9357, 384 9358, 384 9359, 384 9365, 703 0510, 703 0520, 703 0530, 703 0540, 703 0550, 703 0560, 703 1000, 703 1610, 703.1620, 793.1630, 703.1640 and 703.1650

[1] The agreement provides, in part, that: (1) Specific limits may be exceeded during the agreement year by designated percentages; (2) specific limits may be adjusted for swing, carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–22805 Filed 10–1–87; 8:45 am]

BILLING CODE 3510–DR–M

Adjustment of an Import Limit for Certain Cotton, Wool and Man-Made Fiber Sweaters Assembled in the Northern Mariana Islands (CNMI) from Imported Parts

September 29, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 5, 1987. For further information contact Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the limit for sweaters in Categories 345, 445, 446, 645 and 646 which are assembled in the Commonwealth of the Northern Mariana Islands and exported during the twelve-month period which began on November 1, 1986 and extends through October 31, 1987.

Background

On November 3, 1986 a notice was published in the **Federal Register** (51 FR 39902), which continued and increased the import restraint limit for cotton, wool and man-made fiber sweaters in Categories 345, 445, 446, 645 and 646, which were determined by the U.S.

Customs Service to be products of foreign countries or foreign territories and exported from the Commonwealth of the Northern Mariana Islands (CNMI) during the period which began on November 1, 1986 and extends through October 31, 1987. A subsequent notice published on September 10,1987 (52 FR 34271) announced the reduction of this limit.

As an interim measure pending amendment to the existing bilateral agreement regarding sweaters panels assembled in the CNMI, the Commonwealth of the Northern Mariana Islands has requested that the limit for Categories 345, 445, 446, 645 and 646 be increased by application of carryforward for the period which began on November 1, 1986 and extends through October 31, 1987. This action will re-open the limit which is currently embargoed.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States annotated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on October 29, 1986, as amended on September 4, 1987, by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of cotton, wool and man-made fiber sweaters in Categories 345, 445, 446, 645 and 646, assembled in the Commonwealth of the Northern Mariana Islands from foreign parts and exported during the twelve-month period which began on November 1, 1986 and extends through October 31, 1987.

Effective on October 5, 1987 the directive of October 29, 1986, as amended, is hereby further amended to adjust the previously established limit for cotton, wool and man-made fiber sweaters in Categories 345, 445, 446, 645 and 646, as provided under the terms of the Arrangement of October 17, 1986 to 100,000 dozen.[1]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. (a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–22806 Filed 10–1–87; 8:45 am]

BILLING CODE 3510–DR–M

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the Philippines

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 5, 1987. For further information contact Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535–6735. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the restraint limits for Categories 335, 338/339, 340/640, 342/642, 347/348, 359–I, 445/446, 634, 635, 638/639, 645/646 and 659–H for the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Background

A CITA directive dated March 11, 1987 (52 FR 7918) established limits for certain specified categories of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, including individual specific limits within Group I and a limit for categories in Group II which do not have specific limits, produced or manufactured in the Philippines and exported during the agreement year which began on January 1, 1987 and extends though December 31, 1987. Pursuant to a request from the Government of the Republic of the Philippines and under the terms of the Bilateral Textile Agreement of March 7, 1987, between the Governments of the United States and the Republic of the Philippines, Categories 355, 338/339, 340/640, 342/642, 347/348, 359–I, 445/446, 634, 635, 638/639, 645/646 and 659–H are being increased by application of swing and carryforward. The 1987 limit for Group II is being reduced to account for the swing applied to these categories. In addition, special carryforward is being granted for Categories 338/339, 340/640, 342/642, 347/348, 359–I, 634, 638/639, and 659–H

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annoated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

September 29, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on March 11, 1987 by the Chairman, Committee for the Implementation of Textile Agreements,

[1] The limit has not been adjusted to account for any imports exported after October 31, 1986.

concerning imports of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 5, 1987, the directive of March 11, 1987 is amended to include the following adjusted restraint limits under the terms of the Bilateral Textile Agreement of March 7, 1987: [1]

Category	Adjusted 12-mo limit [1]
335	113,000 dz.
338/339	1,298,000 dz.
340/640	630,000 dz.
342/642	324,500 dz.
347/348	1,180,000 dz.
359-I [2]	819,000 dz.
445/446	27,841 dz.
634	189,000 dz.
635	345,003 dz.
638/639	1,333,400 dz.
645/646	565,000 dz.
659-H [3]	1,260,000 pds.
Group II:	
300-320, 330, 332, 349, 350, 353, 354, 359-0 [4], 360-363, 369-0 [5], 400-429, 432, 434-442, 444, 448-459, 464-469, 600-603, 605-627, 630, 632, 644, 653, 654, 659-0 [6], 665-670, and 831-859, as a group.	61,330,438 sq yds equivalent.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

[2] In Category 359-I, only TSUSA numbers 384.0439, 384.0441, 384.0442, 384.444, 384.0805, 384.0810, 384.0815, 384.0820, 384.0825, 384.5162, 384.5163, 384.5167, 384.5169, 384.5172, 384.3451, 384.3452, 384.3453 and 384.3454.

[3] In Category 659-H, only TSUSA numbers 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 793.1620, 703.1630, 703.1640 and 703.1650.

[4] In Category 359-0, all TSUSA numbers except 384.0439, 384.0441,384.0442, 384.0444, 384.0805, 384.0810, 384.0815, 384.0820, 384.0825, 384.5162, 384.5163, 384.5167, 384.5169, 3894.5172, 384.3451, 384.3452, 384.3453 and 384.3454.

[5] In Category 369-0, all TSUSA numbers except 366.2840.

[6] In Category 659-0, all TSUSA numbers except 384.2105, 384.2115, 384.2120, 384.2125, 384.2646, 384.2647, 384.2648, 384.2649, 384.2652, 384.8651, 384.8652, 384.8653, 384.8654, 384.9356, 384.9357, 384.9358, 384.9359, 384.9365 (659-I), 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650 (659-H).

[1] The agreement provides, in part, that: (1) Specific limits may be exceeded during the agreement year by designated percentages; (2) specific limits may be adjusted for swing, carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-22803 Filed 10-1-87; 8:45 am]

BILLING CODE 3510-DR-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1987; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1987 a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: November 2, 1987.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On August 10, 1987, the Committee for Purchase from the Blind and Other Severely Handicapped published notice (52 FR 29564 of a proposed addition to Procurement List 1987, November 3, 1986 (51 FR 39945).

After consideration of the relevant matter presented, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77 and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the service listed.

c. The action will result in authorizing small entities to provide the service procured by the Government.

Accordingly, the following service is hereby added to Procurement List 1987:

Service

Janitorial/Custodial
U.S. Department of Justice, Northwestern Bank Building, 1405 Eye Street NW., Washington, DC

C W. Fletcher,

Executive Director.

[FR Doc. 87-22813 Filed 10-1-87; 8:45 am]

BILLING CODE 6820-33-M

Procurement List 1987; Proposed Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions and deletions to Procurement List.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1987 commodities and services produced or provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 2, 1987.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following services to Procurement List 1987, November 3, 1986 (51 FR 39945).

Service

Assembly of Kit
Camouflage Support System, U.S. Army Troop Support Command, St. Louis, Missouri

Janitorial
Federal Building, 601 East 12th Street, Kansas City, Missouri

Deletions

It is proposed to delete the following commodities from Procurement List 1987, November 3, 1986 (51 FR 39945):

Commodities

Frame, Picture
7105–00–986–7356
7105–00–149–1277
Pencil, Mechanical
7520–00–285–5818

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Follow on Forces Attack (FOFA); Advisory Committee Meetings

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Task Force on Follow on Forces Attack (FOFA) will meet in closed session on November 23–24, 1987 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will continue to review, in detail, classified material associated with conventional military capabilities in NATO to include special targeting requirements.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

September 29, 1987.

Patricia H. Means,

OSD Federal Register Liaison Officer Department of Defense.

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning Qualifications Requirements.

ADDRESS: Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Chester Mathews, Office of Federal Acquisition and Regulatory Policy (202) 523–3856 or Mr. Owen Green, Defense Acquisition Regulatory Council, (703) 697–7268.

SUPPLEMENTARY INFORMATION:

a. Purpose

The solicitation provision at FAR 52.209–1, Qualifications Requirements, requires offerors who have met the qualifications requirements to identify the offeror's name, the manufacturer's name, the item name and the test number.

b. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, *7,882*; responses per respondent, *100*; total annual responses *788,200*; hours per response, *.084*; and total burden hours, *66,209*.

Obtaining Copies of Proposals: Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0083, Qualifications Requirements.

Dated: September 22, 1987.

BILLING CODE 6820–1–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER87–614–000 et al.]

Electric Rate and Corporate Regulation Filings; Washington Water Power et al.

Take notice that the following filings have been made with the Commission:

1. Washington Water Power

[Docket No. ER87–614–000]

September 25, 1987.

Take notice that on September 14, 1987, Washington Water Power (WWP) tendered for filing an amendment of a list of customers that have agreed to the settlement offer extended by WWP in the Alternative Fourteenth Revision of Schedule 61. WWP states that wholesale customers, Citizens Utilities Company, the City of Chewelah, and the City of Plummer have signed settlement agreements. WWP requests that the Commission consider these settlement agreements at the time the Commission acts on WWP's rate filing. If the Commission approves the settlement agreements, WWP requests that Alternate Fourteenth Revision of Schedule 61 be approved effective November 1, 1987 applicable to all five of its wholesale electric customers and that the Commission's Order specifically approve the 64.1% level and method of recovery of WWP's investment in BPA Settlement Exchange Power addressed in the settlement agreement.

A copy of this filing is being served on all parties to this proceeding.

Comment date: October 6, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Niagara Mohawk Power Corporation

[Docket No. ER87–418–000]

September 25, 1987.

Take notice that on September 8, 1987, Niagara Mohawk Power Corporation (Niagara Mohawk) tendered for filing an amendment with additional information to the application filed May 1, 1987 in this docket for a change in the rates Niagara Mohawk charges the New York Power Authority (Power Authority) for the transmission and delivery of power and energy under Niagara Mohawk FERC Rate Schedule No. 138. This filing was in response to an August 7, 1987 letter from Mr. Jerry R. Milbourn requesting additional information.

Pursuant to 18 CFR 35.11 (1987), Niagara Mohawk requests that the Commission waive its notice requirements for good cause shown and allow the proposed rates to become effective on July 1, 1987, the effective date requested in the May 1, 1987 application. Niagara Mohawk states the affected customers and the Commission have had notice of the proposed change in rates and the proposed effective date since May 1, 1987, and that this amendment to the filing does not involve revisions to the originally proposed rates. Thus, neither the affected

customers nor the Commission would not be prejudiced by such waiver.

Niagara Mohawk also renews its request, as set forth in its May 1, 1987 transmittal letter, that the Commission suspend the proposed rates, if at all, for no more than one day.

Comment date: October 6, 1987, in accordance with Standard Paragraph E at the end of this document.

3. Pacific Gas and Electric Company

[Docket No. ER87-424-000]

September 28, 1987.

Take notice that on September 24, 1987, Pacific Gas and Electric Company (PGandE) tendered for filing in compliance with Commission Order dated June 26, 1987:

(1) A letter agreement with Western Area Power Administration (WAPA), dated December 21, 1979 (Letter Agreement). This is the amendment to PGandE's agreement with WAPA that clearly sets forth the energy rate methodology.

(2) An explanation of the derivation of all the components of the energy rate.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Pacific Gas and Electric Company

[Docket No. ER87-665-000]

September 28, 1987.

Take notice that on September 24, 1987, Pacific Gas and Electric Company (PGandE) tendered for filing a Revised Letter of Understanding (Letter) Concerning the WSPP Agreement and the Interconnection Agreement between PGandE and the Northern California Power Agency (NCPA).

The Letter defines how PGandE will provide transmission services for NCPA for transactions under the Western Systems Pool (WSPP) experiment. NCPA requires transmission services from PGandE to participate in the WSPP experiment. The Letter specifies which transmission services shall be provided under the Western Systems Power Pool Agreement (Pool Agreement) and which shall be provided under the Interconnection Agreement between PGandE and NCPA.

All firm transmission services will be provided under the Pool Agreement. All non-firm transmission services will be provided under the Interconnection Agreement. WSPP transactions will be billed separately from Interconnection Agreement transactions and compensation for a WSPP transaction will in no way effect either party's obligation for services offered under the Interconnection Agreement.

The Letter is to effective only for the year term of the experiment.

Comment date: October 13, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL87-67-000]

Regulation of Independent Power Producers; Technical Conference

September 25, 1987.

AGENCY: Federal Energy Regulatory Commision.

ACTION: Notice of Technical Conference.

SUMMARY: This Notice is establishing a schedule for a technical conference conducted by the Staff of the Federal Energy Regulatory Commission (Commission) to allow the public to comment on the Commission's regulation of independent power producers (IPPs) under the Federal Power Act, 16 U.S.C. 791A-825R.

Although written comments may be given regarding any aspect of IPPs regulation, the Staff is particularly interested in receiving comments in five major topic areas:

1. The need for new policies toward IPPs;
2. Identifying and regulating producers lacking market power;
3. Rate regulation of IPPs;
4. Utility ownership of IPPs;
5. FERC/State issues.

In addition, the Staff will make available to the public no later than October 9, 1987 a preliminary working paper exploring the technical and policy issues associated with the regulation of IPPs. The Staff wishes to receive comments from the public on this paper.

DATES: Panels will be created around the five major topics listed above. Each party wishing to speak should file a request to speak, indicating the panels on which it wishes to participate ranked by order of preference. Because of time limitations, parties may not be granted the opportunity to participate on every panel that they request. However, parties may file written comments on as many issues as they wish. The Commission encourages every party who plans to make an oral presentation to file written comments with the Commission in advance of the conference. Every person desiring to make an oral presentation must file a request to speak. An original plus fourteen (14) copies of requests to speak must be received by the Commission's Secretary by 5:00 p.m. EDT on October 16, 1987. An original plus fourteen (14) copies of written comments on the technical conference and working paper must be received by the Commision's Secretary by 5:00 EST on November 6, 1987. The public conference will be held on October 22 and 23, 1987 beginning at 9:00 a.m. each day in Hearing Room A at the Commission's headquarters, 825 North Capitol Street, NE., Washington, DC.

ADDRESSES: All filings should refer to Docket No. EL87-67-000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

I. Introduction

Notice is hereby given that the Staff of the Federal Energy Regulatory Commission will hold a technical conference to receive comments on initiatives involving independent power producers (IPPs) under the Federal Power Act (FPA). This notice is establishing a schedule for this conference and an opportunity to provide written and oral comments on the issues set forth below.

Background

One of the main objectives of poublic utility regulation is to protect the public against the abuses of market power.[1]

[1] See, *e.g., Associated Gas Distributors v. FERC*, D.C. Circuit, No. 85-1811, slip opinion at 20.

Market power is the ability of a seller to raise its prices substantially without substantially losing sales. The Commission has regulatory authority under the FPA to pursue this objective in four broad areas:

(a) Pricing and review of contracts (Sections 205 and 206).

(b) Reporting (Section 301).

(c) Financial and real asset transactions (Sections 203 and 204).

(d) Intercorporate affiliations (section 305).

The Commission's jurisdiction to regulate in these areas extends both to traditional electric utilities and to independent power producers other than qualifying facilities (QFs) under the Public Utility Regulatory Policies Act of 1978. For purposes of this Notice, we define an IPP to be a generating entity (other than a QF) that lacks significant market power and that is independent of any local electric utility where the IPP provides service, i.e., independent of the company possessing the exclusive franchise to sell electricity at retail. This definition could encompass facilities owned by utilities outside their zone of economic influence (i.e., the geographic area where they possess an exclusive franchise or otherwise possess significant market power).

To aid the Commission in fulfilling its statutory responsibilities to promote efficiency and maintain competition in bulk power markets,[2] the Commission Staff is reexamining the Commission's regulatory policies toward IPPs. The Staff wishes to receive comments from the public to assist it in that reexamination. The Staff will hold a technical conference for this purpose on October 22 and 23, 1987 beginning at 9 a.m. each day in Hearing Room A at the Commission's headquarters, 825 North Capitol Street, NE., Washington, DC. A transcript of the conference will be taken. The conference will focus on technical and policy issues.

II. Request for Specific Comments

Interested parties may make oral presentations at the technical conference without filing written comments. However, all parties who plan to make an oral presentation are encouraged to file written comments with the Commission's Secretary in advance of the conference. Parties may also choose to file written comments only, without making an oral presentation.

Although written comments may be given on any aspect of the Commission's regulatory policy toward IPPs, the Staff is particularly interested in receiving comments on the following topics:

Topic Area No. 1: The Need for New Policies Toward IPPs

(1) What role should independent or third party generation play in meeting our nation's future energy needs? Should utilities be afforded the opportunity to purchase from third party or independent power producers under rates set through competitive bidding or rate negotiations in workably competitive markets when such sources are less costly than other alternatives available to utilities?

(2) Can third party or independent power production be integrated into the wholesale power market in a fashion consistent with utilities' obligations to provide their customers with adequate, reasonably priced and reliable service?

(3) Do current Commission regulatory policies create barriers to the development of independent power producers? If so, which policies operate to constrain IPPs? What classes of IPPs are constrained?

(4) What problems currently exist that could be alleviated by reducing the Commission's regulation of IPPs? Would greater development of IPPs provide benefits that are not already being provided in sale-leaseback arrangements?

(5) Does the Public Utility Holding Company Act (PUHCA) impede the development of IPPs? If so, how?

Topic Area No. 2: Identifying and Regulating Producers Lacking Market Power

(6) Are there any public policy objectives served by traditional embedded cost regulation of the price of power sold by producers who do not have significant market power? Are any purposes served by the Commission imposing on such producers an obligation to provide service beyond the terms of their contracts? Are any purposes served by regulating the corporate and financial structure and activities of such producers?

(7) Can certain power producers be identified generically as not having significant market power, and thus classified as IPPs? What specific criteria should be used to identify these producers?

Topic Area No. 3: Rate Regulation of IPPs

(8) Which of the following pricing mechanisms should be used for regulating the rates of IPPs in order to promote economic efficiency in the electric industry?

(a) Rates set at or below avoided costs determined administratively;

(b) Rates set through a bidding mechanism;

(c) Rates set through private negotiation;

(d) Rates set through other pricing mechanisms.

(9) What would be the appropriate role, if any, for IPPs in a competitive bidding system that the states might adopt under PURPA?

(10) If the states were to allow IPPs to directly participate in a competitive bidding process, what flexibility should be afforded to the purchasing utilities and state public utility commissions to determine the role of nonprice factors in the bidding evaluation process?

(11) How can concerns about the reliability, dispatchability, and performance of IPPs be adequately addressed?

Topis Area No. 4: Utility Ownership of IPPs

(12) Under what circumstances, if any, should generating facilities be eligible for IPP status if they are owned by utilities possessing a monopoly franchise to serve retail customers?

(a) Should a utility-owned facility be eligible for IPP status only if it is located outside the utility's zone of economic influence? Is so, what factors are relevant to identify a utility's zone of economic influence?

(b) Should utility-owned generating facilities be eligible for IPP status if they are located in the utility's service territory but their power is sold in markets beyond the utility's zone of economic influence?

(c) If utility-owned generating facilities are eligible for IPP status, what steps should FERC take to protect against potential abuses (e.g., self-dealing, daisy chaining, reciprocal dealing, cost misallocation, etc.)?

(d) Should a joint venture be eligible for IPP status if the local utility is a part owner of the venture? If so, what limits should be placed on the ownership share of the utility? What other restrictions, if any, should be placed on the venture or the utility owning a portion of the venture?

Topic Area No. 5: FERC/State Issues

(13) What are the policy ramifications of third party or independent wholesale power producers on the division of jurisdiction between FERC and state commissions?

Staff Working Paper

A preliminary Staff working paper exploring the technical policy issues associated with the regulation of IPPs will be made available to the public no later than October 9, 1987. In addition to comments on the above questions, the public may file comments on this working paper.

Ground Rules for the Conference

The issues surrounding IPPs regulation are numerous and complex. The conference will be more productive if detailed and well supported comments, rather than broad generalities, are received. To focus the oral presentations, the conference will be organized around the five major topic areas listed above. Panels will be created for each major topic area. Each party wishing to speak at the conference should file a request to speak with the Commission. The request should indicate the panels on which the party wishes to participate, ranked by order of preference. Because of time limitations, parties may not be allowed to participate on every panel that they request. If parties request to speak on subjects not covered in the 5 topics, listed above, other panels may be created. While parties may not be allowed to spaek on every topic requested, written comments may cover as many areas as the party wishes.

Each speaker may be allowed up to 5 minutes to make his or her presentation. However, this time limit may be modified depending on the number or parties who request to speak. Following the presentation, the Staff may ask questions of the speaker. The conference will be chaired by Dr. Douglas R. Bohi, Director of the Commission's Office of Economic Policy. Dr. Bohi may announce additional ground rules at the beginning of the conference.

III. Comment Procedures

The Commission's Staff invites interested persons to submit written comments, data, and other information concerning the matters set forth in this Notice. Due to the numerous comments that are expected, every person desiring to make an oral presentation must file a request to speak. The Commission Staff urges persons with common points of view to jointly submit their written comments and to appoint a single spokesperson for oral presentations. Requests to speak should be filed with the Secretary of the Commission by 5:00 p.m. EDT on October 16, 1987. Requests to speak should identify the name of the speaker, the group represented, and the major topic areas that the speaker wishes to discuss ranked by order of preference.

Written comments must be received by 5:00 p.m. EST on November 6, 1987. However, as noted earlier, we encourage parties making oral presentations to file written comments in advance of the conference. All filings should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, and should refer to Docket No. EL87–67–000.

All filings will be placed in the Commission's public files and will be available for public inspection in the Commission's Division of Public Information, Room 1000, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, during regular business hours.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. EF87–2011–001]

Order Granting Interim Approval of Rates, Noting and Granting Interventions, Denying Motion for Final Approval, Denying Request for Waiver of Regulations, and Directing the Filing of Supplemental Information; United States Department of Energy-Bonneville Power Administration

Issued: September 29, 1987.

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On July 31, 1987, the Bonneville Power Administration (BPA) filed with the Commission a proposed surplus firm power rate schedule (SL–87) in Docket No. EF87–2011–001. BPA requests long-term final approval of its proposed SL–87 rate as of October 1, 1987, pursuant to section 7(a)(2) of the Pacific Northwest Electric Power Planning & Conservation Act (Northwest Power Act) [1] and the Commission's regulations for the confirmation and approval of the rates of Federal Power Marketing Administrations,[2] for as long as BPA has surplus firm power available for sale.

BPA also requests waiver of the five year limit on the rate approval period [3] and waiver of the 180-day advance filing requirement for final approval of a rate.[4] The rate schedule was developed as a part of BPA's overall system power and transmission rate filing, Docket Nos. EF87–2011–000 and EF87–2021–000, parts of which are incorporated by reference in this filing.

BPA projects a continued firm capacity surplus of about 2,000 megawatts of power well past the year 2000 and a firm energy surplus of 1,000 average megawatts into the mid-1990s. At the same time, sales to existing customers—principally aluminum smelters and California utilities—have faltered in the recent past. Accordingly, BPA is now attempting to diversify its product and customer mix by marketing some of its surplus firm power on a long-term basis for twenty years.

The proposed rate schedule would only apply to 1,350 megawatts of capacity and 725 average megawatts of energy currently available for sale. This comprises less than seven percent of BPA's total firm obligations. The SL–87 rate schedule does not, however, obligate BPA to acquire any new power resource to meet long-term obligations. When the surplus is gone there will be no firm power to which this schedule might apply and sales will cease. According to BPA, the duration of BPA's surplus is indefinite and cannot be estimated precisely at this time.

BPA claims that regulatory delay is one of the key difficulties it has experienced in the marketing of surplus power. The alternative to long term surplus firm sales, BPA asserts, would be to sell this power through the highly volatile spot market. BPA points out that it is not attempting to structure a transaction that would allow it to sell all of its surplus power to a single buyer, but rather would prefer to have a series of small transactions that would increase its customer diversity and diminish its risk of revenue underrecovery.

In its wholesale power and transmission rate filings in Docket Nos. EF87–2011–000 and EF87–2021–000, BPA has made estimates of the sales it expects to make under the SL–87 rate schedule during Fiscal Years (FY) 1988 and 1989. In FY 1988, BPA estimates that it will sell 1015 average megawatts of surplus firm power, 17 percent through contractual sales and the remainder through sales on the spot market as nonfirm energy. In FY 1989, BPA estimates a total of 1099 average megawatts of surplus firm power sales with 20 percent through contractual

[2] 18 CFR Part 300 (1987).

[3] 18 CFR 300.21(e)(1) (1987).

[4] 18 CFR 300.10(a)(3)(ii) (1987).

sales and the remainder on the spot market as nonfirm energy sales. BPA has assumed that the price of gas which fuels the alternative source during this period will increase from the current price of $1.83 per MMBTU to $2.25 per MMBTU in FY 1988 and to $2.67 per MMBTU in FY 1989.

Notice of the filing was published in the **Federal Register** on August 17, 1987,[5] with comments due on or before August 25, 1987. Fourteen separate motions to intervene were filed by individual petitioners or groups of petitioners.[6] Six of the interventions were timely filed. On August 27, 1987, late motions to intervene were filed by the Pacific Power & Light Company and by the Pacific Northwest Generating Company. On August 28, 1987, late motions to intervene were filed by Dow Corning Corporation and by Cascade Steel Rolling Mills, Inc. Late motions to intervene were filed on August 31, 1987, by the Washington Utilities and Transportation Commission, by the Atlantic Richfield Company, by Portland General Electric Company, and by the Public Generating Pool.

All petitioners have requested party status in these proceedings. Only the Public Power Council (PPC) has raised substantive issues. The PPC asserts that BPA's request for a final decision within 60 days provides insufficient time for comments and adequate Commission review. It also states that the market may be too volatile for a 20-year rate, and alleges that SL–87 is excessively unstructured.

On September 9, 1987, BPA filed an answer to comments of the Public Power Council regarding final approval of the proposed SL–87 surplus power rate. BPA alleges that the PPC believes that BPA should continue to rely exclusively on the spot market. BPA, however, notes that firm power customers, including PPC members, bear all costs of unsold surplus power not recovered through spot-market transactions. BPA alleges that the proposed SL–87 rate schedule would lessen the total amount of its revenues that PPC would view as "at risk." Furthermore, BPA states that the nine months of proceedings before the Administrator have provided the Commission with sufficient information to accomplish a full and deliberate review by October 1, 1987, and have provided any potential intervenors with adequate time to prepare comments.

[5] 52 F.R. 30,721 (1987).

[6] *See* Attachment 1 for a complete list of intervenors.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure,[7] the timely, unopposed motions to intervene serve to make those movants parties to this proceeding. Given the shortened comment period in this docket, the early stage of this of this proceeding, and the fact that the interventions filed late should not unduly delay the proceeding or prejudice any other party, the late filed motions to intervene of the Pacific Power & Light Company, the Pacific Northwest Generating Company, Dow Corning Corporation, Cascade Steel Rolling Mills, Inc., the Washington Utilities and Transportation Commission, the Atlantic Richfield Company, Portland General Electric Company, and the Public Generating Pool shall be granted.

As noted above, BPA requests approval of these rates as of October 1, 1987. In the alternative, BPA seeks interim approval as of that date. Due to the complexities of the filing, we are unable to make a determination at this time with respect to BPA's request for final approval. Therefore, our current review will be limited to consideration on an interim basis which, necessarily, is a more limited review process than the review of rates for confirmation and approval on a final basis. We note that BPA has also filed its wholesale power rates and its transmission rates to be acted upon within the same 60-day review period, and thus our efforts are also focused on BPA's general rate cases.[8]

BPA also requests waiver of the Commission's regulations governing the final approval of rates, under which the filing entity is required to give the Commission 180 days from the time a rate is filed until the proposed effective date. 18 CFR 300.10 (1987). This time is necessary to weigh the revenue impacts of the proposal, to review the public comments received, and to determine whether the rate is adequate to meet all the financial obligations including the amortization of the Federal investment on a timely basis. We shall deny this request for waiver because 60 days does not allow sufficient time to review and analyze BPA's submittals and does not give the parties an adequate opportunity to intervene and to prepare and submit comments and reply comments for the Commission's consideration and analysis. The 60 days that BPA proposes is an inadequate amount of time to review and analyze such a complex filing

The Commission's regulations set forth the standards to be used in considering appropriate action with respect to a request by the Administrator of BPA for interim approval of rates. The rate schedules proposed in the filing are to be developed at a level which, assuming accurate cost and revenue estimates, and provided that all amortization payments are made on a timely basis, would produce the needed revenues to allow BPA to meet its financial obligations, and to repay deficits incurred in previous years. 18 CFR Part 300 (1987).

BPA's proposal for an open-ended rate approval period is also contrary to the Commission's regulations which limit approval of PMA rates to a maximum of 5 years. 18 CFR 300.1(b)(6) (1987). While there have been instances where longer approval periods have been granted, it has been done only after the Commission has satisfied itself that such a finding can be made after an adequate review of the filing documents and independent studies by the Commission. Time for that level of investigation does not exist to make a final determination by October 1, 1987.

Additional time is also needed because BPA's proposed new SL–87 rate is a new innovation in rate design that has not been reviewed before. Rate schedule SL–87 does not establish a fixed or even a formula-type rate. BPA states that it has concluded from past experience that flexible pricing is a key to successful marketing, and thus the SL–87 rate schedule allows a negotiated rate that may be unique to each contract. At the end of each fiscal year, in order to establish a floor and ceiling level for proposed contracts negotiated during the next fiscal year under the SL–87 rate schedule, BPA will make 21-year projections of the following: (1) BPA's priority firm power rate (an average of 23.9 mills per kWh during the proposed current rate period); (2) the value of surplus firm power in the opportunity market; and (3) the fully allocated cost of BPA's highest-cost power resource (currently Washington Public Power Supply System (WPPSS) Unit No. 2). The floor is the projected priority firm power rate or the projected value of power in the opportunity market, whichever is greater. Similarly, the ceiling will be the projected cost of the expected highest-cost power resource on BPA's system.

Any contract signed during that year must specify rates or rate formulas that, when applied to contract loads, will

[7] 18 CFR 385.214 (1987).

[8] The rates involved there, in Docket Nos. EF87–2011–000 and EF87–2021–000, represent an estimated $5.88 billion in revenues during the rate approval period whereas the SL–87 rate would account for $435 million in revenues during the same period.

provide a stream of revenues, the present worth of which will lie between the present worths of the forecasted floor and ceiling levels applied to the same loads. The rates or rate formulas specified in each contract will not be revised annually when projections are revised but will be fixed for the duration of the contract.

Before we could approve such a scheme on a final basis, more information from BPA is needed, such as the actual mechanics of its forecasting procedures and an estimate of the downside risks to BPA's cost/revenue situation in the event the forecast should prove to be inaccurate. This type of information and analysis cannot be developed in the review period BPA has proposed. In addition, the PPC states that "[t]he circumstances surrounding the SL–87 rate in fact appear to be precisely those that justify full and deliberate consideration by the Commission; that is, a twenty-year rate with no clearly defined structure, revenue projections, or future safeguards ensuring Commission review." The PPC goes on to recommend that the Commission review the actual rates established for each sale "[r]ather than approve another amorphous rate with unreviewable implementation for twenty years * * * *" In light of the fact that we have had an insufficient amount of time to review and analyze the SL–87 rate, and because of the concerns expressed by the PPC, we shall only grant interim approval of the SL–87 rate schedule at this time.

For the above reasons, final approval of BPA's surplus firm power rate schedule SL–87 shall not be granted now. Because BPA has been negotiating with California parties and appears to be ready to sign some sort of contract with them based on the SL–87 rate schedule, we shall approve the proposed rate schedule on an interim basis at this time, thus preserving any final decisions until a later time.

In light of the limited time in which parties were permitted to file comments on BPA's filing, we shall allow an additional period during which parties may comment on any and all issues related to final confirmation and approval of BPA's rates.

The Commission Orders

(A) The untimely motions to intervene of the Pacific Power & Light Company, the Pacific Northwest Generating Company, Dow Corning Corporation, Cascade Steel Rolling Mills, Inc., the Washington Utilities and Transportation Commission, the Atlantic Richfield Company, Portland General Electric Company, and the Public Generating Pool are hereby granted, subject to the Commission's Rules of Practice and Procedure.

(B) BPA's request for interim approval of its surplus firm power rate schedule is hereby granted.

(C) BPA's requests for final approval effective October 1, 1987, and the request for waiver of the 180-day filing requirement are hereby denied.

(D) BPA is hereby directed to provide additional information, as needed, to supplement the record and fully define the parameters of the SL–87 rate schedule, as discussed in the body of this order.

(E) Within thirty (30) days of the date of this order, all parties who wish to do so shall file additional comments regarding final confirmation and approval of BPA's rates. All parties who wish to do so shall file cross comments within twenty (20) days thereafter. All timely comments will be considered by the Commission in determining the ultimate disposition of BPA's rate proposals.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Bonneville Power Administration Surplus Firm Power Rate (SL–87)

BILLING CODE 6717–01–M

[Docket Nos. EF87-2011-000 and EF87-2021-000]

Order Granting Interim Approval of Rates, Noting and Granting Interventions, Denying Motions for Final Approval, and Directing Filing of Supplemental Information; United States Department of Energy-Bonneville Power Administration

Issued: September 29, 1987.

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On July 31, 1987, the Bonneville Power Administration (BPA) filed proposed wholesale power rates and transmission system rates in Docket Nos. EF87-2011-000 and EF87-2021-000, respectively, in accordance with sections 7(a)(2) and 7(i)(6) of the Pacific Northwest Power Planning and Conservation Act (Northwest Power Act) [1] and the Commission's regulations for the confirmation and approval of the rates of Federal Power Marketing Administrations.[2] Final rate approval is requested by October 1, 1987, but, in the alternative, interim approval is requested pending the Commission's review of the request for final approval, pursuant to § 300.20 of the Commission's regulations.[3]

The proposed rates will increase wholesale power revenues by an average of 5.2 percent, and decrease transmission revenues an average of 17.4 percent. The proposed rates would generate an estimated $5.88 billion in revenues for BPA during the proposed 2-year rate approval period.

The wholesale power rate schedules submitted for approval in Docket No. EF87-2011-000 are PF-87 (Priority Firm Power Rate), IP-87 (Industrial Firm Power Rate), VI-87 (Variable Industrial Power Rate), SI-87 (Special Industrial Power Rate), CF-87 (Firm Capacity Rate), CE-87 (Emergency Capacity Rate), NR-87 (New Resource Firm Power Rate), SP-87 (Short Term Surplus Firm Power Rate), NF-87 (Nonfirm Energy Rate), SS-87 (Share-the-Savings Rate), and RP-87 (Reserve Power Rate). In addition to these rate schedules BPA has also requested extension of approval of the Impact Aid Methodology, first approve in a subdocket of the 1985 rate filing.

The transmission rate schedules submitted for approval in Docket No. ER87-2021-000 are FPT-87.1 (Formula Power Transmission), FPT-87.3 (Formula Power Transmission), IR-87 (Integration of Resources), IS-87 (Southern Intertie Transmission), IN-87 (Northern Intertie Transmission), IE-87 (Eastern Intertie Transmission), ET-87 (Energy Transmission), MT-87 (Market Transmision), and extension of the UFT-2 (Use-of-Facilities Transmission).

BPA requests rate approval for the 2-year period from October 1, 1987, through September 30, 1989, for all rate schedules, except for transmission rate schedules UFT-2 and FPT-87.3. BPA requests extension of current rate schedule UFT-2 for the period October 1, 1987, through June 30, 1990. The proposed approval period for schedule FPT-87.3 is October 1, 1987, through September 30, 1990.

BPA also requests approval of the General Rate Schedule Provisions (GRSP) for a 12-year period, from October 1, 1987 through September 30, 1999, and requests wavier of the Commission's regulations [4] which limit the approval period to 5 years.

BPA asserts that the proposed rates would protect against its estimated total annual revenue risk during the rate period of approximately $350 to $400 million. The revenue forecast from nonfirm energy and surplus firm power sales assumes poorer water conditions than average. BPA has increased its revenue requirement to provide an average interest coverage of 1.08 on interest payments to the Federal Treasury. The proposal also contains a provision for a one-time upward or downward adjustment to rates based on the difference between BPA's planned and actual financial performance as of the end of Fiscal Year (FY) 1988. The upward adjustment is for as much as 10 percent for the last nine months of FY 1989.

Concurrent with this filing, on July 31, 1987, in Docket No. EF87-2011-001, BPA filed a proposed surplus firm power rate schedule (SL-87). The SL-87 rate schedule is addressed in a separate order.

Notice of the filing was published in the **Federal Register** on August 17, 1987,[5] with comments due on or before August 25, 1987. Sixteen separate notices of intervention or motions to intervene were filed by individual petitioners or groups of petitioners.[6] Eight of the interventions were timely filed. On August 27, 1987, a late motion to intervene was filed by the Pacific Power and Light Company. On August 28, 1987, late motions to intervene were filed by Cascade Steel Rolling Mills, Inc., and Dow Corning Corporation. Late motions to intervene were filed on August 31, 1987, by the Washington Utilities and Transportation Commission, the Portland General Electric Company, the Atlantic Richfield Company, and the Public Generating Pool. The California Energy Commission (CEC) filed a late motion to intervene on September 3, 1987.

Most of the motions to intervene raised no substantive issues but stated that an additional opportunity should be provided for comments after the interim approval question is resolved. Puget Sound Power and Light Company and the Public Generating Pool allege that the filing contains substantive and procedural errors that should be addressed later in the proceedings. Only the Public Power Council (PPC), the California Utilities, and the CEC raised specific issues.

The PPC alleges that various BPA practices relative to determination of revenue requirements, refinancing bonds, treatment of depreciation and replacements, risk management strategies, design of the nonfirm rate schedule, and the lack of specific guidelines to ensure Federal repayments render the 60-day review time BPA has requested for final approval inadequate for detailed review.

The California Utilities protest even interim approval of certain rate schedules, contending that even refund provisions do not provide a remedy for transactions that do not occur due to excessive BPA pricing. They contend that NF-87, SP-87, and MT-87 were established on a value-based concept which, in conjunction with the Intertie Access Policy (IAP) and the Exportable Energy Agreement (EEA), do not promote economic efficiency. They maintain that BPA should be ordered to explain, at least, how the IAP and the EEA interact with flexible pricing.

The CEC raises issues relative to rate schedules that will affect BPA's customers in California. The CEC opposes adoption of the MT-87 rate schedule; opposes the inclusion of certain BPA costs in the NF-87 rates as contrary to statutory standards; opposes certain costs used to develop a "rate cap" for rate schedules NF-87 and SS-87, and opposes other elements of the design of the nonfirm energy rates.

On September 9, 1987, BPA filed an answer in opposition to the motion to intervene of the California Utilities. BPA points out that the California Utilities chose not to participate in a recent evidentiary hearing on BPA's proposed rates, despite a warning by BPA that failure to attend the hearings could be

[1] 16 U.S.C. 839e(a)(2) and 839e(i)(6) (1982).

[3] 18 CFR 300.20 (1987).
[4] 18 CFR 300.1(b)(6) (1987).
[5] 52 F.R. 30721 (1987).
[6] *See* Attachment 1 for a complete list of intervenors.

construed as a failure to exhaust remedies.

On September 9, 1987, BPA also filed an answer in opposition to comments of the California Utilities regarding interim approval of proposed rates. BPA maintains that the California Utilities are attempting to hold it to an economic efficiency standard, notwithstanding the fact that none of the statutes or case law governing review contains such a standard. Moreover, BPA alleges that all of the disputed rates are market-based and are, by their very nature, economically efficient.

On September 18, 1987, the California Utilities filed a motion to strike BPA's answer to protest. They assert that BPA's September 9, 1987 answer in opposition to comments is, in fact, an answer to a protest and, thus, specifically disallowed by the Commission's regulations.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure,[7] the timely, unopposed motions to intervene serve to make those movants parties to this proceeding. Notwithstanding BPA's opposition to the California Utilities' motion to intervene, we find that good cause exists to grant their motion. We are satisfied that the California Utilities have expressed an interest in the outcome of these proceedings that is not represented by another party and that their participation may be in the public interest. Accordingly, we shall grant their motion to intervene. Given the shortened comment period necessitated in these dockets, the early stage of these proceedings, and the fact that the interventions should not unduly delay the proceeding or prejudice any other party, the late-filed motions of the Pacific Power and Light Company, the Cascade Steel Rolling Mills, Inc., the Dow Corning Corporation, the Washington Utilities and Transportation Commission, the Portland General Electyric Company, the Atlantic Richfield Company, the Public Generating Pool, and the California Energy Commission shall also be granted. Given that we are granting the California Utilities' motion to intervene, and are inviting additional comments in these proceedings, for the reasons set forth below, the California Utilities' motion to strike BPA's answer need not be acted upon and will be treated as moot.

In *Central Lincoln Peoples' Utility District* v. *Johnson*,[8] the court interpreted the Northwest Power Act as setting a narrow scope for Commission review of BPA's regional wholesale power and transmission rates. We are to review these rates to determine whether they meet three specific, limited statutory requirements: (1) The rates must be sufficient to assure repayment of the Federal investment in the Federal Columbia River Power System over a reasonable number of years after first meeting BPA's other costs; (2) the rates must be based on BPA's total system costs; and (3) the transmission rates must equitably allocate the cost of the Federal transmission system between Federal and non-Federal power using the system.[9] Thus, we are not concerned with rate design or with allocation of costs between customer classes except as they relate to the equitable allocation of transmission cost between Federal and non-Federal users of that system.[10]

However, due to the complexities of the filing, we are unable to make a determination at this time with respect to the BPA's request for final approval. Therefore, our current review will be limited to consideration of approval on an interim basis which, necessarily, is a more limited review process than the review of rates for confirmation and approval on a final basis.

The Commisson's regulations also set forth the standards to be used in considering appropriate action with respect to a request by the Administrator of BPA for interim approval of rates. The rate schedules proposed in the filing are to be developed at a level which, assuming accurate cost and revenue estimates and provided that all amortization payments are made on a timely basis, would produce the needed revenues to allow BPA to meet its financial obligations, and to repay deficits incurred in previous years. 18 CFR Part 300 (1987).

By order of April 29, 1987, we approved BPA's general system power and transmission rates on a final basis, to be effective for the period July 1, 1985 through September 30, 1987,[11] We noted certain deficiencies in the content of BPA's filing, noted that other weaknesses had surfaced in our review, and directed BPA staff to meet with our staff in an effort to improve the content of BPA's future filings. It appears that the Commission's directive and the staff efforts have had salutory effects in some areas but appear to have been less successful in others. For example, BPA has provided, as required by the Commission's and the Department of Energy's regulations, repayment studies which demostrate the long-term effect of continued application of the existing rates. The current repayment study for the generation function demostrates that if BPA were to continue its currently approved rates, repayment of the generation investments would not be accomplished on a timely basis. BPA studies also indicate that the transmission investments, on the other hand, would be repaid ahead of schedule. As the result of this projection of future revenues, BPA has proposed rates which will increase power revenues and reduce wheeling revenues. BPA continues, however, to provide repayment studies in support of the filed rates that do not demonstrate that the proposed rates, if continued over the entire repayment period, will repay the Federal investment in the transmission system in a timely manner as required by law. Therefore, more detailed analysis is required in order to determine whether the revenue deficiency warrants disapproval of the rates.

Another filing improvement relates to the statutory requirement that costs of the transmission system be equitably apportioned between Federal and non-Federal users of the system. BPA has now provided a lengthy analysis of power and wheeling operations from FY 1978 through FY 1986 that, purportedly, demostrates that revenues from Federal and non-Federal users of the transmission system have been applied in conformance with the requirements of the Northwest Power Act.

There has been some failure to follow our staff's suggestion that each filing clearly identify which rate schedules, contract rates, or rate schedule provisions are being submitted for Commission approval, which have already been approved in previous dockets, and which are being filed only for the Commission's information, which has resulted in some confusion.

Furthermore, in Statement A, BPA has identified a source of revenues from a WNP–3 exchange amounting to approximately $24 million annually. We are aware that this is the result of a settlement under which BPA has agreed to sell at negotiated rates a certain block of power to investor-owned-utilities (IOU) that had participated in the financing of the Washington Public Power Supply System (WPPSS) Unit #3. As the $24 million annual revenue would appear to have an effect on BPA's cost or revenue requirements, it would appear that the exchange terms should require Commission confirmation and

[7] 18 CFR 385.214 (1987).

[8] 735 F.2d 1101 (9th Cir. 1984).

[9] Section 7(a)(2) of the Northwest Power Act. 16 U.S.C. 839e(a)(2); *see also* 26 FERC ¶ 61.096 (1984).

[10] 735 F.2d at 1115.

[11] 39 FERC ¶ 61.078 (1987).

approval under the Northwest Power Act. Accordingly, we will direct BPA to show cause why the WNP–3 exchange should not be submitted for approval under the Northwest Power Act. It is noted that the IOU portion of the exchange has already been filed and approved by the Commission under the Federal Power Act.

Based on the data filed by BPA, we are convinced that BPA needs some increase in its power rates. We are less certain, however, that the decrease in transmission rates is appropriate. BPA states that it expects to incur, in the aggregate, an operating loss of over $400 million in FY 1987. It appears possible that BPA, as has happened in previous years, might encounter difficulties in making its scheduled amortization payments toward the Federal transmission investment. Nevertheless, the filed revenue requirement study, the only test prescribed by the Department of Energy for determining the adequacy of revenues, indicates that (assuming all of BPA's data and projections are valid) the proposed rates, if continued over the balance of the repayment periods, would provide revenues reasonably sufficient to repay the investment on a timely basis as required by law.

We agree with the PPC's position that 60 days does not provide adequate time for detailed review of the issues involved in these proceedings. We, therefore, shall not grant final approval of the proposed rates at this time.

We take note of the allegations of the California Utilities that they may never be made whole if the rates in effect on an interim basis should ultimately be disapproved. Nevertheless, the Commission's interim approval option was specifically provided by statute as the best tool available to balance the competing requirements of the parties involved. Accordingly, we will grant interim approval of the proposed rates at this time.

Given that we are only approving these rates on an interim basis, we do not believe that the issues raised by the CEC must be resolved at the present time.

In light of the limited time in which parties were permitted to file comments on BPA's filing, we shall allow an additional period during which parties may comment on any and all issues related to final confirmation and approval of BPA's rates. In particular, the parties are invited to comment on the need for a further hearing before this Commission.

The Commission Orders

(A) The California Utilities motion to intervene is hereby granted, subject to the Commission's Rules of Practice and Procedure.

(B) The untimely motions to intervene of the Pacific Power & Light Company, the Cascade Steel Rolling Mills, Inc., Dow Corning Corporation, the Washington Utilities & Transportation Commission, the Portland General Electric Company, the Atlantic Richfield Company, the Public Generating Pool, and the California Energy Commission are hereby granted, subject to the Commission's Rules of Practice & Procedure.

(C) BPA's request for interim approval of its system wholesale power rates, general rate schedule provisions, and impact aid methodology schedule, in Docket No. EF87–2011–000, is hereby granted, until the Commission takes final action on either their approval or disapproval.

(D) BPA's request for interim approval of its transmission rates, in Docket No. EF87–2021–000, is hereby granted, until the Commission takes final action on either their approval or disapproval.

(E) BPA's request for final approval of the rates in Docket No. EF87–2011–000 is hereby denied.

(F) BPA's request for final approval of the rates in Docket No. EF87–2021–000 is hereby denied.

(G) BPA is hereby directed to show cause within thirty (30) days from the date of the issuance of this order why its rates for the sale of power under the WNP–3 exchange should not be filed for confirmation and approval under the Northwest Power Act.

(H) Within thirty (30) days of the date of this order, all parties who wish to do so shall file additional comments regarding final confirmation and approval of BPA's rates. All parties who wish to do so shall file cross comments within twenty (20) days thereafter. The parties should specifically delineate in their comments any and all issues that they feel should properly be set for hearing under section 7(k) of the Act in light of the Commission's interpretation of the Act as set forth in its September 1, 1982 order resolving the scope of the Commission's jurisdiction (20 FERC ¶ 61,292). All timely comments will be considered by the Commission in determining the ultimate disposition of BPA's rate proposal.

(I) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment 1—Bonneville Power Administration 1987 Wholesale Power and Transmission Rate Filing

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3272-3]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Carla Levesque at EPA, (202) 382-2740 (FTS 382-2740).

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: FIFRA Sec. 29 Annual Report on Conditional Registrations.

(EPA ICR #0601) (Renewal)

Abstract: FIFRA Sec. 29 requires that an annual report on Conditional Registrations (registrations for which the submission of some supporting data has been deferred to a future date) be supplied to members of Congress to monitor the Conditional Registration program.

EPA obtains pesticide production data needed to complete the report through this information collection.

Respondents: Pesticides Manufacturers.

Estimated Annual Burden: 350.

Comments on the abstracts in this notice may be sent to:

Carla Levesque, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM-223), Information and Regulatory Systems Division, 401 M Street, SW., Washington, DC 20460
and
Marcus Peacock, Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3019), 726 Jackson Place, NW., Washington, DC 20503.

Date: September 24, 1987.

Daniel J. Fiorino,

Director, Information Regulatory Systems Division.

Environmental Impact Statements and Regulations; Availability of EPA Comments

This notice announces the Availability of EPA comments prepared September 14, 1987 through September 18, 1987 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act (CAA) and Section 102(2)(c) of the National Environmental Policy Act (NEPA) as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5076/73. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 24, 1987 (52 FR 13749).

DRAFT EISs

ERP No. D-BIA-L35003-WA, Rating EO2, Swinomish Marina and Associated Facilities Development, Lease Approval, Swinomish Channel, WA. SUMMARY: EPA has several major concerns with this project. The draft EIS does not sufficiently address and analyze the relative impacts of potential less environmentally damaging alternatives to the proposed project. The proposed project entails the filling of wetlands for non-water dependent uses and specific mitigation is not proposed to offset losses of wetland and intertidal habitat through the proposed dredge and fill activities. The draft EIS does not sufficiently address both direct and secondary impacts of the marina on the

biota of the adjacent Padilla Bay Estuarine Sanctuary.

ERP No. D–BLM–J61071–WY, Rating EO2, Medicine Bow and Divide Resource Areas, Land and Mineral Mgmt. Plan, Bennett Mtn., Encampment River Canyon, and Prospect Mtn. WSA's, Wilderness Designation, WY. SUMMARY: Although some commendable actions for managing water quality and watershed resources are proposed, EPA expressed concerns regarding the following: insufficient and/or inconsistent information for meeting surface water quality standards, including aquatic life, and for protecting ground water; lack of a framework for Clean Water Act and ground water monitoring; adequacy of grazing management direction; riparian area management objectives and plans; potential impacts to areas of Critical Environmental Concern (ACECs); inconsistent ACEC recommendations; oil, gas, and coal planning; decisions on wilderness designations and management; and the need for a chapter or appendix regarding plan implementation.

ERP No. DS–COE–K35024–CA, Rating EU2, Marathon Industrial/Commercial Business Park Development, Fill Permit, Additional Alternative and Information, 404 and 10 Permits, CA. SUMMARY: EPA rated the supplemental draft EIS environmentally unsatisfactory because the proposed project would cause the unacceptable loss of 90 acres of wetlands that provide valuable wildlife habitat in south San Francisco Bay area. EPA noted that the loss of these wetlands would be severe because they provide important habitat for migratory birds and possibly an endangered species (salt marsh harvest mouse). EPA requested that the final EIS contain an Endangered Species Act Section 7 biological opinion and documentation of California water quality certification. EPA also requested further analysis of air and water quality impacts and commitments to mitigate adverse air and water impacts. EPA stated that the project as proposed fails to comply with three of the four major substantive criteria of the Clean Water Act Sect. 404(b)(1) Guidelines. EPA recommended that the Corps deny the 404 permit. EPA stated that if these issues were not resolved in the final EIS, the project could be a candidate for referral to the Council on Environmental Quality.

ERP No. D–NOA–B90009–NH, Ration LO, New Hampshire Coastal Program, NH. SUMMARY: From the standpoint of EPA's jurisdiction and expertise, EPA believes approval of the program will not result in adverse environmental impacts.

ERP No. DS–USA–L11001–WA, Rating LO, Ft. Lewis Military Installation, Ft. Lewis and Yakima Firing Center, High-Technology Motorized Division Conversion, 9th Infantry Division, Updated Information, WA. SUMMARY: EPA reviewed the project and has no objections to the proposed action as described.

Final EISs

ERP No. F1–BLM–K65068–NV, Wells Resource Areas Wilderness Study Areas, Wilderness Designation, Recommendations, NV. SUMMARY: EPA concurred with BLM's proposed recommendations of four wilderness study areas for inclusion in the National Wilderness System, and noted that air and water quality will be best protected by wilderness designation.

ERP No. F–FHW–K40156–CA, I–680/CA–24 Interchange Reconstruction and Freeway Improvements, Rudgear Rd. in Walnut Creek to Willow Pass Rd. in Pleasant Hill/Concord, 404 Permit, CA. SUMMARY: EPA expressed continuing concerns regarding High Occupancy Vehicle (HOV) lanes and ozone impacts, in particular the effects of transportation projects on continuing violations of ozone standards. EPA recommended that the FHW implement its new procedures on HOV policy to the fullest extent for future I–680 projects.

Dated: September 29, 1987.

State-FIFRA Issues Research and Evaluation Group (SFIREG) Working Committees; Open Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: There will be a 2-day meeting of the Working Committee on Enforcement and Certification of the State FIFRA Issues Research and Evaluation Group (SFIREG) and a 2-day meeting of the SFIREG Working Committee on Registration and Classification to discuss various aspects of pesticides. The meetings will be open to the public.

DATE: The Working Committee on Enforcement and Certification will meet on Tuesday and Wednesday, October 20 and 21, 1987, and the Working Committee on Registration and Classification will meet on Thursday and Friday, October 22 and 23, 1987. The meetings of both committees will start at 8:30 a.m. each day.

ADDRESS: The meetings will be held at: Omni San Diego Hotel, 910 Broadway Circle, San Diego, CA 92101, 619–239–2200.

FOR FURTHER INFORMATION CONTACT: By mail, Philip H. Gray, Jr., Office of Pesticide Programs (TS–766C), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 1115, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–7096).

SUPPLEMENTARY INFORMATION: The meeting of the Working Committee on Enforcement and Certification will be concerned with the following topics:

1. Endangered species enforcement policy;
2. Conservation Reserve Programming (CRP) policy;
3. Tracking and reporting of state regulatory actions;
4. Uniform reporting of outputs;
5. Justification for increased grant funding for state enforcement programs;
6. Bulk mixing of pesticides and fertilizers;
7. State regulation of bulk pesticide containers;
8. Priority of Experimental Use Permit monitoring;
9. Chromated copper arsenate: possible problems with use as wood preservative;
10. Office of Compliance Monitoring reports on various topics;
11. Pesticide Certification and Training Office reports on various topics;
12. Other topics as appropriate.

The meeting of the Working Committee on Registration and Classification will be concerned with the following topics:

1. Endangered species maps and labeling;
2. Ground water protection strategy: Registration and labeling implications for potential contaminants;
3. Concentrate ground application equipment: Review of need for EPA policy allowing use of aircraft diluent rates;
4. Regulating Pesticides in Food: EPA strategy in response to NAS report;
5. Genetically Engineered Microbial Pesticides: State need for registration and shipping guidelines;
6. Clarification of crop grouping scheme with regard to pesticide use on similar but unlabeled crops;

7. Status of a number of ongoing EPA programs and projects including section 24(c) review criteria, inert ingredients policy, generic labeling, termiticide regulation, farm worker protection, and Statements of Practical Treatment for labels;

8. Other topics as appropriate.

Dated: September 23, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

[FR Doc. 87-22789 Filed 10-1-87; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-140086; FRL-3271-5]

Access to Confidential Business Information by Planning Research Corporation, Government Information System

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor, Planning Research Corporation, Government Information System (PRC), of McLean, VA, for access to information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATE: Access to the confidential data submitted to EPA will occur no sooner than October 13, 1987.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460, (202-554-1404).

SUPPLEMENTARY INFORMATION: Under TSCA, EPA must determine whether the manufacture, processing, distribution in commerce, use, or disposal of certain chemical substances or chemical mixtures may present an unreasonable risk of injury to human health or the environment. New chemical substances, i.e., those not listed on the TSCA Chemical Substances inventory, are evaluated by EPA under section 5 of TSCA. Existing chemical substances, i.e., those listed on the TSCA Inventory, are evaluated by the Agency under sections 4, 6, 7, and 8 of TSCA.

Under contract No. 68-01-7361, EPA's contractor, PRC, 1500 Planning Research Drive, McLean, VA, will assist the Office of Toxic Substances' Information Management Division in developing a national toxic chemical inventory database under the requirements of section 313 of Title III, of the Emergency Planning and Community Right to Know Act of 1986. In designing this database, it is important that it be compatible with other databases maintained under TSCA so that EPA can use the databases together when assessing chemicals under TSCA. This will require reviewing preent confidential databases and hard copy documents to make comparisons in design, data elements, and data handling to assure consistency. PRC will not conduct substantive review of the CBI.

In accordance with 40 CFR 2.306(j), EPA has determined that under contract No. 68-01-7361, PRC will require access to CBI submitted to EPA under TSCA to successfully perform the duties specified under the contract. PRC personnel will be given access to all information submitted under all sections of TSCA. Some of the information may be claimed or determined to be CBI.

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide PRC access to these CBI materials on a need-to-know basis. All access to TSCA CBI under this contract will take place at EPA Headquarters facilities.

Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1988.

PRC personnel will be required to sign non-disclosure agreements, will be briefed on appropriate security procedures and must pass a test on those security procedures before they are permitted access to TSCA CBI. Access is authorized on a yearly basis.

Dated: September 21, 1987.

Charles L. Elkins,

Director, Office of Toxic Substances.

[FR Doc. 87-22792 Filed 10-1-87; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-44502; FRL-3271-4]

Diethylenetriamine; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces test data submissions on diethylenetriamine (DETA; CAS No. 111-40-0) received by EPA on September 18, 1987, pursuant to a test rule under the Toxic Substances Control Act (TSCA). This action is in compliance with section 4(d) of TSCA.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554-1404.

SUPPLEMENTARY INFORMATION: Section 4(d) of TSCA requires the EPA to issue a notice in the **Federal Register** reporting the receipt of test data submitted pursuant to test rules or consent orders promulgated under section 4(a). In the **Federal Register** of June 30, 1986 (51 FR 23705), EPA issued procedures for entering into Enforceable Consent Orders (ECO's) under section 4 of TSCA. Those procedures provide that EPA will follow the procedures specified in section 4(d) in providing notice of test data received pursuant to ECO's. In addition, EPA from time to time receives industry submissions of test data developed voluntarily (i.e., not under test rules or ECO's) on chemical substances or mixtures EPA has considered for testing under section 4.

Test Data Submissions

This notice announces the test data submissions received by EPA on September 18, 1987, from the Dow Chemical Company pursuant to a test rule under section 4 of TSCA for the chemical substances DETA which is codified at 40 CFR 799.1575. The test substance is widely used as an hardening agency for epoxy resins.

The submission describes an *in vitro* chromosomal aberration assay utilizing Chinese Hamster Ovary (CHO) cells. The clastogenicity of the test material was assessed in the absence and presence of a metabolic activation system at dose levels of 250, 833, and 2,500 micrograms/ml of culture medium. DETA was reported to be non-clastogenic to the CHO cells in culture. The applicable test standards were revised EPA-approved modified study plans (June 19, 1986) originally submitted by the Diethylenetriamine Producers/Importers Alliance (DPIA) and can be found at 40 CFR 799.1575(c)(2)(ii). The final report was required to be submitted to the Agency by September 19, 1987.

EPA has initiated its review and evaluation process for this data submission. At this time the Agency is unable to provide any determination as to the submission's completeness, adequacy or validity.

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPTS-44502). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the OPTS Reading Room, NE-G004, 401 M St.,

SW., Washington, DC 20460. The rulemaking public record for DETA is assigned docket number [OPTS–42012].

Dated: September 25, 1987.

Joseph J. Merenda,

Director, Existing Chemical Assessment Division.

[FR Doc. 87–22793 Filed 10–1–87; 8:45 am]

BILLING CODE 6560–50–M

[OPTS–83002E; FRL–3273–2]

Receipt of Request for Exclusion From/Waiver of Testing of Ethyl Corp. and Great Lakes Chemical Corp.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Receipt of Requests for Exclusion/Waiver of Testing Requirements.

SUMMARY: EPA requires testing of specified chemical substances to see if they are contaminated with halogenated dibenzo-p-dioxins (HDDs) or halogenated dibenzofurans (HDFs) and reporting of the results. However, provisions are made for exclusion from, or waiver of, these requirements if an appropriate application is made to the Agency and is approved. EPA has received such requests for exclusions from and waivers of these requirements from Ethyl Corporation and Great Lakes Chemical Corporation and this document gives notice of their receipt. Comments may be made on these requests.

DATE: Comments should be received by October 19, 1987.

ADDRESS: Submit comments in triplicate, identified with the document control number OPTS–83002E, to: TSCA Public Information Office (TS–793), Office of Toxic Substances, Environmental Protection Agency, Rm. NE–G004, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. E–543, 401 M St., SW., Washington, DC 20460, (202–554–1404).

SUPPLEMENTARY INFORMATION: EPA under 40 CFR Part 766 (52 FR 21412, June 5, 1987) requires testing of certain chemical substances to determine whether they may be contaminated with HDDs and HDFs.

Under 40 CFR 766.32(a)(1) (i) and (ii), a person may be granted an exclusion from the testing requirements of Part 766 if appropriate testing of the chemical substance has already been done or the process and reaction conditions are such that HDDs/HDFs would not be produced.

A waiver of the testing requirements of Part 766 may be granted under 40 CFR 766.32(a)(2) (i) through (ii) if: (1) 100 kilograms or less of the product are produced annually exclusively for research and development, or (2) the cost of testing would be so high as to prohibit its production and the chemical substance will be produced in such a manner that there will be no unreasonable risk during its manufacture, import, processing, distribution, use, or disposal. Under 40 CFR 766.32(a)(2)(iii), waivers may be appropriately conditioned with respect to such factors as time and conditions of manufacture and use.

Under the regulation, a request for either an exclusion or waiver must be made before September 4, 1987, for persons manufacturing, importing, or processing a chemical substance as of June 5, 1987, or 60 days prior to resumption of manufacture or import of a chemical substance not being manufactured or processed as of June 5, 1987.

The requests from Ethyl Corporation and Great Lakes Chemical Corporation ask that exclusions and waivers of testing be granted with respect to a number of chemicals the companies manufacture. A public file has been established for this proceeding; it is located in Room NE–G004, 401 M St., SW., Washington, DC 20460.

Dated: September 27, 1987.

Charles L. Elkins,

Director, Office of Toxic Substances.

BILLING CODE 6560–50–M

[FRL–3271–2]

Sole Source Aquifer Petition; Final Determination; Catawba Island, OH

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of final determination.

SUMMARY: Notice is hereby given that, pursuant to section 1424(e) of the Safe Drinking Water Act, the U.S. Environmental Protection Agency (EPA) Region V Administrator has determined that the Bass Islands Dolomite Aquifer, which underlies Catawba Island Township in Ottawa County, Ohio, hereafter called the Bass Islands Aquifer, is the sole or principal source of drinking water for Catawba Island Township and that this aquifer, if contaminated, would create a significant hazard to public health. As a result of this action, all Federal financially assisted projects constructed in the Bass Island Aquifer area and its principal recharge zone will be subject to EPA's review to insure that these projects are designed and constructed such that they do not create a significant hazard to public health.

DATES: This determination shall be promulgated for purposes of judicial review at 1:00 p.m. Eastern time on October 16, 1987.

ADDRESSES: The data on which these findings are based are available to the public and may be inspected during normal business hours at the U.S. Environmental Protection Agency, Office of Ground Water 5WG–TUB8, 230 S. Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Wm. Turpin Ballard, Office of Ground Water, U.S. Environmental Protection Agency, Region V, at 312–353–1435.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1424(e) of the Safe Drinking Water Act (42 U.S.C., 300f, 300h–3(e), Pub. L. 93–523) states:

"(e) If the Administrator determines on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the **Federal Register**. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into plan or design the project to assure that it will not so contaminate the aquifer."

Effective March 9, 1987, authority to make a Sole Source Aquifer Designation Determination was delegated to the U.S. EPA Regional Administrators.

On March 17, 1986, EPA received a petition from the Catawba Island Residents Association and the Fairway Association, both of Port Clinton, Ohio, which petitioned EPA to designate the Bass Islands Aquifer as a Sole Source Aquifer. On May 15, 1987, EPA published to announce a public comment period regarding the petition. The public was permitted to submit comments and information on the petition until July 19, 1987. During this

VOL
52
ISS
191
OC
2
1987
UMI

period a request for a public meeting was received and a notice announcing the meeting was published in the same newspaper. The meeting was held July 6, 1987, and the public comment period was extended to July 19, 1987, to allow for additional written comments subsequent to the meeting.

II. Basis for Determination

Among the factors to be considered by the U.S. EPA in connection with the designation of an area under section 1424(e) are: (1) Whether the Bass Island Aquifer is the area's sole or principal source of drinking water, and (2) whether contamination of the aquifer would create a significant hazard to public health. On the basis of technical information available to this Agency, the Regional Administrator has made the following findings, which are the bases for the determination noted above:

1. The Bass Island Aquifer currently serves as the "sole source" of drinking water for approximately 4,600 permanent residents, 7,100 seasonal residents, and up to 20,000 transient users.

2. Catawba Island Township is a peninsula which extends into Lake Erie. However, due to the absence on the peninsula of a central water distribution system, Lake Erie water is not available for use as a source of drinking water. There is no existing alternative drinking water source or combination of sources which provides 50 percent or more of the drinking water to the designated area, nor is there any available, cost effective potential source capable of replacing the drinking water needs of for the Catawba Township community that are presently supplied by the aquifer.

3. The Bass Islands Aquifer is an unconfined to semi-confined aquifer that transmits water along joints and solution cavities, which are common features in the dolomite bedrock. The majority of the area residents draw their drinking water from private wells which are typically 30 to 60 feet deep. Because of the ease by which water is transmitted through the relatively large conduits in the bedrock, downward migration of surface or near-surface contaminants to the saturated zone could occur in a relatively short time, with little opportunity for attenuation of the contaminants. Sources for such contamination include, but are not limited to: (A) Effluent from residential or commercial sewage disposal sites, (B) use and improper storage of agricultural chemicals, (C) leaking underground storage tanks, (D) leachment of fertilizers associated with golf course maintenance. Should any of the above sources of contamination enter the public water supply, there could be a significant negative effect on drinking water quality with a consequent adverse effect on public health.

III. Description of the Bass Islands Aquifer, Along With its Recharge Zone

The Bass Islands Aquifer is a bedrock aquifer consisting of jointed and brecciated dolomite (a calcium-magnesium carbonate rock) which also contains many solution cavities. The joints and cavities provide the conduits along which ground water is transmitted to any wells that intersect them. The dolomite formation is approximately 100–120 feet thick, and is underlain by the anhydrite-rich Salina Group. Water wells which penetrate as deep as the Salina Group encounter sulfur-rich water due to the calcium sulfate composition of anhydrite.

Principal recharge of the aquifer is due mainly to infiltration of precipition through soils and unsaturated bedrock. Therefore, the entire surface of the designated area is the effective recharge zone. However, because of the undeveloped nature of the center of the area, and because of the presence of karst sinkholes, ponds and collapse features, this portion of the recharge area not only contributes a larger volume to recharge, it is potentially a more vulnerable location for contaminants to enter the aquifer.

The review area for Federal financially assisted projects will be the entire peninsula north of the 580 foot contour (which marks the contact between the Bass Islands Dolomite and the Salina Group) on the U.S.G.S. 7½ minute topographic map called the *Gypsum Quadrangle, Ohio*.

IV. Information Utilized in Determination

The information utilized in this determination includes the petition, written and verbal comments submitted by the public, and various technical publications. The above data are available to the public and may be inspected during normal business hours at the U.S. Environmental Protection Agency, Region V, Office of Ground Water, 230 S. Dearborn (5WG–TUB8), Chicago, Illinois 60604.

V. Project Review

EPA Region V is working with the Federal agencies that may in the future provide financial assistance to projects in the area of concern. Interagency procedures and Memoranda of Understanding will be developed through which EPA will be notified of proposed commitments of funding by Federal agencies for projects which could contaminate the Bass Islands Aquifer, upon which Catawba Island Township depends for its sole or principal source water supply. EPA will evaluate such projects and, where necessary, conduct an in-depth review, including soliciting public comments where appropriate. Should the Regional Administrator determine that a project may contaminate the aquifer through its recharge zone so as to create a significant hazard to public health, no commitment for Federal financial assistance may be made. However, a commitment for Federal financial assistance may, if authorized under another provision of law, be made to plan or design the project to assure that it will not so contaminate the aquifer.

Although the project review process cannot be delegated, the U.S. Environmental Protection Agency will rely to the maximum extent possible on existing or future State and local control mechanisms in protecting the ground water quality of the Bass Islands Aquifer. Included in the review of any Federal financially assisted project will be the coordination with the State and local agencies. Their comments will be given full consideration, and the Federal review process will attempt to complement and support State and local ground water protection mechanisms.

VI. Summary and Discussion of Public Comments

The primary issues that came out of the public comment period revolve around a pending sewer project which is being planned for Catawba Island Township by the Ottawa County Commissioners. Catawba Island is number one on the Ohio EPA priority list for funds to unsewered areas. Federal funds have been set aside for, but not yet committed to the project. The county is concerned that Sole Source designation would delay approval of funding and/or necessitate costly modifications to the construction plans. EPA response was that this is a possibility, but that the fact of a pending sewer project was not germaine to a finding as to the eligibility of the aquifer for designation.

The petitioners are concerned about the possible effects that trench blasting for the sewer could have on the quality-quantity of their water. EPA response was that this concern, again, was something to be addressed in a project review, and did not impact on a designation decision.

Neither the County, the public, nor any other entity submitted comments which substantially refuted the data

provided in the petition. Based on this data, and verified thru technical review, the area proposed for designation was determined to be dependent upon one aquifer for its sole or principal drinking water source and which aquifer, if contaminated, would pose a serious threat to the health of the residents of Catawba Island Township.

VII. Economic and Regulatory Impact

Pursuant to the provisions of the Regulatory Flexibility Act (RFA), 5 U.S.C. 605(b), I hereby certify that the attached rule will not have a significant impact on a substantial number of small entities. For purposes of this Certification, the "small entity" shall have the same meaning as given in section 601 of the RFA. This action is only applicable to the Catawba Island Township area. The only affected entities will be those area-based businesses, organizations or governmental jurisdiction that request Federal financial assitance for projects which have the potential to contaminate the aquifer so as to create a significant hazard to public health. EPA does not expect to be reviewing small isolated commitments of financial assistance on an individual basis, unless a cumulative impact on the aquifer is anticipated; accordingly, the number of affected small entities will be minimal.

For those small entities which are subject to review, the impact to today's action will not be significant. Most projects subject to this review will be preceded by a ground water impact assessment required pursuant to other Federal laws, such as the National Environmental Policy Act (NEPA) as amended 42 U.S.C. 431, et seq. Integration of those related review procedures with Sole Source Aquifer review will allow EPA and other Federal agencies to avoid delay or dpulication of effort in approving financial assistance thus minimizing any adverse effect on those small entities which are affected. Finally, today's action does not prevent grants of Federal financial assistance which may be available to any affected small entity in order to pay for the redesign of the project to assure protection of the aquifer.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it will not have an annual effect of $100 million or more on the economy, will not cause any major increase in costs or prices, and will not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States enterprises to compete in domestic or export markets. Today's action only affects the Bass Islands Aquifer and the Catawba Island Township, Ohio, area. It provides an additional review of ground water protection measures, incorporating State and local measures, whenever possible, for only those projects which request Federal financial assistance.

Dated: September 21, 1987.

Frank M. Covington,

Acting Regional Administrator.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.:

(1) 202-010636-025
(2) 202-010637-022

Title:

(1) U.S. Atlantic-North Europe Conference
(2) North Europe-U.S. Atlantic Conference

Parties (1) & (2):

Atlantic Container Line, B.V.
Dart-ML Limited
Hapag-Lloyd AG
Sea-Land Service, Inc.
Gulf Container Line (GCL), B.V.
Trans Freight Lines
Compagnie Generale Maritime (CGM)
Nedlloyd Lijnen, B.V.

Synopsis: The proposed amendments would expressly stipulate that the current effective authority of each conference to engage in activities concerning the European inland transportation segment of cargo shipments within its scope, whether or not performed under through bills of lading, and as elsewhere provided thereby, includes determination of prices paid to European inland carriers in connection therewith.

Agreement No.: 212-010746-002.

Title: Columbus/PACE/SCNZ/BSL/PAD Space Charter and Sailing Agreement.

Parties:

Columbus Line
Associated Container Transportation (Australia), Ltd.
The Shipping Corporation of New Zealand, Limited
Blue Star Line, Ltd.
Pacific Australia Direct Line

Synopsis: The proposed amendment would extend the period during which a party may withdraw from the agreement on immediate notice to December 15, 1987 and would delay the implementation of the previous amendment (Agreement No. 212-010746-001) until January 1, 1988.

Agreement No.: 203-011137-001.

Title: Pacific Coast/Australia-New Zealand Discussion Agreement.

Parties:

Pacific Coast/Australia-New Zealand Tariff Bureau
Hong Kong Islands Line America S.A.

Synopsis: The proposed amendment would admit Leif Hoegh & Co., A.S. as a party to the agreement. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: September 29, 1987.

BILLING CODE 6230-01-M

[Docket No. 87-19]

Filing of Complaint and Assignment; Atlantis Lines, Ltd. v. American President Lines, Ltd.

Notice is given that a complaint filed by Atlantis Lines, Ltd. ("Atlantis") against American President Lines, Ltd. ("APL") was served September 28, 1987. Atlantis alleges that APL has violated sections 10(b)(1) and 10(b)(3), Shipping Act of 1984, 46 U.S.C. app. 1709 (b)(1) and (b)(3) by its failure to make available certain tariff rates applicable to cargo tendered by Atlantis.

This proceeding has been assigned to Administrative Law Judge Joseph N. Ingolia ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing

shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by September 28, 1988, and the final decision of the Commission shall be issued by January 28, 1989.

Tony P. Kominoth,

Assistant Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

September 28, 1987.

Background

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822)

OMB Desk Officer—Robert Fishman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503 (202-395-7340)

Proposal To Approve Under OMB Delegated Authority the Extension, With Revision, of the Following Reports

1. *Report title:* Application for Prior Written Consent To Effect a Merger
   Agency form number: FR2070
   OMB Docket number: 7100-0045
   Frequency: on occasion
   Reporters: State chartered banks that are members of the Federal Reserve System
   Annual reporting hours: 1,540
   Significant effect on small businesses is not expected.
   General description of the report: This form provides information on the pro forma financial condition of the applicant, a description of the proposed merger and the advantages it offers to the public's needs and convenience. The form is used by the Federal Reserve to evaluate the proposed merger as to financial soundness, competitive acceptability and consistency with the public interest. The proposed revisions include clarifications, changes to conform with recent revisions of bank holding company application forms (FR Y-1, FR Y-2), and requests for certain financial data in accord with changes in the Board's capital guidelines.
   This report is required by law [12 U.S.C. 1828 (c)]. Parts may be given confidential treatment at applicant's request [5 U.S.C. 552(b)(4)].

2. *Report title:* Change in Bank Control Form
   Agency form number: FR 2081
   OMB Docket number: OMB No. 7100-0134
   Frequency: on occasion
   Reporters: Persons proposing to acquire control of a bank holding company or State member bank
   Annual reporting hours: 11,067
   Significant effect on small businesses is not expected.
   General description of report: This form is mandatory under the Change in Bank Control Act, which seeks to maintain public confidence in the banking system by preventing anti-competitive or otherwise adverse combinations of banks. The form requests information regarding the factors that must be considered by the Board under the statute, including a description of the proposal, and financial and employment data concerning the acquiring party. The proposed revisions include certain additional information and publication requirements pursuant to the Anti-Drug Abuse Act of 1986.
   This information collection is required by law [12 U.S.C. 1817(j)]. Parts may be given confidential treatment at applicant's request [5 U.S.C. 552(b)(4)].

3. *Report title:* Uniform Application for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer
   Agency form number: FR MSD-4
   OMB Docket number: 7100-0100
   Frequency: on occasion
   Reporters: Banks who engage in activities as a municipal securities dealer and persons designated as municipal securities principals and representatives
   Annual reporting hours: 773
   Significant effect on small businesses is not expected.
   General description of report: This information collection is mandatory [15 U.S.C. 78o-4(c)(5), 78q and 78w] and is given confidential treatment [5 U.S.C. 552(b)(6)].
   The filing of this application is required of a Municipal Securities Dealer Bank (MSD) and a person associated with a MSD, prior to such person functioning in a professional capacity. This application serves to verify compliance with the rules of the Municipal Securities Rulemaking Board and with related securities and banking laws. It is also used as a source document for entry into an interagency computer system of records. The proposed revisions are deletion of certain spaces for notations by receiving agency personnel, since these items are rarely used; and changing the requested record of residential addresses from the past ten years to the past five, corresponding to changes in MSRB rule G-7.

Proposal To Approve Under OMB Delegated Authority the Extension, Without Revision, of the Following Report

1. *Report title:* Uniform Termination Notice for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer
   Agency form number: FR MSD-5
   OMB Docket number: 7100-0101
   Frequency: on occasion
   Reporters: Banks who engage in activities as a municipal securities dealer and persons designated as municipal securities principals and representatives
   Annual reporting hours: 47
   Significant effect on small businesses is not expected.
   General description of report: This information collection is mandatory [15 U.S.C. 78o-4(c)(5), 78q and 78w] and is given confidential treatment [5 U.S.C. 552(b)(6)].
   This notice must be filed within 30 days after a person associated in a professional capacity with a bank municipal securities dealer terminates employment. The notice is a compliance vehicle for rules of the Municipal Securities Rulemaking Board and for related securities and banking laws. It is also a source document for updating information on interagency computer system of records.

Board of Governors of the Federal Reserve System, September 28, 1987.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Acquisitions of Companies Engaged in Permissible Nonbanking Activities; Cook Investment Inc., et al; Correction

This notice corrects a previous **Federal Register** notice (FR Doc. 87-22236) published at page 36301 of the issue for Monday, September 28, 1987.

Under the Federal Reserve Bank of Kansas City, the entry for Cook Investment, Inc. is revised to read as follows:

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Cook Investment, Inc.,* Beatrice, Nebraska; to acquire Gage, Inc., Beatrice, Nebraska, and thereby engage in leasing real and personal property pursuant to § 225.25(b)(5) of the Board's Regulation Y.

Comments on this application must be received by October 13, 1987.

Board of Governors of the Federal Reserve System, September 28, 1987.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87-22742 Filed 10-1-87; 8:45 am]

BILLING CODE 6210-01-M

Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company; Equimark Corp.

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggreived by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 19, 1987.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Equimark Corporation,* Pittsburgh, Pennsylvania; to acquire 100 percent of the voting shares of The Liberty Financial Group, Inc., Horsham, Pennsylvania, and thereby indirectly acquire Liberty Savings Bank, Horsham, Pennsylvania. Applicant also proposes to acquire Liberty Service Corporation, Horsham, Pennsylvania, and thereby indirectly acquire Wynnewood Plaza, Inc., Horsham, Pennsylvania, and thereby engage in making and servicing loans pursuant to § 225.25(b)(1) of the Board's Regulation Y.

In connection with this application, Equimark Acquisition Incorporated, Pittsburgh, Pennsylvania, has applied to become a bank holding company by acquiring 100 percent of the voting shares of Liberty Savings Bank, Horsham, Pennsylvania.

Board of Governors of the Federal Reserve System, September 28, 1987.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87-22743 Filed 10-1-87; 8:45 am]

BILLING CODE 6210-01-M

Acquisition of Company Engaged in Permissible Nonbanking Activities; Midwest Financial Group

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their view in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 22, 1987.

A. Federal Reserve Bank of Chicago (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Midwest Financial Group, Inc.,* Peoria, Illinois; to acquire Central Computing Company, Decatur, Illinois, and thereby engage in providing data processing and data transmission services pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 28, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Availability of Environmental Assessment and Finding of No Significant Impact (FONSI) Regarding Construction; Phase II; Paul Laxalt Mineral Engineering Center, Mackay School of Mines, University of Nevada-Reno

AGENCY: General Services Administration, Federal Property Resources Service.

ACTION: Notice of the availability of Environmental Assessment and the Finding of No Significant Impact (FONSI) regarding construction of Phase II of the Paul Laxalt Mineral Engineering Center at the Mackay School of Mines, University of Nevada-Reno.

SUMMARY: The University of Nevada-Reno was awarded Grant No. DN-001 on February 18, 1986, by the General Services Administration, Federal Property Resources Service, Office of National Defense Stockpile for the construction of Phase II, as noted. In developing its proposal to finalize the grant award, the University of Nevada-Reno (UNR) has used the architectural engineering firm of Casazza, Peetz & Hancock Architects, 480 Casazza Drive, Reno, NV 89502, and the consulting engineers (for environmental assessment and historic preservation purposes) of Kennedy/Jenks/Chilton, 160 Hubbard Way, No. 2, Reno, NV 89502. The Environmental Assessment entailed standard indicators of significance. The General Services Administration monitored and reviewed the progress and development of the environmental report including Historic Preservation. An environmental report (final draft, dated 3/12/87) presented a detailed analysis of all indicators of significance. After independent review and assessment of the data and analysis of the final environmental report, dated August 1987, and after execution of a Memorandum of Agreement (dated August 19, 1987) providing for recordation documentation, Earl E. Jones, Commissioner of the Federal Property Resources Service, issued his determination of no significant impact (FONSI) on September 24, 1987. Notice is hereby given pursuant to section 102(c) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines and 36 CFR 800.15 (Protection of Historic and Cultural Properties-Public Participation) that the proposed construction of Phase II, as noted, will not create any significant adverse impact on the physical environment and that no significant controversy related to the natural or cultural resources environment is associated with this action. As a result of these findings, the Commissioner, FPRS, has determined that the preparation of an Environmental Impact Statement is not required in this case. The Environmental Assessment, the Finding of No Significant Impact and the Memorandum of Agreement are on file and may be viewed by interested parties.

DATE: Administrative action or implementation of the decision will be deferred up to and including November 2, 1987 at which time implementation will begin unless comments are received which result in a contrary determination. For further information contact: Miss Cheryl A. Deister, General Services Administration, FPRS/Office of National Defense Stockpile, 18th & F Streets, NW, Room 5207, Washington, DC 20405, Telephone Number—(202) 535-7234.

Dated: September 24, 1987.

Daniel B. McMorrow,

Contracting Officer.

BILLING CODE 6820-96-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Statement of Organization, Functions and Delegations of Authority; Office of the Assistant Secretary for Public Affairs

Part A (Office of the Secretary) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (DHHS) is amended to reflect the transfer of the Freedom of Information Act and Privacy Act appeals for documents denied by officials in the Office of the Secretary from the Office of Administrative and

Management Services to the Office of Public Affairs. Specifically, Chapter AP, Office of Public Affairs, as last published at 51 FR 41158, Nov. 13, 1986 is revised as follows:

1. In Chapter AP, Section AP.20 Functions, paragraph "B.1 FOIA/Privacy Act Division," add as last paragraph, "Analyzes and recommends action on Freedom of Information Act and Privacy Act appeals for documents denied by officials in the Office of the Secretary."

Date: September 25, 1987.

S. Anthony McCann,

Assistant Secretary for Management and Budget.

[FR Doc. 87-22739 Filed 10-1-87; 8:45 am]

BILLING CODE 4150-04-M

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on August 28, 1987.

Social Security Administration

(Call Reports Clearance Officer on 301-594-5706 for copies of package)

1. Reporting Events—SSI—0960-0128—This form is used by recipients of Supplemental Security Income to report changes which may effect their benefits to the Social Security Administration. Respondents: Individuals or households. Number of Respondents: 100,000; Frequency of Response: Occasionally; Estimated Annual Burden: 8,333 hours.

2. Disabled Beneficiary Add-on to SIPP-Feasibility Study—NEW—SSA needs to have a factual basis upon which to evaluate and implement program incentive to encourage return to work. The survey shall provide data on post-entitlement labor force behavior not available from SSA administrative records. SSA needs to determine if combining a SSA based sampling frame with Survey of Income and Program Participation (SIPP) data is feasible. Respondents: Individuals or households. Number of Respondents: 2310; Frequency of Response: Occasionally; Estimated Annual Burden: 3,580 hours.

3. Application for Child's Insurance Benefits—0960-0010—This form is used to collect information from applicants for child's insurance benefits. The information is needed to determine eligibility of the applicant. Respondents: Individuals or households. Number of Respondents: 1,740,000; Frequency of Response: Occasionally; Estimated Annual Burden: 357,917 hours.

Desk Officer: Elana Norden

Office of the Secretary

(Call Reports Clearance Officer on 202-245-6511 for copies of package)

1. HHS Acquisition Regulations—HHSAR Part 337 Service Contracting—0990-0132—Contractors are required to furnish information on consultants to the HHS contracting officer for cost-reimbursement contracts. The information is used to monitor the use of consultants. Respondents: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 1,661; Frequency of Response: Occasionally; Estimated Annual Burden: 1,661 hours.

2. HHS Acquisition Regulations—HHSAR Part 352—Solicitation Provisions and Contract Clauses—0990-0130—The Key Personnel Clause requires contractors to justify changes to key personnel which were specified in the contract. The information is used to ascertain the qualifications of substitute personnel. The Publication and Publicity Clause requires contractors to inform the project officer of each publication resulting from the contractual effort. Respondents: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 3,429; Frequency of Response: Occasionally; Estimated Annual Burden: 2,585 hours.

3. HHS Acquisition Regulations—HHSAR Part 370—Special Programs Affecting Acquisition—0990-0129—Reporting and recordkeeping requirements are established to assure that contractors conducting meetings use facilities which are accessible to disabled individuals, and to assure contractor compliance with the Indian Preference program (Public Law 93-638 Section 7(b)). Respondents: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 769; Frequency of Response: Occasionally; Estimated Annual Burden: 12,368 hours.

4. HHS Acquisition Regulations—HHSAR Part 353—Forms—0990-0091—This form is used to monitor contract costs. It is completed by contractors for cost type contracts. Respondents: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 1,000; Frequency of Response: Occasionally; Estimated Annual Burden: 1,500 hours.

5. Acknowledgement of Receipt of Public Service Announcement (PSA)—0991-0001—The acknowledgement card is used when Public Service Announcements are distributed to the media. Respondents are requested to acknowledge receipt, indicate preferences and comment on the quality of the materials, so that the Office of Public Affairs can monitor the distributions of PSAs. Respondents: Businesses or other for-profit. Number of Respondents: 5,000; Frequency of Response: Occasionally; Estimated Annual Burden: 84 hours.

OMB Desk Officer: Shannah Koss-McCallum

Health Care Financing Administration

(Call Reports Clearance Officer on 301-594-1238 for copies of package)

1. ICRs is BQC-18-F, CPAS—0938-0431—Purpose is to reduce reporting burden on States under current MQC to consolidate the monitoring of claims processing under the MMIS approval and annual reapproval process. Respondents: State or local governments. Number of Respondents: 1; Frequency of Response: 1; Estimated Annual Burden: 1 hour.

2. Home Health Agency Survey Report Form (Test)—NEW—This is a pilot test of a revised process and test forms for surveying Home Health Agencies for Medicare participation. Respondents: Individuals or households, State or local governments. Number of Respondents: 7; Frequency of Response: One-time; Estimated Annual Burden: 116 hours.

3. Quarterly Periodic Interim Payment (PIP) Report—0938-0384—This form provides HCFA with a current assessment of those providers receiving advanced funding through the PIP program. HCFA needs this data in order to monitor intermediary performance and detect significant trends. Respondents: Businesses or other for-profit, Non-profit institutions. Number of Respondents: 55; Frequency of Response: Quarterly; Estimated Annual Burden: 220 hours.

OMB Desk Officer: Allison Herron

Office of Human Development Services

(Call Reports Clearance Officer on 202-472-4415 for copies of package)

1. Outline for Preparation of the Part IV Narrative of the UAF and Satellite Center for Competing Continuation Application—0980-0016—Legislative requirements found at section 153 (a)

and (b) of the ADD Act and 45 CFR Part 1388 require that University Affiliated Facilities and Satellite Centers must be in compliance with established standards in order to receive a grant. Proposed standards are found in Part 1388. Respondents: Non-profit institutions. Number of Respondents: 42; Frequency of Response: Annual; Estimated Annual Burden: 2,016 hours.

2. Certification of Maintenance of Effort—Administration on Aging—0980–0180—The Department is unable to identify funds solely from State sources because information currently collected on financial reports combines funds from State and local sources. The certification of maintenance of effort form is used to collect data on State sources jointly. Respondents: State or local governments. Number of Respondents: 59; Frequency of Response: Annual; Estimated Annual Burden: 30 hours.

3. Program Performance Report, Title IV of the Older Americans Act, Grants to Indian Tribes for Supportive and Nutritional Services—0980–0120—The Congress has mandated that the Administration on Aging (AoA) and the Secretary provide such information on activities of Older Americans among Indian tribes as necessary in order that AoA can determine the progress of its programs. Both Houses of Congress have indicated their desire for more information. Respondents: Indian Tribes. Number of Respondents: 133; Frequency of Response: Semi-Annually; Estimated Annual Burden: 399 hours.

OMB Desk Officer: Shannah Koss-McCallum

Family Support Administration

(Call Reports Clearance Officer on 202–245–0652 for copies of package)

2. FY 1988 Winter Grantee Survey of the Low Income Energy Assistance Program—0970–0063—The survey collects FY 1988 Winter fiscal and caseload estimates and updates FY 1987 uses of funds if necessary. The survey results will be displayed in tables for an information memorandum to be sent to Congress, States and other interested parties. Respondents: State or local governments. Number of Respondents: 51; Frequency of Response: Annually; Estimated Annual Burden: 117 hours.

Public Health Service

(Call Reports Clearance Officer on 202–245–2100 for copies of package)

National Institutes of Health

1. Established Populations for Epidemiologic Studies of the Elderly (EPESE) (In-person Follow-up–Year 6)—0925–0271—These large community-based epidemiologic studies of elderly persons will determine the influences of physiological, behavioral, social and environmental forces on the mortality, morbidity, and utilization of health services in the elderly. Eligible respondents are the participants in the three EPESE study sites; East Boston, Iowa, and New Haven. Respondents: Individuals or households. Number of Respondents: 9,410; Frequency of Response: Single-time study; Estimated Annual Burden: 9,410 hours.

Food and Drug Administration

1. Survey to Determine Patient Knowledge and Perceptions on Hemodialysis Reuse—NEW—The PHS Interagency Task Force on Dialysis determined that hemodialysis patients have a need for education on hemodialysis reuse. In order to assure that information prepared is effective and adequate, FDA recommended, and the Task Force agreed, that a patient survey be conducted prior to preparing education material to assess patient's educatonal needs. Respondents: Individuals or households. Number of Respondents: 1,700; Frequency of Response: One-time; Estimated Annual Burden: 379 hours.

2. General Biological Products Standards, Additional Standards for Human Blood and Blood Products Seriologic Test for Human Immunodeficiency Virus (HIV)—0910–0227—FDA is proposing to require that each unit of blood or blood components be tested for HTLV–III. The rules will effect 1400 blood banks and 500 plasma collection centers. The rules would reduce the risk of transmitting Acquired Immune Deficiency Syndrome by the use of blood products. Respondents: Blood Banks and Plasma Collection Centers. Number of Respondents: 1; Frequency of Response: 1; Estimated Annual Burden: 1 hour.

OMB Desk Officer: Shanna Koss-McCallum

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, on one of the following numbers:

PHS: 202–245–2100
SSA: 301–594–5706
OS: 202–245–6511
HDS: 202–472–4415
HCFA: 301–594–1238
FSA: 202–245–0652

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address:

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503

ATTN: (name of OMB Desk Officer)

Date: September 29, 1987.

James F. Trickett,

Deputy Assistant Secretary, Office of Administrative and Management Services.

[FR Doc. 87–22835 Filed 10–1–87; 8:45 am]

BILLING CODE 4150–04–M

Statement of Organization, Functions and Delegations of Authority; Assistant Secretary for Management and Budget

Part A (Office of the Secretary) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (DHHS) is amended to reflect the transfer of the Freedom of Information Act appeals for documents denied by officials in the Office of the Secretary function from the Office of Management Programs to the Office of the Assistant Secretary for Public Affairs. Specifically, Chapter AMS, Office of Administrative and Management Services, as last published at 52 FR 25312, July 6, 1987 is revised as follows:

1. In Chapter AMS, Section AMS.20 Functions, paragraph "F. Office of Management Programs," delete item (8); and renumber (9) as item (8).

Dated: September 25, 1987.

S. Anthony McCann,

Assistant Secretary for Management and Budget.

[FR Doc. 87–22740 Filed 10–1–87; 8:45 am]

BILLING CODE 4150–04–M

Statement of Organization, Functions and Delegations of Authority; Office of the Assistant Secretary for Personnel Administration

Part A (Office of the Secretary) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (DHHS) is amended to reflect a realignment of functions in the Office of the Assistant Secretary for Personnel Administration. In the Office of Human Resource Information Management, a new Division entitled Systems and Networking Division is established and the existing Systems Design and Analysis Division is restructured.

Specifically, Chapter AH, Office of the Assistant Secretary for Personnel Administration, as last published at 50 FR 20850, May 20, 1985, is revised as follows:

1. In Chapter AH, Section AH.20 Functions, paragraph "B.3 Systems Design and Analysis Division," delete entire paragraph and insert new paragraph as follows:

3. *Systems Design and Analysis Division.* Performs analysis and design for changes, enhancements, and new requirements to the Department's Human Resource Information systems; determines feasibility, benefits, impact, and estimates of staff, hardware, software, and telecommunications required for system development requests; develops prototype systems as needed to assist in the identification of user requirements or for purpose of preliminary design; develops test criteria for evaluating performance, system interfaces, audit checks, security, and other requirements of new software; provides design and analysis support to user requested reporting requirements; serves as Office of Human Resource Information Management (OHRIM) contact with external organizations that are developing requirements or prototypes for DHHS system modernization applications; coordinates user needs, system planning and information management into a consolidated program for the Department's Human Resource Information systems; serves as a representative to internal and external Information Resource Management (IRM) committees and related efforts; develops and maintains long term strategic plans and near term action plans for system change; provides assistance to the OHRIM Director in the structure and application on the principles and procedures of project management and system life cycle management; provides technical assistance to users of DHHS Human Resource Information systems in the development of functional needs statements, operational concept documentation, and acceptance criteria; provides focal point within OHRIM for receiving and responding to requests for system services and resolution of system problems; develops or approves all technical documentation and other literature intended for distribution to the user community; develops or coordinates system training for staff and users of the Department's interactive field system; and participates in the evaluation and selection of hardware and packaged software.

2. In Chapter AH, Section AH.20 Functions, paragraph "B.3. Systems Design and Analysis Division", add new paragraph "7. *Systems and Networking Division*", to read as follows:

7. *Systems and Networking Division.* Provides responsibility for designing, obtaining, installing and maintaining automatic data processing systems required to support the field systems (Regions and OPDIVs) and to support office automation activities of the Assistant Secretary for Personnel Administration (ASPER) at Headquarters. Additionally, provides office automation programmatic support to all sites nationwide outside ASPER Headquarters. The Division provides automated data processing services and distributed configuration management services for computer systems located in the regional offices and the Department's OPDIV level Servicing Personnel Offices. The Division also provides the personnel offices with technical expertise in such areas as data communications, data center hardware and related equipment, data center operating systems, general purpose software and data center management. The Systems and Networking Division staff advise and assist ASPER program offices in related areas and conduct independent research and development studies related to hardware, systems software and data communications. The Division serves as initial contact for ADP hardware, software, and services vendors; provides technical assistance to the development of acquisitions including cost benefit analyses, requirements statements and performance criteria; and participates in the evaluation and selection of vendors and equipment. The Division also maintains coordination with Parklawn Computer Center and Division of Research and Technology telecommunications managers in the areas of networking support for the Department's centralized and distributed data processing facilities. The Systems and Networking Division consists of an Immediate Office, Computer Facilities Group and a Distributed Network Management Group.

Dated: September 25, 1987.

S. Anthony McCann,

Assistant Secretary for Management and Budget.

[FR Doc. 87-22836 Filed 10-1-87; 8:45 am]

BILLING CODE 4150-04-M

Delegation of Authorities to the Commissioner of Social Security for Experimental, Pilot and Demonstration Projects

The Secretary of Health and Human Services (the Secretary) has authority, under section 505(a) of Public Law (Pub. L.) 96-265, to conduct experimental and demonstration projects involving persons who are receiving Disability Insurance benefits under title II of the Social Security Act, as amended (the Act), and authority, under section 505(b) of Pub. L. 96-265, to conduct experimental, pilot and demonstration projects involving persons who are Supplemental Security Income (SSI) recipients under title XVI of the Act.

Section 505(a) of Pub. L. 96-265 also provides the Secretary with authority to waive compliance with benefit requirements of titles II (cash benefits) and XVIII (Medicare) of the Act, to the extent necessary to conduct experimental and demonstration projects under section 505(a) of Pub. L. 96-265 involving Social Security Disability Insurance beneficiaries under title II of the Act.

Section 505(b) of Pub. L. 96-265, which amends section 1110 of the Act and is incorporated in the Act as section 1110(b), also provides the Secretary with authority to waive or add to any of the requirements, conditions or limitations of title XVI of the Act, to the extent necessary to conduct experimental, pilot and demonstration projects under section 505(b) of Pub. L. 96-265 involving SSI recipients under title XVI of the Act.

Under section 505(c) of Pub. L. 96-265, authority to initiate projects under sections 505 (a) and (b) of Pub. L. 96-265 expired as of June 9, 1985. However, this authority was reinstated and extended for an additional period to June 9, 1990, for section 505(a) projects, and reinstated on a permanent basis for section 505(b) projects, by amendments to section 505 of Pub. L. 96-265 contained in section 12101 of Pub. L. 99-272, which was enacted into law on April 7, 1986.

Notice is hereby given that the Secretary has delegated to the Commissioner of Social Security (the Commissioner) the authorities vested in the Secretary under section 505 of Pub. L. 96-265, as amended by section 12101 of Pub. L. 99-272, provided that:

1. The waiver of compliance with benefit requirements under title XVIII of the Act, as authorized under section 505(a)(3) of Pub. L. 96-265, as amended, shall require the concurrence of the Administrator, Health Care Financing

Administration, Department of Health and Human Services (HHS);

2. The functions concerning submission of certain reports to Congress, under sections (a)(3), (a)(4) and (c) of Pub. L. 96–265, as amended, shall be exercised only by the Secretary; and

3. The authorities are exercised in accordance with all pertinent provisions of law, as well as applicable Federal and HHS regulations, policies, procedures, requirements and operating instructions.

This delegation is effective on the date that it is published in the **Federal Register**. The Commissioner may redelegate.

I affirm and ratify any actions by the Commissioner, or by other Social Security Administration officials acting with the Commissioner's approval, which may constitute the exercise of the above delegated authorities before the date that notice of this delegation is published in the **Federal Register**.

Dated: September 24, 1987.

Otis R. Bowen,

Secretary.

BILLING CODE 4110–12–M

Food and Drug Administration

[Docket No. 87F–0287]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of poly[[6-[(1,1,3,3-tetramethylbutyl)amino]-*s*-triazine-2,4-diyl][2,2,6,6,-tetramethyl-4-piperidyl)imino]hexamethylene[2,2,6,6,-tetramethyl-4-piperidyl)imino]] as a stabilizer for polyethylene and olefin copolymers used in the manufacture of articles or components of articles intended for food-contact use.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center For Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 7B4021) has been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) be amended to provide for the safe use of poly[[6-[(1,1,3,3-tetramethylbutyl)amino]-*s*-triazine-2,4-diyl][2,2,6,6,-tetramethyl-4-piperidyl)imino]hexamethylene[2,2,6,6,-tetramethyl-4-piperidyl)imino]] as a stabilizer for polyethylene and olefin copolymers used in the manufacture of articles or components of articles intended for food-contact use.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: September 25, 1987.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 87–22751 Filed 10–1–87; 8:45 am]

BILLING CODE 4160–01–M

Health Care Financing Administration

[HSQ–143–FN]

Medicare Program: End-Stage Renal Disease Program; Revised Network Area Designations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final notice.

SUMMARY: This notice provides for 18 End-Stage Renal Disease (ESRD) network areas and sets forth the geographic areas of the new network organizations and the criteria used to designate the new areas. This notice also sets forth evaluation criteria and performance indicators for monitoring the performance of network organizations.

EFFECTIVE DATE: These regulations are effective on November 2, 1987.

FOR FURTHER INFORMATION CONTACT: Spencer Colburn, (301) 594–3413.

SUPPLEMENTARY INFORMATION:

I. Background

Previous Legislative Activity and Regulations

The Social Security Amendments of 1972 (Pub. L. 92–603) extended Medicare coverage to individuals with end-stage renal disease (ESRD) who require dialysis or transplantation. The End-Stage Renal Disease Amendments of 1978 (Pub. L. 95–292) authorized the establishment of ESRD network areas and network organizations under the Medicare program, consistent with the criteria the Secretary finds appropriate to assure the effective and efficient administration of ESRD program benefits.

In June 1984, Congress (House Report 98–861, p. 1336) directed the Secretary to consider consolidating the existing 32 network areas.

On April 7, 1986, the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) (Pub. L. 99–272) was enacted. Section 9214 of that law requires the Secretary to maintain renal disease network organizations as authorized under section 1881(c) of the Social Security Act (Act) and not merge the network organizations into other organizations or entities. The Secretary was permitted to consolidate network organizations, but only if such consolidation did not result in fewer than 14 such organizations being permitted to exist.

Consistent with section 9214 of Pub. L. 99–272, we published a notice of proposed rulemaking on April 15, 1986 (51 FR 12714), and a final rule on August 26, 1986 (51 FR 30356). These regulations permit the Secretary to redesignate the ESRD networks and improve their administration. At the same time we published the final rule, we also published a final notice (51 FR 30434) that provided for 14 networks and set forth the geographic areas of the new network organizations (area designations) under the ESRD program.

For more detailed explanations of each of the above **Federal Register** documents, refer to the preambles to those documents.

Omnibus Budget Reconciliation Act of 1986

On October 21, 1986, the Omnibus Budget Reconciliation Act of 1986 (OBRA) (Pub. L. 99–509) was enacted. Sections 9335(d) through (h) of Pub. L. 99–509 amend, in several ways, section 1881(c) of the Act. Those sections require the Secretary to—

- Establish at least 17 ESRD network areas not later than May 1, 1987 (section 9335(d)(1) and (2)).
- Designate, not later than July 1, 1987, a network administrative organization for each area that will establish a network council of renal dialysis and transplant facilities located in the area and a medical review board (section 9335(d)(1) and (2)).
- Consult with profesional and patient organizations regarding the

redesignation of network areas and publish in the **Federal Register** a description of each network area and the criteria on the basis of which network determinations were made (section 9335(d)(1)).

- Publish in the **Federal Register** the criteria, standards and procedures to evaluate an applicant organization's ability to perform or actual performance of required network functions (section 9335(d)(1)).
- Evaluate each applicant network organization based on quality and scope of services and not accord more than 20 percent of the weight of the evaluation to the element of price (section 9335(d)(1)).
- Terminate an agreement with a network administrative organization (network organization) only if he finds, after applying published standards and criteria, that the organization has failed to perform its prescribed responsibilities effectively and efficiently. If an agreement is to be terminated, the Secretary must select a successor to the agreement on the basis of competitive bidding and in a manner that provides an orderly transition (section 9335(d)(1)).

Additionally, if the Secretary designates a network organization for an area that was not previously designated for that area, the statute requires the Secretary to offer to continue to fund the previously designated organization for that area for a period of 30 days after the first date the newly designated organization assumes the duties of a network administrative organization for that area (section 9335(d)(3)).

Section 9335 of Pub. L. 99–509 contains other provisions that amend section 1881(c) of the Act relating to the ESRD networks. Those provisions require ESRD network organizations to—

- Establish a network council of renal dialysis and transplant facilities located in each area and a medical review board (section 9335(d)(1)) with at least one patient represenative as a member of each network council and each medical review board (section 9335(e)).
- Encourage participation in vocational rehabilitation programs and develop criteria and standards relating to such encouragment (section 9335(f)(1), (2), and (4), and (h)).
- Report on those facilities and providers not providing appropriate medical care (section 9335(f)(3)).
- Implement a procedure for evaluating and resolving patient grievance (section 9335(f)(5)).
- Conduct onsite reviews of individual ESRD facilities as directed by the Secretary or medical review board and utilize standards of care established by the network organization to assure proper medical care (section 9335(f)(5)).
- Collect, validate, and analyze ESRD program data (section 9335(f)(5)).
- Provide data to the national ESRD data registry established under section 1881(c)(7) of the Act (section 9335(f)(5)).

In addition, the statute requires that the medical review board include physicians, nurses, and social workers engaged in treatment relating to end stage renal disease and at least one patient representative (sections 9335(d)(1) and (e)). It also encourages facility cooperation with network organizations by requiring that ESRD facilities and providers follow the recommendations of the medical review board (section 9335(g)).

Federal Register Documents

On April 9, 1987, we published a notice in the **Federal Register** (52 FR 11550) that proposed 17 new network areas and designations. In accordance with the provisions of section 9335(d) of Pub. L. 99–509, we invited every national renal professional and patient organization to provide counsel with respect to the network area designations and to submit proposed network area configurations. The April 9, 1987 proposed notice contains a detailed discussion of a proposed configuration of the network areas and our rationale for the proposed network designations.

The April 9, 1987 notice also contains the proposed criteria, standards, and procedures to evaluate the performance of network organizations and the potential capabilities of an applicant organization as required by section 9335(d)(1) of Pub. L. 99–509.

On May 12, 1987, we published a proposed rule (52 FR 17777) that announces the proposed responsibilities of network organizations as required by sections 9335(d) through (h) of Pub. L. 99–509. A final rule addressing those requirements will be forthcoming.

II. Analysis of and Responses to Public Comments

We received 160 timely comments on the proposed notice. Comments were submitted by 16 of the 32 existing ESRD networks, the Renal Physicians Association, the National Renal Administrators Association, the American Nephrology Nurses' Association, the National Association of Patients on Hemodialysis and Transplantation, the Forum of ESRD Networks, 30 hospitals, 12 ESRD facilities, 16 ESRD patients, 2 ESRD facility chain organizations, 4 local chapters of kidney organizations, 1 member of Congress, 1 State health department, and 1 State dialysis organization. The remaining comments were submitted by physicians, nurses, social workers, dieticians, and other interested parties.

The majority of comments related to the proposal to combine the entire State of California into a single network and network assignment for the State of Connecticut. In the case of California, the commenters expressed concern that the dialysis population of the proposed network area would be too large to administer. In the case of Connecticut, the commenters requested that Connecticut be included with New York State. The specific comments and our responses follow.

California

Comment: Approximately half of the commenters suggested that California be divided into network areas. These commenters stated that a single network that would encompass the entire State of California would be too large to accomplish the tasks of the network and that the new network would incur unnecessary costs in consolidating the existing network data systems. The commenters suggested that the success of a network depends upon the communication and the personal relationships that develop between the provider community and the network staff. In an area that includes nearly 200 dialysis facilities and 9,400 dialysis patients, the commenters believe that those personal relationships would be compromised. In addition, some commenters stated that the patient population would permit two independent networks to function successfully. Commenters further stated that driving California into two networks would not interfere with the ability to function with other agencies within the State, such as the State Health Department and the HCFA regional office. Finally, some commenters stated that a number of national organizations, such as the ESRD Network Forum, NAPHT, and RPA also endorse two networks in California.

Other commenters stated that California should be a single network area as proposed. The commenters believe that a single network would allow the organization to relate to the State and Federal governments with one data system, one set of goals and objectives, and one program and one executive director. This would result in cost savings and other efficiencies.

Response: We have accepted the rationale of the majority of commenters that the population of California is large enough to support two networks and

VOL
52
ISS
191
OC
2
1987
UMI

that designating a single area might compromise the working relationships that have been developed in the past. Therefore, we will establish two networks in California.

Connecticut

Comment: Approximately one third of the commenters recommended that Connecticut be included with New York because of existing patient referral patterns and because the Connecticut network had worked closely with the New York City network in the past. Other commenters recommended that the New England network should be retained as previously configured without Connecticut. Those commenters stated that the population of New England without Connecticut can support a network organization.

Response: Our primary criterion for designating network areas is patient population because that determines the funding for each area. Placing Connecticut (approximately 1,000 patients) with New York would jeopardize the financial soundness of the New England network. In addition, a network consisting of New York and Connecticut would be too large to function adequately. We do not believe that the referral patterns of Connecticut are so interconnected with New York to warrant redesignating those two areas. Connecticut previously stood alone as a network area, and we believe that New England and Connecticut can form a successful network area. Therefore, we have rejected the comments supporting combining Connecticut with New York.

Georgia

Comment: Eight commenters recommended that Georgia be combined with North Carolina and South Carolina rather than with Florida as proposed. These commenters stated that this configuration would allow two areas of equal patient population, would maintain existing referral patterns and relationships, and would not require combining complex data systems. In addition, the commenters state that Florida and Georgia have populations with significant socio-economic differences and that both States would be better served by maintaining separate network areas.

One commenter stated that the interests of patients in Georgia would be best served by combining Georgia and Florida into one network because the Florida network is well organized, active and progressive.

Response: The configuration of Georgia, North Carolina, and South Carolina was previously considered when we prepared the proposed notice and was one proposed option of the Forum of ESRD Networks. This configuration meets all of our criteria for establishing networks and would adequately serve the needs of the patients. Therefore, we have accepted this comment and will include Georgia in the network with North Carolina and South Carolina.

Hawaii

Comment: Several commenters suggested that Hawaii be included with Northern California because it is part of that medical trade area. Other commenters from the northwest suggested that combining Hawaii with the northwest would strain the resources of the area. These commenters suggest that the revenue generated from dialysis treatments of the Hawaii patients would be insufficient to overcome the expenses necessary to administer that area from the northwest.

Response: We initially designated Hawaii as part of the northwest to assure adequate funding for the northwest. However, the patient population of Hawaii is relatively small and commenters from the region believe that combining Hawaii with Northern California would not negatively affect the financial capabilities of the northwest. Therefore, we accept these comments and have designated Hawaii, American Samoa, Guam, and the Trust Territory of the Pacific Islands as part of the Northern California network (Network Area #17).

Michigan

Comment: Two commenters requested that Michigan be retained as a single network area.

Response: Again, we must assure that each network area is comprised of an adequate population base to finance the respective network organizations. Designating Michigan as a single area would jeopardize the financial capabilities of Michigan and the rest of network area #11.

Puerto Rico and the Virgin Islands

Comment: One commenter stated that Puerto Rico and the Virgin Islands should remain a separate network and not be included with New Jersey. The commenter stated that given the growth rate of the patient population, Puerto Rico will soon realize the minimum patient loan requirement. The commenter also stated that communication between Puerto Rico and New Jersey would be difficult because of geographic distance and because most patients from Puerto Rico speak only Spanish. The commenter also stated that there is an existing collaboration among the facilities and the professionals in Puerto Rico and that it would be difficult to interact with New Jersey professionals, because no professional ties exist between the two areas.

Response: We realize that communication between Puerto Rico and any other network area will be difficult and not without problems. However, no geographical area, including Puerto Rico, would be able to accomplish the network requirements unless it is compose of the minimum patient population. Combining Puerto Rico and New Jersey will create a population base to permit adequate network funding and will allow both areas to be better served by the resulting network organization. In addition, that configuration will allow the interchange of medical perspectives between the two areas. Therefore, we reject the comment.

Random Case Reviews

Comment: Several commenters expressed concern over our proposed evaluation criteria relating to the requirement that networks perform medical case reviews. Those commenters believe that networks should gather data and evaluate trend data to identify facility problems. One commenter stated that the networks should create a mini-medical staff organization to participate in a broad-based, team oriented quality assurance effort. In addition, one commenter stated that case review would duplicate the functions of the State agencies, which would result in a waste of financial resources. Other commenters expressed concern over a case review requirement modeled after those reviews performed by Utilization and Quality Control Peer Review Organizations (PROs) for the network organizations. Those commenters state that the PRO-model case review is based upon hospital inpatient experience, will cause problems in record review, and is antagonistic in its relationship with providers.

Response: We believe that case review is the best method to assure that networks perform their statutory responsibility to evaluate the appropriateness of care within the network area. The evaluation of trend data is certainly an acceptable technique but will best be accomplished on a national level by the ESRD Registry. The networks will have the opportunity to evaluate trend data from the national program management and medical information system and to identify local aberrations from the

national data. The strength of the networks will be access to facility records from which to supplement data on specific issues. Therefore, we reject the comment and networks will be required to conduct case reviews.

Demonstrating Contractor Financial Integrity

Comment: Two commenters asked how the current networks interested in bidding on the new contracts can demonstrate financial integrity when they are currently funded solely by HCFA. In addition, one of the commenters asked whether, if a contract is awarded to an existing network, HCFA could advance it three months start-up funding. One commenter stated that every effort should be made to encourage the existing organizations to be primary candidates for the new designations.

Response: It is the responsibility of any potential bidders to demonstrate the financial soundness of their organizations and to acquire independently the necessary financial support. We do not plan to advance any network contract funds. With respect to encouraging the current networks to bid on the new areas, government contract regulations forbid special consideration to any potential bidders. All current networks will be placed on the bidders list for the network contract solicitation and all proposals will be judged on their merits.

Variations in Network Size

Comment: Several commenters noted that the geographic size of the networks will vary considerably and they are concerned that this geographic variance will hinder the performance of the larger geographic networks. The commenters believe that the availability of professionals to serve as "expert" volunteers will be severely hampered due to distance and time commitment. The commenters believe that the access to care and the grievance procedure for patients will also be adversely affected in the large geographic networks. These commenters also believe that in the larger areas the facilities will have less input into the development of network goals and objectives.

Response: We do not believe that a difference in geographic size of the organizations will greatly affect their capabilities. Our proposed network requirements have been designed to be accomplished from the network office and will not require a great amount of travel. In addition, the contracting mechanism will allow the network organizations to reimburse their staff for their activities.

Network Funding

Comment: Several commenters suggested that the funding mechanism be revised to account for transplant patients and include transplant centers in the funding formula. Other commenters suggested that the funding mechanism be revised to distribute the network revenue more equitably.

Response: Section 9335(j) of Pub. L. 99–509 amended section 1881(b)(7) of the Act and specifies the funding mechanism for the network organizations. We have no administrative authority to modify the funding formula. In the request for proposals, we will specify the maximum funding available for each area based upon the current estimates of patient population. Each network contract proposal will be evaluated for technical content and proposed price. Each network business proposal will be assigned point values according to the following formula:

$$20 - \frac{(\text{Price of proposal} - \text{Lowest priced proposal}) \times 20}{\text{Lowest priced proposal}}$$

The points assigned for the price of the proposal will not exceed 20 percent of the total evaluation score. If there are no significant technical or financial and management differences, price alone may be the determining factor for source selection.

Data Collection and Analysis

Comment: One commenter stated that the network role in data collection for the national patient registry should be closely monitored by HCFA and the National Institutes of Health (NIH). Another commenter stated that the regulations should address data system administration through clear statements about the level of data management and analysis skills required of network organizations.

Response: We are working closely with NIH to assure the success of the national patient registry, and we will assure that the networks also cooperate in this effort. We will specify the technical data collection specifications and requirements in the network contracts.

Representation in Network Activities

Comment: One commenter stated that the network contracts specify the role of the patients in the network administration. Other commenters requested that dieticians be included on the medical review boards, that transplant surgeons be required to be members of the board, and that a cross section of the provider community be mandated to participate in the governing body.

Response: The requirement for patient representation on the medical review board and other network committees will provide active patient representation and participation in each network organization. In addition, each network will have the latitude to appoint various professionals to the medical review board. There is nothing that would preclude a dietician, a transplant surgeon, or other professional specialties from being appointed to the medical review board. We will evaluate the proposals of the prospective contractors to determine how the contractor intends to represent the provider community. During this process we will ensure that the contractor develops a plan that fully represents the full spectrum of dialysis professionals.

Sanctions

Comment: One commenter stated that if networks are given the clear ability to sanction ESRD facilities, then we must provide an avenue of administrative redress for the facilities.

Response: The administrative procedures for implementing alternative sanctions against ESRD facilities that fail to participate in network activities and pursue network goals are being prepared in a separate rule. We will apply those sanctions on the basis of recommendations from the network organizations. The final rule implementing the alternative sanctions requirements will be published shortly.

Periodic Adjustments of Network Designations

Comment: One commenter stated that further changes in network designations could be disruptive to network

BEST COPY AVAILABLE

operations and should be avoided because networks are small businesses dependent upon relationships with their constituents.

Response: We agree that changes in the network areas disrupt the program and we only intend to revise the areas when a need to change an area is apparent.

Onsite Reviews

Comment: One commenter stated that onsite reviews by the network be conducted only on an as needed basis and only in new facilities.

Response: Section 9335(f) of Pub. L. 99–509 added section 1881(c)(2)(E) to the Act, which gives the networks the responsibility to conduct on-site reviews of facilities and providers as necessary, utilizing standards of care established by the network organization to assure proper medical care. Each network organization will develop criteria and standards for assessing the need for onsite reviews and will conduct onsite reviews in response to those criteria. We do not intend to restrict the authority of the networks in this important area.

Monthly Progress Reporting

Comment: One commenter stated that a quarterly system of progress reporting would be more efficient and more illustrative of acomplishments of the networks than preparing monthly reports.

Response: We will require monthly reports from network organizations so that we can assure that contract requirements are performed satisfactorily. Since many of the network requirements will be performed on a monthly basis, the monthly reports will allow us to assure that the networks will not fall behind in fulfilling these tasks.

Contractor Eligibility

Comment: One commenter stated that we should prohibit two classes of organizations from bidding on network contracts. The commenter stated that providers of kidney dialysis services, manufacturers of dialysis supplies and/or consortia representing or controlled by providers or manufacturers would be unsuitable for obtaining a network contract because of an inherent risk of conflict of interest. In addition, the commenter believes that PROs should not be selected as network contractors because the ESRD program would become secondary to their role of conducting inpatient hospital reviews.

Response: At this time, we have not restricted who may respond to the request for proposals. (See section IV below.) All potential bidders will be required to demonstrate their ability to fulfill the contract requirements in an unbiased manner. All successful bidders will be required to perform the contract requirements in a fully acceptable manner or their contracts will be terminated.

Development of Criteria and Standards to Evaluate Appropriateness of Care

Comment: One commenter is concerned about the development of the criteria and standards of medical care. The commenter is concerned that a wide variety of criteria and standards will be developed nationwide, many of which may not be appropriate. The commenter believes that we should review the standards to assure that minimum requirements are met.

Response: The medical review board of each network will be responsible for developing the criteria and standards for each network area. We expect that the medical experts of the member facilities will participate in this activity to assure that reasonable standards are developed. While we intend to review the standards that are developed, we believe that the medical experts in the networks are qualified to develop reasonable standards for medical care of the patients. Therefore, we do not intend to change or revise the standards that are developed.

Vocational Rehabilitation

Comment: Several commenters are concerned that the term "vocational rehabilitation", as mentioned in the law, is too narrow and should be revised to consider factors such as demographics, age, job skills, and employment history for each patient.

Response: Each network will be responsible for developing the criteria and standards and methods for encouraging vocational rehabilitation within the network area. The networks will have the latitude to define the criteria appropriate for their network area and apply their standards accordingly.

Technical Changes

In the proposed notice, we inadvertently referred to the Trust Territory of the Pacific as the Trust Territories of the Pacific. That error has been corrected in this final notice.

III. Provisions of the Final Notice

This final notice implements new network area designations and sets forth the criteria, standards and procedures we will use to evaluate new network organizataions as required by section 9335(d) of Pub. L. 99–509. As we stated in the April 9, 1987 notice, we will also issue area designations through revisions to the ESRD Facility Manual and the Provider Reimbursement Manual. We will require facilities to notify patients of the area designation changes, and we will notify patient advocacy groups (for example, The National Association of Patients on Hemodialysis and Transplantation and The National Kidney Patients Association) directly.

Network Area Designations

Based on the public comments, we changed the network area designations that we proposed on April 9, 1987 as follows:

- We will designate Florida as a single State network area (Network Area #7).
- We will combine Georgia with North Carolina and South Carolina to form one network area (Network Area #6).
- We will spilt California into two district network areas—Northern California (Network Area #17) and Soutern California (Network Area #18).
- We will combine Hawaii, America Samoa, Guam, and the Trust Territory of the Pacific Islands with Northern California (Network Area #17).

The new network area designations follow:

Network Area #1

Connecticut
Maine
Massachusetts
New Hampshire
Rhode Island
Vermont

Network Area #2

New York

Network Area #3

New Jersey
Puerto Rico
Virgin Islands

Network Area #4

Delaware
Pennsylvania

Network Area #5

District of Columbia
Maryland
Virginia
West Virginia

Network Area #6

Georgia
South Carolina
North Carolina

Network Area #7

Florida

Network Area #8

Network Area #17

The following counties in Northern California: Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Fresno, Glenn, Humboldt, Lake, Lassen, Madera, Marin, Mariposa, Mendocino, Merced, Modoc, Mono, Monterey, Napa, Nevada, Placer, Plumas, Sacramento, San Benito, San Francisco, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Stanislaus, Sutter, Tehama, Trinity, Tuolumne, Yolo, Yuba.

Hawaii. American Samoa. Guam. The Trust Territory of the Pacific Islands.

Network Area #18

The following counties in Southern California: Imperial, Inyo, Kern, Kings, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, Tulare, Ventura.

Evaluation Criteria

We have made no changes to the criteria, standards, and procedures that will be used to evaluate the performance of network organizations and the potential capabilities of an applicant organization with respect to the statutory duties of the network organizations. The evaluation criteria that we will use to assess the capabilities of organizations that submit proposals in response to the request for contract proposals follows:

I. Understanding of Work and Approach
  A. Analysis of scope and purpose
  B. Technical approach
II. Experience
  A. Developing and conducting medical review programs
  B. Managing data and conducting data analysis and studies
  C. Coordinating work groups in the health field
III. Personnel
  A. Project Director
  B. Subordinate staff
IV. Management Plan

We will use the following evaluation criteria and performance indicators to assess the effectiveness or potential effectiveness of network organizations.

Criteria	Evaluation indicator
I. MEDICAL REVIEW	
A. *General*	
The network organization appoints a qualified Medical Review Board	The network demonstrates an ability to appoint a medical review board in accordance with the regulatory requirements.
The network develops and adopts criteria for the evaluation of patient care and for encouraging participation in vocational rehabilitation programs and network goals for placing patients in settings for self care and transplantation	The Network demonstrates an ability to adopt criteria and standards for the evaluation of the quality and appropriateness of patient care.
B. *Case Review*	
The network develops a protocol for the receipt and review of a representative sample of individual patient cases per month	The network proposes a mechanism to identify individual cases for review against criteria and standards established under I.A. above
The review of individual cases includes the evaluation of at least: Individual care plans, Long term and short term plans, Appropriateness of treatment modality, Adverse effects, Incident reports involving the patient, and Patient suitability for home dialysis, transplantation and vocational rehabilitation	The network proposes a mechanism to evaluate these areas.
C. *Systems Assessment*	
The network successfully identifies specific network problems in the delivery of patient care	Proposed studies and a written mechanism to implement corrective actions or suggestions
The organization assists individual facilities and acts to resolve identified problems within the network area	Proposed activities required of facilities to improve care
The network is aware of and assists facilities in correcting internal problems that interfere with meeting program requirements. The network documents these activities.	The network proposes policies and procedures to gain voluntary compliance from facilities in meeting HCFA goals and objectives. Recalcitrant facilities will be reported to HCFA
The network develops a protocol to select a sample of member facilities for evaluation of patient placement.	The network uses established criteria and standards to evaluate the procedures used at each facility in assessing patients for placement in appropriate treatment settings.
The network heightens both patient and physician interest and awareness of alternative treatment modalities and facilitates entry into those treatment modalities when medically indicated.	The Network proposes to initiate patient and professional education and information activities in this area. Other initiatives to increase the percentage of patients or alternative treatments are proposed and implemented
The network objectively assesses and assists facilities efforts to correct problems identified through the network medical review program.	The network proposes to develop a review mechanism to determine if benefits are achieved from the medical review programs.
D. *Patient Services Evaluation*	
The network assists ESRD beneficiaries in obtaining access to all types and levels of care	The network has mechanisms to assist patients in obtaining access to care with respect to proper treatment settings and treatment schedules compatible with patient employment.
The network is responsive to patient concerns and encourages responsible patient participation. Responsiveness is documented	Proposed methods of assuring appropriate consumer representation.
The network provides, maintains, and directs an effective patient grievance mechanism: Standard policies and procedures, Evaluation of complaints legitimacy, Rationale for complaints not pursued is documented, Investigation, Corrective actions, Follow-up of corrective action, Notification of parties concerned and resolution/corrective action is clearly explained, and The network assumes the responsibility of assuring that a result is obtained.	Documented procedures

Criteria	Evaluation indicator
II. DATA ACTIVITIES	
The network maintains a patient and facility specific data system that meets the needs of the network and HCFA requirements.	The proposed data system includes at least the required specific data items as specified by HCFA.
Data handling is physically and administratively structured to assure patient privacy and confidentiality	Information must be released only in accordance with the provisions of the contract or as otherwise specified in writing by HCFA.
The network data management system provides for collection, analysis, verification and reporting on a timely basis	The network proposes to meet its obligation in providing information to HCFA as specified in the provisions of the contract and program instructions
The network is aware of and assists facilities in correcting internal problems that interfere with meeting program requirements. These activities are documented.	The network proposes policies and procedures to gain voluntary compliance from its facilities in meeting data gathering requirements
The network data system is adequate to support current activities, including the activities of the medical review board	The network proposal assures that there will be no curtailment of network activities due to a lack of data or meaningful analysis. A periodic analysis of patient morbidity and mortality trends will be performed. Data findings that may be indicative of inadequate patient care will be tracked and reported to the medical review board.
The network has established a periodic internal audit procedure to assure the effectiveness of its system and its performance in: submitting reports, meeting deadlines, and identifying and correcting errors.	The network proposes procedures to identify and correct problems in its data activities. The network has planning activities to identify and address future data needs
III. PROGRAM ADMINISTRATION AND MANAGEMENT	
The network plans and manages network activities to enhance the achievement of ESRD national priorities.	The network prepares a comprehensive contract proposal, and submits acceptable deliverables.
Record Systems:	
The network maintains all appropriate systems in a standardized manner	Organization's records must be maintained in accordance with sound business practices
The network maintains an effective liaison role to the Federal government	The network proposal clearly indicates that there will be specific individuals in the network organization to coordinate communications with HCFA. The network will adhere to specific reporting mechanisms specified in the contract.
The network arranges, as required, to have audits performed and audit reports sent to HCFA	External (independent) audit.

IV. Request for Proposals

We have developed separately an announcement of a request for proposals (RFP) to solicit prosepective contractors as the new ESRD network organizations for the newly designated areas. We will publish the announcement in the Commerce Business Daily (CBD) for 15 consecutive days. During those 15 days, interested parties can request copies of the RFP. On the fifteenth day that the announcement appears in the CBD, we will distribute copies of the RFP to existing organizations that currently have the expertise to perform network organization functions and any other parties that request copies. We will accept proposals within 45 days from the date that we publish the announcement of the RFP in the CBD.

V. Regulatory Impact Statement

Executive Order (E.O.) 12291 requires us to prepare and publish a final regulatory impact analysis for any notice such as this that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in: An annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant advere effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, we generally prepare a final requlatory flexibility analysis that is consistent with the Regulatory Flexibility Act (REA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a notice such as this will not have a significant economic impact on a substantial number of small entities.

Because ESRD networks are such a small activity, with a total FY 1987 budget of less than $6 million, these changes do not meet any of the criteria for a major rule under Executive Order 12291, and a regulatory impact analysis is not required. However, the planned reductions in numbers of network areas and organizations will clearly affect all or almost all existing network organizations. Since these organization are a creation of the government and are funded by us solely to fulfill the requirements of the law, they are not the kind of small entities to which the Regulatory Flexibility Act is usuallly considered to apply. Nonetheless, they are small organizations and a substantial number of them will experience a significant adverse economic effect as a result of our changes. Therefore, the following discussion, in combination with other sections of this notice, serves as a voluntary regulatory flexibility analysis.

Existing network organizations will be affected only when we actually redesignate network areas and make arrangements with new network organizations. We do not expect the redesignation of network areas to have an adverse affect on ESRD facilities or benefitciaries. Rather, to the extent that network performance relative to available rsources is enhanced, the entire ESRD program will benefit.

The Criteria for the designation of these new network aras will have an impact upon the networks, the beneficiaries, and the facilities. For example, one of the criteria that we will use as a basis for area designation is patient population. This criterion will determine the funding level of each network organization because the network funding mechanism is based on the number of treatments provided within the network area. (Section 1881(b)(7) of the Act, as amended by section 9335(j) of Pub. L. 99–509 requires the Secretary to reduce the amount of each composite rate payment for each treatment by $0.50 and provide for the payment of such amount to meet the necessary and proper administrative costs of the network organization in the area where the treatment is provided.)

The area designations and the total number of patients per area follow:

Network area:	Number of patients
1	3,917
2	7,641
3	4,436
4	4,914
5	5,273
6	6,674
7	4,625
8	4,935
9	5,743
10	3,733
11	5,113
12	3,497
13	3,277
14	5,785
15	2,977
16	2,354
17	3,954
18	5,934

For purposes of estimating revenue, we have assumed that the average number of dialysis treatments per week

is 2.6 at $.50 per treatment. We assume an allocation of $67.60 per patient per year. The smallest area will thus be allocated about $185,000 and the largest area will be allocated approximately $520,000.

The patient population criterion should ensure that there is a sufficient level of funding to ensure the survival of small network organizations and ensure a bssic level of services provided to the beneficiaries and the providers. Appropriate application of this factor could prevent the growth of disparities among the services provided to the ESRD beneficiaries throughout the country.

We intend to replace existing network organizations with a more effective and efficient system. As a desirable by-product, these changes will reduce the regulartory burden on the suppliers of ESRD services, while continuing to assure the health and safety of Medicare beneficiaries. Also, these criteria should result in a good management information system defining partients' treatment modalities and a quality control system that justify the costs and burden imposed on the networks and which are expected to benefit the beneficiary and society.

In conclusion, although our evaluation criteria may appear to be burdensome, we have made an effort to assure that network areas of sufficient size will perform these functions. We believe that the adverse economic impact of this notice will be limited to the affected entities and their immediate employees. Such adverse consequences as may be anticipated will not be of sufficient magnitude to offset the advantages to be gained by anticipated improvements in efficiency, effectiveness, economy, and quality of care.

VI. Collection of Information Requirements

This notice contains no information collection requirements. Consequently, this notice need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.)

(Secs. 1102, 1861, 1862(a), 1871, 1874, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395x, 1395y(a), 1395hh, 1395kk, and 1395rr))

(Catalong of Federal Domestic Assistance Program No. 13.773, Medicare Hospital Insurance and No. 13.774, Supplementary Medical Insurance)

Dated: August 24, 1987.

William L. Roper,

Administrator, Health Care Financing Administration.

Approved: September 14, 1987.

Otis R. Bowen,

Secretary.

[FR Doc. 87-22738 Filed 10-1-87; 8:45 am]

BILLING CODE 4120-010-M

Office of Human Development Services

Meeting of the Advisory Board on Child Abuse and Neglect

Agency Holding the Meeting: Administration for Children, Youth and Families.

Times and Dates: 9:00 a.m. November 4, 1987 to 12:00 a.m. November 6, 1987.

Place: DuPont Plaza Hotel, 1500 New Hampshire Avenue, NW., Washington, DC 20036.

Status: Advisory Board meetings are open for public observation.

Matters to be Considered: At this meeting, the Advisory Board will discuss: The National Symposium on Child Victimization, FY'88 Child abuse and Neglect priorities, interagency agreements, future efforts of the Advisory Board and other matters of importance.

Contact Person for More Information: Jan Kirby-Gell, National Center on Child Abuse and Neglect, P.O. Box 1182, Washington, DC 20013; 202/245-2856.

Date: September 28, 1987.

Carolyn Garnett,

HDS Committee Management Officer.

BILLING CODE 4130-01-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[AA-650-07-4121-09]

Establishment of the Fort Union Regional Coal Team

This notice is published in accordance with section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463). Following consultation with the General Services Administration, notice is hereby given that the Secretary of the Interior (Secretary) is establishing a regional coal team (RCT) for the Fort Union (Montana and North Dakota) Federal coal production region. The RCT is an independent subcommittee of the Federal-State Coal Advisory Board renewed by the Secretary on October 3, 1986. As such, the RCT will guide all phases of coal activity planning in the region and will specifically provide advice to the Secretary, through the Director, Bureau of Land Management, on regional coal leasing levels and on Federal coal lease sale schedules and the tracts to be offered.

Further information regarding the committee may be obtained from the Director, Bureau of Land Management (650), U.S. Department of the Interior, 18th and C Streets, NW, Washington, DC 20240.

The certification of establishment is published below.

Certification

I hereby certify that the establishment of the Fort Union Regional Coal Team is necessary and in the public interest in connection with the performance of duties imposed on the Department of the Interior by those statutory authorities listed in 43 Code of Federal Regulations 3400.0-3 and by Departmental policy for Federal-State cooperation concerning the Federal coal management program.

Donald Paul Hodel,

Secretary of the Interior.

September 17, 1987.

Bureau of Land Management

[AA820-07-4830-14]

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone 202-395-7340.

Title: Payments in Lieu of Taxes, 43 CFR Part 1881.

Abstract: The information requested is statutorily required to compute payments due units of local government under the Payments in Lieu of Taxes Act (31 U.S.C. 6901 through 6907). The Act requires that the Governor of each State

furnish a statement as to the amounts paid to units of local government under 11 receipt sharing statutes in the prior fiscal year. CFDA Number 15.216.

Bureau Form Number: None.

Frequency: Annually.

Description of Respondents: States supplying Federal land payment information to the Bureau of Land Management.

Annual Response: 50.

Annual Burden Hours: 1,000.

Bureau Clearance Officer (alternate): Rick Iovaine (202) 653–8853.

Dated: July 15, 1987.

Andrew J. Ondrof,

Deputy Assistant Director, Management Services.

Competitive Coal Lease Offering By Sealed Bid, Fayette and Tuscaloosa Counties, AL

AGENCY: Bureau of Land Management, Interior.

ACTION: Competitive coal lease offering by sealed bid.

SUMMARY: Notice is hereby given that certain coal resources in the Sandy Point Tract, Fayette and Tuscaloosa Counties, Alabama, will be offered for competitive lease by sealed bid in accordance with the provisions of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*). The Sandy Point Tract is being offered for lease as the result of Emergency Coal Lease Application ES 36413, filed by Chevron U.S.A. Inc. The applicant has satisfactorily demonstrated under the Emergency Coal Leasing Regulation 43 CFR 3425.1–4, that if these coal deposits are not leased, they will be bypassed in the reasonably foreseeable future, and if leased, some portion of the tract applied for would be used within 3 years.

DATES: The lease sale will be held at 10:30 a.m., Thursday, October 29, 1987. Sealed bids must be submitted on or before 4:00 p.m., Wednesday, October 28, 1987.

ADDRESS: The lease sale will be held in the Public Room of the Bureau of Land Management, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304. Sealed bids should be sent by certified mail, return receipt or hand-delivered to the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Ivy J. Garcia, Bureau of Land Management, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, (703) 274–0151.

SUPPLEMENTARY INFORMATION: The Sandy Point Tract will be leased to the qualified bidder of the highest cash amount provided that the high bid equals the fair market value of the tract. The minimum bid for this tract is $100 per acre, or fraction thereof. No bid that is less than $100 per acre, or fraction thereof, will be considered. The minimum bid is not intended to represent fair market value. The fair market value of this tract will be determined by the authorized office after the sale.

The lands included in Emergency Coal Lease Application ES 36413 are described as follows:

Sandy Point Tract

T. 17S., R. 11–W., Huntsville Meridian, Alabama.
Sec. 12, SE¼SW¼, Fayette County.
Sec. 13, E½NW¼, Tuscaloosa County.
Containing approximately 120 acres.

The Sandy Point Tract represents the continuation of an existing underground mining operation. The primary group and bed of interest is the Pratt. This tract is to be mined from the existing underground mine.

The proximate analysis of the Pratt Tract is:

1. Moisture (%)—2.5
2. Ash (%)—8.2
3. Sulfur (%)—1.8
4. BTU/lb.—13,833
5. Approx. tons in place—1.2 million
6. Medium-Volatile B bituminous in rank.

Rental and Royalty

A lease issued as the result of this offering will provide for payment of an annual rental of $3.00 per acre or fraction thereof and a royalty payable to the United States of 8.0 percent of the value of the coal produced by underground mining methods. The value of the coal shall be determined in accordance with 30 CFR 203.200.

G. Curtis Jones, Jr.,

State Director.

BILLING CODE 4310–GJ–M

[NV–030–07–4212–21; N–47283]

Realty Action; Noncompetitive Lease of Public Land in Douglas County, NV

The following described parcel of public land is being considered for lease under section 302 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2762; 43 U.S.C. 1732), at not less than fair market value:

Mount Diablo Meridian, NV

T. 14 N., R. 20 E.,
Sec. 8, N½NW¼.
The parcel comprises 80 acres.

Seniors' Mobilehome Village, Inc., has requested a lease authorizing construction of a mobilehome park to benefit low income senior citizens. The proposal is consistent with land use planning for the site and the land is considered generally suitable for the proposed use. The development proposal will be evaluated in accordance with the National Environmental Policy Act to assess

impacts upon the filing of an application.

Information regarding the proposal can be reviewed at the Bureau of Land Management, Carson City District office. Environmental Assessments concerning the physical capabilities of the land are also available for review.

For a period of 45 days from the date of publication of this Notice in the **Federal Register** interested parties may submit comments to the District Manager, Bureau of Land Management, Carson City District Office, 1535 Hot Springs Road, Suite 300, Carson City, Nevada 89706. Any adverse comments will be evaluated and the Nevada State Director, Bureau of Land Management, may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this Notice will become the final determination of the Department of the Interior.

Norman L. Murray,

Acting District Manager, Carson City District.

Dated this 23rd day of September 1987.

[CA-060-07-4410-04]

Meeting of the California Desert District Advisory Council

SUMMARY: Notice is hereby given, in accordance with Public Laws 92-463 and 94-579, that the California Desert District Advisory Council to the Bureau of Land Management, U.S. Department of the Interior, will meet formally Thursday, October 29, 1987, beginning at 9 a.m. and Friday, October 30, 1987, beginning at 8 a.m., at the Carriage Inn, 901 China Lake Boulevard, Ridgecrest, California. A field trip to Short Canyon and Homewood Canyon will be conducted for Council members Thursday, October 29, from 1 p.m. to 5 p.m. Any members of the public wishing to participate in the field trip must provide their own transportation, food and beverages.

Agenda items will include a review and recommendations on the 1987 proposed amendments to the California Desert Plan; recommendations from the Council on the East Mojave National Scenic Area Management Plan; Council review and recommendations on the joint Draft Environmental Impact Statement/Environmental Impact Report on the Western Mojave Land Tenure Adjustment Project; and, staff reports on the status of plans for Afton Canyon, Desert Tortoise Natural Area and other ACEC plans scheduled for FY 1988; discussion of status of FY 1988 budget allocations (appropriations, State OHV and other sources); pipeline and utility right of way updates; and, briefings on current issues such as wilderness reclamation, Prado Basin oil and gas leases and El Mirage OHV project.

All formal Council meetings are open to the public, with time allocated for public comments and time for comment made available by the Council Chairman during the presentation of various agenda items.

Written comments may be filed in advance of the meeting with the California Desert District Advisory Council Chairman, Dr. Loren Lutz, c/o Bureau of Land Management Public Affairs Office, 1695 Spruce Street, Riverside, CA 92507.

FOR FURTHER INFORMATION AND MEETING CONFIRMATION: Contact the Bureau of Land Management, California Desert District, Public Affairs Office, 1695 Spruce Street, Riverside, CA 92507 (714) 351-6383.

Dated: September 25, 1987.

Wesley T. Chambers,

Acting, District Manager.

Minerals Management Service

Outer Continental Shelf Advisory Board; Policy Committee; Notice and Agenda for Meeting

This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Pub. L. No. 92-463, 5 U.S.C. Appendix 1, and the Office of Management and Budget's Circular No. A-63, Revised. The Policy Committee of the Outer Continental Shelf (OCS) Advisory Board will meet during the period 8:30 a.m. to 4:45 p.m., November 4, 1987, and 8:30 a.m. to 5 p.m., November 5, 1987, at the Holiday Inn—Emerald Beach to Corpus Cristi, Texas (512-883-5731).

The agenda for the meeting will cover the following principal subjects:

November 4

- EPA Report to Congress
  Impact of considering drilling muds, cuttings, and produced waters as toxic waste
- Impact of dredging on organisms and water quality
- Changes in agreements with coastal States regarding access to privileged and proprietary G&G data

November 5

- What constitutes an adequate biological/water quality monitoring program
- Effect of seismic activity on fish and fishing
- Gulf States perspective

The meeting is open to the public. Upon request, interested parties may make oral or written presentations to the Committee. Such requests should be made no later than October 16, 1987, to the OSC Policy Committee, Minerals Management Service, Department of the Interior, 18th and C Streets, NW., Washington DC 20240

Requests to make oral statements should be accompaned by a summary of the statement to be made. For more information, contact the Executive Secretary, John B. Rigg, at 202-343-3530.

Minutes of the meeting will be available for public inspection and copying at the Minerals Management Service, Department of the Interior, 18th and C Streets, NW., Washington, DC 20240.

Dated: September 29, 1987.

John B. Rigg,

Associate Director for Offshore Minerals Management.

National Park Service

Women's Rights National Historical Park Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 US.C. App. 1 section 10) that a meeting of the Women's Rights National Historical Park Advisory Commission will be held October 21, 1987.

The Commission was established pursuant to Public Law 96–607. The purpose of the Commission is to advise the Secretary of the Interior, or his designee, with respect to matters relating to the administration of Women's Rights National Historical Park.

The meeting will convene at the Park Visitors Center, 116 Fall Street, Seneca Falls, New York, from 7 a.m. to 8 a.m. and then move to the Old Village Hall, 136 Fall Street, Seneca Falls, New York, from 8 a.m. to 3 p.m.

The topic of discussion will be Funding Strategies for the Chapel Block.

The meeting is open to the public.

Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made to the official listed below at least seven days prior to the meeting. Further information concerning this meeting may be obtained from the Superintendent, Women's Rights National Historical Park, P. O. Box 70, Seneca Falls, New York 13148.

Dated: September 23, 1987.

Herbert S. Cables, Jr.,

Regional Director.

BILLING CODE 4310–70–M

Intent To Negotiate Concession Contract; West Park Hospital

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that ninety (90) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with West Park Hospital, authorizing it to provide medical services for the public at Yellowstone National Park, Wyoming for a period of seven (7) years from November 1, 1985, through October 31, 1992.

This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired October 31, 1985, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposal received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the ninetieth (90th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Regional Director, Rocky Mountain Region, P.O. Box 25287, Denver, Colorado, 80225, for information as to the requirements of the proposed contract.

Richard A. Strait,

Acting Regional Director, Rocky Mountain Region.

Dated: August 11, 1987.

[FR Doc. 87–22816 Filed 10–1–87; 8:45 am]

BILLING CODE 4310–67–M

Golden Gate National Recreation Area Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area Advisory Commission will be held at 7:30 p.m. (PST) on Tuesday, November 10, 1987 at the Building 201, Fort Mason, San Francisco, California.

The Advisory Commission was established by Public Law 92–589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service systems in Marin, San Francisco and San Mateo Counties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Vice Chair
Mr. Ernest Ayala
Mr. Richard Bartke
Dr. Howard Cogswell
Brig. Gen. John Crowley, USA (ret.)
Mr. Margot Patterson Doss
Mr. Neil D. Eisenberg
Mr. Jerry Friedman
Mr. Steve Jeong
Ms. Daphne Greene
Ms. Gimmy Park Li
Mr. Gary Pinkston
Mr. Merritt Robinson
Mr. R.H. Sciaroni
Mr. John J. Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The main agenda item will be a joint presentation by the staffs of Golden Gate National Recreation Area and the Presidio of San Francisco on plans for development of Crissy Field in San Francisco. The plans for those Crissy Field lands under U.S. Army management were developed by the Directorate of Engineering and Housing at the Presidio of San Francisco. Plans for the Golden Gate National Recreation Area portions of Crissy Field were developed with the assistance of John Northmore Roberts Landscape Architects and Land Planners of Berkeley, California, under the auspices of the Golden Gate National Park Association. The San Francisco City Planning Commission staff has also participated in the formulation of this plan. The joint U.S. Army/National Park Service planning effort has been undertaken to assure that the requirements of both the Army and the National Park Service are addressed in development of this critical urban shoreline.

The meeting is open to the public. Persons wishing to receive further information on this meeting or who wish to submit written statements may contact General Superintendent Brian O'Neill, Golden Gate National Recreation Area, Building 201, Fort Mason, San Francisco, California 94123.

This meeting will be recorded for documentation and transcribed for dissemination. Minutes of the meeting will be available to the public after approval of the full Advisory Commission. A transcript is available after December 4, 1987. For copies of the minutes contact the Office of the Staff Assistant, Golden Gate National

Recreation Area, Building 201, Fort Mason, San Francisco, California 94123.

Date: September 25, 1987.

John D. Cherry,

Acting Regional Director, Western Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-18 (Sub-No. 108X]

Exemption: The Chesapeake and Ohio Railway Co.; Abandonment in Ross County, OH

CXS Transportation (CSX) [1] has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its line of railroad between valuation station 4395+00 (milepost 83.33) near Scioto Junction and valuation station 4528+11 (milepost 85.85) near VA Junction, in Ross County, OH a distance of approximately 2.52 miles.

Applicant has certified that (1) no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line or may be rerouted and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from this abandonment.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen,* 360 I.C.C. 91 (1979).[2]

Grand Trunk Western Railroad Company has trackage rights over this line, and applicant acknowledges that discontinuance of trackage rights must be granted before this line can be abandoned. This notice of exemption is conditioned upon receipt of authority to discontinue Grand Trunk Western Railroad Company's trackage rights over the line in Docket No. AB-31 (Sub-No. 25X), *The Grand Trunk Western Railroad Co.—Exemption Abandonment—In Fayette, Ross and Pike Counties, OH,* filed August 10, 1987.

This exemption will be effective on October 30, 1987 (unless stayed pending reconsideration) or on the effective date of our decision in Docket No. AB-31 (Sub-No. 25X), whichever occurs later. Petitions to stay must be filed by October 12, 1987, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by October 22, 1987, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Lawrence H. Richmond, CSX Transportation, Inc., 100 North Charles Street, Baltimore, MD 21201.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: September 24, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 87-22669 Filed 10-1-87; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-No. 212 X)]

Exemption: CSX Transportation, Inc.; Abandonment of Service in Perry County, KY

Applicant has filed a notice of exemption under 49 C.F.R. 1152 Subpart F—*Exempt Abandonments* to abandon its 2.63-mile line of railroad between milepost VO-266.37 and milepost VO-269 in Perry County, KY.

Applicant has certified (1) that no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line or may be rerouted, and (2) that no formal complaint filed by a user of a rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from this abandonment.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen,* 360 I.C.C. 91 (1979).

The exemption will be effective November 2, 1987 (unless stayed pending reconsideration). Petitions to stay must be filed by October 13, 1987, and petitions for reconsideration, including environmental, energy and public use concerns, must be filed by October 22, 1987 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Charles M. Rosenberger, CSX Transportation, Inc., 500 Water St., Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: September 18, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-244 (Sub-No. 2X]

Abandonment Exemption in Comanche and Cotton Counties, OK; The Oklahoma, Kansas and Texas Railroad Co.

The Oklahoma, Kansas and Texas Railroad Company has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 15.5-mile line of railroad between milepost L-498.0 and milepost L-513.5 in Comanche and Cotton Counties, OK.

Applicant has certified that (1) no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line or may be rerouted, and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service

[1] Preliminary notice of the exemption was given by The Chesapeake and Ohio Railway Company (C&O) which was subsequently merged into CSXT. The docket number used by C&O is used here for continuity and to avoid confusion.

[2] The Railway Labor Executives' Association filed a request for labor protection. Since this transaction involves an exemption from 49 U.S.C. 10903, whereby the imposition of labor protective conditions is mandatory, those conditions have been routinely imposed.

over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from this abandonment.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective November 2, 1987 (unless stayed pending reconsideration). Petitions to stay must be filed by October 13, 1987, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by October 22, 1987 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Michael E. Roper, Oklahoma, Kansas and Texas Railroad Company, 701 Commerce Street, Dallas, TX 75202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: September 18, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 87-22390 Filed 10-1-87; 8:45 am]

BILLING CODE 7035-01-M

[No. 40154 [1]]

Extension of Expiration Date of Master Tariff Increases; Amendments No. 5 and 12 To Special Tariff Authority

Decided: September 25, 1987.

AGENCY: Interstate Commerce Commission.

ACTION: Date for filing comments extended 45 days and formal docket number assigned.

SUMMARY: On August 27, 1987 a notice was served requesting comments on a proposal for incorporation of master tariff increases in basic tariffs. (Published in the **Federal Register** at 52 FR 32611, August 28, 1987.) Comments on the proposal were due September 28, 1987. Based upon the requests received, I will extend the date comments are due for 45 days. I am also assigning the formal docket No. 40154 to this proceeding to facilitate processing.

DATES: Comments are due on November 12, 1987.

ADDRESSES: Please refer to docket No. 40154, and send (an original and 10 copies if possible) to: Office of the Secretary, Case Control Branch, Room 1324, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Elaine A. Sehrt, (202) 275-7899

or

Joseph H. Dettmar, (202) 275-7245 (TDD for hearing impaired: (202) 275-1721).

SUPPLEMENTARY INFORMATION: In this proceeding, the Commission has proposed an alternative approach for incorporation of master tariff increases in basic tariffs. Comments on this proposal were due September 28th. Eight requests for extensions of time to file comments have been filed.[2] Generally, the parties contend that the Commission's proposal requires analysis which cannot be completed within the 30 days allowed. They contend that time is needed to complete studies on the feasibility and effects of the proposal. I will grant an extension so that parties will have an opportunity to submit meaningful comments. However, the parties have not shown that 90 days are needed to prepare their analysis; accordingly, I will grant a 45-day extension. I would also assure the parties that this Commission is sensitive to shippers' concerns and will consider the issues they raise in this proceeding.[3]

Finally, to facilitate processing, this proceeding has been assigned a formal docket No. 40154.

This action will not significantly affect either the quality of the human environment or energy conservation, and will not have an impact on a substantial number of small entities.

Authority: 49 U.S.C. 10321 and 10762.

By the Commission, Chairman Heather Gradison.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Pollution Control; Lodging of Consent Decree Pursuant To The Clean Air Act; Atlantic Marine and Industrial Services, Inc., et al.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Atlantic Marine & Industrial Services, Inc.; John E. Snyder, Inc.; and the Franklin Borough Board of Education* was lodged with the United States District Court for the District of New Jersey on September 24, 1987. This agreement resolves a judicial enforcement action brought by the United States against the defendants which alleged violations of the Clean Air Act and the asbestos National Emission Standard For Hazardous Air Pollutants (NESHAP) at the Franklin Elementary School in Franklin, New Jersey.

The consent decree provides for compliance with the Clean Air Act and NESHAP and payment of $40,000 in settlement of the action.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed decree. Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to "*United States* v. *Atlantic Marine & Industrial Services, Inc.; John E. Snyder, Inc; and the Franklin Borough Board of Education*, D.J. Ref. 90-5-2-1-900."

The proposed consent decree may be examined at the office of the United States Attorney for the District of New Jersey or the regional office of the Environmental Protection Agency as follows:

U.S. Attorney

U.S. Attorney, District of New Jersey,

---

[1] This proceeding was originally numbered: Amendment No. 12 to Special Tariff Authority No. 80-1748 and Amendment No. 5 to Special Tariff Authority No. 84-8933.

[2] Requests were filed by: Rail Publication Services (Southern Freight Association and Traffic Executive Association—Eastern Railroad Agents); the Society of the Plastics Industry, Inc.; Himont U.S.A., Inc.; Hercules Incorporated and Aqualon Company; Dow Chemical U.S.A.; the National Industrial Transportation League; Chevron Chemical Company; and the Board of Trade of the City of Chicago.

[3] The request for a separate rulemaking proceeding should be addressed in the comments.

502 Federal Building, 970 Broad Street, Newark, New Jersey 07102

EPA

Office of Regional Counsel, Region II, 26 Federal Plaza, New York, New York 10278

A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice at the address above. In requesting a copy of the decree, please enclose a check payable to the Treasurer of the United States in the amount of $1.90 ($.10 per page reproduction cost).

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Antitrust Division

Notification Pursuant to National Cooperative Research Act; Bell Communications Research, Inc.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), Bell Communications Research, Inc. ("Bellcore") has filed written notifications on behalf of Bellcore and Vitesse Semiconducter Corporation, ("Vitesse") simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties of the joint venture and (2) the nature and objectives of the joint venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the joint venture, and its general areas of planned activities, are given below.

Bellcore is a Delaware corporation with its principal place of business at 290 West Mount Pleasant Avenue, Livingston, New Jersey 07039.

Vitesse is a Delaware corporation with its principal place of business at 741 Calle Plano, Camarillo, California 93010.

Bellcore and Vitesse entered into an agreement effective June 16, 1987 to collaborate on research to better understand the applications for exchange and exchange access services of technology related to monolithic integrated circuits utilizing Gallium Arsenide substrates.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in. Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be requred to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 534-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Connecticut Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

Bureau of Labor Statistics
Work Injury Report
1220-0047; BLS 980
Non-recurring
Selected injured workers
2,100 responses; 350 hours; 1 form

The Work Injury Report program examines selected types of work injuries/illnesses to develop information based on the data needs of the Occupational Safety and Health Administration. The current survey will focus on inhalation of toxic substances and assist in the development of safety standards, compliance and training programs.

Extension

Mine Safety and Health Administration
Radiation Sampling and Exposure Records
1219-0003
Weekly; annually
Businesses or other for profit; small businesses or organizations
35 respondents; 13,563 hours

Requires underground uranium mine operators and underground non-uranium mine operators, where concentrations of radon daughters exceed 0.3 WL, to calculate, record, and report to MSHA individual miner's exposures to concentrations of radon daughters.

Extension

Occupational Safety and Health Administration
Powered Platforms for Exterior Maintenance
1218-0121;
On occasion
Businesses and other for-profit;
19,500 respondents; 243,750 burden hours; no forms

OSHA is requiring this information to be collected by employers for determining the cumulative maintenance status of a powered platform and for taking the necessary preventive action to assure employee safety.

Signed at Washington, DC, this 29th day of September, 1987.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-43-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled, "General Wage Determinations Issued Under the Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled, "General Wage Determinations Issued Under the Davis-Bacon and Related Acts," being modified are listed by Volume, State, and page number (s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled, "General Wage Determinations Issued Under the Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the Country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest,

since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 25th day of September 1987.

Alan L. Moss,

Director, Division of Wage Determinations.

NATIONAL SCIENCE FOUNDATION

Task Force on Women, Minorities and the Handicapped in Science and Technology; Meeting and Public Hearing

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the task force followed by a public hearing on October 29, 1987.

Meeting

Name: Task Force on Women, Minorities, and the Handicapped in Science and Technology.

Date: October 29, 1987.

Time: 7:30 am—9:15 am.

Place: 35th Floor Conference Room, 300 South Wacker Drive, Chicago, Illinois 60606.

Type of meeting: Open.

Purpose: The purpose of the task force on Women, Minorities, and the Handicapped is to: examine the current status of women, minorities and the disabled in science and engineering positions in the federal government and in federally assisted research programs; coordinate existing Federal programs designed to promote the employment of women, minorities and physically disabled scientists and engineers; suggest cooperative interagency programs for promoting such employment; identify exemplary programs in the state, local or private sectors; and develop a long-range plan to advance opportunities for women, minorities, and disabled persons in science and technology.

Agenda: Reports will be heard on progress of the subcommittees on Employment, Research, Higher Education, Precollege Education, and Social Aspects, as well as other business of the task force.

Public Hearing

Name: Task Force on Women, Minorities, and the Handicapped in Science and Technology.

Date: October 29, 1987.

Time: 9:30 am—4:45 pm.

Place: 35th Floor Conference Room, 300 Wacker Drive, Chicago, Illinois 60606.

Type of meeting: Open.

Purpose: The task force will seek testimony from interested parties on innovative ways to increase opportunities for women, minorities and the handicapped in science and technology in the areas of employment, research, higher education, precollege education, and social aspects.

Testimony will be heard in three ways: 1) Scheduled testimony of ten-minute summary presentations accompanied by longer written statements and supporting documents for the record; 2) summary statements from the floor of 3-minute duration accompanied by any longer written statements or materials for the record; and 3) written testimony submitted to the task force offices from those who cannot be heard because of time constraints or those who cannot attend.

Anyone wishing to testify or submit a statement for the record should write Sue Kemnitzer, Executive Director, Task Force on Women, Minorities, and the Handicapped in Science and Technology; 330 C Street, SW; Washington, DC 20201.

All meetings and public hearings of the task force are open to the public and all proceedings will be recorded and will be available at the task force offices.

September 25, 1987.

Sue Kemnitzer,

Executive Director, (202) 245-7477.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Procedures for Meetings

Background

Procedures to be followed with respect to meetings conducted pursuant to the Federal Advisory Committee Act by the Nuclear Regulatory Commission's Advisory Committee on Reactor Safeguards, which were published October 20, 1986 (51 FR 37241), are renewed by this notice. These procedures are set forth in order that they may be incorporated by reference in future individual meeting notices.

The Advisory Committee on Reactor Safeguards (ACRS) is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a nuclear power reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements from members of the public to be considered as a part of the Committee's information gathering procedure, they are not adjudicatory hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety and Licensing Board as part of the Commission's licensing process. ACRS reviews do not normally encompass matters pertaining to environmental impacts other than those pertaining to radiological safety. ACRS full Committee and Subcommittee meetings are conducted in accordance with sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.).

General Rules Regard ACRS Meetings

An agenda is published in the **Federal Register** for each full Committee meeting and for each Subcommittee meeting which is partially or fully open to public

VOL 52 ISS 191 OC 2 1987 UMI

attendance. Practical considerations may dictate some alterations in the agenda. The Chairman of the Committee or Subcommittee which is meeting is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incomplete session from one day to the next.

With respect to public participation in ACRS meetings, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy at the beginning of the meeting. When meetings are held at locations other than Washington, DC, reproduction facilities are usually not available. Accordingly, 15 additional copies should be provided for use at such meetings. Comments should be limited to safety-related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy addressed to the Designated Federal Official specified in the **Federal Register** notice for the individual meeting in care of the ACRS, NRC, Washington, DC 20555. Comments postmarked no later than one calendar week prior to a meeting will normally be received in time for reproduction, distribution, and consideration at the meeting.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the beginning of the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether a meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call, on the working day prior to the meeting, to the Office of the Executive Director of the Committee (telephone: 202–634–3265, ATTN: the Designated Federal Official specified in the **Federal Register** Notice for the meeting) between 8:15 a.m. and 5:00 p.m., Washington, DC time.

(d) Questions may be asked only by ACRS Members, Consultants, and Staff.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc., being used during the meeting. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept.

(f) A copy of the transcript of the open portions of the meeting where factual information is presented will be available at the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555, for inspection within one week following the meeting. A copy of the minutes of the meeting will be available at the same location on or before three months following the meeting. Copies may be obtained upon payment of appropriate charges.

Special Provisions When Proprietary Sessions are To Be Held

If it is necessary to hold closed sessions for the purpose of discussing matters involving proprietary information, persons with agreements permitting access to such information may attend those portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that it can be confirmed and a determination made regarding the applicability of the agreement to the material that will be discussed during the meeting. The minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Designated Federal Official prior to the beginning of the meeting.

Dated: September 29, 1987.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

SMALL BUSINESS ADMINISTRATION

[License No. 02/02–0503]

Issuance of a Small Business Investment Company License; Bishop Capital, L.P.

On June 26, 1987, a notice was published in the **Federal Register** (52 FR 24083) stating that an application has been filed by Bishop Capital, L.P., Newark, New Jersey, with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 107.102 (1983)) for a license as a small business investment company.

Interested parties were given until close of business July 30, 1987, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 02/02–0503 on August 27, 1987, to Bishop Capital, L.P. to operate as a small business investment company.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

BILLING CODE 8025–01–M

Interest Rates; Quarterly Determinations

The interest rate on section 7(a) Small Business Administration direct loans (as amended by Pub. L. 97–35) and the SBA share of immediate participation loans is nine and five-eighths (9⅝) percent for the fiscal quarter beginning October 1, 1987.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 122.8–4(d)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the October-December quarter of 1987,

this rate will be eight and one-half (8½) percent.

Edwin T. Holloway,

Associate Administrator for Finance and Investment.

[Public Notice 1028]

Designation of Palestine Information Office as a Foreign Mission

Pursuant to the authority vested in me by the Foreign Missions Act, 22 U.S.C. 4301–4314 (hereinafter referred to as "the Act"), I hereby designate the Palestine Information Office ("PIO") as a "foreign mission" within the meaning of section 202 (a)(4) of the Act (22 U.S.C. 4302(a)(4)), in that the Palestine Information Office is a foreign mission as defined by that section.

Designation of the Palestine Information Office as a foreign mission is based on the following:

—It is an entity.

—It is substantially owned and/or effectively controlled by the PLO.

—The PIO conducts its functions on behalf of an organization which has received privileges and immunities under U.S. law. The PLO is accorded certain privileges and immunities by virtue of its status as an observer to the United Nations. Further, the PLO clearly engages in "some aspect of the conduct of international affairs," as evidenced by, for example, its membership in the League of Arab States and its status at the United Nations.

—It is involved in "other activities." The PIO registration statement under the Foreign Agents Registration Act indicates that the PIO engages in political activity and political propaganda on behalf of the PLO.

Dated: Septembe 15, 1987.

John C. Whitehead,

Deputy Secretary of State.

[FR Doc. 87-22781 Filed 10-1-87; 8:45 am]

BILLING CODE 4710-08-M

[Public Notice 1029]

Determination and Designation of Benefits Concerning Palestine Information Office

Pursuant to the authority of the President of the United States to conduct foreign affairs under Atricle II of the United States Constitution, including his authority to recieve ambassadors, and the authority vested in me by the Foreign Missions Act, 22 U.S.C. 4301–4314 (hereinafter referred to as "the Act"), I hereby determine that it is reasonably necessary to protect the interests of the United States to require that the Palestine Information Office cease operation as a mission representing the Palestine Liberation Organization.

The Palestine Information Office is being required to cease operation as a mission representing the PLO because of U.S. concern over terrorism committed and supported by individuals and organizations affiliated with the PLO, and as an expression of our overall policy condemning terrorism. The organizations and individuals associated with the PLO who support terrorism include, among others, Abu Al-Abbas, recently retained as a member of the PLO Executive Committee, who was responsible for the Achille Lauro hijacking, which included the murder of an American citizen, Leon Klinghoffer. At the Palestine National Congress meeting in April, 1987 other groups which have been responsible for terrorist acts in recent years against many peoples, including Palestinians, were reunited with the PLO. The United States supports the legitimate rights of the Palestinian people. It acknowledges and respects the right of the Palestinian people to achieve their legitimate rights through a process of peaceful negotiations designed to achieve a resolution of the Arab-Israeli conflict and the Palestinian issue. It is important that Palestinian representatives participate in all stages of that process However, the U.S. believes that acts of terrorism, committed purportedly on behalf of the Palestinian people by some groups and individuals associated with the PLO and others, have done grievous damage to the achievement of legitimate Palestinian rights which are broadly supported by individuals and states opposed to terrorism, but which support instead the peaceful settlement of disputes. Terrorism by this minority of Palestinians and their supporters has been a serious obstacle to the realization of a peaceful settlement of the Arab-Israeli conflict, and an accommodation between Israelis and Palestinians.

In order to achieve the objective of terminating operation of the Palestine Information Office as a foreign mission, I hereby also determine that it is reasonably necessary to protect the interests of the United States to require that the Palestine Information Office divest itself of all real property which it currently occupies or in which it has a real property interest (through ownership, lease or otherwise) in the United States, pursuant to 22 U.S.C. 4305(b)(3). I also hereby determine that it is reasonably necessary to protect the interests of the United States to require that the Palestine Information Office and its employees and agents acting on its behalf acquire and dispose of real property (by purchase, lease, exchange, construction or otherwise) from or through the Office of Foreign Missions under such terms and conditions as may be established by the Driector of the Office of Foreign Missions, pursuant to 22 U.S.C. 4304(b). In addition, and for the same purpose, under the authority of section 4303(b)(2) to protect the interests of the United States, I hereby designate as benefits for the purposes of the Act the acquisition from any person or entity subject to the jursidiction of the United States or use in the United States by the Palestine Information Office and its agents or employees acting on its behalf of the following services and goods:

Services

(1) Public utilities and services, including telephone and telegraph, mail, public transportation and sanitation services; and

(2) Personal services of individuals engaged within the United States for whatever purposes, whether on a temporary or regular basis. Such personal services include:

(a) Services relating to public relations, information, publishing, printing, advertising, distribution of literature, or mailing;

(b) Plumbing, electrical, construction, maintenance, engineering, architectural or related services;

(c) Packing, shipping, cartage and related services, including provision of packing materials; and

(d) Financial services.

Goods

(1) Motor vehicles;

(2) Construction equipment and materials;

(3) Equipment and materials for the maintenance of the mission, including typewriters, telephones, xerox machines and related materials;

(4) Computers and automated data processing equipment; and

(5) Furnishings for offices.

I hereby determine that it is reasonably necessary to protect the interests of the United States to require that the palestine Information Office and its agents or employees acting on its behalf discontinue use and dispose of all benefits defined in the Act and this Determination and Designation of Benefits which it currently owns or uses.

VOL 52 ISS 191 OCT 2 1987 UMI

I also hereby require that the Palestine Information Office and its employees and agents acting on its behalf acquire and dispose of all benefits defined in the Act or this Determination and Designation of Benefits from or through the Office of Foreign Missions under such terms and conditions as the Director of the Office of Foreign Missions may specify. 22 U.S.C. 4304(b).

The Palestine Information Office must comply with the terms of this Determination and Designation of Benefits within thirty days, unless further time is extended upon a showing of good cause.

It shall be unlawful for any person subject to the jurisdiction of the United States directly to supply, or contract to supply, the aforementioned benefits to the Palestine Information Office, or to any agent or employee thereof acting on its behalf, other than in accordance with section 4311(a) of the Act, this determination and any subsequent determination.

Persons wishing clarification as to the applicability of this determination or information on subsequent determinations may contact the Office of Foreign Missions, U.S. Department of State, Washington, DC 20520; or by telephone: (202) 647–3416.

Dated: September 15, 1987.

John C. Whitehead,

Deputy Secretary of State.

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea, Working Group on Radio Communications; Meeting Change

The October 15, 1987 meeting of the Working Group on Radio Communications of the Subcommittee on Safety of Life at Sea has been changed to October 22, 1987 at 0930 in room 9230 of the Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. The Working Group will discuss the following topic:

Global Maritime Distress Safety System (GMDSS). Members of the Public may attend the meeting up to the seating capacity of the room.

For further information contact LT McDannold, U.S. Coast Guard Headquarters (G–TTS–1/63), 2100 Second Street SW., Washington, DC 20593–0001. Telephone: (202) 267–1354.

Date: September 24, 1987.

Richard C. Scissors,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710–07–M

[Public Notice CM–8/1121]

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea, Working Group on Ship Design and Equipment; Notice of Meeting

The Working Group on Ship Design and Equipment of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting on November 5, 1987 at 9:30 a.m. in Room 2415 at Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of the meeting will be to discuss the activities of the 30th Session of the International Maritime Organization (IMO) Subcommittee on Ship Design and Equipment (DE), held June 1 to 5, 1987, and to prepare for the 31st Session of IMO DE, tentatively scheduled for March 7 to 11, 1988.

The major items of discussion will include the following:

1. Review of the Mobile Offshore Drilling Unit (MODU) Code—At the 30th Session of IMO DE, the MODU and Machinery and Electrical Installations ad hoc working groups, due to time limitations, were only able to consider Chapters 1 & 3–11 of the MODU Code with the following results: accepting in principle the proposed changes to Chapters 4 & 10, using the U.S. position as the base document for revision of Surveys and Certification, forwarding ongoing stability studies for consideration by the Subcommittee on Stability and Load Lines and on Fishing Vessels Safety at its 32nd Session, recommending that the MODU Code be considered as equivalent to rather than duplicative of SOLAS, urging the Subcommittee on Fire Protection to finalize its review of Chapter 9 at its 33rd Session, and proposing numerous amendments covering Chapters 5–8.

2. Materials other than steel for pipes—The Maritime Safety Committee (MSC) at its 53rd Session instructed the DE Subcommittee, in cooperation with the Subcommittee on Fire Protection, to consider a new agenda item covering materials other than steel for pipes. The DE Subcommittee agreed to establish a working group at its 31st Session with the goal of initially defining basic design parameters for various shipboard piping systems.

Other items of discussion include:

3. Maneuverability of ships, maneuvering standards.

4. Helicopter facilities offshore.

5. Operating mechanisms for watertight doors.

6. Below deck openings into cargo tanks.

7. Design and construction of sea inlets under slush ice conditions.

8. Requirements for purpose and non-purpose-built ships dedicated to the carriage of irradiated nuclear fuel.

9. Comprehensive Code on Alarms.

10. Amendments of regulations II–1/41, 42, and 43 of SOLAS, as amended.

11. Ventilation of vehicle decks during loading and unloading, surveillance of vehicle spaces, warning lights and operational procedures covering vehicle spaces.

12. Review of sections of the International Maritime Dangerous Goods (IMDG) Code.

Members of the public may attend up to the seating capacity of the room.

For further information contact Captain G. G. Piche, or Commander C. E. Bills, U.S. Coast Guard Headquarters (G–MTH), 2100 Second Street, SW., Washington, DC 20593–0001; Telephone: (202) 267–2967.

Date: September 23, 1987.

DEPARTMENT OF TRANSPORTATION

[Docket No. 45163, Order 87–9–62]

Aviation Proceedings; Order Instituting Spokane-Vancouver Service Case

AGENCY: Department of Transportation.

ACTION: Institution of *Spokane-Vancouver Service Case*, Docket 45163, Order 87–9–62.

SUMMARY: The Department has decided to institute the *Spokane-Vancouver Service Case*, Docket 45163, to select one primary and one backup carrier to provide scheduled foreign air transportation of persons, property, and mail between Spokane, Washington, and Vancouver, British Columbia, Canada. The proceeding will be set for an oral evidentiary hearing before an Administrative Law Judge. The Department is inviting interested air carriers to file applications for certificate authority to serve the route at issue.

DATES: Applications for Spokane-Vancouver certificate authority, motions to consolidate, petitions for leave to intervene, and petitions for reconsideration of Order 87–9–62, should be filed by October 23, 1987. Answers shall be due 7 calendar days thereafter. Parties to the docket listed above may obtain a service copy of the order by calling the Documentary Services Division, (202) 366–9329, or by writing to the address below.

ADDRESS: Applications (Spokane-Vancouver), motions to consolidate, petitions for leave to intervene and petitions for reconsideration of Order 87–9–62, should be filed in Docket 45163, addressed to the Documentary Services Division, U.S. Department of Transportation, 400 7th Street SW., Room 4107, Washington, DC 20590, and should be served on all parties in Docket 45163.

Dated: September 28, 1987.

Philip Haseltine,

Deputy Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q during the Week Ended September 25, 1987

The following applications for certificates of public convenience and necessity and foreign air carrier permits were file under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No. 45148

Date Filed: September 22, 1987
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 20, 1987

Description: Application of America West Airlines, Inc., pursuant to section 401 of the Act and Subpart Q of the Regulations applies for a certificate of public convenience and necessity authorizing it to engage in nonstop scheduled foreign air transportation of persons, property, and mail between the terminal point San Francisco, California and the coterminal points Calgary and Edmonton, Alberta, Canada and pursuant to section 401(g) (1) and (3) of the Act, to suspend or revoke the existing authority of United Air Lines, Inc. for that route.

Docket No. 45154

Date Filed: September 23, 1987
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 21, 1987

Description: Application of Continental Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations applies for a certificate of public convenience and necessity which will authorize Continental to provide foreign air transportation of persons, property and mail between Cleveland, Ohio, on the one hand, and Merida, Cancun, and Cozumel, Mexico, on the other hand.

Docket No. 45155

Date Filed: September 24, 1987
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 22, 1987

Description: Joint Application of Blue Bell, Inc., Wrangler Aviation, Inc. and W.A. Services, Inc. pursuant to section 401(h) of the Act and Subpart Q of the Regulations, requests the Department to disclaim jurisdiction over the transfer of certificate authority from Blue Bell to Wrangler as such a transfer is independent of any other subsequent proposed transactions and is a corporate reorganization which will result in a change of form, not substance.

Senior Executive Service; Departmental Performance Review Board

ACTION: This notice lists the membership of the Departmental Performance Review Board (PRB), superseding the list published in 52 FR 19793, May 27, 1987, in accordance with 5 U.S.C. 4313(c)(4).

Scope: This notice applies to all components within the Department of the Treasury.

Purpose: The purpose of the Board is to review proposed performance appraisals, ratings, bonuses and other appropriate personnel actions for incumbents of non-delegated SES positions. These positions include SES bureau heads, deputy bureau heads, bureau chief inspectors, and certain other positions. The Board makes recommendations to the Secretary or his designee as Apppointing Authority. The Board will perform PRB functions for other top bureau positions if requested. In addition, the Board will review proposed SES bonus distributions and Presidential Rank nominations from the bureaus upon request.

Composition of PRB: The Board shall consist of at least three members. In the case of an appraisal of a career appointee, more than half the members of the PRB shall consist of career appointees. The names and titles of the PRB members are as follows:

Chairperson, John F. W. Rogers, Assistant Secretary of the Treasury (Management)
Paul W. Bateman, Deputy Treasurer
Thomas J. Berger, Deputy Assistant Secretary (International Monetary Affairs)
William J. Bremner, Deputy Assistant Secretary (Federal Finance)
O. Donald Chapoton, Acting Assistant Secretary (Tax Policy)
James W. Conrow, Deputy Assistant Secretary (Developing Nations)
Roger M. Cooper, Deputy Assistant Secretary (Information Systems)

Robert A. Cornell, Deputy Assistant Secretary (Trade and Investment Policy)
William E. Douglas, Commissioner, Financial Management Service
Stephen J. Entin, Deputy Assistant Secretary (Economic Forecasting)
Eugene H. Essner, Deputy Director, U.S. Mint
Richard L. Gregg, Commissioner, Bureau of Public Debt
Stephen E. Higgins, Director, Alcohol, Tobacco and Firearms
Michael R. Hill, Inspector General
Francis A. Keating, II, Assistant Secretary (Enforcement)
Jill E. Kent, Deputy Assistant for Departmental Finance and Management
Robert J. Leuver, Director, Bureau of Engraving and Printing
Samuel T. Mok, Comptroller
Gerald Murphy, Fiscal Assistant Secretary
Michael J. Murphy, Senior Deputy Commissioner, Internal Revenue Service
Howard W. Nester, Deputy Director (Revenue Estimating)
Thomas P. O'Malley, Director, Office of Procurement
Katherine D. Ortega, Treasurer of the United States
Marcus W. Page, Deputy Fiscal Assistant Secretary
Charles B. Respass, Director, Facilities Management Division
Charles Schotta, Deputy Assistant Secretary (Arabian Peninsula Affairs)
Charles O. Sethness, Assistant Secretary (Domestic Finance)
John P. Simpson, Deputy Assistant Secretary (Regulatory, Trade and Tariff Enforcement)
Edward T. Stevenson, Special Assistant to the Assistant Secretary (Legislative Affairs)
Margaret D. Tutwiler, Assistant Secretary of the Treasury (Public Affairs and Public Liaison)
D. Edward Wilson, Jr., Deputy General Counsel
Gregory P. Wilson, Deputy Assistant Secretary (Financial Institutions Policy)
Robert B. Zoellick, Executive Secretary

BILLING CODE 4810–05–M

Intent to Examine Depreciation of Scientific Instruments, Rental Clothing, Horses, and Assets Used in the Manufacture of Electronic Components, Products, and Systems and Notice of Public Meetings

The Office of Depreciation Analysis intends to initiate studies of the depreciation of four classes of assets:

Scientific Instruments
Rental Clothing
Horses
Assets used in the manufacture of electronic components, products, and systems (Asset guideline class 36.0)

Pursuant to the mandates of the Tax Reform Act of 1986 (Pub. L. 99–514), the Office of Depreciation Analysis will solicit information relating to the anticipated useful life and anticipated decline in economic value of the above noted assets from the owners and users of these assets. This information, together with additional information such as the depreciation methods used in accounting for such assets in the taxpayer's financial reports, and the terms under which such assets are financed or leased, will be used to determine appropriate class lives for these assets.

The Office of Depreciation Analysis will hold public meetings with all interested parties to discuss the precise definition of the assets to be included in these studies, the specific nature of the information sought, and other related issues. The schedule for these meetings is as follows:

Scientific instruments, Friday, October 16, at 10:00–12:00 a.m.
Horses, Monday, October 19, at 2:00–4:00 p.m.
Assets used in the manufacture of electronic components, products, and systems, Friday, October 23, at 10:00–12:00 a.m.
Rental clothing, Monday, October 26, at 2:00–4:00 p.m.

All meetings will be held in Room 4121, Main Treasury Building, 15th Street and Pennsylvania Avenue, Washington, DC. Names of those wishing to attend these meetings, and any inquiries, comments, or other materials relating to these studies should be sent to: The Office of Depreciation Analysis, Room 4217, Main Treasury, Washington, DC 20220.

O. Donaldson Chapoton,

Acting Assistant Secretary (Tax Policy).

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains an extension and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) a description of the need and its use, (5) how often the form must be filled out, (6) who will be required or asked to report, (7) an estimate of the number of responses, (8) an estimate of the total number of hours needed to fill out the form, and (9) an indication of whether section 3504(h) of Public Law 96–511 applies.

ADDRESSES: Copies of the forms and supporting documents may be obtained from Patti Viers, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW., Washington DC 20420, (202) 233–2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Joseph Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: September 29, 1987.
By direction of the Administrator.

Frank E. Lalley,

Director, Office of Information Management and Statistics.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 191
Friday, October 2, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

COMMODITY FUTURES TRADING COMMISSION

TIME AND DATE: 11:00 a.m., October 2, 1987.

PLACE: 2033 K St., NW., Washington, DC, 8th Floor Conference Room.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Market Surveillance Matters.

CONTACT PERSON FOR MORE INFORMATION: Jean A. Webb, 254–6314.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 87–22863 Filed 9–30–87; 11:36 am]

BILLING CODE 6351–01–M

COMMODITY FUTURES TRADING COMMISSION

TIME AND DATE: 11:00 a.m., October 9, 1987.

PLACE: 2033 K St., NW., Washington, DC, 8th Floor Conference Room.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Market Surveillance Matters.

CONTACT PERSON FOR MORE INFORMATION: Jean A. Webb, 254–6314.

Jean A. Webb,

Secretary of the Commission.

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:05 p.m. on Thursday, September 24, 1987, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider (1) the application of Commonwealth Thrift and Loan, an operating noninsured industrial bank located near the intersection of Hawthorne and Sepulveda Boulevards, Torrance, California, for Federal deposit insurance; (2) a recommendation regarding an administrative enforcement proceeding initiated against an insured bank; and (3) matters relating to the possible failure of an insured bank.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: September 29, 1987.

Federal Deposit Insurance Corporation.

Corrections

Federal Register
Vol. 52, No. 191
Friday, October 2, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF ENERGY

Voluntary Agreement and Plan of Action To Implement The International Energy Program; Meeting

Correction

In the issue of Wednesday, September 23, 1987, in the document beginning on page 35756 in the third column, make the following correction:

On page 35757, in the first column, in the file line at the end of the document, "FR Doc. 87-21754" should read "FR Doc. 87-21954".

BILLING CODE 1505-01-D

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Correction

In notice document 87-22260 appearing on page 36303 in the issue of Monday, September 28, 1987, make the following corrections:

1. In the second column, the heading should read as set forth above.

2. In the table, in the heading the dates should read "September 1, 1987 and September 16, 1987".

3. In the first column, in the last line, the FR Doc. "Filed" date should read "9-25-87".

BILLING CODE 1505-01-D

Part II

Department of Health and Human Services

Food and Drug Administration

21 CFR Part 291

National Institute on Drug Abuse; Methadone in Maintenance and Detoxification; Joint Proposed Revision of Conditions for Use; Proposed Rule

VOL 52 ISS 191 OCT 2 1987 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 291

[Docket No. 83N-0249]

National Institute on Drug Abuse; Methadone in Maintenance and Detoxification; Joint Proposed Revision of Conditions for Use

AGENCY: Food and Drug Administration and National Institute on Drug Abuse.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) and the National Institute on Drug Abuse (NIDA) are proposing to revise the conditions for the use of methadone in maintenance and detoxification treatment. One revision would provide standards for long-term detoxification. This change is necessary because Pub. L. 98–509 revised the statutory definition of detoxification treatment from 21 days up to 180 days. Other proposed revisions do not involve major substantive changes but rather are designed to streamline the regulation, to delete the requirement that treatment programs using methadone submit annual reports to FDA, and to promote more efficient operation of methadone treatment programs. Another revision would convert to guidelines the provisions in the current regulation that do not impose specific requirements.

DATE: Comments by December 1, 1987.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert J. Meyer, Center for Drugs and Biologics (HFN–362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8049.

SUPPLEMENTARY INFORMATION:

Background

The conditions for the use of methadone in the maintenance and detoxification treatment of narcotic addicts are provided for in 21 CFR Part 291 (the methadone regulation). The methadone regulation also delineates the appropriate methods of professional practice for medical treatment of the narcotic addiction of various classes of addicts (see 21 CFR 291.505). The methadone regulation was last reviewed, evaluated, and substantially revised in the **Federal Register** of September 19, 1980 (45 FR 62694).

Under the Regulatory Flexibility Act, the Paperwork Reduction Act of 1980, and Executive Order 12291, FDA is conducting a retrospective review of its existing regulations. The purpose of the review is to identify regulations that should be revised or revoked. FDA encouraged public participation in this process by publishing a notice in the **Federal Register** of July 14, 1981 (46 FR 36333) seeking public comment on which regulations are burdensome, and by establishing agencywide review priorities including incorporation of retrospective review status reports into the agency's regulation planning process. Also, by notice published in the **Federal Register** of August 5, 1983 (48 FR 35668), FDA, at the request of the Office of Management and Budget (OMB), announced its intention to propose changes with regard to the collection of information requirements in the methadone regulation.

Accordingly, in the **Federal Register** of September 13, 1983 (48 FR 41049), FDA and NIDA published a notice of intent and request for comments. The September 13, 1983, notice focused on whether FDA and NIDA should make portions of the methadone regulation into guidelines and whether the agencies should modify the recordkeeping and reporting requirements. An additional issue involved whether revising the requirements would impair enforcement and compliance with the regulation, affect the quality of patient care, and increase the likelihood of the diversion of methadone for illicit use.

Summary of the Proposal

The methadone regulation has, in general, facilitated the efficient and safe management and rehabilitation of narcotic addicts. According to most of the comments received on the September 1983 notice, the requirements of the methadone regulation are generally neither unreasonable nor burdensome. In fact, most comments argued that the methadone regulation should not be substantially revised. FDA and NIDA agree, and the proposed rule generally retains current requirements necessary to achieve the goals of the 1974 Narcotic Addict Treatment Act (NATA) (21 U.S.C. 823(g)) without substantial change, except for the proposed revision regarding the length of time allowed for detoxification treatment. This change is necessary in light of a recent amendment to the Controlled Substances Act (CSA) (21 U.S.C. 801 et seq.) that now allows detoxification treatment to extend up to 180 days, as opposed to the 21 days provided formerly in the law and currently in the regulation. The recent amendment requires that this change be implemented through regulation; during the interim period before the new rule implementing the 180-day period becomes final, FDA will not take enforcement action against treatment centers that are otherwise in compliance with the existing regulations, but that provide detoxification treatment for periods up to 180 days as provided in the proposed rule.

FDA and NIDA are proposing many revisions that are designed to streamline the regulation and to promote more efficient operation of methadone treatment programs. The responses to the comments that follow discuss in detail the proposed revisions. The most significant of the revisions involves the development of separate guidelines consisting of those provisions of the current regulation that are not legal requirements. Although these provisions are, in effect, already guidelines, their inclusion in the Code of Federal Regulations makes it difficult to distinguish them from other provisions that are legal requirements. Accordingly, the paragraphs in the current regulation that begin with the phrase: "It is recommended practice that * * *" are not contained in the proposed regulation and will be incorporated into guidelines that FDA and NIDA will make available at the time a final rule resulting from the proposal is published in the **Federal Register**.

Comments

In response to the September 13, 1983, notice, the agencies received 47 comments. Government authorities and agencies, including Federal agencies (Drug Enforcement Administration and Veterans' Administration), State agencies (Single-State Authorities, Departments of Health, and a Department of Correction), and county and city health or "substance abuse" agencies submitted most of the comments (about 60 percent). Many privately operated treatment programs and three private physicians also submitted comments. The American Medical Association also commented.

1. One comment favored any change in the regulation that would emphasize the rehabilitation aspects of treatment.

The methadone regulation already emphasizes the rehabilitation aspects of treatment. For example, several paragraphs of the regulation are devoted to the development of an initial treatment plan and periodic treatment plan evaluations. These plans help to ensure that patients receive the necessary psychosocial, economic, legal, and other supportive services available

at the program and in the community. The current regulation also already requires that a comprehensive range of medical and rehabilitation services be provided to patients. Counselors are assigned to each patient to help ensure that patients participate, for example, in educational or job training programs or obtain gainful employment. Accordingly, FDA and NIDA believe that no major or substantive revisions in this area are necessary.

2. Several comments stated that the statutory requirement that detoxification be completed within 21 days is unrealistic. The comments suggested that the regulation allow a longer time period for detoxification or that the time frames should be within the treating physician's discretion.

The statutory definition of detoxification treatment in the CSA has been revised and now allows detoxification treatment to extend up to 180 days. See Pub. L. 98–509, enacted on October 19, 1984, which amends 21 U.S.C. 802(28). The legislative history to Pub. L. 98–509 provides that, "* * * it would appear to be more efficacious to permit, *when appropriate,* a long-term detoxification period which is more humane and increases client retention, * * *" (emphasis supplied). FDA and NIDA agree that for some patients (not all patients) a detoxification period in excess of 21 days is appropriate. Accordingly, the agencies are proposing two types of detoxification treatment: short-term detoxification treatment and long-term detoxification treatment (see proposed § 291.505(a)(1) for the definitions of the two terms). The agencies are soliciting comments on the usefulness of these two definitions, and on whether it is appropriate to provide separately for short-term and long-term treatment as outlined below.

The agencies are proposing that short-term detoxification treatment would have essentially the same requirements as the current detoxification requirements except that treatment may last 30 days. The agencies believe that the 30-day period, for those for whom detoxification is the treatment of choice, would lessen the chance that a patient would suffer from withdrawal. This would be the case, for example, for a patient whose initial or stabilizing dosing requirements are relatively high (more than 40 milligrams of methadone). The agencies believe that 30 days instead of the 21 days previously allowed is more consistent with normal recordkeeping, reporting, accounting practices, and available clinical data.

The agencies are proposing that long-term detoxification treatment require, among other things, that a program physician document that short-term detoxification is not a sufficiently long enough treatment course for rehabilitation and that the services supplied during long-term detoxification treatment (e.g., employment or educational counseling, monthly testing for drug use, treatment plans and treatment plan evaluations, and the full range of medical and rehabilitative services required for maintenance patients) would benefit the patient. The proposed long-term detoxification regulation would also allow no more than a 1-day supply of take-home medication, whereas no take-home medication is permitted in short-term detoxification treatment.

The requirement that the program physician document that long-term detoxification is necessary for rehabilitation is designed to ensure that not all detoxification patients are indiscriminantly placed in longer-term treatment. The agencies believe that the requirement is necessary because clinical experience shows that short-term detoxification does work for some patients. The requirement reflects the fact that the goal of detoxification treatment is to help a patient achieve a drug-free existence in as short a time as is consistent with effective treatment.

The agencies are proposing to permit that programs may issue a 1-day take-home supply of methadone to a patient assigned to long-term detoxification treatment. The agencies recognize that many programs offering long-term treatment are not in operation 7 days a week and that it may not be a feasible for a patient to come to the program facility 7 days a week over a period of 6 months. Also, the agencies believe that there may be some patients receiving long-term treatment who exhibit greater responsibility in handling methadone than patients receiving short-term detoxification treatment. FDA and NIDA are especially interested in receiving comments on this aspect of the proposed regulation (see proposed § 291.505(d)(8)).

3. A few comments suggested that all Federal involvement concerning methadone should end because States are already responsible for licensing, monitoring, and implementing the prescribing of methadone and because each State could regulate the area according to its own specific needs.

States are responsible for many of the aspects of regulating the use of methadone. The involvement of Federal agencies in the regulation of the use of methadone in the treatment of addicts, however, is required by NATA. Congress enacted NATA to ensure that only bona fide narcotic addicts are admitted to maintenance or detoxification treatment and that they receive quality care. Another reason for NATA was to limit the potential for illicit diversion of addictive substances used in the treatment of narcotic addition. NATA also sets out minimum standards for the treatment of narcotic addicts with methadone.

4. One comment called for the elimination of the minimum staffing ratio of 1 counselor to 50 patients (current § 291.505(d)(7)(iii)) because, although patients recently admitted to treatment may need counseling, those patients who have been in treatment for some time (e.g., those who have made progress in rehabilitation, working, or in school) need less intensive counseling. Another comment wanted the patient to counselor ratio changed from 1 to 50 to 1 to 30 so that effective clinical intervention can take place.

While the agencies believe that a 1 to 50 counselor/patient ratio is generally reasonable, the agencies have decided that there may be circumstances in which greater flexibility is required. For example, some methadone treatment programs that have been in operation a number of years may have a considerable number of patients who have been treated for 3 years or more and have made considerable progress in rehabilitation; in such circumstances, the need for counselors could be much less than for programs with proportionately greater numbers of "new" patients. The agencies have, therefore, decided to eliminate the requirement for a minimum of 1 counselor for every 50 patients, and to rely on the principles expressed in proposed § 291.505(d)(5) to provide flexibility and an adequate framework for determining staffing requirements. This would not prohibit a finding that the circumstances of a particular program required a counselor to patient ratio as low as the 1 to 30 sought by 1 comment.

5. One comment asked that the take-home requirements be revised to allow a program the flexibility to provide for more than a 2-week supply of medication for a patient on maintenance treatment who desires to or must travel. Another comment requested that the take-home requirements be revised to provide the treating physician with the discretion to determine how much take-home medication a program can provide. Another comment asked that the take-home requirements be liberalized to reduce the required number of visits to or contacts with the clinic or program. The comment reasoned that such a modification would

help reduce the crowding at programs and the opportunities for illicit dealings. Another comment suggested that the limit of 1-day take-home for patients during the first 3 months of treatment be removed because it was inconvenient for some patients, especially those living far away from their programs. Other comments asked that the regulation be revised to permit programs to limit or restrict take-home medication to a 2-day supply.

In adopting the requirements in the current regulation concerning take-home medication, the agencies recognized that regular attendance at a treatment program may not always be compatible with a patient's employment, family responsibilities, and other obligations. At the same time, however, the agencies recognized that illicit diversion may occur when patients take medication from the treatment program for self administration. FDA and NIDA believe that the current requirements strike a necessary balance between the risk of diversion and the benefit of enhancing a patient's progress toward rehabilitation and, therefore, should not be substantively revised. The comments that requested stricter take-home rules overlook the fact that the methadone regulation does not mandate that take-home privileges be made available. In fact, the regulation provides that any treatment program may choose not to allow take-home medication at all or may choose to impose stricter requirements than the minimum Federal requirements contained in the regulation.

6. One comment requested the revocation of all the requirements that may limit a program's capacity to treat patients, e.g., minimum staffing requirements.

As explained in comment 4 above, the minimum staffing requirement of 1 counselor for every 50 patients is proposed to be eliminated. In addition, the agencies are proposing to delete the requirement at current § 291.505(b)(2)(i) that the number of patients treated at a methadone treatment medication unit may not exceed 30 patients. The agencies believe that the requirements for program approval by the State authority and the Drug Enforcement Administration are sufficient to ensure that medication units are of appropriate size.

7. Comments requested the deletion of the 2-year limitation in current § 291.505(d)(3)(iii)(C) concerning the 2-year time limit on the readmission of previously treated patients without evidence of current physiologic addiction.

As is discussed above, Congress enacted NATA to ensure, among other things, that only narcotic addicts are admitted to maintenance or detoxification treatment. FDA and NIDA believe that some minimum admission criteria are necessary to ensure that only those who need treatment are admitted. The 2-year limit on readmission is necessary and reasonable because over 90 percent of patients who return to drug use after detoxification do so within the first 2 years (see 45 FR 62697; September 19, 1980).

8. One comment stated that "longtime, well-established" patients do not need many, if any, rehabilitation services, do not need treatment plans, and do not need treatment plan evaluations or updates. Another comment added that the regulation should be revised to require counseling for patients who have been in treatment for 2 years or more only on an as needed schedule. Other comments stated, however, that the treatment plan requirements including periodic evaluations must be kept as regulations because they are the key to successful treatment.

Rehabilitation services included in treatment plans and treatment plan evaluations and updates are important to successful treatment because they are part of the remedial approach that will be used to address the medical, psychosocial, economic, legal, and other problems a patient may have. The agencies agree that newly admitted patients are more likely to need and benefit from these types of requirements than patients who have been in treatment for some time and who show good progress towards rehabilitation. Therefore, the agencies are proposing to revise these requirements to allow treatment programs to focus the resources for these types of services on those patients who need them the most. The proposed changes make clear that these services would be discretionary for patients either who are not ready for such services or who show substantial progress in rehabilitation, i.e., the program physician can decide if the services are needed for such patients (see proposed § 291.505(d)(3)(v)(D) and current § 291.505(d)(6)(v)(B)).

9. Two comments asked that the minimum urine testing requirements be eliminated and left entirely to the physicians' discretion. Another comment suggested that all the urine testing requirements be made guidelines. Another comment suggested that the urine testing requirements be revised so that only the type of drugs prominent in the particular program area be tested for, i.e., that not every program be required to test patient's urine for drugs that may not affect a patient's treatment progress. Other comments stated that urine testing was one area that should not be converted to guidelines because it would have negative consequences on treatment programs, and that more, not less, urine testing should be required.

An objective evaluation (by someone other than the program staff or the patient) is necessary to determine whether there is diversion of take-home medication and whether there is risk of the patient suffering a drug overdose. The agencies also believe that it is important to the patient as well as to the program to require a minimum drug-screening testing because it is an important way to objectively monitor and assess a patient's clinical course. Monitoring is especially important because certain patient benefits (e.g., take-home privileges and reduced attendance at programs) are determined in large part by a patient's progress in rehabilitation, including the absence of diversion and abuse by the patient.

Therefore, FDA and NIDA are not proposing any changes in the existing regulation concerning the initial drug-screening testing requirements and the existing requirements for a monthly test for 6-day take-home patients. The agencies do propose, however, to revise current § 291.505(d)(4) to allow for different testing or analyses to meet these minimum requirements, e.g., blood testing. FDA and NIDA welcome comments suggesting other appropriate objective analyses methods. FDA and NIDA also recommend that programs require more analyses if they deem them necessary or useful. Finally, the agencies believe that each program must test for opiates, methadone, cocaine, amphetamines, and barbiturates. The agencies are unaware of any data that would merit deleting the testing requirement for any of these substances. Therefore, the agencies have retained the requirement in the proposed regulation. The requirement, however, does not preclude the testing for other substances if the testing is desired by the program physician or required by the State authority (see proposed § 291.505(d)(2)).

10. One comment requested the agencies to amend the regulations to require or recommend "ongoing psychotherapy."

Any treatment program or State authority in its discretion may require "ongoing psychotherapy." FDA and NIDA do not believe it is necessary to require it for all patients in all programs

and are, therefore, not proposing to modify the regulation as requested.

11. One comment suggested eliminating the requirement that methadone be dispensed in liquid form only. The comment stated that no diversion would result if this were done.

FDA and NIDA believe that diversion would increase if methadone were dispensed in nonliquid form, e.g., tablets. Tablets would be very easy to hide, hard to detect, and, thus, could easily be diverted.

12. One comment suggested that the Federal regulation be made stricter concerning screening of applicants for program sponsorship.

FDA and NIDA do not conduct investigations concerning the character of applicants who apply to sponsor a narcotic treatment program. The State and local authorities are in a better position to have knowledge of the character of the sponsor. However, the application submitted by a sponsor to FDA is scrutinized closely to ensure that appropriate protocol, facilities, personnel, including physicians, nurses, and counselors, are part of the program. FDA grants program approval only after receipt of the recommendations for approval from (1) the State methadone authority that the applicant meets the State's standards and (2) the Drug Enforcement Administration (DEA) that the applicant meets DEA's security and recordkeeping requirements. Therefore, FDA and NIDA believe that it is not necessary to propose the requirements suggested in the comment.

13. One comment suggested that the current regulation is too flexible and that, therefore, the standards from the Joint Commission of Hospital Accreditation Consolidated Standards for Alcoholism and Drug Abuse Facilities (Joint Commission) should be adopted.

FDA and NIDA are proposing changes to the current methadone regulation to increase, not decrease, the flexibility of the clinical standards. Furthermore, FDA and NIDA believe that the Joint Commission's standards are inappropriate for the methadone regulation. For example, the Joint Commission's standards are not specific to drug abuse, i.e., they are intended also to apply to alcohol abuse. The agencies believe, therefore, that Federal regulation provides more meaningful guidance concerning the appropriate methods of professional practice for medical treatment of narcotic addiction than will the Joint Commission's standards.

14. One comment suggested that the regulation be revised to provide that no Federal inspection of treatment programs should be conducted if State inspections are conducted and conducted well.

The regulation does not need to be revised to implement this suggestion. The regulation has not prevented FDA from entering into contracts with States to conduct inspections of treatment programs. Several such contracts were in effect between 1975 and 1981. Under these contracts, State agencies inspected treatment programs to determine compliance with both State and Federal requirements. No separate or additional FDA inspection was necessary after a State inspection, conducted pursuant to contract, resulted in the finding that a program was operating in compliance with Federal requirements.

15. One comment said that the requirement for keeping records of batch or code marks is unnecessary and should be eliminated.

The requirement for keeping batch and code mark records (current § 291.505(d)(15)(ii)) is in keeping with the more extensive recordkeeping and reporting regulations of DEA regarding security of drug supplies. See, for example, 21 CFR 1304.28 and 1304.29. The requirements provide important checks on the illicit diversion of stocks of narcotic drugs. Batch and code mark records are also important in carrying out efficient recalls of defective drug stocks. The records are also invaluable in those rare, but critical situations where patients who have received drugs from a particular batch or drug must be identified.

16. One comment requested that the regulation be revised to permit the administration of more than 100 milligrams (mg) of methadone to patients who need it.

The regulation does not require preapproval of the administration of doses of more than 100 mg of methadone, but it does require, at current § 291.505(d)(8)(i)(*d*), notification to FDA and the State authority within 72 hours when a patient is administered such a dose. The proposed regulation deletes this notification requirement because the agencies believe that the purposes of the regulation are adequately achieved by the provision that a licensed physician shall ensure that a daily dose greater than 100 mg is justified in the patient's record. The regulation also provides that the program physician who administers a dose of more than 100 mg of methadone must ensure that the dose is justified. An additional provision (current § 291.505(a)(8)(v)(D)) requires that patients receiving more than 100 mg of methadone must be kept under regular observation. These requirements help protect against the illicit diversion of methadone and also ensure that patients will be observed for signs of overdose.

17. One comment said that the reporting requirements concerning (1) patient deaths and (2) newborns of patients showing adverse reactions are not clear. The comment recommended eliminating the requirements unless more specific reporting standards are developed and more in depth analyses are required in evaluating the data received.

Because of the novelty involved in using an addictive drug to treat addiction, FDA and NIDA in promulgating the regulations required that specific information concerning adverse reactions to methadone be reported in addition to the adverse reaction information already specifically required under § 314.80 (21 CFR 314.80). These specific reporting requirements are contained in current § 291.505(d)(13)(i) and (ii). In light of the experience the agencies have gained over the years in this area, the agencies now believe that there is no longer a need for the special reporting requirements and are proposing to delete them from the regulation.

18. One comment suggested that the regulation be revised to include a definition (and presumably specific regulations) for "iatrogenic treatment."

Patients with iatrogenic addiction (medically related addiction) are not excluded from treatment by the existing regulatory scheme. Any practitioner who wishes to treat an iatrogenically addicted patient may apply for a one-patient program approval. Also, a treatment program may, on a case-by-case basis, follow the exemption procedure under current § 291.505(d)(12) to treat such patients separately. The agencies, therefore, do not believe it is necessary to issue any additional regulations for such patients.

19. One comment requested that the regulation include specific criteria for dealing with maintenance patients who have been arrested and are expected to be incarcerated. The comment suggested that the regulation require that patients be detoxified prior to trial, and if that is not possible, to require that patients be detoxified during any subsequent incarceration (assuming incarceration is to exceed 3 weeks). The comment mentioned that the American Medical Association in its "Standards for Health Services in Jails" has specified suitable detoxification schedules.

FDA and NIDA believe that the issues raised by this comment are best dealt

VOL

ISS
191
OC
2
1987
UMI

with by the State and/or local jurisdictions involved.

20. One comment suggested that new treatment programs not be approved by FDA and that existing programs not be allowed to expand unless the new program can show that there is a need in the area for additional treatment facilities.

The State and local entities are in the best position to determine whether new programs or expanded treatment program facilities are needed in a given jurisdiction. The agencies do not believe that it is appropriate to prescribe the extent to which State and local entities should document the need for additional treatment facilities.

21. One comment suggested that all Federal regulations dealing with methadone be placed in one document so that it would be easy for an affected party to comply.

All of the regulations issued jointly by FDA and NIDA on drugs used in the treatment of narcotic addiction are included in 21 CFR Part 291. In addition, DEA's regulations in this area are included in 21 CFR Part 1300 to end. Copies of these volumes are available in most major libraries or may be obtained from the Government Printing Office, Washington, DC 20402.

22. One comment requested that the regulation be revised to require that a patient be ineligible for treatment if the patient misses appointments for 1 month without notifying the program. The current regulation (§ 291.505(d)(15)(iii)) provides for a 2-week period, which the comment believes is too strict.

In FDA's and NIDA's view, the current requirement is not too strict. A patient who misses appointments may be demonstrating that he or she does not need his or her usual stabilization dose, is abusing other narcotic drugs, or is not committed to treatment. Therefore, upon return to the program, the patient is considered to be readmitted and must be stabilized to protect against the danger of overmedication and the possibility of illicit drug diversion.

23. One comment wanted the word "physician" changed throughout the regulations to "program director" or a similar phrase except where purely medical areas and decisions are involved. The reason for the request, the comment said, is to make it clear that the person who is required to monitor, evaluate, and be responsible for the services of the entire methadone treatment program need not be a physician.

Current § 291.505(c)(1) already states that the program sponsor is responsible for the operation of a treatment program and that the sponsor need not be a licensed practitioner (physician). A medical director, however, licensed to practice medicine in the jurisdiction in which the program is located, must direct the medical affairs of the program (see current § 291.505(d)(6)(ii)). Also, the agencies are unaware of the use of the word "physician" in places other than where medical areas or decisions are involved. Accordingly, the agencies do not believe that the requested revisions are necessary.

24. A comment submitted by two treatment programs objected to the requirement that the program physician review and countersign the patient's treatment plan at least annually and suggested that the supervisory counselor could conduct the annual review and also countersign the plan. Another comment stated, however, that the requirement should remain unchanged.

As discussed above, FDA and NIDA believe that counseling, rehabilitative services, and treatment plans, including periodic treatment plan evaluations, are important tools that treatment programs need to use to help ensure quality patient care. The agencies also believe, however, that these tools may be generally more beneficial to newer patients than to "older" patients who have demonstrated good, steady, and substantial progress towards rehabilitation. (See discussion under comment 8 above.) Thus, FDA and NIDA are proposing to revise current §§ 291.505(d) (5)(vi) and (6)(ii)(E) so that it is clear that the supervisory counselor—instead of a program physician—may conduct the annual review and sign the treatment plan but only for certain qualified patients who have been in treatment for 3 years or more. For patients in treatment for less than 3 years, no rule changes are proposed. The agencies believe that during the first 3 years of maintenance treatment it is important to have the treating physician closely involved in the treatment plan procedures. See proposed §§ 291.505(d) (3)(v) and (4)(ii)(E).

25. One comment suggested the establishment of a pilot program to determine whether maintenance treatment should be expanded beyond formal treatment programs, i.e., to allow physicians in the private practice setting to offer maintenance treatment.

Although approximately 95 percent of applications for narcotic treatment programs involve fairly large patient populations, the current regulation already provides for much smaller programs, i.e., one or two patient programs in a private practice setting. Because smaller "programs" already exist under the current regulation, there is no need to establish new or additional Federal regulations for a pilot program as requested.

26. The proposed rule contains editorial revisions to the current regulation. These revisions include moving sections or subsections of the existing regulation that are definitional in nature into the definition section of the regulation (current § 291.505(a)) and deleting the word "methadone" where it is not necessary and adding the word "narcotic" in its place where appropriate, e.g., methadone treatment program would become narcotic treatment program and methadone maintenance treatment would become maintenance treatment. These minor changes are not substantive and would not affect the substantive requirements of the existing rule. Simply stated, the changes would make the existing regulation clearer and more easily understood.

27. The proposed rule eliminates the requirement at current § 291.505(c)(4)(iii) for submission of Form FDA–2634 "Annual Report for Treatment Program Using Methadone." FDA is proposing to eliminate this requirement because data from the report are not routinely utilized for any specific purpose and are considered to be of very little value, particularly as compared with the burden of preparing, assembling, and reviewing the data. FDA believes that the information collected on the form has no practical utility, as the term is used in the Paperwork Reduction Act of 1980, and that continued use of the form is thus not allowable under that Act.

Environmental Impact

The agency has determined under 21 CFR 25.24(a) (8) and (11) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Economic Impact

The agency has examined the regulatory impact and regulatory flexibility implications of the proposed rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). The agency finds that the proposed rule is not a major rule inasmuch as the revisions proposed would not result in any increase in cost (significant or otherwise) to narcotic treatment programs or to the State and local authorities that would enforce the proposed rule. Moreover, this proposed rule would provide treatment programs with more flexibility than exists under

the current regulation and thus allow such programs alternative and presumably more cost efficient means to comply with the proposed requirements. For these reasons, therefore, the agency has determined that the proposed rule is not a major rule as defined in Executive Order 12291. Further, FDA certifies that the proposed rule will not have a significant impact on a substantial number of small entities as defined by the Regulatory Flexibility Act.

Paperwork Reduction Act of 1980

Section 291.505 of this proposed rule contains collection of information requirements. In addition, this proposed rule would delete the information collection requirement at current § 291.505(c)(4)(iii) for submission of Form FDA-2634 "Annual Report for Treatment Program Using Methadone." As required by section 3504(h) of the Paperwork Reduction Act of 1980, FDA has submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these collection of information requirements. Other organizations and individuals desiring to submit comments on the collection of information requirements should direct them to FDA's Dockets Management Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, Rm. 3208, New Executive Office Bldg., Washington, DC 20503, Attn: Desk Officer for FDA.

Request for Comments

Interested persons may, on or before December 1, 1987, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 291

Health professions, Methadone, Reporting and recordkeeping requirements.

Therefore, under the Comprehensive Drug Abuse Prevention and Control Act of 1970, the Narcotic Addict Treatment Act of 1974, and applicable delegations of authority thereunder, and under authority delegated to the Commissioner of Food and Drugs, it is proposed that Part 291 be amended as follows:

PART 291—DRUGS USED FOR TREATMENT OF NARCOTIC ADDICTS

1. The authority citation for Part 291 is revised to read as follows:

Authority: Secs. 505, 701(a), 52 Stat. 1052–1053 as amended, 1055 (21 U.S.C. 355, 371(a)); sec. 303(a), 70 Stat. 929 as amended (42 U.S.C. 242a(a)); sec. 4, 84 Stat. 1241 (42 U.S.C. 257a); sec. 3, 88 Stat. 124–125 (21 U.S.C. 823(g)); 21 CFR 5.10.

2. By revising § 291.505 to read as follows:

§ 291.505 Conditions for the use of narcotic drugs; appropriate methods of professional practice for medical treatment of the narcotic addiction of various classes of narcotic addicts under section 4 of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

(a) *Definitions.* As used in this part:

(1) "Detoxification treatment" means the dispensing of a narcotic drug in decreasing doses to an individual to alleviate adverse physiological or psychological effects incident to withdrawal from the continuous or sustained use of a narcotic drug and as a method of bringing the individual to a narcotic drug-free state within such period. There are two types of detoxification treatment: short-term detoxification treatment and long-term detoxification treatment.

(i) "Short-term detoxification treatment" is for a period not in excess of 30 days.

(ii) "Long-term detoxification treatment" is for a period more than 30 days but not in excess of 180 days.

(2) "Maintenance treatment" means the dispensing of a narcotic drug in the treatment of an individual for dependence on heroin or other morphine-like drugs.

(3) A "medical director" is a physician, licensed to practice medicine in the jurisdiction in which the program is located, who assumes responsibility for the administration of all medical services performed by the narcotic treatment program including ensuring that the program is in compliance with all Federal, State, and local laws and regulations regarding the medical treatment of narcotic addiction with a narcotic drug.

(4) A "medication unit" is a facility established as part of but geographically dispersed, i.e., separate from a narcotic treatment program from which licensed private practitioners and community pharmacists—

(i) Are permitted to administer and dispense a narcotic drug and

(ii) Are authorized to conduct drug testing or analysis for narcotic drugs.

(5) "Narcotic dependent" means an individual who physiologically needs heroin or a morphine-like drug to prevent the onset of signs of withdrawal.

(6) A "narcotic treatment program" is an organization (or a person, including a private physician) that administers or dispenses a narcotic drug to a narcotic addict for maintenance or detoxification treatment, provides, when appropriate or necessary, a comprehensive range of medical and rehabilitative services, is approved by the State authority and the Food and Drug Administration, and that is registered with the Drug Enforcement Administration to use a narcotic drug for the treatment of narcotic addiction.

(7) A "program sponsor" is a person (or representative of an organization) who is responsible for the operation of a narcotic treatment program and who assumes responsibility for all its employees including any practitioners, agents, or other persons providing services at the program (including its medication units).

(8) The term "services," as used in this part, includes medical evaluations, counseling, rehabilitative and other social programs (e.g., vocational and educational guidance, employment placement), which will help the patient become a productive member of society.

(9) A "State authority" is the agency designated by the Governor or other appropriate official to exercise the responsibility and authority within the State or Territory for governing the treatment of narcotic addiction with a narcotic drug.

(b) *Organizational structure and approval requirements*—(1) *Organizational structure.* (i) A narcotic treatment program may be an independent organization or part of a centralized organization. For example, if a centralized organizational structure consists of a primary facility and other outpatient facilities, all of which conduct initial evaluation of patients and administer or dispense medication, the primary facility and each outpatient facility are separate programs, even though some services (e.g., the same hospital or rehabilitative services) are shared.

(ii) The program sponsor shall submit to the Food and Drug Administration and the State authority a description of the organizational structure of the program, the name of the persons responsible for the program, the address of the program, and the responsibilities of each facility or medication unit. The sources of funding for each program shall be listed and the name and

VOL
52
ISS
191
OC
2
1987
UMI

address of each governmental agency providing funding shall be stated.

(iii) Where two or more programs share a central administration (e.g., a city or State-wide organization), the person responsible for the organization (administrator or program sponsor) is required to be listed as the program sponsor for each separate participating program. An individual program shall indicate its participation in the central organization at the time of its application. The administrator or sponsor may fulfill all recordkeeping and reporting requirements for these programs, but each program must continue to receive separate approval.

(iv) One physician may assume primary medical responsibility for more than one program and be listed as medical director. If a physician assumes medical responsibility for more than one program, a statement documenting the feasibility of the arrangement is required to be attached to the application.

(2)(i) *Program approval.* Before a narcotic treatment program may be lawfully operated, the program, whether an outpatient facility or a private practitioner, shall submit the applications specified in this section simultaneously to the Food and Drug Administration and the State authority and must receive the approval of both, except as provided for in paragraph (h)(5) of this section. Before granting approval, the Food and Drug Administration will consult with the Drug Enforcement Administration, Department of Justice, to ascertain if the program is in compliance with Federal controlled substances laws. Each physical location within any program is required to be identified and listed in the approval application. At the time of application for approval, the program sponsor shall indicate whether medication will be administered or dispensed at the facility. Before medication may be administered or dispensed at a location not previously approved for this purpose, the program is required to obtain approval from FDA and the State agency. However, no approval is necessary, but notification is required when a facility in which medication is administered or dispensed is deleted by a program; the program shall notify the Food and Drug Administration and the State authority within 3 weeks of the deletion. Similarly, addition or deletion of facilities which provide services other than administering or dispensing medication is also permitted without approval, but notification must be made within 3 weeks to the Food and Drug Administration and the State authority about the addition and/or deletion.

(ii) *Exemption of Federal programs.* The provisions of this section requiring approval (or permitting disapproval or revocation of approval) by the State authority, compliance with requirements imposed by State law, or the submission of applications or reports required by the State authority do not apply to programs operated directly by the Veterans' Administration or any other department or agency of the United States. Federal agencies operating narcotic treatment programs have agreed to cooperate voluntarily with State agencies by granting permission on an informal basis for designated State respresentatives to visit Federal narcotic treatment programs and by furnishing a copy of Federal reports to the State authority, including the reports required under this section.

(iii) *Services.* Each narcotic treatment program shall provide medical and rehabilitative services and programs. (See paragraph (d)(4) of this section.) These services should normally be made available at the primary facility, but the program sponsor may enter into a formal documented agreement with private or public agencies, organizations, or institutions for these services, if they are available elsewhere. The program sponsor, in any event, must be able to document that medical and rehabilitative services are fully available to patients.

(iv) *Prohibition against unapproved use of narcotic drugs.* No prescribing, administering, or dispensing of a narcotic drug for the treatment of narcotic addiction may occur without prior approval by the Food and Drug Administration and the State authority, except as provided for in paragraph (h)(5) of this section, unless specifically exempted by this section.

(v) *Approved narcotic drugs for use in treatment programs.* The following narcotic drug has been approved for use in the treatment of narcotic addiction: Methadone.

(3)(i) *Medication unit.* A program may establish a medication unit to facilitate the needs of patients who are stabilized on an optimal dosage level. To lawfully operate a medication unit, the program shall, for each separate unit, obtain approval from both the Food and Drug Administration and the State authority, except as provided for in paragraph (h)(5) of this section. The Food and Drug Administration, in determining whether to approve a medication unit, will consider the distribution of units within a particular geographic area. Any new medication unit is required to receive approval before it may lawfully commence operation.

(ii) *Narcotic drug supply.* A medication unit must receive its supply of the narcotic drug directly from the stocks of the primary facility. Only persons permitted to administer or dispense the drug or security personnel licensed or otherwise authorized by State law to do so may deliver the drug to a medication unit.

(iii) *Revocation of approval.* If the Food and Drug Administration revokes the primary program's approval, the approval for any medication unit associated with the program is deemed to be automatically revoked. The Food and Drug Administration's revocation of the approval of a particular medication unit, will not, in and of itself, affect the approval of the primary program.

(iv) *Referral.* The patient shall be stabilized at his or her optimal dosage level before he or she may be referred to a medication unit. Since the medication unit does not provide a range of services, the program sponsor shall determine that the patient to be referred is not in need of frequent counseling, rehabilitative, and other services which are only available at the primary program facility.

(v) *Responsibility for patient.* After a patient is referred to a medication unit, the program sponsor retains continuing responsibility for the patient's care. The program sponsor shall ensure that the patient receives needed medical and rehabilitative services at the primary facility.

(c) *Conditions for approval of the use of a narcotic drug in a treatment program*—(1) *Applicants.* An individual listed as program sponsor for a treatment program using a narcotic drug need not personally be a licensed practitioner but shall employ a licensed physician for the position of medical director. Persons responsible for administering or dispensing the narcotic drug shall be practitioners as defined by section 102(20) of the Controlled Substances Act (21 U.S.C. 802(20)) licensed to practice by the State in which the program is to be established.

(2)(i) *Assent to regulation.* A person who sponsors a narcotic treatment program, and any persons responsible for a particular program, shall agree to adhere to all the rules, directives, and procedures, set forth in this section, and any regulation regarding the use of narcotic drugs in the treatment of narcotic addiction which may be promulgated in the future. The program sponsor has responsibility for all personnel and individuals providing services, who work in the program at the

primary facility or at other facilities or medication units. The program sponsors shall agree to inform all personnel and individuals providing services of the provisions of this section and to monitor their activities to assure compliance with the provisions.

(ii) The Food and Drug Administration and the State authority are required to be notified within 3 weeks of any replacement of the program sponsor or medical director. Activities in violation of this regulation may give rise to the sanctions set forth in paragraph (i) of this section.

(3) *Description of facilities.* Only program site(s) approved by Federal, State, and local authorities may treat narcotic addicts with a narcotic drug. To obtain program approval, the applicant shall demonstrate that he or she will have access to adequate physical facilities to provide all necessary services. A program must have ready access to a comprehensive range of medical and rehabilitative services so that the services may be provided when necessary. The name, address, and description of each hospital, institution, clinical laboratory, or other facility available to provide the necessary services are required to be included in the application submitted to the Food and Drug Administration and the State authority. The application is also required to include the name and address of each medication unit.

(4) *Submission of proper applications.* The following applications shall be filed simultaneously with both the Food and Drug Administration and the State authority:

(i) Form FDA–2632 "Application of Approval of Use of a Narcotic Drug in a Treatment Program." This form, required by paragraph (k) of this section, shall be completed and signed by the program sponsor and submitted in duplicate to the Food and Drug Administration and the State authority.

(ii) Form FDA–2633 "Medical Responsibility Statement for Use of a Narcotic Drug in a Treatment Program." This form, required by paragraph (k) of this section, shall be completed and signed by each licensed physician authorized to administer or dispense narcotic drugs and submitted in duplicate to the Food and Drug Administration and the State authority. The names of any other persons licensed by law to administer or dispense narcotic drugs working in the program shall be listed even if they are not at present responsible for administering or dispensing the drug.

(5) *State and Federal approval, denial, and revocation of approval of narcotic treatment programs.* (i) The Food and Drug Administration may grant approval to a program only after FDA has received notification from both the State authority and the Drug Enforcement Administration that the program conforms to all pertinent State and Federal requirements.

(ii) The Food and Drug Administration will revoke the approval of a narcotic treatment program if so requested by the State authority or the Drug Enforcement Administration. If approval of a program is denied or revoked by the State or the Drug Enforcement Administration, the program shall have a right to appeal to the Commissioner, as provided for in paragraph (h)(5) of this section.

(iii) No shipment of a narcotic drug may lawfully be made to any program which does not have current approval from the Food and Drug Administration. Within 60 days after receipt of the application from the program sponsor for approval, the Food and Drug Administration will notify the sponsor whether the application is approved or denied.

(d)(1) *Minimum standards for admission*—(i) *History of addiction and current physiologic dependence.* (A) A person may be admitted as a patient for a maintenance program only if a program physician determines that the person is currently physiologically dependent upon a narcotic drug and became physiologically dependent at least 1 year before admission for maintenance treatment. A 1-year history of addiction means that an applicant for admission to a maintenance program was physiologically addicted to a narcotic at a time at least 1 year before admission to a program and was addicted, continuously or episodically, for most of the year immediately before admission to a program. In the case of a person for whom the exact date on which physiological addiction began cannot be ascertained, the admitting program physician may, in his or her reasonable clinical judgment, admit the person to maintenance treatment, if from the evidence presented, observed, and recorded in the patient's record, it is reasonable to conclude that there was physiologic dependence at a time approximately 1 year before admission.

(B) The program physician or an appropriately trained staff member designated and supervised by the physician shall record in the patient's record the criteria used to determine the patient's current physiologic dependence and history of addiction. In the latter circumstance, the program physician shall review, date, and countersign the supervised staff member's evaluation to demonstrate his or her agreement with the evaluation. The program physician shall make the final determination concerning a patient's physiologic dependence and history of addiction. The program physician shall sign, date, and record a statement that he or she has reviewed all the documented evidence to support a 1-year history of addiction and the current physiologic dependence and that in his or her reasonable clinical judgment the patient fulfills the requirements for admission to maintenance treatment. The program physician shall complete and record the statement before the program administers any methadone to the patient.

(ii) *Voluntary participation, informed consent.* The person responsible for the program shall ensure that: A patient voluntarily chooses to participate in a program; all relevant facts concerning the use of the narcotic drug used by the program are clearly and adequately explained to the patient; all patients, with full knowledge and understanding of its contents, sign the "Consent to Methadone Treatment" Form (FDA–2635) (see paragraph (k) of this section); a parent, legal guardian, or responsible adult designated by the State authority (e.g., "emancipated minor" laws) sign for patients under the age of 18 the second part of Form FDA–2635 "Consent to Methadone Treatment."

(iii) *Exceptions to minimum admission criteria*—(A) *Penal or chronic care.* A person who has resided in a penal or chronic care institution for 1 month or longer may be admitted to maintenance treatment within 14 days before release or discharge or within 6 months after release from such an institution without documented evidence to support findings of physiological dependence provided the person would have been eligible for admission before he or she was incarcerated or institutionalized and, in the reasonable clinical judgment of a program physician, treatment is medically justified. Documented evidence of the prior residence in a penal or chronic care institution and evidence of all other findings and the criteria used to determine the findings are required to be recorded in the patient's record by the admitting program physician, or by program personnel supervised by the admitting program physician. The admitting program physician shall date and sign these recordings or review the health-care professional's recordings before the initial dose is administered to the patient. In the latter case, the admitting program physician shall date and sign the recordings in the patient's record made by the health-care professional

UMI

within 72 hours of administration of the initial dose to the patient.

(B) *Pregnant patients.* (*1*) Pregnant patients, regardless of age, who have had a documented narcotic dependency in the past and who may be in direct jeopardy of returning to narcotic dependency, with all its attendant dangers during pregnancy, may be placed on a maintenance regimen. For such patients, evidence of current physiological dependence on narcotic drugs is not needed if a program physician certifies the pregnancy and, in his or her reasonable clinical judgment, finds treatment to be medically justified. Evidence of all findings and the criteria used to determine the findings are required to be recorded in the patient's record by the admitting program physician, or by program personnel supervised by the admitting program physician. Pregnant patients are required to be given the opportunity for prenatal care either by the program or by referral to appropriate health care providers.

(*2*) If a program cannot provide direct prenatal care for pregnant patients in treatment, the program shall establish a system for informing the patients of the publicly or privately funded prenatal care opportunities available. If there are no publicly funded prenatal referral opportunities and the program cannot provide such services or the patient cannot afford them or refuses them, then the treatment program shall, at a minimum, offer her basic prenatal instruction on maternal, physical, and dietary care as part of its counseling service.

(*3*) Counseling records and/or other appropriate patient records are required to reflect the nature of prenatal support provided by the program. If the patient is referred for prenatal services, the physician to whom she is referred is required to be notified that she is in maintenance treatment, provided that notification is in accordance with the Department of Health and Human Services' confidentiality regulations (42 CFR Part 2). If a pregnant patient refuses direct treatment or appropriate referral for treatment, the treating program physician should consider using informed consent procedures, e.g., to have the patient acknowledge in writing that she had the opportunity for this treatment but refuses it. The program physician, consistent with the confidentiality regulations, shall request the physician or the hospital to which a patient is referred to provide, following birth, a summary of the delivery and treatment outcome for the patient and offspring. If the program physician does not receive a response to the request, he or she shall document in the record that such a request was made.

(*4*) Within 3 months after termination of pregnancy, the program physician shall enter an evaluation of the patient's treatment state into her record and state whether she should remain in the maintenance program or be detoxified.

(*5*) Caution should be taken in the maintenance treatment of pregnant patients. Dosage levels should be maintained at the lowest effective dose if treatment is deemed necessary. The program sponsor shall ensure that each female patient is fully informed of the possible risks to her or to her unborn child from the use of a narcotic drug administered or dispensed by the program.

(C) *Previously treated patients.* Under certain circumstances a patient who has been treated and later voluntarily detoxified from maintenance treatment may be readmitted to maintenance treatment, without evidence to support findings of current physiologic dependence, up to 2 years after discharge if the program attended is able to document prior narcotic drug maintenance treatment of 6 months or more, and the admitting program physician, in his or her reasonable clinical judgment, finds readmission to maintenance treatment to be medically justified. For patients meeting these criteria, the quantity of take-home medication will be determined in the reasonable clinical judgment of the program physician, but in no case may the quantity of take-home medication be greater than would have been allowed at the time the patient voluntarily terminated previous treatment. The admitting program physician or a program employee under supervision of the admitting program physician must enter in the patient's record documented evidence of the patient's prior treatment and evidence of all decisions and criteria used relating to the admission of the patient and the quantity of take-home medication permitted. The admitting program physician shall date and sign these entries in the patient's record or review the health-care professional's entries therein before the program administers any medication to the patient. In the latter case, the admitting program physician shall date and sign the entries in the patient's record made by the health-care professional within 72 hours of administration of the initial dose to the patient.

(iv) *Special limitation; treatment of patients under 18 years of age.* A person under 18 is required to have had two documented attempts at short-term detoxification or drug-free treatment to be eligible for maintenance treatment. A 1-week waiting period is required after such a detoxification attempt, however, before an attempt is repeated. The program physician shall document in the patient's record that the patient continues to be or is again physiologically dependent on narcotic drugs. No person under 18 years of age may be admitted to a maintenance treatment program unless a parent, legal guardian, or responsible adult designated by the State authority (e.g., "emancipated minor" laws) completes and signs consent form, Form FDA–2635 "Consent to Methadone Treatment."

(v) *Denial of admission.* If in the reasonable clinical judgment of the medical director a particular patient would not benefit from treatment with a narcotic drug, the patient may be refused such treatment even if the patient meets the admission standards.

(2) *Minimum testing or analysis for drugs: Uses and frequency.* (i) The person(s) responsible for a program shall ensure that: An initial drug-screening test or analysis is completed for each prospective patient; at least eight additional random tests or analyses are performed on each patient during the first year in maintenance treatment; and at least quarterly random tests or analyses are performed on each patient in maintenance treatment for more than 1 year, except that a random test or analysis is performed monthly on each patient who receives a 6-day supply of take-home medication. When such test or analysis is done for each patient it must be done in a manner that minimizes falsification. Each test or analysis must be analyzed for opiates, methadone, amphetamines, cocaine, barbiturates, as well as other drugs as indicated. Any laboratory that performs the testing required under these regulations shall be in compliance with all applicable Federal proficiency testing and licensing standards and all applicable State standards. Any time a program desires to change a laboratory used for such testing or analysis., the program shall approve the change with the Food and Drug Administration.

(ii) The person responsible for a program shall ensure that test results are not used as the sole criterion to force a patient out of treatment but are used as a guide to change treatment approaches. The person responsible for a program shall also ensure that when test results are used, presumptive laboratory results are distinguished from results that are definitive.

(3) *Patient evaluation; minimum admission and periodic requirements*—(i) *Minimum contents of medical evaluation.* Each patient is required to have a medical evaluation by a program physician or an authorized health-care professional under the supervision of a program physician on admission to a program. At a minimum, this evaluation is required to consist of a medical history which includes the required history of narcotic dependence, evidence of current physiologic dependence unless excepted by the regulations, and a physical examination, and includes the following laboratory examinations: Serological test for syphilis, a tuberculin skin test, and a test or analysis for drug determination. The physical examination is required to consist of an investigation of the organ systems for possibilities of infectious disease, pulmonary, liver, and cardiac abnormalities, and dermatologic sequelae of addiction. In addition, the physical examination is required to include a determination of the patient's vital signs (temperature, pulse, and blood pressure and respiratory rate); an examination of the patient's general appearance, head, ears, eyes, nose, throat (thyroid), chest (including heart, lungs, and breasts), abdomen, extremities, skin, and neurological assessment; and the program physician's overall impression of the patient.

(ii) *Recordings of findings.* The admitting program physician or an appropriately trained health-care professional supervised by the admitting program physician shall record in the patient's record all findings from the admission medical evaluation. In each case the admitting program physician shall date and sign these entries, or date, review, and countersign these recordings in the patient's record to signify his or her review of and concurrence with the history and physical findings.

(iii) *Admission evaluation.* (A) Each patient seeking admission or readmission for treatment services is required to be interviewed by a well-trained program counselor, qualified by virtue of education, training, or experience to assess the psychological and sociological background of drug abusers, to determine the appropriate treatment plan for the patient. To determine the most appropriate treatment plan for a patient, the interviewer shall obtain and document in the patient's record the patient's history.

(B) A patient's history includes information relating to his or her educational and vocational achievements. If a patient has no such history, i.e., he or she has no formal education or has never had an occupation, this requirement is met by writing this information in the patient's history.

(iv) *Initial treatment plan.* (A)(*1*) The initial treatment plan is required to contain a statement that outlines realistic short-term treatment goals which are mutually acceptable to the patient and the program. The initial treatment plan is also required to spell out the behavioral tasks a patient must perform to complete each short-term goal and the medical, psychosocial, economic, legal, or other supportive services that a patient needs immediately. The plan is also required to identify the frequency with which these services are likely to be provided.

(*2*) A primary counselor is one who is assigned by the program to develop, implement, and evaluate the patient's initial and periodic treatment plan and to monitor a patient's progress in treatment. The primary counselor shall enter in the patient's record the counselor's name, the contents of a patient's initial assessment, and the initial treatment plan. The primary counselor shall make these entries immediately after the patient is stabilized on a dose or within 4 weeks after admission, whichever is sooner.

(B) It is recognized that patients need varying degrees of treatment and rehabilitative services which are often dependent on or limited by a number of variables, e.g., patient resources, available program, and community services. It is not the intent of this regulation to prescribe a particular treatment and rehabilitative service or the frequency at which a service should be offered.

(C) The program supervisory counselor or other appropriate program personnel so designated by the program physician shall review and countersign all the information and findings required by this paragraph (d)(3)(iv) to be recorded in each patient's record.

(v) *Periodic treatment plan evaluation.* (A) The program physician or the primary counselor shall review, reevaluate, and alter where necessary each patient's treatment plan at least once each 90 days during the first year of treatment, and then at least twice a year after the first year of continuous treatment.

(B) The program physician shall ensure that the periodic treatment plan becomes part of each patient's record and that it is signed and dated in the patient's record by the primary counselor and is countersigned and dated by the supervisory counselor.

(C) At least once a year, the program physician shall date, review, and countersign the treatment plan recorded in each patient's record and ensure that each patient's progress or lack of progress in achieving the treatment goals is entered in the patient's record by the primary counselor. When appropriate, the treatment plan and progress notes should deal with the patient's mental and physical problems, apart from drug abuse. The treatment plan is required to include the name of and the reasons for prescribing any medication for emotional or physical problems.

(D) The requirement for annual physician review and signature by the program physician in paragraph (d)(3)(v)(C) of this section is discretionary, however, as it applies to a patient who has satisfactorily adhered to program rules for at least 3 consecutive years from his or her entrance into the maintenance treatment program and who has made substantial progress in rehabilitation.

(4) *Minimum program services*—(i) *Access to a range of services.* (A) A treatment program shall provide a comprehensive range of medical and rehabilitative services to its patients especially during the first 3 years of treatment. Also, for pregnant patients in a treatment program who were not admitted under paragraph (d)(1)(iii)(B) of this section, a treatment program shall give them the opportunity for prenatal care either by the narcotic treatment program or by referral to appropriate health-care providers. If a program cannot provide direct prenatal care for pregnant patients in treatment, it shall establish a system of referring them for prenatal care which may be either publicly or privately funded. If there is no publicly funded prenatal care available to which a patient may be referred, and the program cannot provide such services, or the patient cannot afford or refuses prenatal care services, then the treatment program shall, at a minimum, offer her basic prenatal instruction on maternal, physical, and dietary care as a part of its counseling service.

(B) Counseling records and other appropriate patient records are required to reflect the nature of prenatal support provided by the program. If the program refers a patient for prenatal services, it shall inform the physician to whom she is referred that the patient is in maintenance treatment, provided such notification is in accordance with the Department of Health and Human

Services' confidentiality regulations (42 CFR Part 2). If a pregnant patient refuses direct prenatal services or appropriate referral for prenatal services, the treating program physician should consider using informed consent procedures, i.e., to have the patient acknowledge in writing that she had the opportunity for this treatment but refuses it. The program physician shall request the physician or the hospital to which a patient is referred to provide, following birth, a summary of the delivery and treatment outcome for the patient and offspring. The information should be obtained in accordance with the Department of Health and Human Services' confidentiality regulations (42 CFR Part 2). If no response is received, the program physician shall document in the record that such a request was made and no response was received.

(C) Caution should be taken in the maintenance treatment of pregnant patients. Dosage levels should be maintained at the lowest effective dose if continued treatment is deemed necessary. It is the responsibility of the program sponsor to ensure that each female patient is fully informed of the possible risks to a pregnant woman and her unborn child from the use of a narcotic drug.

(D) Any service not furnished at the primary facility is required to be listed in any application for approval submitted to the Food and Drug Administration or to the State authority. The addition, modification, or deletion of any program services is required to be reported immediately to the Food and Drug Administration.

(ii) *Minimum medical services: designation of medical director and responsibilities.* Each program shall have a designated medical director who assumes responsibility for administering all medical services performed by the program. The medical director and other authorized program physicians are required to be licensed to practice medicine in the jurisdiction in which the program is located. The medical director is responsible for ensuring that the program is in compliance with all Federal, State, and local laws and regulations regarding medical treatment of narcotic addiction. In addition, the medical director or other authorized physicians shall:

(A) Ensure that evidence of current physiologic dependence, length of history of addiction, or exceptions to criteria for admission are documented in the patient's record before the patient receives the initial dose.

(B) Ensure that a medical evaluation including a medical history has been taken, and physical examination has been done before the patient receives the initial dose (except that in an emergency situation, the initial dose may be given before the physical examination).

(C) Ensure that appropriate laboratory studies have been performed and reviewed.

(D) Sign or countersign all medical orders as required by Federal or State law. (Such medical orders include but are not limited to the initial medication orders and all subsequent medication order changes, all changes in the frequency of take-home medication, and prescribing additional take-home medication for an emergency situation.)

(E) Review and countersign treatment plans at least annually as qualified by paragraph (d)(3)(v)(D) of this section.

(F) Ensure that justification is recorded in the patient's record for reducing the frequency of clinic visits for observed drug ingesting, providing additional take-home medication under exceptional circumstances or when there is physical disability, or prescribing any medication for physical or emotional problems.

(iii) *Use of health-care professionals.* Although the final decision to accept a patient for treatment may be made only by the medical director or other designated program physician, it is recognized that physicians can train program personnel to detect and document narcotic abstinence symptoms and that some jurisdictions allow State-licensed or certified health-care professionals, e.g., physician's assistants, nurse practitioners, to perform certain functions—record medical histories, perform physical examinations, and prescribe, administer, or dispense certain medications—that are ordinarily performed by a licensed physician. These regulations do not prohibit licensed or certified health-care professionals from performing those functions in narcotic treatment programs if it is authorized by Federal, State, and local laws and regulations, and if those functions are delegated to them by the medical director, and records are properly countersigned by the medical director or a licensed physician.

(iv) *Vocational rehabilitation, education, and employment.* (A) Each program shall provide opportunities directly, or through referral to community resources, for patients who either desire or have been deemed by the program staff to be ready to participate in educational job-training programs or to obtain gainful employment as soon as possible.

(B) The patient's needs and readiness for vocational rehabilitation, education, and employment should be evaluated and recorded in the patient's records during the preparation of the initial treatment plan and reviewed and updated as appropriate in subsequent periodic treatment plan evaluations.

(5) *Staffing patterns*—(i) *Program personnel.* The person(s) responsible for a program shall determine program personnel requirements after considering the number of patients who are vocationally and educationally impaired; the number of patients with significant psychopathology; the number of patients who are also nonnarcotic drug or alcohol abusers; the number of patients with behavioral problems in the program; and the number of patients with serious medical problems.

(ii) *Supportive services.* The person(s) responsible for the program shall take notice, when considering the staffing pattern, that maintenance treatment programs need to establish supportive services in accordance with the varying characteristics and needs of their patient populations. The person(s) responsible for a program shall also take notice of the availability of existing community resources which may complement or enhance the program's delivery of supportive services and then establish a staffing pattern based on a combination of patient needs and available, accessible community resources.

(6) *Frequency of attendance; quantity of take-home medication; dosage of methadone; initial and stabilization*—(i) *Dosage and responsibility for administration.* (A) The person(s) responsible for the program shall ensure that the initial dose of methadone does not exceed 30 milligrams and that the total dose for the first day does not exceed 40 milligrams, unless the program medical director documents in the patient's record that 40 milligrams did not suppress opiate abstinence symptoms.

(B) A licensed physician shall assume responsibility for the amounts of the narcotic drug administered or dispensed and shall record, date, and sign in each patient's record each change in the dosage schedule.

(C) The administering licensed physician shall ensure that a daily dose greater than 100 milligrams is justified in the patient's record.

(ii) *Authorized dispensers of narcotic drugs; responsibility.* A narcotic drug may be administered or dispensed only by a practitioner licensed under the appropriate State law and registered under the appropriate State and Federal laws to order narcotic drugs for patients, or by an agent of such a practitioner, supervised by and under the order of the

practitioner. This agent is required to be a pharmacist, registered nurse, or licensed practical nurse, or any other health-care professional authorized by the Federal and State law to administer or dispense narcotic drugs. The licensed practitioner assumes responsibility for the amounts of narcotic drugs administered or dispensed and shall record and countersign all changes in dosage schedule.

(iii) *Form.* Methadone may be administered or dispensed in oral form only when used in a treatment program. Hospitalized patients under care for a medical or surgical condition are permitted to receive methadone in parenteral form when the attending physician judges it advisable. Although tablet, syrup concentrate, or other formulations may be distributed to the program, all oral medication is required to be administered or dispensed in a liquid formulation. The oral dosage form is required to be formulated in such a way as to reduce its potential for parenteral abuse. Take-home medication is required to be labeled with the treatment center's name, address, and telephone number and must be packaged in special packaging as required by 16 CFR 1700.14 in accordance with the Poison Prevention Packaging Act (Pub. L. 91–601, 15 U.S.C. 1471 et seq.) to reduce the chances of accidental ingestion. Exceptions may be granted when these provisions conflict with State law with regard to the administering or dispensing of drugs.

(iv) *Take-home medication.* (A) Take-home medication may be given only to a patient who, in the reasonable clinical judgment of the program physician, is responsible in handling narcotic drugs. Before the program physician reduces the frequency of a patient's clinical visits, she or he or a designated staff member shall record the rationale for the decision in the patient's clinical record. If this is done by a designated staff member, a program physician shall review, countersign, and date the patient's record where this information is recorded.

(B) The program physician shall consider the following in determining whether, in his or her reasonable clinical judgment, a patient is responsible in handling narcotic drugs:

(*1*) Absence of recent abuse of drugs (narcotic or nonnarcotic), including alcohol;

(*2*) Regularity of clinic attendance;

(*3*) Absence of serious behavioral problems at the clinic;

(*4*) Absence of known recent criminal activity, e.g., drug dealing;

(*5*) Stability of the patient's home environment and social relationships;

(*6*) Length of time in maintenance treatment;

(*7*) Assurance that take-home medication can be safely stored within the patient's home; and

(*8*) Whether the rehabilitative benefit to the patient derived from decreasing the frequency of clinic attendance outweighs the potential risks of diversion.

(v) *Take-home requirements.* The requirement of time in treatment is a minimum reference point after which a patient may be eligible for take-home privileges. The time reference is not intended to mean that a patient in treatment for a particular time has a specific right to take-home medication. Thus, regardless of time in treatment, a program physician may, in his or her reasonable judgment, deny or rescind the take-home medication privileges of a patient.

(A)(*1*) In maintenance treatment it is required that a patient come to the clinic for observation daily or at least 6 days a week. If, in the reasonable clinical judgment of the program physician, a patient demonstrates that he or she has satisfactorily adhered to program rules for at least 3 months, has made substantial progress in rehabilitation and responsibility in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section), and would improve his or her rehabilitative progress by decreasing the frequency of attendance at the clinic for observation, the patient may be permitted to reduce his or her attendance at the clinic for observation to three times weekly. The patient may receive no more than a 2-day take-home supply of medication.

(*2*) If, in the reasonable clinical judgment of the program physician, a patient demonstrates that he or she has satisfactorily adhered to program rules for at least 2 years from his or her entrance into the program, has made substantial progress in rehabilitation and responsibility in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section), and would improve his or her rehabilitative progress by decreasing the frequency of attendance at the clinic for observation, the patient may be permitted to reduce his or her clinic attendance at the clinic for observation to twice weekly. Such a patient may receive no more than a 3-day take-home supply of medication.

(*3*) If, in the reasonable clinical judgment of the program physician, a patient demonstrates that he or she has satisfactorily adhered to program rules for at least 3 consecutive years from his or her entrance into the maintenance treatment program, has made substantial progress in rehabilitation, has no major behavioral problems, is responsible in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section), and would improve his or her rehabilitative progress by decreasing the frequency of his or her clinic attendance for observation, the patient may be permitted to reduce clinic attendance for observation to once weekly, provided that the following additional criteria are met: The program physician has written into the patient's record an evaluation that the patient is responsible in handling narcotic drugs (paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section); the patient is employed (or actively seeking employment), attends school, is a homemaker, or is considered unemployable for mental or physical reasons by a program physician; the patient is not known to have abused drugs including alcohol in the last year; and the patient is not known to have engaged in criminal activity, e.g., drug dealing, in the last year. A patient permitted to reduce clinic attendance for observation to once weekly may receive no more than a 6-day take-home supply of medication.

(B)(*1*) If a patient, after receiving a supply of take-home medication, is inexcusably absent from or misses a scheduled appointment with a treatment program without authorization from the program staff, the program physician shall increase the frequency of the patient's clinic attendance for drug ingestion under observation. For such a patient, the program physician shall not reduce the frequency of the patient's clinic attendance for drug ingestion under observation until she or he has had at least three consecutive monthly tests or analyses that are neither positive for morphinelike drugs (except from the narcotic drug administered or dispensed by the program) or other drugs of abuse nor negative for the narcotic drug administered or dispensed by the program, and until she or he is again determined by a program physician to be responsible in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section) and to meet the criteria in paragraph (d)(6)(v)(A) of this section).

(*2*) If a patient, after receiving a 6-day supply of take-home medication, has a test or analysis which is confirmed to be positive for morphinelike drugs (except for the narcotic drug administered or dispensed by the program) or other drugs of abuse or negative for the narcotic drug administered or dispensed by the program, the program physician shall place the patient on probation for 3 months. If, during this probation, the

patient has a test or analysis either positive for morphinelike drugs (except for the narcotic drug administered or dispensed by the program) or other drugs of abuse or negative for the narcotic drug administered or dispensed by the program, the program physician shall increase the frequency of the patient's clinic attendance for observation to at least twice weekly. Such a patient may receive no more than a 3-day take-home supply of medication until she or he has had at least three consecutive monthly tests or analyses which are neither positive for morphinelike drugs (except for the narcotic drug administered or dispensed by the program) or other drugs of abuse nor negative for the narcotic drug administered or dispensed by the program, and the program physician again determines that the patient is responsible in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section) and meets the criteria contained in paragraph (d)(6)(v)(A) of this section.

(C) In calculating the number of years of maintenance treatment, the period is considered to begin on the first day the medication is administered, or on readmission if a patient has had a continuous absence of 90 days or more. Cumulative time spent by the patient in more than one program is counted toward the number of years of treatment, provided there has not been a continuous absence of 90 days or more.

(D) Each patient whose daily dose is above 100 milligrams is required to be under observation while ingesting the drug at least 6 days per week irrespective of the length of time in treatment, unless the program has received prior approval from the State authority and the Food and Drug Administration.

(vi) *Exceptions to take-home requirements.* If, in the reasonable clinical judgment of the program physician:

(A) A patient is found to have a physical disability which interferes with his or her ability to conform to the applicable mandatory schedule, she or he may be permitted a temporarily or permanently reduced schedule provided she or he is also found to be responsible in handling narcotic drugs.

(B) A patient, because of exceptional circumstances such as illness, personal or family crises, travel, or other hardship, is unable to conform to the applicable mandatory schedule she or he may be permitted a temporarily reduced schedule provided she or he is also found to be responsible in handling narcotic drugs. The rationale for an exception to a mandatory schedule is to be based on the reasonable clinical judgment of the program physician and shall be recorded in the patient's record by the program physician or by program personnel supervised by the program physician. In the latter situation, the physician shall review, countersign, and date the patient's record where this rationale is recorded. In any event, a patient may not be given more than a 2-week supply of narcotic drugs at one time.

(7) *Minimum standards for short-term detoxification treatment.* (i) For short-term detoxification from narcotic drugs, the narcotic drug is required to be administered by the program physician or by an authorized agent of the physician, supervised by and under the order of the physician. The narcotic drug is required to be administered daily, under close observation, in reducing dosages over a period not to exceed 30 days. All requirements for maintenance treatment apply to short-term detoxification treatment with the following exceptions:

(A) Take-home medication is not allowed during short-term detoxification.

(B) A history of 1 year physiologic dependence is not required for admission to short-term detoxification.

(C) Patients who have been determined by the program physician to be currently physiologically narcotic dependent may be placed in short-term detoxification treatment, regardless of age.

(D) No test or analysis is required except for the initial drug screening test or analysis.

(E) The initial treatment plan and periodic treatment plan evaluation required for maintenance patients are not necessary for short-term detoxification patients. However, a primary counselor must be assigned by the program to monitor a patient's progress toward the goal of short-term detoxification and possible drug-free treatment referral.

(F) The requirements of paragraph (d)(4) of this section, except paragraphs (d)(4)(ii) (A) through (D) and (iii) of this section, do not apply to short-term detoxification treatment.

(ii) A patient is required to wait at least 7 days between concluding a short-term detoxification treatment episode and beginning another. Before a short-term detoxification attempt is repeated, the program physician shall document in the patient's record that the patient continues to be or is again physiologically dependent on narcotic drugs. The provisions of these requirements, except as noted in paragraph (d)(7)(i) of this section, apply to both inpatient and ambulatory short-term detoxification treatment.

(iii) Short-term detoxification treatment is not recommended for a pregnant patient.

(8) *Minimum standards for long-term detoxification treatment.* (i) For long-term detoxification from narcotic drugs, the narcotic drug is required to be administered by the program physician or by an authorized agent of the physician, supervised by and under the order of the physician. The narcotic drug is required to be administered on a regimen designed to reach a drug-free state and to make progress in rehabilitation in 180 days or less. All requirements for maintenance treatment apply to long-term detoxification treatment with the following exceptions:

(A) In long-term detoxification treatment it is required that the patient be under observation while ingesting the drug daily or at least 6 days a week, for the duration of the long-term detoxification treatment.

(B) A history of 1 year physiologic dependence is not required for admission to long-term detoxification.

(C) The program physician shall document in the patient's record that short-term detoxification is not a sufficiently long enough treatment course to provide the patient with the additional program services he or she deems necessary for the patient's rehabilitation. The program physician shall document this information in the patient's record before long-term detoxification may begin.

(D) Patients who have been determined by the program physician to be currently physiologically dependent on narcotics may be placed in long-term detoxification treatment, regardless of age.

(E) An initial drug screening test or analysis is required for each patient. And at least one additional random test or analysis must be performed monthly on each patient during long-term detoxification.

(F) The initial treatment plan and periodic treatment plan evaluation required for maintenance patients are also required for long-term detoxification patients except that the required periodic treatment plan evaluation is required to occur monthly.

(ii) A patient is required to wait at least 7 days between concluding a long-term treatment episode and beginning another. Before a long-term detoxification attempt is repeated, the program physician shall document in the patient's record that the patient continues to be or is again physiologically dependent on narcotic

drugs. The provisions of these requirements apply to both inpatient and ambulatory long-term detoxification treatment.

(iii) Long-term detoxification is not recommended for a pregnant patient.

(9) *Inspections of programs; patient confidentiality.* A program shall allow inspections by duly authorized employees of the State authority, and in accordance with Federal controlled substances laws and Federal confidentiality laws, by duly authorized employees of the Food and Drug Administration, the Drug Enforcement Administration of the Department of Justice, and the National Institute on Drug Abuse.

(10) *Exemptions from specific program standards.* (i) A program is permitted, at the time of application or any time thereafter, to request exemption from or revision of specific program standards. The rationale for an exemption or revision shall be thoroughly documented in an appendix to be submitted with the application or at some later time. The Food and Drug Administration will approve such exemptions or revisions of program standards at the time of application with the concurrence of the State authority.

(ii) The Food and Drug Administration has the right to withhold the granting of an exemption until such time as a program is in actual operation in order to assess if the exemption is necessary. If periodic inspections of the program reveal that discrepancies or adverse conditions exist, the Food and Drug Administration shall reserve the right to revoke any or all exemptions previously granted.

(11) *Research.* When a program conducts research on human subjects or provides subjects for research, there must be written policies and written review to assure the rights of the patients involved. Appropriate informed consent forms are required to be signed by the patient and to be retained in his or her patient record at the program. All research, development, and related activities which involve human subjects and which are funded by grants from or contracts with the Department of Health and Human Services are required to comply with the Department of Health and Human Services' regulations on the protection of human subjects, 45 CFR Part 46, and confidentiality of information, 42 CFR Part 2. All investigational research involving human subjects conducted for submission to the Food and Drug Administration must be conducted in compliance with 21 CFR Part 312.

(12) *Patient record system*—(i) *Patient care.* The person(s) responsible for a program shall establish a record system to document and monitor patient care. This system is required to comply with all Federal and State reporting requirements relevant to methadone. All records are required to be kept confidential and in accordance with all applicable Federal and State regulations regarding confidentiality.

(ii) *Drug dispensing.* The person(s) responsible for a program shall ensure that accurate records traceable to specific patients are maintained showing dates, quantity, and batch or code marks of the drug dispensed. These records must be retained for a period of 3 years from the date of dispensing.

(iii) *Patient's record.* An adequate record must be maintained for each patient. The record is required to contain a copy of the signed consent form(s), the date of each visit, the amount of drug administered or dispensed, the results of each test or analysis for drugs, any significant physical or psychological disability, the type of rehabilitative and counseling efforts employed, an account of the patient's progress, and other relevant aspects of the treatment program. For recordkeeping purposes, if a patient misses appointments for 2 weeks or more without notifying the program, the episode of care is considered terminated and is to be so noted in the patient's record. This does not mean that the patient cannot return for care. If the patient does return for care and is accepted into the program, this is considered a readmission and is to be so noted in the patient's record. This method of recordkeeping helps assure the easy detection of sporadic attendance and decreases the possibility of administering inappropriate doses of narcotic drugs (e.g., the patient who has received no medication for several days or more and upon return receives the usual stabilization dose). An annual evaluation of the patient's progress must be entered in the patient's record.

(13) *Security of drug stocks.* Adequate security is required to be maintained over drug stocks, over the manner in which it is administered or dispensed, over the manner in which it is distributed to medication units, and over the manner in which it is stored to guard against theft and diversion of the drug. The program is required to meet the security standards for the distribution and storage of controlled substances as required by the Drug Enforcement Administration, Department of Justice (21 CFR 1301.72–1301.76).

(e) *Multiple enrollments*—(1) *Administering or dispensing to patients enrolled in other programs.* There is a danger of drug dependent persons attempting to enroll in more than one narcotic treatment program to obtain quantities of drugs for the purpose of self-administration or illicit marketing. Therefore, except in an emergency situation, drugs shall not be provided to a patient who is known to be currently receiving drugs from another treatment program.

(2) *Patient attendance requirements.* The patient shall always report to the same treatment facility unless prior approval is obtained from the program sponsor for treatment at another program. Permission to report for treatment at the facility of another program shall be granted only in exceptional circumstances and shall be noted on the patient's clinical record.

(f) *Conditions for use of narcotic drugs in hospitals for detoxification treatment*—(1) *Form.* The drug may be administered or dispensed in either oral or parenteral form (see paragraph (d)(6)(iii) of this section).

(2) *Use of narcotic drugs in hospitals*—(i) *Approved uses.* For hospitalized patients, the use of a narcotic drug for narcotic addict treatment may be administered or dispensed only for detoxification treatment. If a narcotic drug is administered for treatment of narcotic dependence for more than 180 days, the procedure is no longer considered detoxification but is, rather, considered maintenance treatment. Only approved narcotic treatment programs may undertake maintenance treatment. This does not preclude the maintenance treatment of a patient who is hospitalized for treatment of medical conditions other than addiction and who requires temporary maintenance treatment during the critical period of his or her stay or whose enrollment in a program which has approval for maintenance treatment using narcotic drugs has been verified (see 21 CFR 1306.07(c)). Any hospital which already has received approval under this paragraph (f) may serve as a temporary narcotic treatment program when an approved treatment program has been terminated and there is no other facility immediately available in the area to provide narcotic drug treatment for the patients. The Food and Drug Administration may give this approval upon the request of the State authority or the hospital, when no State authority has been established.

(ii) *Individuals responsible for supplies.* Hospitals shall submit to the Food and Drug Administration and the State authority the name of the individual (e.g., pharmacist) responsible for receiving and securing supplies of

narcotic drugs for the treatment of narcotic addicts. The individual responsible for supplies shall ensure that the only persons who receive supplies of narcotic drugs are those who are authorized to do so by Federal or State law.

(iii) *General description.* The hospital shall submit to the Food and Drug Administration and the State authority a general description of the hospital including the number of beds, specialized treatment facilities for drug dependence, and nature of patient care undertaken.

(iv) *Anticipated quantity of drug needed.* The hospital shall submit to the Food and Drug Administration and the State authority the anticipated quantity of narcotic drugs for narcotic addict treatment needed per year.

(v) *Records.* The hospital shall maintain accurate records showing dates, quantity, and batch or code marks of the drug used for inpatient treatment. The hospital shall retain the records for at least a period of 3 years.

(vi) *Inspection.* The hospital shall permit the Food and Drug Administration and the State authority to inspect supplies of the drug at the hospital and evaluate the uses to which the drug is being put. The Food and Drug Administration and the State authority will keep the identity of the patients confidential in accordance with confidentiality requirements of 42 CFR Part 2. Records on the receipt, storage, and distribution of narcotic medication are subject to inspection under Federal controlled substances laws; but use or disclosure of records identifying patients will, in any case, be limited to actions involving the program or its personnel.

(vii) *Approval of hospital pharmacy.* Application for a hospital pharmacy to provide narcotic drugs for detoxification treatment must be submitted to the Food and Drug Administration and the State authority and approval from both is required, except as provided for in paragraph (h)(5) of this section. Within 60 days after the Food and Drug Administration receives the application, it will notify the applicant of approval or denial or will request additional information, when necessary.

(viii) *Approval of shipments to hospital pharmacies.* Before a hospital pharmacy may lawfully receive shipments of narcotic drugs for detoxification treatment, a responsible official shall complete, sign, and file in duplicate with the Food and Drug Administration and the State authority Form FDA–2636 "Hospital Request for Narcotic Drugs for Detoxification Treatment" (see paragraph (k) of this section) and must have received from the Food and Drug Administration a notice that the request has been approved.

(ix) *Sanctions.* Failure to abide by the requirements described in this section may result in revocation of approval to receive shipments of narcotic drugs for narcotic addict treatment, seizure of the drug supply on hand, injunction, and criminal prosecution.

(g) *Confidentiality of patient records.* (1) Except as provided in paragraph (g)(2) of this section, disclosure of patient records maintained by any program is governed by the provisions of 42 CFR Part 2, and every program must comply with that part. Records on the receipt, storage, and distribution of narcotic medication are also subject to inspection under Federal controlled substances laws: But use or disclosure of records identifying patients will, in any case, be limited to actions involving the program or its personnel. In addition to the restrictions upon disclosure in 42 CFR Part 2, and in accordance with the authority conferred by section 303(a) of the Public Health Service Act (42 U.S.C. 242(a)), every program is authorized to protect the privacy of patients therein by withholding from all persons not employed by such program or otherwise connected with the conduct of its operations the names or other identifying characteristics of such patients under any circumstances under which such program has reasonable grounds to believe that such information may be used to conduct any criminal investigation or prosecution of a patient. Programs may not be compelled in any Federal, State, or local civil, criminal, administrative, or other proceedings to furnish such information, but this paragraph does not authorize withholding information authorized to be furnished under 42 CFR Part 2. Records on the receipt, storage, and distribution of narcotic medication are subject to inspection under Federal controlled substances laws: But use or disclosure of records identifying patients will, in any case, be limited to actions involving the program or its personnel.

(2) A treatment program or medication unit or any part thereof, including any facility or any individual, shall permit a duly authorized employee of the Food and Drug Administration to have access to and to copy all records on the use of narcotic drugs in accordance with the provisions of 42 CFR Part 2. A treatment program may reveal such records only when necessary in a related administrative or court proceeding.

(h) *Denial or revocation of approval.* (1) Complete or partial denial or revocation of approval of an application to receive shipments of narcotic drugs (Forms FDA–2632 "Application for Approval of Use of Narcotic Drugs in a Treatment Program" and FDA–2636 "Hospital Request for Narcotic Drugs for Detoxification and Maintenance Treatment") may be proposed to the Commissioner of Food and Drugs by the Director of the Food and Drug Administration's Center for Drugs and Biologics, on his or her own initiative or at the request of representatives of the Drug Enforcement Administration, Department of Justice, National Institute of Drug Abuse, the State authority, or any other interested person.

(2) Before presenting such a proposal to the Commissioner, the Director of the Center for Drugs and Biologics or his or her representative will notify the applicant in writing of the proposed action and the reasons therefor and will offer the applicant an opportunity to explain the matters in question in an informal conference and/or in writing within 10 days after receipt of such notification. The applicant shall have the right to hear and to question the information on which the proposal to deny or revoke approval is based, and may present any oral or written information and views.

(3) If the explanation offered by the applicant is not accepted by the Center for Drugs and Biologics as sufficient to justify approval of the application, and denial or revocation of approval is therefore proposed, the Commissioner will evaluate information obtained in the informal hearing before the Director of the Center for Drugs and Biologics. If the Commissioner finds that the applicant has failed to submit adequate assurance justifying approval of the application, the Commissioner shall issue a notice of opportunity for hearing with respect to the matter pursuant to § 314.200 of this chapter and the matter shall thereafter be handled in accordance with established procedures for denial or revocation of approval of a new drug application. If the Secretary determines that there is an imminent hazard to health, revocation of approval will become effective immediately and any administrative procedure will be expedited. Upon revocation of approval of an application, the Commissioner will notify the applicant, the State authority, the Drug Enforcement Administration, Department of Justice, and all other appropriate persons that the applicant may no longer receive shipments of narcotic drugs, and will require the recall of all of the drugs from the applicant. Revocation of approval may also result in criminal prosecution.

(4) Denial or revocation of approval may be reversed when the

Commissioner determines that the applicant has justified approval of the application.

(5) A treatment program or medication unit or any part thereof, including any facility or any individual, may appeal to the Food and Drug Administration a complete or partial denial or revocation of approval by the State authority unless the denial or revocation is based upon a State law or regulation. The appeal shall first be made to the Director of the Center for Drugs and Biologics, who shall hold an informal conference on the matter in accordance with paragraph (h)(2) of this section. The State authority may participate in the conference. The appellant or the State authority may appeal the Director's decision to the Commissioner, who shall decide the matter in accordance with paragraph (h)(3) of this section. If the Commissioner denies or revokes approval, such action shall be handled in accordance with paragraph (h)(3) of this section. The Commissioner may not grant or retain Food and Drug Administration approval if the Commissioner finds that the appellant is not in compliance with all applicable State laws and regulations and with this section.

(i) *Sanctions*—(1) *Program sponsor or individual responsible for a particular program.* If the program sponsor or the person responsible for a particular program fails to abide by all the requirements set forth in these regulations, or fails to adequately monitor the activities of those employed in the program, he or she may have the approval of his or her application revoked, his or her narcotic drug supply seized, an injunction granted precluding operation of his or her program, and criminal prosecution instituted against him or her.

(2) *Persons responsible for administering or dispensing narcotic drugs.* If a person responsible for administering or dispensing narcotic drugs for narcotic addict treatment fails to abide by all the requirements set forth in this regulation, criminal prosecution may be instituted against him or her, his or her drug supply may be seized, the approval of the program may be revoked, and an injunction may be granted precluding operation of the program.

(j) *Requirements for distribution by manufacturers of narcotic drugs for narcotic addict treatment*—(1) *Distribution requirements.* Shipments of narcotic drugs for narcotic addict treatment are restricted to direct shipments by manufacturers of the drugs to approved treatment programs using the narcotic drugs and to approved hospital pharmacies. If requested by a manufacturer or State authority, wholesale pharmacy outlets in some regions or States may be authorized to stock narcotic drugs for narcotic addict treatment for that area and then transship the drug to approved narcotic treatment programs and approved hospital pharmacies. Alternative methods of distribution will be permitted if they are approved by the Food and Drug Administration and the State authority. Prior to any approval of an alternative method of distribution there will be consultation with the Drug Enforcement Administration, Department of Justice, to assure compliance with its regulations regarding controlled substance distribution.

(2) *Information regarding approved programs and hospitals.* The Food and Drug Administration will provide manufacturers and the public with names and locations of programs and hospitals that have been approved to receive shipments of narcotic drugs for narcotic addiction treatment. All information contained in the forms required by paragraph (k) of this section is available for public disclosure except for names or other identifying information with respect to patients.

(3) *Acceptance of delivery.* Delivery shall only be made to a licensed practitioner employed at the facility. At the time of delivery the licensed practitioner shall sign for the drugs and place his or her specific title and identification number on any invoice. Copies of these signed invoices shall be kept by the manufacturer.

(k) *Program forms.* The program sponsor must ensure that the following forms are completed by the proper program staff and submitted to the appropriate State authority and the Division of Scientific Investigations, Regulatory Management Branch (HFN–342), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Forms are available upon request from the Regulatory Management Branch (HFN–342), at the same address.

34 CFR Parts 656 and 657

National Resource Centers Program for Foreign Language and Area Studies or Foreign Language and International Studies and Foreign Language and Area Studies Fellowships Program; Notices of Proposed Rulemaking

VOL 52 ISS 191 OCT 2 1987 UMI

DEPARTMENT OF EDUCATION

34 CFR Part 656

National Resource Centers Program for Foreign Language and Area Studies or Foreign Language and International Studies

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the National Resource Centers Program. The amendments are needed to implement changes made in Title VI of the Higher Education Act of 1965 (HEA), as amended by the Higher Education Amendments of 1986, Pub. L. 99–498. The major statutory change requires separate criteria for evaluating applications for comprehensive and undergraduate Centers. The proposed regulations implement that statutory change.

DATE: Comments must be received on or before November 2, 1987.

ADDRESS: All comments concerning these proposed regulations should be addressed to: Joseph F. Belmonte, Acting Deputy Director, Center for International Education, U.S. Department of Education, Room 3054, ROB–3, 400 Maryland Avenue SW., Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Section of this preamble.

FOR FURTHER INFORMATION CONTACT: Joseph F. Belmonte, Telephone: (202) 732–3304.

SUPPLEMENTARY INFORMATION: The National Resource Centers Program is authorized by section 602(a) of the HEA and is designed to provide grants to institutions of higher education and combinations of those institutions to establish, operate, and strengthen national resource centers for the teaching of modern foreign languages plus area studies, international studies, and the international and foreign language aspects of professional studies. Before section 602(a) was amended by the Higher Education Amendments of 1986, it referred to graduate and undergraduate centers. After the amendments it specifically defined each type of Center and required separate evaluate criteria for comprehensive and undergraduate Center applications. Before the amendments, the same criteria were used to evaluate both types of Centers. The major regulatory change in these proposed regulations is therefore the separate listing of these funding criteria.

Executive Order 12291

The proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. Respondents to this program are major higher education institutions with enrollments of well over 500 students. They are not defined as small entities.

Paperwork Reduction Act of 1980

Sections 656.20, 656.21, and 656.22 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget for its review. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3054, ROB–3, 7th and D Streets SW., Washington, DC 20202, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 656

Colleges and universities, Education, Educational study programs, Fellowship, Foreign Languages, Grant programs—education, Resource center, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.015A)

Dated: September 9, 1987.

William J. Bennett,

Secretary of Education.

The Secretary proposes to revise Part 656 of Title 34 of the Code of Federal Regulations to read as follows:

PART 656—NATIONAL RESOURCE CENTERS PROGRAM FOR FOREIGN LANGUAGE AND AREA STUDIES OR FOREIGN LANGUAGE AND INTERNATIONAL STUDIES

Subpart A—General

Sec.

656.1 What is the National Resource Centers Program?
656.2 Who is eligible to receive a grant?
656.3 What activities define a comprehensive or undergraduate National Resource Center?
656.4 What types of Centers receive grants?
656.5 What activities may be carried out?
656.6 What regulations apply?
656.7 What definitions apply?

Subpart B—How Does One Apply for a Grant?

656.10 What combined application may an institution submit?

Subpart C—How Does the Secretary Make a Grant?

656.20 How does the Secretary evaluate an application?
656.21 What selection criteria does the Secretary use to evaluate an application for a comprehensive Center?
656.22 What selection criteria does the Secretary use to evaluate an application for an undergraduate Center?
656.23 What priorities may the Secretary establish?

Subpart D—What Conditions Must Be Met by a Grantee?

656.30 What are allowable costs and what are the limitations on allowable costs?

Authority: 20 U.S.C. 1122, unless otherwise noted.

Subpart A—General

§ 656.1 What is the National Resource Centers Program?

Under the National Resource Centers Program For Foreign Language and Area Studies or Foreign Language and International Studies (National Resource Centers Program), the Secretary awards

grants to institutions of higher education and combinations of institutions to establish, strengthen, and operate comprehensive and undergraduate Centers that will be national resources for—

(a) Stimulating the attainment of foreign language acquisition and fluency;

(b) Instruction in fields needed to provide a full understanding of the areas, regions, or countries in which the foreign language is commonly used;

(c) Research and training in international studies and the international and foreign language aspects of professional and other fields of study; and

(d) Instruction and research on issues in world affairs which concern one or more countries.

(Authority: 20 U.S.C 1122)

§ 656.2 Who is eligible to receive a grant?

An institution of higher education or a combination of institutions of higher education is eligible to receive a grant under this part.

(Authority: 20 U.S.C 1122)

§ 656.3 What activities define a comprehensive or undergraduate National Resource Center?

A comprehensive or undergraduate National Resource Center—

(a) Teaches modern foreign languages;

(b) Provides—

(1) Instruction in fields necessary to provide a full understanding of the areas, regions, or countries in which the languages taught are commonly used;

(2) Resources for training and research in international and foreign language aspects of professional and other fields of study; or

(3) Opportunities for training and research on issues in world affairs that concern one or more countries;

(c) Provides outreach and consultative services on a national, regional, and local basis;

(d) In the case of a comprehensive Center—

(1) Maintains specialized library collections; and

(2) Employs scholars engaged in research which relates to the subject area of the center; and

(e) In the case of an undergraduate Center—

(1) Maintains library holdings, basic reference works, journals, and works in translation; and

(2) Employs faculty with strong credentials in language area, and international studies.

(Authority: 20 U.S.C 1122)

§ 656.4 What types of Centers receive grants?

The Secretary awards grants to Centers that—

(a) Focus on—

(1) A single country or on a world area (such as East Asia, Africa, or the Middle East) and offer instruction in the principal language or languages of that country or area and those disciplinary fields necessary to provide a full understanding of the country or area; or

(2) International studies or the international aspects of contemporary issues or topics (such as international business or energy) while providing instruction in modern foreign languages; and

(b) Provide training at the—

(1) Graduate, professional, and undergraduate levels, as a comprehensive center; or

(2) Undergraduate level only, as an undergraduate center.

(Authority: 20 U.S.C 1122)

§ 656.5 What activities may be carried out?

A Center may carry out any of the activities described in § 656.3 under a grant received under this part.

(Authority: 20 U.S.C 1122)

§ 656.6 What regulations apply?

The following regulations apply to this part:

(a) 34 CFR Part 655.

(b) The regulations in this Part 656.

(c) The Education Department General Administrative Regulations [EDGAR] in 34 CFR Part 74 (Administration of Grants), 34 CFR Part 75 (Direct Grant Programs), 34 CFR Part 77 (Definitions that apply to Department Regulations), and 34 CFR Part 78 (Education Appeal Board).

(Authority: 20 U.S.C 1122)

§ 656.7 What definitions apply?

The following definitions apply to this part:

(a) The definitions in 34 CFR Part 655.

(b) "Area studies" means a program of comprehensive study of the aspects of a world area's society or societies, including study of history, culture, economy, politics, international relations, and languages.

(c) "Center" means an administrative unit of an institution of higher education that has direct access to highly qualified faculty and library resources, and coordinates a concentrated effort of educational resources, including language training and various academic disciplines, in the area and subject matters described in § 656.3.

(d) "Comprehensive Center" means a Center that—

(1) Contributes significantly to the national interest in advanced research and scholarship;

(2) Offers intensive language instruction;

(3) Maintains important library collections related to the area of its specialization; and

(4) Makes training available to a graduate, professional, and undergraduate clientele.

(e) For purposes of this section, "intensive language instruction" means instruction of at least 5 contact hours per week during the academic year.

(f) "Undergraduate Center" means an administrative unit of an institution of higher education that—

(1) Contributes significantly to the national interest through the education of students who matriculate into advanced language and area studies programs or professional school programs;

(2) Incorporates substantial international and foreign language content into baccalaureate degree programs;

(3) Makes training available predominantly to undergraduate students; and

(4) Engages in research, curriculum development, and community outreach.

(Authority: 20 U.S.C. 1122)

Subpart B—How Does One Apply for a Grant?

§ 656.10 What combined application may an institution submit?

An institution that wishes to apply for a grant under this part and for an allocation of fellowships under 34 CFR Part 657 may submit one application for both.

(Authority: 20 U.S.C. 1122)

Subpart C—How Does the Secretary Make a Grant?

§ 656.20 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application for a comprehensive Center under the criteria contained in § 656.21, and for an undergraduate Center under the criteria contained in § 656.22.

(b) In general, the Secretary awards up to 100 possible points for these criteria. However, if the criterion in § 656.21(1) or § 656.22(1) is used, the Secretary awards up to 120 possible points. The maximum possible points for each criterion are shown in parentheses.

(Authority: 20 U.S.C. 1122)

VOL 52 ISS 191 OC 2 1987 UMI

§ 656.21 What selection criteria does the Secretary use to evaluate an application for a comprehensive Center?

The Secretary uses the following criteria in evaluating an application for a comprehensive Center:

(a) *Plan of operation.* (10) (See 34 CFR 655.31(a)).

(b) *Quality of key personnel.* (15) (See 34 CFR 655.31(b)).

(c) *Budget and cost effectiveness.* (5) (See 34 CFR 655.31(c)).

(d) *Evaluation plan.* (5) (See 34 CFR 655.31(d)).

(e) *Commitment to the subject area on which the center focuses.* (5) The Secretary reviews each application to determine—

(1) The degree of institutional commitment to the subject area for which funding is sought as shown by the institution's previous record of accomplishment and support for that subject area; and

(2) The extent to which the institution will provide financial and other support to the Center, faculty members, and qualified students in fields related to the Center.

(f) *Strength of library.* (10) The Secretary reviews each application to determine—

(1) The strength of the institution's library in the subject area and the educational levels (graduate, professional, undergraduate) on which the Center focuses; and

(2) The extent to which the institution will provide financial support for the acquisition of library materials and for library staff in the subject area of the Center.

(g) *Quality of the Center's instructional program.* (20) The Secretary reviews each application to determine—

(1) The quality and extent of the Center's course offerings;

(2) The quality and extent of the Center's language training program including the adequacy of its instructional resources; and

(3) The extent to which the Center employs a sufficient number of scholars or teaching faculty to enable the Center to carry out its purposes.

(h) *Quality of the Center's relationships within the institution.* (10) The Secretary reviews each application to determine the extent to which the Center—

(1) Provides multi- and interdisciplinary instruction; and

(2) Has entered into cooperative arrangements with departments, schools, and professional programs of the institution.

(i) *Overseas activities.* (5) The Secretary reviews each application to determine—

(1) The adequacy of the provisions for relevant overseas experience for faculty and students in the Center's program; and

(2) The extent to which provision is made for cooperation with foreign educators, institutions, organizations, and governments.

(j) *Need and potential impact.* (10) The Secretary reviews each application to determine—

(1) The extent to which the proposed activities serve national needs;

(2) The extent to which an improved program in language and area studies or language and international studies will be available at the applicant institution at the termination of the grant period; and

(3) The potential impact of the proposed project in improving the knowledge of languages, areas, issues in world affairs which concern one or more countries, or international studies at the national level and in providing a national example of excellence and innovation in the subject area on which the Center focuses.

(k) *Outreach activities.* (5) The Secretary reviews each application to determine—

(1) The quality and extent of the services the Center will provide to persons and organizations outside the Center at national, regional, and local levels; and

(2) The contribution of these outreach services to activities such as curriculum development, professional training, and public understanding.

(l) *Degree to which priorities are served.* (20) If, under the provisions of § 656.23, the Secretary establishes specific priorities for Centers, the Secretary considers the degree to which those priorities are being served.

(Authority: 20 U.S.C. 1122)

§ 656.22 What selection criteria does the Secretary use to evaluate an application for an undergraduate Center?

The Secretary uses the following criteria in evaluating an application for an undergraduate Center:

(a) *Plan of operation.* (10) [See 34 CFR 655.31(a)].

(b) *Quality of key personnel.* (15) [See 34 CFR 655.31(b)].

(c) *Budget and cost effectiveness.* (5) [See 34 CFR 655.31(c)].

(d) *Evaluation plan.* (5) [See 34 CFR 655.31(d)].

(e) *Commitment to the subject area on which the Center focuses.* (10) The Secretary reviews each application to determine—

(1) The degree of institutional commitment to the subject area for which funding is sought as shown by the institution's previous record of accomplishment and support for that subject area;

(2) The extent to which the institution is committed to the center by providing financial and other support to the Center and to tenured faculty members of the Center; and

(3) The extent to which students matriculate into advanced language and area or international studies programs or related professional programs.

(f) *Strength of library.* (10) The Secretary reviews each application to determine—

(1) The strength of the institution's library in the subject area on which the Center focuses; and

(2) The extent to which the institution provides financial support for the acquisition of library materials and for library staff in that subject area.

(g) *Quality of the Center's instructional program.* (20) The Secretary reviews each application to determine—

(1) The quality and extent of the Center's course offerings;

(2) The quality of the Center's language training program, including the adequacy of instructional resources; and

(3) The extent to which the Center employs a sufficient number of scholars or teaching faculty to enable the center to carry out its purposes.

(h) *Quality of the center's relationships within the institution.* (5) The Secretary reviews each application to determine—

(1) The extent to which the Center provides multi- and interdisciplinary instruction;

(2) The extent to which the Center has entered into cooperative arrangements with departments, schools, and professional programs of the institution; and

(3) The extent to which substantial instruction in the subject area and languages on which the Center focuses have been incorporated into baccalaureate degree programs.

(i) *Overseas activities.* (5) The Secretary reviews each application to determine—

(1) The adequacy of the provisions for relevant overseas experience for faculty and students in the Center's program; and

(2) The extent to which provision is made for cooperation with foreign educators, institutions, and governments.

(j) *Need and potential impact.* (10) The Secretary reviews each application to determine—

(1) The extent to which the proposed activities serve national needs;

(2) The extent to which an improved program in language and area studies or language and international studies will be available at the applicant institution at the termination of the grant period; and

(3) The potential impact of the proposed project—those activities for which funding is requested—in improving the knowledge of languages, areas, or international studies at the national level and in providing a national example of excellence and innovation for undergraduate education in the subject area on which the Center focuses.

(k) *Outreach activities.* (5) The Secretary reviews each application to determine—

(1) The quality and extent of the services the Center provides to persons and organizations outside the Center as these services relate to the provision of information and training primarily for national groups, but, also, for regional and local groups; and

(2) The contribution of these outreach services to curriculum development, faculty development, pre-professional training, and public understanding.

(l) *Degree to which priorities are served.* (20) If, under the provisions of § 656.23, the Secretary establishes specific priorities for Centers, the Secretary considers the degree to which those priorities are being served.

(Authority: 20 U.S.C. 1122)

§ 656.23 What priorities may the Secretary establish?

(a) The Secretary may select one or more of the following funding priorities:

(1) Specific countries or world areas, such as, for example, East Asia, Africa, or the Middle East.

(2) Specific focus of a center, such as, for example, a single world area; international studies; a particular issue or topic, e.g., business, development issues, or energy; or any combination.

(3) Level or intensiveness of language instruction, such as intermediate or advanced language instruction, or instruction at an intensity of 10 contact hours per week.

(4) Types of activities to be carried out, for example, cooperative summer intensive language programs or teacher training activities.

(b) The Secretary announces any priorities in the application notice published in the **Federal Register**.

(Authority: 20 U.S.C. 1122)

Subpart D—What Conditions Must Be Met By a Grantee?

§ 656.30 What are allowable costs and what are the limitations on allowable costs?

(a) *Allowable costs.* Except as provided under paragraph (b) of this section, a grant awarded under this part may be used to pay all or part of the cost of establishing, strengthening, or operating a comprehensive or undergraduate Center including, but not limited to, the cost of—

(1) Faculty and staff salaries and travel;

(2) Library acquisitions;

(3) Teaching and research materials;

(4) Curriculum planning and development; and

(5) Bringing visiting scholars and faculty to the Center to teach, conduct research, or participate in conferences or workshops.

(b) *Limitations on allowable costs.* The following are limitations on allowable costs:

(1) Equipment costs exceeding ten percent of the grant are not allowable.

(2) Funds for undergraduate travel are allowable only in conjunction with a formal program of supervised study in the subject area on which the center focuses.

(3) Grant funds may not be used to supplant funds normally used by applicants for purposes of this part.

(Authority: 20 U.S.C. 1122)

BILLING CODE 4000–01–M

Office of Postsecondary Education

34 CFR Part 657

Foreign Language and Area Studies Fellowships Program

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Foreign Language and Area Studies Fellowships Program. These amendments are needed to implement changes made in Title VI of the Higher Education Act of 1965 (HEA) by the Higher Education Amendments of 1986, Public Law 99–498. The statute and the proposed regulations increase the program's emphasis on language training and permit awards only to students taking languages for which their institution has developed or is developing competency-based instruction. The Higher Education Amendments of 1986 also authorized a new Direct Individual Foreign Language and Area Studies fellowship program for which regulations will be developed in another Part.

DATE: Comments must be received on or before November 2, 1987.

ADDRESS: All comments concerning these proposed regulations should be addressed to Joseph F. Belmonte, Acting Deputy Director, Center for International Education, U.S. Department of Education, 400 Maryland Avenue SW. (Room 3054, ROB–3), Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction section of this preamble.

FOR FURTHER INFORMATION CONTACT: Joseph F. Belmonte; Telephone: (202) 732–3304.

SUPPLEMENTARY INFORMATION: The Foreign Language and Area Studies Fellowships Program was originally established under the National Defense Education Act of 1958 and has been included in the Higher Education Act authorization since 1980. Under this program institutions of higher education apply to the Secretary for allocations of fellowship funds which are in turn awarded to students undergoing advanced training in study of a modern foreign language in combination with either area studies, international studies, or international aspects of professional fields.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. Respondents to this program are major higher education institutions with enrollments of well over 500 students. They are not small entities.

Paperwork Reduction Act of 1980

Sections 657.3, 657.20, and 657.21 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations, and in particular, the proposed definition of competency-based language training in § 657.5(f).

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3054, 7th & D Streets SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays. To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Education Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 657

Colleges and universities, Education, Educational study program, Fellowships, Foreign languages, Grant program—Education, Reporting and recordkeeping requirements.

Dated: August 24, 1987.

William J. Bennett,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.015, Foreign Language and Area Studies Fellowships Program)

The Secretary proposes to revise Part 657 of Title 34 of the Code of Federal Regulations to read as follows:

PART 657—FOREIGN LANGUAGE AND AREA STUDIES FELLOWSHIPS PROGRAM

Subpart A—General

Sec.

657.1 What is the Foreign Language and Area Studies Fellowships Program?
657.2 Who is eligible to receive an allocation of fellowships?
657.3 Who is eligible to receive a fellowship?
657.4 What regulations apply?
657.5 What definitions apply?

Subpart B—How Does an Institution or a Student Submit and Application?

657.10 What combined application may an institution submit?
657.11 How does a student apply for a fellowship?

Subpart C—How Does the Secretary Select An Institution for an Allocation of Fellowships?

657.20 How does the Secretary evaluate an institutional application for an allocation of fellowships?
657.21 What criteria does the Secretary use in selecting institutions for an allocation of fellowships?
657.22 What priorities may the Secretary establish?

Subpart D—What Conditions Must Be Met By a Grantee and a Fellow?

657.30 What is the duration of and what are the limitations on fellowships awarded to individuals by institutions?
657.31 What is the amount of a fellowship?
657.32 What is the payment procedure for fellowships?
657.33 What are the limitations on the use of funds for overseas fellowships?
657.34 Under what circumstances must an institution terminate a fellowship?

Authority: 20 U.S.C. 1122, unless otherwise noted.

Subpart A—General

§ 657.1 What is the Foreign Language and Area Studies Fellowship Program?

Under the Foreign Language and Area Studies Program, the Secretary awards fellowships, through institutions of higher education, to students who are—

(a) Enrolled for advanced training in a center or program approved by the Secretary under this part; and

(b) Undergoing competency-based modern foreign language training or training in a program for which competency-based modern foreign language instruction is being developed, in combination with area studies, international studies, or the international aspects of professional studies.

(Authority: 20 U.S.C. 1122)

§ 657.2 Who is eligible to receive an allocation of Fellowships?

(a) The Secretary awards an allocation of fellowships to an institution of higher education or to a combination of institutions of higher education that—

(1) Operates a center or program approved by the Secretary under this part;

(2) Teaches modern foreign languages under a program described in paragraph (b) of this section; and

(3) In combination with the teaching described in paragraph (a)(2) of this section—

(i) Provides instruction in the disciplines needed for a full understanding of the area, regions, or countries in which the foreign languages are commonly used; or

(ii) Conducts training and research in international studies, the international aspects of professional and other fields of study, or issues in world affairs that concern one or more countries.

(b) In teaching those modern foreign languages for which an allocation of fellowships is made available, the institution must be either using a program of competency-based training or developing a competency-based training program.

(c) The Secretary uses the criteria in § 657.21 both to approve centers and programs for the purpose of receiving an allocation of fellowships and to evaluate applications for an allocation of fellowships.

(d) An institution does not need to receive a grant under the National Resource Center Program 34 CFR Part 656, or the Undergraduate International Studies and Foreign Language Program, 34 CFR Part 658, to receive an allocation of fellowships under this Part.

(Authority: 20 U.S.C. 1122)

§ 657.3 Who is eligible to receive a fellowship?

A student is eligible to receive a fellowship if the student—

(a) (1) Is a citizen or national of the United States;

(2) Is a permanent resident of the United States; or

(3) Is a permanent resident of the Trust Territory of the Pacific Islands;

(b) Is accepted for enrollment or is enrolled—

(1) In an institution receiving an allocation of fellowships; and

(2) In a program that combines modern foreign language training with—

(i) Area or international studies; or

(ii) Research and training in the international aspects of professional and other fields of study;

(c) Shows potential for high academic achievement, based on such indices as grade point average, class ranking, or similar measures that the institution may determine; and

(d) Is enrolled in modern foreign language training in a language for which the institution has developed or is developing competency-based instruction.

(Authority: 20 U.S.C. 1122)

§ 657.4 What regulations apply?

The following regulations apply to the program:

(a) 34 CFR Part 655.

(b) The regulations in this Part 657.

(c) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), 34 CFR Part 75 (Direct Grant Programs), 34 CFR Part 77 (Definitions That Apply To Department Regulations), and 34 CFR Part 78 (Education Appeal Board).

(Authority: 20 U.S.C. 1122)

§ 657.5 What definitions apply?

The following definitions apply to this Part:

(a) The definitions in 34 CFR 655.4.

(b) "Center" means an administrative unit of an institution of higher education that has direct access to highly qualified faculty and library resources, and coordinates a concentrated effort of educational activities, including training in modern foreign languages and various academic disciplines, in its subject area.

(c) "Fellow" means a person who receives a fellowship under this Part.

(d) "Fellowship" means the payment a fellow receives under this Part.

(e) "Program" means a concentration of educational resources and activities in modern foreign language training and related studies.

(f) "Competency-based language training" means a training program which has defined functional language use objectives and whose evaluation measures for students can be linked to established national standards.

(Authority: 20 U.S.C. 1122)

Subpart B—How Does an Institution or a Student Submit an Application?

§ 657.10 What combined application may an institution submit?

An institution that wishes to apply for an allocation of fellowships and for a grant to operate a Center under 34 CFR Part 656 may submit a combined application for both grants to the Secretary.

(Authority: 20 U.S.C. 1122)

§ 657.11 How does a student apply for a fellowship?

(a) A student shall apply for a fellowship directly to an institution of higher education that has received an allocation of fellowships.

(b) The applicant shall provide sufficient information to enable the institution to determine whether he or she is eligible to receive a fellowship and whether he or she should be selected to receive a fellowship.

(Authority: 20 U.S.C. 1122)

Subpart C—How Does the Secretary Select an Institution for an Allocation of Fellowships?

§ 657.20 How does the Secretary evaluate an institutional application for an allocation of fellowships?

(a) The Secretary evaluates an application for an allocation of fellowships on the basis of the quality of the applicant's center or program. The applicant's center or program is evaluated and approved under the criteria in § 657.21.

(b) In general, the Secretary awards up to 100 possible points for these criteria. However, if priority criteria are used, the Secretary awards up to 120 possible points. The maximum possible points for each criterion are shown in parentheses.

(Authority: 20 U.S.C. 1122)

§ 657.21 What criteria does the Secretary use in selecting institutions for an allocation of fellowships?

The Secretary selects applicants for an allocation of fellowships on the basis of the quality of the applicant's center or program. The Secretary uses the following criteria in evaluating the applicant's center or program:

(a) *Plan of operation.* (5) (See 34 CFR 655.31(a)).

(b) *Quality of key personnel.* (15) (See 34 CFR 655.31(b)).

(c) *Evaluation plan.* (5) (See 34 CFR 655.31(d)).

(d) *Commitment to the subject area on which the center or program focuses.* (5) The Secretary reviews each application to determine—

(1) The degree of institutional commitment to the subject area of the center or program as shown by the institution's previous record of accomplishment and support for that subject area; and

(2) The extent to which the institution provides financial and other support to the center or program, to faculty members of the center or program, and to qualified students in fields related to the center or program.

(e) *Strength of library.* (15) The Secretary reviews each application to determine—

(1) The strength of the institution's library in the subject area of the center or program; and

(2) The extent to which the institution provides financial support for the acquisition of library materials and for library staff in that subject area.

(f) *Quality of the center's or program's instructional program.* (40) The Secretary reviews each application to determine—

(1) The quality and extent of the course offerings (15);

(2) The quality of the modern foreign language training program, as measured by the scope of the competency-based language instruction which is being used or developed, the adequate of instructional resources, and the nature of language proficiency requirements (15);

(3) The extent to which a sufficient number of scholars or teaching faculty are employed to enable the center or program to carry out its purposes (5); and

(4) The relationship of the language program to area studies, international studies, or international aspects of professional studies (5).

(g) *Quality of the center's or program's relationships within the institution.* (5) The Secretary reviews each application to determine—

(1) The extent to which multi- and interdisciplinary instruction is included; and

(2) The extent to which cooperative arrangements with departments, schools, and professional programs of the institution exist.

(h) *Overseas activities.* (5) The Secretary reviews each application to determine—

(1) The adequacy of the provisions for relevant overseas experience for faculty and students; and

(2) The extent to which provision is made for cooperation with foreign educators, institutions, and governments.

(i) *Need and potential impact.* (5) The Secretary reviews each application to determine—

(1) The extent to which the center or program supports training that is needed nationwide;

(2) The extent to which the center or program's plans for selection and training of fellows in language and area studies or language and international studies will foster an improved supply of specialists in the subject area of the center or program.

(j) *Priorities.* (20) If one or more priorities have been established under § 657.22, the Secretary reviews each application for information that shows the extent to which the center or program meets these priorities.

(Authority: 20 U.S.C. 1122)

VOL
52
ISS
191
OC
2
1987
UMI

§ 657.22 What priorities may the Secretary establish?

(a) The Secretary may establish one or more of the following priorities for the allocation of fellowships—

(1) Specific world areas, or countries, such as East Asia or Mexico;

(2) Languages, such as Chinese;

(3) Levels of language offerings;

(4) Academic disciplines, such as linguistics or sociology;

(5) Professional studies, such as business, law, or education;

(6) Particular subjects, such as population growth and planning, or international trade and business; or

(7) A combination of any of these categories.

(b) The Secretary announces any priorities in the application notice published in the Federal Register.

(Authority: 20 U.S.C. 1122)

Subpart D—What Conditions Must Be Met by a Grantee and a Fellow?

§ 657.30 What is the duration of and what are the limitations on fellowships awarded to individuals by institutions?

(a) *Duration.* An institution may award a fellowship to a student for—

(1) One academic year; or

(2) One summer session if the summer session provides the fellow with the equivalent of one academic year of modern foreign language study.

(b) *Vacancies.* If a fellow vacates a fellowship before the end of an award period, the institution to which the fellowship is allocated may reaward the balance of the fellowship to another student if—

(1) The student meets the eligibility requirements in § 657.3; and

(2) The remaining fellowship period comprises at least one full academic quarter, semester, trimester or summer session as described in paragraph (a)(2) of this section.

(Authority: 20 U.S.C. 1122)

§ 657.31 What is the amount of a fellowship?

(a)(1) An institution shall award a fellowship in an amount that covers the cost of the fellow's tuition and fees and an allowance for subsistence.

(2) If permitted by the Secretary, the institution may include an allowance for travel and an allowance for dependents.

(b) The Secretary announces in the annual application notice published in the Federal Register—

(1) The amount of subsistence allowances which may range from $5,000 to $8,000 for an academic year and from $1,250 to $2,000 for a summer session;

(2) Whether dependents' and travel allowances will be permitted; and

(3) The amount of dependents' and travel allowances which may be up to $500 per dependent for the dependency allowance and up to the lesser of $750 or the actual travel cost for the travel allowance.

(c) Funds for undergraduate travel are allowable only in conjunction with a formal program of supervised study in the subject area on which the center or program focuses.

(Authority: 20 U.S.C. 1122)

§ 657.32 What is the payment procedure for fellowships?

(a) An institution shall pay a fellow his or her subsistence and any other allowance in installments during the term of the fellowship.

(b) An institution shall make a payment only to a fellow who is in good standing and is making satisfactory progress.

(c) The institution shall make appropriate adjustments of any overpayment or underpayment to a fellow.

(Authority: 20 U.S.C. 1122)

§657.33 What are the limitations on the use of funds for overseas fellowships?

(a) Before awarding a fellowship for use outside the United States, an institution shall obtain the approval of the Secretary.

(b) The Secretary may approve the use of a fellowship outside the United States if the student is—

(1) Enrolled in an advanced overseas modern foreign language program approved by the institution at which the student is enrolled in the United States; or

(2) Engaged in research that cannot be done effectively in the United States and is affilated with an institution of higher education or other appropriate organization in the host country.

(Authority: 20 U.S.C. 1122)

§657.34 Under what circumstances must an institution terminate a Fellowship?

An institution shall terminate a fellowship if—

(a) The fellow is not making satisfactory progress, is no longer enrolled, or is no longer in good standing at the institution; or

(b) The fellow fails to follow the course of study, including modern foreign language study, for which he or she applied, unless a revised course of study is otherwise approvable under this part.

Connecticut Statute and Regulations Governing Transportation of Radioactive Materials; Notice

VOL
52
ISS
191
OC
2
1987
UMI

DEPARTMENT OF TRANSPORTATION

[Inconsistency Ruling No. IR-21; Docket IRA-38]

Connecticut Statute and Regulations Governing Transportation of Radioactive Materials

Applicant: Citizens Against Nuclear Trucking.

State Regulations Affected: Sections 16a–106 (a) and (b) of the Connecticut General Statutes and sections 19–409d–51, 53, 54, and 55 of the Connecticut Regulations governing transportation of certain radioactive materials.

Applicable Federal Requirements: Hazardous Materials Transportation Act (HMTA) (Pub. L. 93–633, 49 App. U.S.C. 1801 *et seq.*) and the Hazardous Materials Regulations (HMR) (49 CFR Parts 170 through 179) issued thereunder.

Mode Affected: Highway.

Issue Date: September 28, 1987.

Ruling: Connecticut General Statutes sections 16a–106 (a) and (b) and Connecticut Regulations sections 19–409d–51, 53, 54 and 55 are inconsistent with the HMTA and the HMR.

SUMMARY: This inconsistency ruling is the opinion of the Office of Hazardous Materials Transportation (OHMT) of the Department of Transportation (DOT) concerning whether Connecticut General Statutes sections 16a–106 (a) and (b) and Connecticut Regulations sections 19–409d–51, 53, 54, and 55 are inconsistent with the HMTA and the HMR and thus preempted by section 112(a) of the HMTA. This ruling was applied for and is issued under the procedures set forth at 49 CFR 107.201 through 107.209.

FOR FURTHER INFORMATION CONTACT: Edward H. Bonekemper, III, Senior Attorney, Office of the Chief Counsel, Research and Special Programs Administration, Department of Transportation, Washington, DC 20590 [Tel. (202) 366–4362].

I. Background

A. Chronology

On July 16, 1986, Citizens Against Nuclear Trucking (CANT) filed an application for an administrative ruling seeking a determination that certain portions of Connecticut General Statutes (CGS) sections 16a–106 (a) and (b) and Connecticut Regulations sections 19–409d–51, 53, 54, and 55 regulating the transport from, into and through Connecticut of certain radioactive materials are inconsistent with the HMTA and the HMR. These statutory and regulatory provisions contain notice, routing, permit, information, documentation and time requirements.

CANT alleges that its members live and work near, and utilize, a highway (Interstate 84) affected by the cited provisions, and thus are affected by the Connecticut provisions.

CANT specifically requested that the Connecticut provisions be tested for inconsistency with Appendix A to 49 CFR Part 177 and with 49 CFR 177.825. However, as indicated in the Public Notice and Invitation To Comment (51 (FR) 34524, September 29, 1986), comparison with Appendix A will not be undertaken because Appendix A is not a law or regulation, but merely a statement of DOT policy. Thus, comparison of the Connecticut provisions will be made only with 49 CFR 177.825 and any necessarily-related HMTA or HMR provisions and in accordance with relevant prior inconsistency rulings.

CANT asserts that the Connecticut provisions are inconsistent for three general reasons:

(1) They impose routing and filing requirements for shipments of materials that are exempted from such requirements under Federal rules;

(2) They require filing of additional documents beyond those required by Federal rules; and

(3) They create time and escort restrictions in conflict with Federal rules.

In response to the previously cited Public Notice and Invitation To Comment, the State of Connecticut (the State) filed comments opposing CANT's application. The State contends that CANT's application fails to demonstrate that CANT has the requisite standing to challenge the State's provisions. It also argues that the application fails to articulate how or in what manner the Connecticut provisions are inconsistent with Federal law and thus fails to provide an adequate basis for an informed decision.

B. General Authority and Preemption Under the HMTA

The HMTA at section 112(a) (49 App. U.S.C. 1811(a)) preempts "* * * any requirement, of a State or political subdivision thereof, which is inconsistent with any requirement set forth in [the HMTA], or in a regulation issued under [the HMTA]." This express preemption provision makes it evident that Congress did not intend the HMTA and its regulations to completely occupy the field of transportation so as to preclude any State or local action. The HMTA preempts only those State and local requirements that are "inconsistent."

Although advisory in nature, inconsistency rulings issued by OHMT under 49 CFR Part 107 provide an alternative to litigation for a determination of the relationship between Federal requirements and those of a State or political subdivision. If a State or political subdivision requirement is found to be inconsistent, the State or local government may apply to the Administrator of the Research and Special Programs Administration (RSPA) of DOT for a waiver of Preemption. (49 App. U.S.C. 1811(b); 49 CFR 107.215 through 107.225).

Since these proceedings are conducted pursuant to the HMTA, only the question of statutory preemption under the HMTA will be considered. A Federal court might find a non-Federal requirement statutorily preempted under another statute or preempted by the Commerce Clause of the U.S. Constitution because of an undue burden on interstate commerce. However, OHMT does not make such determinations in its inconsistency ruling process.

OHMT has incorporated into its procedures (49 CFR 107.209(c)) the following case law criteria for determining whether a State or local requirement is consistent:

(1) Whether compliance with both the non-Federal requirement and the Act or the regulations issued under the Act is possible; and

(2) The extent to which the non-Federal requirement is an obstacle to the accomplishment and execution of the Act and the regulations issued under the Act.

The first criterion, commonly called the "dual compliance" test, concerns those non-Federal requirements which are irreconcilable with Federal requirements; that is, compliance with the non-Federal requirement causes the Federal requirement to be violated, or *vice versa*. The second criterion, the "obstacle" test, requires an analysis of the non-Federal requirement in light of the requirements of the HMTA and the HMR, as well as the purposes and objectives of Congress in enacting the HMTA and the manner and extent to which those purposes and objectives have been carried out through the OHMT's regulatory program.

In the HMTA's Declaration of Policy (section 102) and in the Senate Commerce Committee language reporting out what became section 112 of the HMTA, Congress indicated a desire for uniform national standards in the field of hazardous materials transportation. Congress inserted the preemption language in section 112(a)

"in order to preclude a multiplicity of State and local regulations and the potential for varying as well as conflicting regulations in the area of hazardous material transportation" (S. Rep. 1192, 93rd Cong., 2d Sess., 37–38 (1974)). Through its enactment of the HMTA, Congress gave the Department the authority to promulgate uniform national standards. While the HMTA did not totally preclude State or local action in this area, Congress apparently intended, to the extent possible, to make such State or local action unnecessary. The comprehensiveness of the HMR severely restricts the scope of historically permissible State or local activity. The nature, necessity and number of hazardous materials shipments make uniform standards extremely important.

II. CANT's Standing To Apply For Inconsistency Ruling

Connecticut contends that CANT has not demonstrated that it has the requisite standing to request an inconsistency ruling and that the application should be dismissed on that basis. The State cites the language of 49 CFR 107.203 providing that "* * * any *person affected by a requirement of a State* * * *" may apply to OHMT for an administrative ruling as to whether a particular existing requirement of the State * * * is inconsistent with a requirement of the Act or the regulations issued under the Act." (Connecticut's emphasis added.)

The State contends that CANT has failed to demonstrate how the Connecticut statute and regulations affect CANT itself. It adds that the application is silent as to how the Connecticut provisions jeopardize the safety of CANT's members.

The State says that standing must be considered "within the context of administrative proceedings and in light of the purpose of the Federal law and regulations under which the Application is filed." It further argues that, in view of the "judicial character of the inconsistency ruling proceeding" (49 FR 46633, November 27, 1984), CANT must meet the judicial standard for standing. Connecticut cites numerous court decisions on judicial standing and explains why it believes CANT does not meet the applicable tests.

Finally, the State contends that CANT also fails to allege a sufficient interest to establish standing under nonjudicial standards applicable to administrative proceedings. It cites *Koniag, Inc. v. Andrus*, 580 F.2d 601 (D.C. Cir. 1978) for the proposition that administrative standing should be tailored to the concerned agency's functions. It then argues that the HMR are aimed at shippers and carriers of hazardous materials, that CANT and its members are neither, and that CANT's application fails to show any relationship between CANT and its members and the Connecticut regulatory scheme.

On the issue of standing, CANT states the following in its original application:

> CANT members live and work near the Interstate 84 portion of the designated route used by shippers of irradiated nuclear fuel from nuclear power plants in New England and are thus in the zone considered at risk by such shipments according to "Guidelines for Selecting Preferred Highway Routes for Large Quantity Shipments of Radioactive Materials" (DOT Guidelines), page 18 Members also utilize the route during the hours required by the Connecticut regulation. CANT members are therefore affected in several ways by Connecticut's rules restricting commercial shipments of irradiated nuclear fuel.

In response to Connecticut's objections to its standing in this matter, CANT responds that judicial standing requirements do not apply in administrative proceedings and that it meets the requirements for standing in such proceedings. It cites *Ingalls Shipbuilding Division v. White*, 681 F.2d 275, 285 (5th Cir. 1982), for the proposition that:

> * * * administrative proceedings * * * are not Article III proceedings to ► which either the "case or controversy" or judicial standing requirements apply. Within their legislative mandates, agencies are free to hear actions brought by parties who might be without standing if the same issues happened to be before a federal court.

CANT contends that its standing should be evaluated under the following five-point functional test of administrative standing set forth by Judge Bazelon in a concurring opinion in *Koniag, Inc. v. Andrus, supra*, at 816:

> (1) The nature of the interest asserted by the potential participant.
> (2) The relevance of this interest to the goals and purposes of the agency.
> (3) The qualifications of the potential participant to represent this interest.
> (4) Whether other persons could be expected to represent adequately this interest.
> (5) Whether special considerations indicate that an award of standing would not be in the public interest.

CANT indicates that it is a person or organization speaking for the affected public as were the plaintiffs in *Office of Communication of United Church of Christ v. FCC*, 359 F.2d 994 (D.C. Cir. 1966), and *National Welfare Rights Organization v. Finch*, 429 F.2d (D.C. Cir. 1970). It asserts:

> CANT is uniquely qualified to represent the interests of those persons in the tri-state New York metropolitan area because of the professional qualifications of many of its key members * * * and because it is the only organization in that metropolitan area which has safe transportation of nuclear materials as its sole objective.

Finally, CANT attaches an affidavit of its member and Technical Director Lindsay Audin in which he asserts that he is a frequent user of I–84 in both New York and Connecticut.

Through its inconsistency ruling process, the Research and Special Programs Administration (RSPA) provides a means of resolving, through non-binding, advisory opinions, preemption issues arising under the HMTA. The process may alleviate expensive and time-consuming litigation of such issues and may produce an inherently consistent body of interpretations. It also enables RSPA to advise State and local governments concerning what types of requirements are consistent or inconsistent with the HMTA and the HMR, thereby possibly assisting in the avoidance of inconsistent enactments.

This RSPA function is prompted by broad construction of the "person affected" test contained in § 107.203 of the HMR. RSPA has considerable discretion to adopt such a broad construction of its administrative standing regulation. *Koniag, Inc. v. Andrus, supra; American Trucking Associations v. U.S.*, 627 F.2d 1313 (D.C. Cir. 1980).

In fact, the issue of standing is rendered moot if the Director, OHMT, decides to address the preemption of a particular state or local requirement. This is because § 107.209(b) of the HMR authorizes the Director, *sua sponte*, to issue inconsistency rulings. In fact, five inconsistency rulings have been issued under this authority. IR–11 (49 FR 46647), IR–12 (49 FR 46650), IR–13 (49 FR 46653), IR–14 (FR 46656), IR–15 (49 FR 46660) (all November 27, 1984).

OHMT encourages use of its inconsistency ruling process to resolve preemption issues under the HMTA in as expeditious and inexpensive a manner as possible. Thus, OHMT will apply a broad interpretation of the "person affected" standard in this and future inconsistency proceedings. In the case at hand, therefore, CANT does have standing to apply for an inconsistency ruling, and an inconsistency ruling is being issued concerning the Connecticut statutory and regulatory provisions challenged by CANT.

III. Connecticut Statutory and Regulatory Provisions

A. Overview

Connecticut General Statutes (CGS) section 16a–106(a) prohibits transportation in Connecticut without a permit of certain radioactive wastes, "large quantity" radioactive materials, and radioactive materials and wastes which are required to be placarded. CGS section 16a–106(b) specifies information which must be submitted to the Commissioner of the Department of Transportation (the Commissioner) to obtain a permit; sets a standard for permit issuance; provides time requirements for permit processing; authorizes the Commissioner to require date, time and route changes or the use of escorts; and requires the Commissioner of Public Safety to establish inspection procedures to ensure compliance with permit conditions and the Commissioner's regulations.

The Commissioner's implementing regulations are in Connecticut Regulations sections 19–409d–51, 53, 54 and 55. Those sections, respectively, address the purpose of the regulations, definitions, permit application requirements, and permit conditions.

B. Statutory Provisions

CGS sections 16a–106(a) provides:

> No person shall transport into or through the state any of the following materials: (1) Any quantity of radioactive material specified as a "large quantity" by the Nuclear Regulatory Commission in 10 CFR, Part 71, entitled "Packaging of Radioactive Material for Transport", (2) any quantity of radioactive waste which has been produced as part of the nuclear fuel cycle and which is being shipped from or through the state to a waste disposal site or facility or (3) any shipment of radioactive material or waste which is carried by commercial carrier and which is required in 10 CFR or 49 CFR to have a placard unless such person has been granted a permit to transport such material from the commissioner of transportation.

In general, hazardous materials transportation permits are not inconsistent *per se*, and their consistency depends upon their specific requirements. IR–2 (44 FR 75566, Dec. 20, 1979); IR–3 (46 FR 18198, March 26, 1981); IR–20 (52 FR 24396, June 30, 1987). However, the field of radioactive materials transportation safety is unique. Because the HMTA and HMR have almost completely occupied the field of radioactive materials transportation safety, state and local transportation requirements relating thereto are limited to: (1) Traffic control or restrictions applying to all traffic, (2) designation of alternative preferred routes under 49 CFR 177.825(b), (3) adoption of Federal or consistent requirements or those for which preemption has been waived, (4) enforcement of the requirements described in (3), and (5) imposition of transit fees to finance the enforcement described in (4) as well as emergency response. IR–8 (Appeal) (52 FR 13000, April 20, 1987); IR–10 through IR–15 (49 FR 46645 to 46660, November 27, 1984); IR–15 (Appeal) (52 FR 13062, April 20, 1987); IR–17 (51 FR 20925, June 9, 1986); IR–17 (Appeal) (52 FR 36200, September 25, 1987); IR–18 (52 FR 200, January 2, 1987), IR–19 (52 FR 24404, June 30, 1987); IR–20, *supra*. RSPA's Administrator discussed this issue in rejecting Vermont's appeal of the OHMT Director's decision in IR–15, *supra*. In IR–15 (Appeal), the Administrator said:

> In light of the virtually total occupation of the field of radioactive materials transportation by the HMTA and the HMR, State or local provisions requiring approval or authorizing conditions to be established for the transportation of radioactive materials (other than compliance with Federal regulations) constitute unauthorized prior restraints on shipments that are presumptively safe based on their compliance with Federal regulations and are inconsistent with the HMTA and the HMR. IR–8 (49 FR 46637), IR–10 (49 FR 46645), IR–11 (49 FR 46647), IR–12 (49 FR 46650), IR–13 (49 FR 46653) (all Nov. 27, 1984). Vermont's Rule V purports to authorize state approvals, conditions, and limitations in this field and thus is inconsistent.

52 FR 13063.

In light of this broad preemption of radioactive materials transportation permitting, CGS section 16a–106(a) is inconsistant with the HMTA and the HMR and, therefore, is preempted.

The other statutory provision at issue, CGS section 16a–106(b), provides:

> Prior to the transporting of such materials, such person shall apply to the commissioner of transportation for a permit and provide said commissioner with the following information: (1) Name of shipper, (2) name of carrier, (3) type and quantity of radioactive material or waste, (4) proposed date and time of shipment, (5) starting point, scheduled route, and destination and (6) any other information required by the commissioner. Said commissioner shall grant such permit upon a finding that the transporting of such material shall be accomplished in a manner necessary to protect public health and safety of the citizens of the state. Such permit shall be granted or denied not later than three days, Saturdays and Sundays excluded, after such person has applied for such permit, except that if the commissioner determines that such additional time is required to evaluate such application, the commissioner shall notify such person not later than such three-day period that additional time is required. Said commissioner may require changes in dates, routes or time for the transporting of such material or the use of escorts in the transporting of such material or waste if necessary to protect the public health and safety. The commissioner may consult with the commissioner of environmental protection and the commissioner of public safety prior to the granting of any permit and of the terms and conditions of such permit. The commissioner of public safety shall establish an inspection procedure along scheduled routes to ensure compliance with permit conditions and with regulations adopted by the commissioner of transportation pursuant to subsection (c).

Because this section is inextricably related to, and "fleshes out," the inconsistent permitting requirements of CGS section 16a–106(a), it also is inconsistent with the HMTA and the HMR and thus preempted.

There are several additional reasons that this section is inconsistent with the HMTA and the HMR. First, it contains radioactive materials transportation information requirements exceeding those in the HMR. In the Action on Appeal concerning IR–15, *supra*, RSPA's Administrator addressed the consistency of such requirements:

> It is clear that DOT and NRC have determined what information and documentation requirements should be imposed on carriers for the safe transportation of radioactive materials, including information needed for emergency response. Therefore, state and local requirements applicable to carriers going beyond the Federal requirements create confusion for transporters, are obstacles to the accomplishment of the objectives of the HMTA and the HMR, and thus are inconsistent with them. (IR–2 (44 FR 75566, Dec. 20, 1979); IR–6 (48 FR 760, Jan. 6, 1983); IR–8 (49 FR 46637, Nov. 27, 1984).

52 FR at 13062. The Connecticut information requirements go beyond those in the HMR, and, therefore, are inconsistent with the HMTA and the HMR.

Second, although CGS section 16a–106(b), unlike the Nevada PSC regulations in IR–19, *supra*, does contain a standard for issuance or denial of a permit, it shares with those regulations a fatal propensity to cause delay in the transportation of hazardous materials. RSPA's concerns about delays in such transportation are long-standing. This issue was addressed in an early ruling: "The manifest purpose of the HMTA and the Hazardous Materials Regulations is safety in the transportation of hazardous materials. Delay in such transportation is incongruous with such transportation." IR–2, *supra*, at 75571. Section 177.853 of the HMR directs that highway shipments proceed without unnecessary delay. The Connecticut statute at issue

here provides three working days for a decision and further allows additional time if the Commissioner determines it is required to evaluate the application. Unnecessary delay is inherent in such a provision; therefore, it is inconsistent with the HMTA and the HMR. IR–6, 48 FR 760 (January 6, 1983); IR–16, 50 FR 20872 (May 20, 1985); IR–19, *supra.*

Third, CGS section 16a–106(b) authorizes the Commissioner to require date, time or route changes or the use of escorts for transport of radioactive materials or wastes. The time issues are discussed below under "Regulatory Provisions." However, discretionary state routing requirements for the transportation of radioactive materials are inconsistent with § 177.825 of the HMR because they are neither identical to that section nor state-designated alternative routes authorized by that section. IR–8 (Appeal), IR–16, IR–18, IR–20, all *supra; Jersey Central Power & Light Co. v. State of New Jersey,* Civil No. 84–5883 (D. N.J., Dec. 27, 1984), *appeal dismissed as moot,* 772 F.2d 35 (3rd Cir. 1985). In addition, requirements to provide escorts for radioactive materials shipments beyond those escorts required by the HMR (including Nuclear Regulatory Commission (NRC) requirements incorporated therein) are inconsistent with the HMR. IR–11, IR–13, IR–15 (Appeal), IR–18, all *supra.* Thus, the Connecticut routing and escort provisions both are inconsistent with the HMR.

Fourth, CGS section 16a–106(b) authorizes the establishment of inspection procedures to ensure compliance with permit conditions and the Commissioner's regulations. Although inspection requirements relating to Federal and consistent requirements are encouraged by RSPA and are themselves consistent (IR–2, IR–15, IR–20, all *supra;* IR–8, 49 FR 46637 (November 27, 1984); IR–17, 51 FR 20925 (June 9, 1986)), inspection requirements, such as this one, relating to inconsistent permitting requirements are themselves inconsistent, IR–20, *supra.*

In summary, for the foregoing reasons, CGS sections 16a–106 (a) and (b) are inconsistent with the HMTA and the HMR.

Regulatory Provisions

The challenged Commissioner's regulations, Connecticut Regulations sections 19–409d–51, –53, –54 and –55 (printed in Appendix A to the Public Notice and Invitation to Comment concerning this inconsistency ruling application, 51 FR 34526–7, September 29, 1986) merely implement the State's inconsistent statutory permitting system and, therefore, are themselves inconsistent with the HMTA and the HMR. In addition, they contain several independently inconsistent provisions, which are discussed in the following paragraphs.

Section 19–409d–51 states that the regulations relate to the transport of, among others, "large quantities of radioactive materials." Section 19–409d–53 defines "large quantity" as the same definition in the NRC regulations at 10 CFR Part 71. The HMR previously contained a similar definition. However, in a final rule issued on July 1, 1983 (Docket No. HM–169, 48 FR 10218), the term "highway route controlled quantity" replaced "large quantity radioactive materials." Continued use of this superseded terminology over four years later could cause confusion and undermine compliance with the HMTA and the HMR. In light of the exclusive Federal role in defining hazardous materials (IR–5, 47 FR 51991 (November 18, 1982); IR–6, IR–8, IR–12, IR–15, IR–16, all *supra*) and of a finding in IR–18, *supra,* that a similar provision is inconsistent, the Connecticut definition is inconsistent with the HMR.

Section 19–409d–54 contains the following sentence regarding time requirements:

> No applications will be processed without a two-hour advance notice nor will an application be accepted more than one working day in advance of the scheduled move except that the Commissioner reserves the right to waive the advance requirement notice when it is in the best interest of public health and safety.

A similar two-hour advance notice requirement with no stated purpose was found inconsistent in IR–20, *supra.* The prohibition on applications more than one working day in advance of each scheduled shipment, combined with the statutory provision for three or more days to act on the application, tends to ensure delays in hazardous materials transportation. As indicated above in the discussion of delays under "Statutory Provisions," this prohibition, therefore, is inconsistent with the HMTA and the HMR. IR–2, IR–3, IR–8 (Appeal), IR–18, IR–19, IR–20, all *supra.* That same section requires two extensive certificates, one from the shipper concerning compliance with NRC and DOT regulations and another from the carrier concerning proper loading, blocking and securing and compliance with DOT regulations. These certification/documentation requirements are similar to the statutory information requirements discussed above. Requirements for information or documentation in excess of the HMR requirements create an additional burden or delay and are inconsistent with the HMTA and the HMR. IR–2, IR–6, IR–8, IR–8 (Appeal), IR–15, IR–15 (Appeal), IR–18, IR–19, all *supra.* Specifically, requirements for certification to a state of a shipment's compliance with law are redundant, constitute obstacles to the HMTA, and thus are inconsistent. IR–8, IR–15, both *supra.* For all these reasons, the Connecticut regulatory certification/documentation requirements are inconsistent with the HMTA and the HMR.

The final provision at issue is Connecticut Regulations section 19–409d–55, which states:

> In the interest of public health and safety, the following requirements are to be considered a condition of the permit.
>
> 1. All routes will be determined by the Connecticut department of energy.
>
> 2. All shipments are to be made during daylight hours between the hours of 9:00 a.m. thru 4:00 p.m.
>
> 3. The permit is void on Saturdays, Sundays, and holidays.
>
> 4. The permit or a confirmation of it must be in the possession of the operator of the vehicle while transporting the radioactive materials over Connecticut state highways.

Paragraph 1. is inconsistent with the HMTA and the HMR because, as indicated above, discretionary state routing requirements for the transportation of radioactive materials have been preempted by RSPA's total occupation of the field of radioactive materials transportation through the promulgation of the HMR. Transportation of radioactive materials in accordance with the HMR, including the routing requirements thereof, are presumptively safe, and, therefore, state and local routing requirements applicable to them (except for state designation of alternative preferred routes under § 177.825b) are inconsistent.

Paragraphs 2. and 3. are inconsistent statewide delay-inducing restraints on the transportation of certain radioactive materials. Cumulatively they would restrict that transportation anywhere in Connecticut to 9 a.m. to 4 p.m. on non-holiday weekdays. On the one hand, limited citywide rush-hour or weekday time restrictions may be consistent with the HMTA and the HMR. *National Tank Truck Carriers, Inc. v. City of New York,* 677 F.2d 270 (2nd Cir. 1982), *affirming City of New York v. Ritter Transportation Co.,* 515 F. Supp. 663 (S.D.N.Y. 1981); IR–3, *supra.* However, statewide time restrictions are of much greater concern because of their greater tendency to redirect and delay hazardous materials transportation. For example, Rhode Island's statewide

prohibition on hazardous materials transportation between 7–9 a.m. and 4–6 p.m. on weekdays was held inconsistent in IR–12, *supra*, and *National Tank Truck Carriers, Inc. v. Burke*, 535 F. Supp. 509 (D.R.I. 1982), *aff'd* 698 F.2d 559 (1st Cir. 1983).

Although those inconsistent Rhode Island provisions prohibited hazardous materials transportation during only 20 of the 168 hours in a week, the Connecticut regulatory provisions at issue here prohibit certain radioactive materials transportation during 133 of the 168 hours in a week (or 140 of the 168 hours when a holiday occurs on a weekday).

Connecticut supports its weekday hours time restrictions with the following data:

[In percent]

Time period	Total daily traffic on highways statewide	Total daily accidents on highways statewide
9 am to 4 pm	41	34
7 pm to 6 am	20	36
4 pm to 7 pm	21	23
6 am to 9 am	18	[illegible]

CANT responds that this data supports CANT's contention that the State creates a safety hazard by restricting shipments to the busiest traffic period. It says that the data shows that the State restricts shipments to the seven hours a day when 41% of the traffic is on its highways and over one-third of the accidents occur.

The State's data indicates that a total of 41% of its traffic moves and that 34% of its accidents occur during the 7 daily hours (29% of each day) when it allows this radioactive materials transportation, and that 59% of its traffic moves and that 66% of its accidents occur during the 17 daily hours (71% of each day) when it prohibits this transportation. The data thus indicates that both traffic and accidents are proportionately *less* during the hours when radioactive materials transportation is prohibited than when such transportation is authorized. That data does not provide adequate justification for Connecticut's burdensome and delay-inducing statewide weekday restrictions, let alone its weekend and holiday transportation prohibition. As in IR–14, *supra*, the term "holiday" is not defined; it is unclear whether it includes Federal, state or local holidays.

Paragraph 4., which is essentially identical to a provision in Connecticut Regulations 19–409d–54, is an additional inconsistent documentation requirement. Requirements for carriage of documents additional to those required by the HMR for radioactive materials transportation are inconsistent with the HMTA and the HMR. IR–2, IR–8 (Appeal), IR–15, IR–15 (Appeal), all *supra*.

IV. Summary

Connecticut's statutory and regulatory permitting system for the transportation of certain radioactive materials contains information, documentation, certification and operational requirements exceeding those of the HMTA and the HMR. It also contains burdensome time of application requirements and time of transport restrictions which are likely to cause delays in hazardous materials transportation. For these reasons, the State's statutory and regulatory provisions constitute an obstacle to the accomplishment and execution of the HMTA and the HMR and, therefore, are inconsistent with them.

V. Ruling

For the foregoing reasons, I find Connecticut General Statutes sections 16a–106 (a) and (b) and Connecticut Regulations sections 19–409d–51, 53, 54, and 55, inconsistent with the HMTA and the HMR and, therefore, preempted under 49 App. U.S.C. 1811(a).

Any appeal of this ruling must be filed within 30 days of service in accordance with 49 CFR 107.211.

Issued in Washington, DC, on September 28, 1987.

Alan I. Roberts,

Director, Office of Hazardous Materials Transportation.

DEPARTMENT OF EDUCATION

Educational Research Grant Program; Proposed Funding Priority for Fiscal Years 1988 and 1989

AGENCY: Department of Education.

ACTION: Notice of proposed funding priority for Fiscal Years 1988 and 1989.

SUMMARY: The Secretary proposes to establish a funding priority by reserving a portion of the funds available for the Educational Research Grant Program, for Fiscal Years 1988 and 1989, to support research projects led by teachers in public and private elementary and secondary schools.

DATE: Comments must be received on or before November 2, 1987.

ADDRESS: Comments should be addressed to Joseph C. Vaughan, Research Applications Division, Office of Educational Research and Improvement, 555 New Jersey Avenue NW., (Room 504C—M/S 1508), Washington, DC 20208.

FOR FURTHER INFORMATION CONTACT: Joseph C. Vaughan Telephone: (202) 357–6193.

SUPPLEMENTARY INFORMATION: The purpose of the Educational Research Grant Program (ERGP) is to support scientific inquiry designed to provide more dependable knowledge about the processes of learning and education.

Proposed Absolute Priority

The Secretary proposes to give an absolute priority under the ERGP for Fiscal Years 1988 and 1989, for a portion of the total funds to be appropriated for the ERGP during Fiscal years 1988 and 1989, to applications that respond to the priority described below. Only applications which meet this priority will be considered under this competition.

Teacher-Led Research Projects Endorsed by Appropriate Education Officials and Addressing One or More Selected Topics

The Secretary proposes to support only those applications which are for teacher-led research projects. Teacher-led research projects are those in which one or more classroom teachers serve as principal investigators for the project, although involvement of other personnel such as school administrators, supervisors of teachers, curriculum specialists, and staff developers may also be appropriate.

Under this proposed priority, each application must also be endorsed by appropriate education officials. An application for a teacher-led research project at a public school must include an endorsement from appropriate officials of the local educational agency (LEA). An application for a teacher-led research project at a private school must include an endorsement from the leadership of that school if the school is not a part of a larger local organization of private schools. If the application is for a teacher-led research project in a private school that is a member of a larger local organization of private schools, the endorsement must come from appropriate officials of the larger local organization of schools. To satisfy the requirement for an endorsement, an application must contain assurances from the entity providing the endorsement that the proposed project addresses issues important to local educational improvement, that the appropriate education officials will provide the project participants with adequate time, facilities and support to conduct the project, and that the appropriate education officials will give the results of the project the fullest possible consideration in addressing related improvements.

The Secretary also proposes that each grantee, in carrying out its teacher-led project, must address one or more of the following topics. Following each topic are examples, illustrative only, of specific study emphases which might be included under that topic.

1. Teachers' roles and teaching functions (e.g., instructional roles, roles as a professional educator, parent-teacher interactions in teaching).
2. Specific instructional processes and materials (e.g., effective teaching techniques, classroom management strategies, organizing learning groups).
3. Effective teaching of subject matter content (e.g., subject specific approaches, interdisciplinary strategies, examining appropriateness of content).
4. Approaches to professional development of educational personnel (e.g., inservice education, induction of beginning teachers, school-based preservice initiatives).
5. Alternative patterns of school management and organization (e.g., administrator-teacher shared decision-making, differentiated staffing, career ladder programs).
6. Ways for schools to find, understand, and use research and practice-based knowledge more effectively in local improvement initiatives (e.g., development of local problem-solving capacity, diagnosing readiness for change, implementing and assessing research-based improvements).
7. More effective strategies to assess student, teacher or school indicators of excellence (e.g., student testing strategies, measurement of achievement of school-wide objectives, teacher performance assessment).

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding the proposed priority.

All comments submitted in response to this proposed priority will be available for public inspection, during and after the comment period, in Room 504C, 555 New Jersey Avenue, NW., Washington, DC 20208 between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

(20 U.S.C. 1221e)

BILLING CODE 4000–01–M

[#84.117K]

Education Grant Research Program; Invitation of Applications for New Awards for Fiscal Years 1988 and 1989

Purpose: To invite applications for research projects led by teachers in public and private elementary and secondary schools.

Deadline for Transmittal of Applications: December 4, 1987.

Applications Available: October 9, 1987.

Estimated Available Funds for FY 1988 and 1989: $150,000 in Fiscal Year 1988 and $250,000 in Fiscal Year 1989. Both Fiscal Year 1988 and Fiscal Year 1989 awards for this competition are subject to availability of funds in those fiscal years.

While this notice describes a single grant competition, it is the intent of the U.S. Department of Education's Office of Educational Research and Improvement (OERI) to make two sets of awards from this competition. Applicants should indicate proposed start and end dates for their projects. Pending availability of funds for Fiscal Year 1988, OERI intends to make approximately 30 awards for projects that may begin as early as April 1, 1988. If funds are available for Fiscal Year 1989, OERI also intends to make approximately 50 additional awards for projects that would have start dates no earlier than October 1, 1988. For this reason, applicants who propose a start date prior to October 1, 1988, should also indicate if they would be willing to negotiate a later start date.

Estimated Maximum Size of Award: $5,000.

Estimated Number of Awards: 30 in Fiscal Year 1988 and 50 in Fiscal Year 1989.

Project Period: Up to 12 months.

Priorities

Proposed Absolute Priority: The Secretary has proposed, in a notice in this issue of the **Federal Register**, an absolute priority for research projects led by teachers in public and private elementary and secondary schools. Subject to the Secretary's adoption of a final priority after consideration of public comments, applications must meet this proposed absolute priority in order to be eligible to be considered for an award.

Weighting for Selection Criteria

The program regulations at 34 CFR 700.30(d) authorize the Secretary to distribute an additional 25 points among the criteria described in the regulations at § 700.31 to bring the total to a maximum of 100 points. The Secretary will distribute the reserved 25 points as follows:

Plan of Operation (§ 700.31(a)): Five (5) additional points will be assigned to the criterion, bringing the possible total for this criterion to 15 points;

Adequacy of Resources (§ 700.31(e)): Five (5) additional points will be assigned to the criterion, bringing the possible total for this criterion to 10 points;

Technical Soundness (§ 700.31(g)): Five (5) additional points will be assigned to the criterion, bringing the possible total for this criterion to 20 points;

Applicant's Commitment and Capacity (§ 700.31(h)): Ten (10) additional points will be assigned to the criterion, bringing the possible total for this criterion to 10 points.

Applicable Regulations

(a) The Educational Research Grant Program Regulations, in 34 CFR Part 700, (b) when adopted in final form, the Notice of Proposed Funding Priority for Fiscal Year 1988 and 1989, published in this issue of the **Federal Register**, and (c) the Education Department General Administrative Regulations, in 34 CFR Parts 74, 75, 77 and 78. Applicants should prepare their applications based on the regulations, the Notice of Proposed Funding Priority for Fiscal Years 1988 and 1989 and this application notice. If there are any substantive changes made in the Notice of Proposed Funding Priority for Fiscal Years 1988 and 1989 when it is published in final form, applicants will be given the opportunity to amend or resubmit their applications.

For Applications or Information Contact: Joseph Vaughan, OERI, Programs for the Improvement of Practice, Research Applications Division, Room 504C, 555 New Jersey Avenue, NW., Washington, DC 20208–1430, (202) 357–6193.

Program Authority: 20 U.S.C. 1221e.

Dated: September 29, 1987.

Chester E. Finn, Jr.,

Assistant Secretary for Educational Research and Improvement.

OFFICE OF PERSONNEL MANAGEMENT

Personnel Management Demonstration Project; Alternative Personnel Management System at the National Bureau of Standards

AGENCY: Office of Personnel Management.

ACTION: Notice of approval of a demonstration project final plan.

SUMMARY: The National Bureau of Standards Authorization Act For Fiscal Year 1987 (Pub. L. 99–574) directed the Office of Personnel Management (OPM) and the National Bureau of Standards (NBS) to "jointly design a demonstration project which shall be conducted by the Director of the National Bureau of Standards." Section 10 of the Act, which covers the project, further provides that "The demonstration project shall, except as otherwise provided in this section, be conducted in accordance with section 4703 of title 5, United States Code . . ." Section 4703 requires the Office of Personnel Management to publish the final project plan in the **Federal Register.** This notice meets that requirement.

DATES: *Approval date:* The demonstration project plan was approved by the Office of Personnel Management on September 29, 1987. *Project implementation date:* January 1, 1988.

FOR FURTHER INFORMATION CONTACT:

NBS: Allen Cassady, (301) 975–3031. Mailing address: U.S. Department of Commerce, National Bureau of Standards, Room A–123, Administration Bldg., Gaithersburg, Maryland 20899.

OPM: Paul Thompson, (202) 632–6164. Mailing address: U.S. Office of Personnel Management, Room 7H34, Washington, DC 20415.

SUPPLEMENTARY INFORMATION:

1. Background

The Office of Personnel Management published the proposed project plan in the **Federal Register** on July 1, 1987 (52 FR 24906). Copies of the proposed plan were transmitted to both Houses of Congress, as required by 5 U.S.C. 4703(b)(4). The period for public comment on the proposal continued through August 31, 1987. The notice of the proposed plan also announced the times and locations of public hearings during which interested persons or organizations could present their written or oral views on the proposed demonstration project plan. The Office held the public hearings as scheduled at the two NBS sites: in Gaithersburg, Maryland, on August 10, 1987, and in Boulder, Colorado, on August 18, 1987. The hearing record was left open for additional data, views, and arguments until September 1, 1987.

2. Summary of Comments

Six letters were received commenting on the **Federal Register** notice. In addition, three individuals made statements at the public hearings. The following is a summary by general topic of these written and oral comments.

(1) *Conversion to project pay system.* Objections were raised to the manner in which NBS employees are to be compensated for foregone within-grade pay increases. The project plan stipulates (in accordance with Pub. L. 99–574) that they receive a pro rata share of their next within-grade increase as of the day before they enter the project, to be paid in a lump sum. It was proposed that the share be paid instead as an addition to base pay, on the grounds that the lump sum payment would result in a short-term (and in some cases long-term) loss of salary for many employees.

(2) *Cost neutrality.* Opinions were expressed that the project could not achieve some of its objectives—i.e., competing more effectively for highly qualified employees, motivating and retaining those on board—if personnel costs are maintained at the levels they would have reached were the project not implemented.

(3) *Performance appraisal.* Concerns were voiced that a quota would be placed on favorable performance ratings under the project, and that persistent differences among supervisors in the severity of the ratings they give would produce inequitable results for employees working under a strict supervisor.

One respondent also urged that peer ratings be introduced, that is, peers *rate* each other's performance. The project plan calls instead for subordinate peers to be *ranked* by their supervisors in order of the quality of their performance.

(4) *Classification system changes.* It was argued that the banding of adjacent grades would result in the loss of status for employees formerly in the upper of the two grades and that these employees would also be disadvantaged in a RIF situation. Concern was also expressed that movement of qualified employees between career paths be encouraged, and that the delegation of classification authority to line managers be accompanied by extensive training. Finally, a question was raised regarding how employees would be converted back to the General Schedule system if they leave the project or at its termination.

(5) *Probationary periods.* The observation was made that the provision for probationary periods of up to three years for new hires in the scientist and engineering career path is too open-ended. This could make for excessive uncertainty among employees regarding when their probation might be ended.

(6) *Promotion.* The suggestion was received that employees be included on promotion panels for their peers.

Demonstration Project Changes

Only a few comments were received on the preliminary project plan, especially considering that about 3000 employees will come under the project at implementation. Of those received, only a few were critical of the content of the substance of the plan. Most were cautionary in nature, urging that certain steps be taken to ensure success in applying the planned provisions.

Some of the provisions whose contents were directly challenged, such as payment of the lump sum pro rata share at conversion and pay banding, were mandated by Congress in the act authorizing the project and are not open to change. Others—extended probationary periods and the requirement of cost neutrality—were not mandated but have been retained in the final plan. The probationary period provision was modified to establish points in time at which supervisors must decide whether the probationary period will be ended. This provides a regular schedule under which each employee's probation is reviewed. In the case of cost neutrality, no substantive changes were made in the final project plan. Basic project objectives can be met within these constraints, which will also make the experiment more applicable to other government agencies.

Additional changes were made to the final version in order to clarify and expand on its provisions. A few editorial changes were also made. The substantive changes, by section, are: (1) Position Classification: further explanation of the process of generating position descriptions, (2) Total Compensation Comparability: more information on the method of measuring benefits, (3) Staffing: More information on the applications of direct hire, the extended probationary period, recruitment and retention allowances, travel expenses, and the link between promotion and performance ratings (the promotion subsection was moved from the classification section to the staffing section), (4) Pay Administration:

expanded explanation of the linkage between performance ratings and pay increases, the criteria for supervisory differentials, pay setting for new hires, and prorating lump sum payouts upon conversion, and (5) Implementation: more detailed criteria on determining grades if the project terminates and employees must be converted back to the General Schedule System.

Public Law 99–574, National Bureau of Standards Authorization Act For Fiscal Year 1987:

Because many elements of the proposed demonstration plan are required by section 10 of Pub. L. 99–574, the complete text of section 10 is presented here.

Section 10, "Demonstration Project Relating to Personnel Management"

Sec. 10. (a)(1) The Office of Personnel Management and the National Bureau of Standards shall jointly design a demonstration project which shall be conducted by the Director of the National Bureau of Standards.

(2) The demonstration project shall, except as otherwise provided in this section, be conducted in accordance with section 4703 of title 5, United States Code, and shall be counted as a single project for purposes of subsection (d)(2) of such section.

(3) Subject to subsections (f) and (g) of section 4703 of title 5, United States Code, the demonstration project shall cover any position within the National Bureau of Standards which would otherwise be subject to—

(A) Subchapter III of chapter 53 of title 5, United States Code, relating to the General Schedule;

(B) Subchapter VIII of chapter 53 of title 5, United States Code, relating to the Senior Executive Service; or

(C) Chapter 54 of title 5, United States Code, relating to the Performance Management and Recognition System.

(b) Under the demonstration project, the Director of the National Bureau of Standards shall provide that—

(1) The rate of basic pay for a position may not be less than the minimum rate of basic pay, nor more than the maximum rate of basic pay, payable for the pay band (as referred to in paragraph (3)) within which such position has been placed;

(2) The minimum and maximum rates of basic pay for each pay band shall be adjusted at the times, and by the amounts, provided for under subsection (c);

(3) Positions shall be classified under a system using pay bands which shall be established by combining or otherwise modifying the classes, grades, or other units which would otherwise be used in classifying the positions involved;

(4) Employees shall be evaluated under a performance appraisal system which—

(A) Uses peer comparison and ranking wherever appropriate; and

(B) Affords appeal rights comparable to those afforded under chapter 43 of title 5, United State Code;

(5)(A) The rate of basic pay of each participating employee will be reviewed annually, and shall be adjusted on the basis of the appraised performance of the employee; and

(B) Subject to subsection (c)(4)(A)(i), the adjustment under subparagraph (A) in any year in the case of any employee whose performance is rated at the fully successful level or higher shall be at least the percentage adjustment taking effect under subsection (c)(3) in such year;

(6) Appropriate supervisory and managerial pay differentials (which shall be considered a part of basic pay) shall be provided;

(7) Performance-recognition bonuses, and recruitment and retention allowances, shall be awarded in appropriate circumstances, (but shall not be considered a part of basic pay);

(8) There shall be an employee development program which includes provisions under which employees may, in appropriate circumstances, be granted sabbaticals, the terms and conditions of which shall be consistent with those applicable for members of the Senior Executive Service under section 3396(c) of title 5, United States Code (excluding paragraph (2)(B) thereof);

(9) Payment of travel expenses shall be provided for personnel to their first post of duty in the same manner as is authorized for members of the Senior Executive Service under section 5723 of title 5, United States Code, at the discretion of the Director; and

(10) The methods of establishing qualification requirements for, recruitment for, and appointment to positions shall, at the discretion of the Director, include methods involving direct examination and hiring.

(c)(1) For the purpose of this subsection, the term "compensation" means the total value of the various forms of compensation provided, including—

(A) Basic pay;

(B) Bonuses;

(C) Allowances;

(D) Retirement benefits;

(E) Health insurance benefits;

(F) Life insurance benefits; and

(G) Leave benefits.

(2) The director of the National Bureau of Standards shall, by contract or otherwise, provide for the preparation of reports which, based on appropriate surveys—

(A) Shall include findings as to—

(i) The extent to which, as of the commencement of the demonstration project, the overall average level of compensation provided with respect to positions under the demonstration project is deficient in comparison to the overall average level of compensation generally provided with respect to positions involving the same types and levels of work in the private sector; and

(iii) With respect to each year thereafter, any net increase occurring during such year in the extent of the deficiency in the overall average level of compensation provided with respect to positions under the demonstration project, as compared to the overall average level of compensation generally provided with respect to positions involving the same types and levels of work in the private sector; and

(B) Shall recommend a single percentage by which basic pay for all positions under the demonstration project must be increased so that, when considered in conjunction with the other forms of compensation generally provided, any net increase determined under subparagraph (A)(ii) will be eliminated.

(3) Whenever the Director of the National Bureau of Standards receives a recommendation under paragraph (2)(B), the Director—

(A) Shall increase the minimum and maximum rates of basic pay for each such pay band by the lesser of—

(i) The percentage recommended; or

(ii) The overall average percentage of the adjustment in the rates of pay under the General Schedule under section 5305 of title 5, United States Code, for the period involved; and

(B) If and to the extent that funds are available for that purpose, may further increase those minimum and maximum rates—

(i) To make up for any part of the difference between the respective percentages under subparagraph (A), if the percentage under subparagraph (A)(ii) is the lesser; and

(ii) After making up for the entirety of any difference determined under clause (i) (including from any previous year), to eliminate any part of any remaining deficiency as originally determined under paragraph (2)(A)(i).

(4)(A) Notwithstanding any other provision of this section—

(i) The maximum rate of basic pay payable under any pay band may not

VOL
52
ISS
191
OC
2
1987
UMI

exceed the rate of basic pay payable for level IV of the Executive Schedule; and

(ii) The amount of basic pay, bonuses, and allowances paid during any fiscal year to any employee participating in the demonstration project may not, in the aggregate, exceed the annual rate of basic pay for level I of the Executive Schedule.

(B)(i) Any amount which is not paid to an employee during a fiscal year because of the limitation under subparagraph (A)(ii) shall be paid in a lump sum at the beginning of the following fiscal year.

(ii) Any amount paid under this subparagraph during a fiscal year shall be taken into account for purposes of applying the limitation under subparagraph (A)(ii) with respect to such fiscal year.

(5) Notwithstanding any other provision of this section, the demonstration project shall be conducted in such a way so that, with respect to the 12-month period beginning on October 1, 1986, the total cost to the Government relating to providing compensation to participating employees shall not exceed the total cost which would have resulted if this section had not been enacted.

(6)(A) If the minimum rate of basic pay for a pay band, after an increase under paragraph (3)(A), exceeds the rate of basic pay payable to an employee whose position would otherwise be within such pay band, the employee's position may, notwithstanding subsection (b)(1), be placed in the next lower pay band.

(B) Placement of a position in a lower pay band under subparagraph (A) shall not be considered a reduction in grade or pay for purposes of subchapter II of chapter 75 of title 5, United States Code, or a comparable provision under the project.

(d)(1) The rate of basic pay for an employee serving in a position at the time it is converted to a position covered by the demonstration project may not be reduced by reason of the establishment of such project.

(2)(A) Each employee referred to in paragraph (1) shall be paid—

(i) In the case of an employee serving in a position under the General Schedule on the date the position becomes covered by the demonstration project, a lump-sum pro rate share of the equivalent of any within-grade increase which would have been due the employee under section 5335 of title 5, United States Code, computed as provided in subparagraph (B), and

(ii) In the case of an employee serving in a position subject to chapter 54 of title 5, United States Code, on such date, a lump sum pro rata share of the equivalent of the employee's merit increase which would have been due under such chapter, computed as provided in subparagraph (B), taking into account the performance requirements applicable to such increase.

(B) For purposes of subparagraph (A), the pro rata share of an equivalent increase referred to in such subparagraph shall be computed through the day before the date referred to in such subparagraph.

(e)(1)(A) In carrying out section 4703(h) of title 5, United States Code, with respect to the demonstration project, the Office of Personnel Management shall provide that such project will be evaluated on an annual basis by a contractor. Such contractor shall be especially qualified to perform the evaluation based on its expertise in matters relating to personnel management and compensation.

(B) The contractor shall report its findings to the Office in writing. After considering the report, the Office shall transmit a copy of the report, together with any comments of the Office and any comments submitted by the National Bureau of Standards, to—

(i) The Committee on Post Office and Civil Service, and the Committee on Science and Technology, of the House of Representatives; and

(ii) The Committee on Governmental Affairs, and the Committee on Commerce, Science, and Transportation, of the Senate.

(2) The Comptroller General shall, not later than 4 years after the date on which the demonstration project commences, submit to each of the committees referred to in paragraph (1)(B) a final report concerning such project. Such report shall include any recommendations for legislation or other action which the Comptroller General considers appropriate.

(f) The authority to enter into any contract under this section may be exercised only to such extent or in such amounts as are provided in advance in appropriation Acts.

(g) The demonstration project shall commence not later than January 1, 1988.

Office of Personnel Management.

Constance Horner,

Director.

Project Plan

The demonstration project plan reads as follows:

An Alternative Personnel Management System to Improve the Ability of the National Bureau of Standards to Attract Highly Qualified Candidates, Motivate Employees, and Retain Successful Performers.

Executive Summary

The project was designed by the National Bureau of Standards, with participation of and review by the U.S. Department of Commerce (DoC) and the Office of Personnel Management (OPM). The Bureau will conduct the project over a 5-year period beginning January 1, 1988. The Office of Personnel Management will evaluate the project annually through contract; the Comptroller General will make a final report to Congress that will make any recommendations for legislation or other action which the Comptroller General considers appropriate.

The project is built upon the concepts of (1) total compensation comparability, rather than pay comparability only; (2) market sensitivity, by surveying compensation for private sector positions similar to NBS positions, linking entry salary to market forces by occupation, and selectively granting recruiting and retention allowances; (3) performance, by linking performance to pay for all covered positions; (4) administrative simplicity, by simplifying paperwork and processing in classification and other personnel systems; (5) management flexibility and accountability, through the delegation of classification and other authorities to line managers; and (6) Government-wide applicability, by designing an alternative system not just for NBS but for use by any agency.

The demonstration system is designed to (1) improve hiring and allow NBS to compete more effectively for high-quality researchers, through direct hiring, selective use of higher entry salaries, and selective use of recruiting allowances; (2) motivate and retain staff, through higher pay potential, pay-for-performance, more responsive personnel systems, and selective use of retention allowances; (3) strengthen the manager's role in personnel management, through delegation of personnel authorities; and (4) increase the efficiency of personnel systems, through installation of a simpler and more flexible classification system based on pay banding, through reduction of guidelines, steps, and paperwork in classification, hiring, and other personnel systems, and through automation.

The Director of the National Bureau of Standards will conduct the project through a Personnel Management Board (PMB) under the chairmanship of the NBS Deputy Director, with the directors

of the six NBS major organizational units (MOUs) as voting members and the NBS Personnel Officer and NBS EEO Officer as non-voting members. A Project Office within the Personnel Division will provide administrative support, communicate with individuals and groups outside NBS, and oversee NBS evaluations of the project.

In presenting the FY 1987 NBS Authorization bill to the Senate, Senator Slade Gorton stated that the bill "creates a National Bureau of Standards demonstration project relating to personnel compensation and management. The demonstration project enhances the Bureau's ability to recruit and retain capable employees by giving the Bureau flexibility in setting salaries competitive with those available outside the Government and in adjusting compensation on the basis of merit. The project addresses the Government's problem attracting and keeping qualified personnel especially in high-technology fields."

Participating Organizations

Both sites of the National Bureau of Standards will participate in the project. The two sites are located at Gaithersburg, Maryland, which is also the headquarters of NBS, and at Boulder, Colorado. The two sites are similar in employment profiles, with the following exceptions: (1) Of the approximately 3050 positions covered by the project, about 85 percent are in Gaithersburg; (2) all heads of major organizational units and all but one center head are located in Gaithersburg; and (3) certain administrative services at the Boulder facility, such as personnel administration and procurement, are provided by the DoC administrative support center in Boulder, which is not covered by the project and which services other DoC organizations also not covered by the project; in Gaithersburg those services are provided by NBS positions under the coverage of the project.

Types and Numbers of Participating Employees

The project will cover approximately 3050 NBS employees. By pay category, the coverage is 87.5 percent General Schedule (GS) positions, 9 percent Performance Management and Recognition System (PMRS) positions, percent 5 U.S.C. 3104 positions, and 3 percent Senior Executive Service (SES) positions. Under the PATCO categories, the coverage is 51 percent "professional," 12 percent "administrative," 18 percent "technician," 16 percent "clerical," and 3 percent "other." The professional category is 98 percent scientists, engineers, and mathematicians.

The ten most populous occupations are Physicist (427), Chemist (258), Secretary (249), Engineering Technician (170), Electronics Engineer (155), Physical Science Technician (152), General Physical Scientist (146), Computer Scientist (134), Computer Specialist (110), and Mechanical Engineer (93).

Of the approximately 3050 covered employees, 78 percent are full-time permanent (FTP), 5 percent are part-time permanent (PTP) and 17 percent are "other" than FTP or PTP. The "other" category, made up of such categories as student, post-doctoral, temporary, and intermittent, shifts significantly during the year, particularly in the summer when many students are hired.

Labor Participation

A few General Schedule employees are represented by labor unions. These employees at the Gaithersburg site are represented by the International Association of Firefighters (IAFF), and at the Boulder site by the American Federation of Government Employees (AFGE). Union representatives have been separately notified about the project. NBS is proceeding to fulfill its obligation to consult or negotiate with them, as appropriate, in accordance with 5 U.S.C. 4703(f).

Project Implementation Date

January 1, 1988.

Project Ending Date

In accordance with section 4703 of title 5, United States Code, the project shall terminate before the end of the 5-year period beginning on the date on which the project takes effect, except that the project may continue beyond that period to the extent necessary to validate the results of the project. The Comptroller General is required to submit a final report to Congress not later than 4 years after the date on which the project commences, including any recommendations for legislation or other action.

Methodology

This proposal explains the methodology for introducing the following innovations in personnel management and demonstrating their results over a 5-year period: (1) Simplified position classification through pay banding, occupational groupings by career paths, and delegation of classification authority to managers; (2) compensation comparability based on total compensation; (3) improved staffing through direct examination and hiring, extended probation, qualification standards more in line with private sector practice, more flexible use of recruiting tools such as paid advertising and retention allowances, travel expenses, and competitive areas based on career paths; (4) pay-for-performance, supervisory and managerial pay differentials, and market-based entry salaries; and (5) sabbaticals.

Senior Executive Service and 5 U.S.C. 3104 Positions

The personnel systems for SES positions will not change for the project. SES classification, staffing, compensation, performance appraisal, awards, and reduction in force will be based on current methods.

The personnel systems for 5 U.S.C. 3104 positions will change only to the extent that 3104 positions are in the same performance appraisal, awards, and reduction in force systems as General Schedule positions. Classification, staffing, and compensation, however, will not change.

Neither SES nor 5 U.S.C. 3104 employees will be subject to the pro rata share payouts upon conversion to the demonstration system. Pay adjustments for their positions under the project will be carried out in accordance with existing Federal rules pertaining to SES and 3104 pay adjustments.

Performance Management and Recognition System (PMRS) and General Schedule (GS) Positions

The PMRS and GS categories will no longer exist as identified categories under the project. Both will be incorporated in the new career-path/pay-band system. The step increases of the General Schedule and the merit increases of the PMRS system will be replaced by the annual performance pay increases described under "Pay Administration". Laws and regulations pertaining to the General Schedule that have not been waived for this project, however, such as those pertaining to overtime pay, will continue in force for all covered positions to which they now apply.

Position Classification

Introduction

The objectives of the new classification system are to simplify the classification process, make the process more serviceable and understandable, and place more decision-making authority and accountability with line managers.

Coverage

All positions listed under "Types and Numbers of Participating Employees" above will be accounted for in the classification structure. All General Schedule occupations currently respresented at NBS will be included. Provisions will be made for including others as employment requirements change in response to changing technical programs.

Career Paths

Occupations at NBS which can be treated in a similar fashion will be aggregated into career paths. Occupations will be grouped according to similarities in type of work and customary requirements for formal training or credentials. The common patterns of advancement within the occupations as practiced at NBS and in the private sector will also be considered. The current occupations and grades at NBS have been examined, and their characteristics and distribution have served as guidelines to the development of career paths.

Four career paths will be established:

(a) *Scientific and Engineering.* This path will include all technical professional positions, such as physical, biological, and social scientists, engineers, computer scientists, mathematicians, and computer specialists. Ordinarily, specific course work or educational degrees are required for these occupations.

(b) *Scientific and Engineering Technician.* This path consists of the jobs that support the various scientific and engineering activities. Employees in these jobs are not required to have college course work. However, training and skills in the various electrical, mechanical, chemical, or computer crafts and techniques are required.

(c) *Administrative.* This career path contains specialized functions in such fields as finance, procurement, personnel, public information, technical information, accounting, administrative computing, and management analysis. Special skills in administrative fields or special degrees are involved.

(d) *Support.* This career path is composed of positions for which an minimal formal education is needed, but for which special skills and knowledge, such as typing or shorthand, are usually required. Clerical work usually involves the processing and maintenance of records. Assistant work requires knowledge of methods and procedures within a specific administrative area. Other support functions include the work of secretaries, guards, firefighters, and mail clerks.

Pay Bands

Each career path will be composed of discrete pay bands (levels) corresponding to recognized advancement within the occupations. These pay bands will replace grades. They will not be the same for all career paths. Each career path will be divided into either five or six pay bands, each pay band covering the same pay range now covered by one or more grades. The maximum rate of a pay band will be the highest rate possible for positions within that career path and band, including any position with a special pay rate. A salary overlap, similar to the current overlap between grades, will be maintained.

Ordinarily an individual will be hired at the lowest salary in a pay band. Superior qualifications may lead to a higher entrance level within a band.

For each pay band, a corresponding band will be established for employees qualifying for supervisory/managerial differentials. The supervisory pay band will have the same minimum rate as the non-supervisory band, but its maximum rate will be 6 percent higher than the maximum rate of the non-supervisory band. Positions in the supervisory pay bands will include division chiefs and group leaders in the Scientific and Engineer Career Path, positions with formal supervisory authority over at least three positions (excluding support positions), and other positions approved by the PMB on a case-by-case basis.

The proposed pay bands for the four career paths appear in Chart I. The General Schedule (GS) grades being replaced appear at the bottom of the figure.

The pay band concept has the following advantages:

Reduces the number of classification decisions required during an employee's career: In the current system a classification action is required for each promotion to a higher grade, while in the new system a classification action is required for promotion to a higher band. Because there will be fewer bands than grades, there will be fewer classification decisions.

Simplifies the classification decision-making process and paperwork: A pay band is a larger target than a grade, and thus may be defined in shorter and simpler language. At the same time the definition for one band can be made more distinct from the definition for adjacent bands, reducing the potential for disagreement.

Supports delegation of classification authority to line managers with review or post-audit by personnel specialists.

Provides a broader range of performance-related pay for each level: In many cases, employees whose pay would have been frozen at the top step or a grade will now have more potential for upward movement in the broader pay band.

The chart below shows all four proposed career paths and how their pay bands relate to the current General Schedule grades. Each regular pay band is considered to have a corresponding pay band for supervisors and managers who qualify for the supervisory/managerial differential, though it is unlikely that the lower bands will ever be filled by supervisory positions.

CHART I: CAREER PATHS AND PAY BANDS

Career Path	Levels (or Bands)														
Scientific and Engineering	I						II			III		IV		V	3104/SES
Scientific and Engineering Technician	I					II			III	IV		V			
Administrative	I						II			III		IV		V	3104/SES
Support	I		II		III		IV		V						
GS Grade	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	3104/SES

Occupational Series

The present General Schedule classification system has 434 occupations (also called series) which are divided into 22 groups. NBS has positions in 115 occupations and in 16 groups. The occupational series, which frequently provide well-recognized disciplines with which employees wish to be identified, will be maintained. New series may be added as physical, chemical, and biological sciences, engineering, and computer science change in other career paths, such as a new series in the Support Career Path to describe clerical and assistant support of the internal administrative functions of an organizational unit. Chart II lists the occupations currently represented at NBS by career path. This arrangement may be modified from time to time as experience is gained in applying it.

Classification Standards

The present system of classification standards will be simplified for routine use by NBS managers. The objective is to record the essential criteria for each pay level within each career path by stating the general duties and responsibilities and the knowledges, skills, and abilities required. Each pay band or level of each standard is described in two categories or factors: (1) General duties and responsibilities, and (2) knowledges, skills, and abilities. These two categories complement each other at each level and may not be separated in classifying a position.

Position Descriptions

New position descriptions will emphasize the knowledges, skills, and abilities required. Line managers will follow an automated menu-driven process to classify positions and produce position descriptions. The objectives in developing these new descriptions are to:

—Simplify the description by using short standard-format descriptors rather than long narrative descriptions and by holding the length of a position description to no more than two pages;

—Allow supervisors to prepare descriptions on a personal computer; and

—Make the position description a more useful and accurate tool for other functions of personnel management, such as recruiting, reduction in force, performance appraisal, and employee development.

Classification and Position Description Process

Part 1 of the position description corresponds to the following steps by the supervisor:

1. *Statement* of Position Objective (a supervisor creates a "statement" by typing free-form at appropriate points in the menu-driven system).

2. *Selection* of Career Path, Occupational Series, Function, Pay Band or Level, Specialty Areas, Supervision Exercised, FLSA Status, and Minimum Qualifications Required (a supervisor makes a "selection" by selecting from options in the menu).

3. *Statement* of Position Title, Organizational Location, and Supervisor.

Part 2 of the position description is the supervisor's *statement* of position-specific duties and responsibilities and position-specific knowledges, skills, and abilities.

In producing a position description the supervisor first states the general purpose to be met, or mission objective

VOL
52
ISS
191
OC
2
1987
UMI

to be accomplished, by the position (position objective). The supervisor then selects from the menu a career path, an occupational series, a functional code, and a level description (see level descriptions under "Classification Standards") commensurate with the position objective. When producing part 2 of the position description, the supervisor will confirm the selections and classification against the position-specific duties and responsibilities and the position-specific knowledges, skills, and abilities.

The menu-driven system incorporates the four career paths and the occupational series listed below. Descriptors of these occupations are available in the program if needed. The "functions" are those currently used by OPM for science and engineering positions, including research, development, planning, etc., as well as functional descriptions associated with maintaining and servicing the facilities and providing technical and administrative services and support to the scientific and engineering staff.

"Specialty Areas" are subdisciplines or subsets of the disciplines as practiced at NBS. Descriptors of these specialties have been prepared by NBS staff and are available in the program. Selection of the appropriate supervisory responsibilities automatically determines the appropriate affirmative action obligations. The FLSA status can generally be matched to Career Path and Level, but a selection of FLSA "exempt" or "non-exempt" must be consistent with OPM guidance. Minimum qualifications are determined by the selection of career path, occupation, and level, and appear automatically after these three items have been selected.

Delegation of Classification Authority

Line managers will have classification authority. Supervisors at the lowest levels will have recommendation authority only. Higher-level managers will have approval authority, the level of approval depending on the proposed career path and pay band. The current system of approval of SES and 5 U.S.C. 3104 positions will be maintained. Classification actions will receive post audits by the personnel office. Periodic audit reports will be made to the NBS Director. Errors in classification will be corrected when discovered.

Chart II: Occupational Series by Career Path

I. Scientific and Engineering

101—Social Scientist
110—Economist
180—Psychologist
185—Social Worker
334—Computer Specialist
401—Biologist
403—Microbiologist
690—Industrial Hygienist
801—General Engineer
804—Fire Prevention Engineer
806—Materials Engineer
808—Architect
810—Civil Engineer
830—Mechanical Engineer
840—Nuclear Engineer
850—Electrical Engineer
855—Electronics Engineer
858—Biomedical Engineer
892—Ceramic Engineer
893—Chemical Engineer
896—Industrial Engineer
899—Engineering Student
1301—General Physical Scientist
1306—Health Physicist
1310—Physicist
1320—Chemist
1321—Metallurgist
1330—Astronomer
1360—Oceanographer
1372—Geodesist
1384—Textile Technologist
1399—Physical Science Student
1515—Operations Research Analyst
1520—Mathematician
1529—Mathematical Statistician
1530—Statistician
1550—Computer Scientist
1599—Mathematics Student

II. Scientific and Engineering Technicians

332—Computer Operator
404—Biology Technician
462—Forestry Technician
802—Engineering Technician
809—Construction Inspector
856—Electronics Technician
1311—Physical Science Technician
1521—Mathematics Technician

III. Administrative

018—Safety Specialist
080—Security Officer
099—Student Trainee
201—Personnel Management Specialist
221—Position Classification Specialist
230—Employee Relations Specialist
235—Employee Development Specialist
260—Equal Employment Specialist
301—Miscellaneous Administration and Program
340—Program Manager
341—Administrative Officer
343—Management Analyst
345—Program Analyst
393—Communication Specialist
501—Financial Administrator
510—Accountant
511—Auditor
560—Budget Analyst
1001—General Arts and Information
1020—Illustrator
1035—Public Affairs Specialist
1060—Photographer
1071—Audio-Visual Production Specialist
1082—Writer/Editor
1083—Technical Writer/Editor
1084—Visual Information Specialist
1101—General Business Specialist
1102—Contracts Specialist
1410—Librarian
1412—Technical Information Specialist
1420—Archivist
1601—General Facilities Manager
1640—Facility Manager
1654—Printing Manager
2001—General Supply Specialist
2003—Supply Manager
2010—Inventory Manager
2050—Supply Cataloger
2130—Traffic Manager
2150—Transportation Operator

IV. Administrative Support

081—Firefighter
085—Guard
203—Personnel Clerk/Assistant
303—Miscellaneous Clerk/Assistant
304—Information Receptionist
305—Mail and File Clerk
309—Correspondence Clerk
312—Clerk-Stenographer
318—Secretary
322—Clerk-Typist
335—Computer Clerk/Assistant
344—Management Clerk/Assistant
350—Equipment Operator
351—Printing Clerk
357—Coding Clerk
382—Telephone Operator
392—General Communications Assistant
394—Communications Clerk
525—Accounting Technician
544—Payroll Clerk/Technician
561—Budget Clerk/Assistant
1021—Office Draftman
1087—Editorial Clerk/Assistant
1105—Purchasing Agent
1106—Procurement Clerk/Assistant
1152—Production Controller
1411—Library Technician
2005—Supply Clerk/Assistant
2102—Transportation Clerk/Assistant
2132—Travel Clerk/Assistant

Total Compensation Comparability

Introduction

An objective of the demonstration project is to improve the quality of NBS by making compensation more competitive. The Bureau will provide for the preparation of reports, by contract or otherwise, that include findings as to the extent to which the overall average level of total compensation for covered NBS positions is deficient in comparison

with the overall average level of total compensation for similar positions in the private sector. Annually thereafter during the project, the Bureau will determine the change in the deficiency.

Definition of Total Compensation

The legislation defines compensation as the total value of the various forms of compensation, including:

(A) Basic pay;
(B) Bonuses;
(C) Allowances;
(D) Retirement benefits;
(E) Health insurance benefits;
(F) Life insurance benefits; and
(G) Leave benefits.

NBS will develop a comparability measurement system, with contractor assistance, based on calculations and comparisons of the costs of compensation to the private sector and to the Federal Government.

NBS will use the "level-of-benefits" or "standardized" cost approach to measure benefits. This approach estimates what it would cost to provide private sector and Federal Government benefit plans to a standard workforce. By determining the cost of the various benefits to a workforce with constant demographic characteristics and using a constant set of actuarial and economic assumptions, cost data can be generated that reflect the difference in the benefit plan provisions. The NBS workforce covered by the demonstration project will be the standard workforce population used in the benefit comparisons.

Process To Determine Overall Deficiency and Net Changes in the Deficiency

The NBS Director is authorized to adjust the ranges of pay bands based on surveys conducted of total compensation paid to individuals in positions in private sector firms and universities that are similar in levels of work and responsibility to NBS positions. The Director will determine the criteria for selecting private sector organizations to be surveyed. The first survey will establish the extent to which compensation for covered NBS positions is deficient in comparison with compensation for comparable positions in the private sector prior to the start of the project, thus setting a baseline. Additional surveys will be conducted annually to determine the change occurring from year to year in private sector total compensation.

NBS will select a representative sample of private sector firms to be used in the surveys on the following basis:

(A) National coverage for scientists and engineers based on peer groups of private sector firms and universities that perform R&D work similar to that performed at NBS;

(B) Regional coverage for administrative positions; and

(C) Local coverage (Gaithersburg, Maryland, and Boulder, Colorado) for science and engineering technicians, and for administrative support positions.

To the extent possible NBS will use available data and will participate in existing compensation surveys. As an example, NBS is participating in the Department of Energy's National Compensation Survey of Research and Development Scientists and Engineers. NBS, using contractor support, will devise ways to build hybrid queries to access various compensation data bases in order to match the pay and benefits components of compensation of individual private sector positions in a mix of occupations similar to those at NBS. The nation's leading actuarial and compensation consulting firms have developed and tested costing models for the various benefit plans. NBS will use one or more of these models to generate total compensation values.

Comparability Decision by the Director

Each year, the NBS Director will receive three comparability figures: (1) The annual percentage pay increase for General Schedule employees (General Federal Increase); (2) the net percentage by which the overall average level of compensation for NBS positions covered by the project has fallen behind the overall average level of compensation for similar private sector positions over the past year (Net Increase in the Deficiency); and (3) the overall percentage by which the average level of compensation for NBS positions covered by the project was deficient, as of the commencement of the project, as compared with the average level of compensation for similar private sector positions (Overall Deficiency). The Director must select at least the lesser of the first two figures as the annual NBS comparability percentage increase. If the Net Increase in the Deficiency is larger than the General Federal Increase, the Director may increase the comparability percentage by some or all of the difference, if budget considerations permit. If the Director makes up all of the Net Increase in the Deficiency, he may, if budget considerations permit, authorize an additional adjustment to further decrease the Overall Deficiency.

The percentage comparability increase selected by the Director will apply directly to: (1) The minimum and maximum rates of basic pay for each pay band (the same percentage increase will apply to all pay bands), and (2) the basic pay of each employee receiving a fully successful or higher performance rating. An employee receiving a rating of less than fully successful will not receive an increase in basic pay.

Staffing

Introduction

New examining and hiring procedures coupled with simplified classification procedures will shorten the hiring process. Other features, such as payment of recruiting allowances, will help attract candidates in essential occupations. Retention allowances will be used to retain highly skilled and productive employees. Line managers will work with the personnel offices to develop hiring strategies. Priority placement, reemployment priority, and the merit assignment process will be addressed in developing these strategies. The personnel offices will ensure that proper procedures are followed. Line managers will participate actively in the examining and hiring process.

NBS will use a full range of staffing options. These options are Direct Hire (shortage occupations and shortage highly-qualified candidates), Agency-Based Staffing, Merit Assignment, Reinstatement, and Reassignment. All vacancies will be treated on a case-by-case basis and managers will have the option of choosing one or a combination of the applicable staffing options. The necessary examination and hiring procedures will be administered by NBS. NBS will not rate applicants for non-NBS positions. This will be made clear to all applicants.

NBS will use two options for candidates not employed by the government (non-status candidates): Direct Examination and Hiring and Agency-Based Staffing. Direct Examination and Hiring will be used for shortage categories. Agency-Based Staffing will be used for shortage categories. Agency-Based Staffing will be used for non-shortage categories to provide NBS with applicants who are specifically interested in, and available for, positions at NBS. Managers working with personnel office staff will determine the appropriate hiring strategy in each case.

Direct Examination and Hiring: Critical Shortage Occupations

NBS will use direct examination and hiring procedures for occupations defined as critical shortage occupations. Critical shortage occupations will be defined as hard-to-fill occupational series which have special pay rates or

require essential job-specific skills that are in short supply. Shortage occupations with special pay rates now include all Engineers, Mathematical Statisticians, Computer Scientists, and Metallurgists in the Scientific and Engineering Career Path, and Clerk-Typists, Clerk-Stenographers, Dictating Machine Transcribers, and all clerical and secretarial positions requiring typing, stenography, or dictating machine transcribing skills in Levels I through IV of the Support Career Path. In addition, all occupations in the Scientific and Engineering Career Path at Level III and above and Nuclear Engineering Technicians (Nuclear Reactor Operators) at Level III in the Scientific and Engineering Technician Career Path are in short supply and are shortage occupations.

NBS will recruit and make immediate offers of appointment to qualified candidates for critical shortage occupations without further competitive steps or procedures. Applications will be solicited through various recruitment activities, and applicants will be asked to submit a Personal Qualifications Statement (SF–171). A completed copy of the Federal Automated Examining System (FAES), Key Entry Examination System (KEES), or other appropriate appointment package will be provided to OPM's Office of Examining Services for all individuals appointed. All applications must be signed and contain information on citizenship, date of birth, removals, and convictions. Candidates who apply pending completion of education must submit verification that they meet all requirements prior to entering on duty.

Appropriate staff of the personnel offices and some non-personnel staff will be trained to rate applicants. Examiners will also be trained to review applications for completeness and to determine whether all legal and suitability requirements have been met. Examiners will not rate the applications of personal acquaintances or relatives. The basis for rating applicants will be documented on the OPM rating sheet. Examiners will initial and date each rating sheet and the front of the corresponding application. NBS will submit monthly reports to OPM showing the previous month's appointment activity. The report will include the name, date of birth, enter-on-duty, pay band, and job series for each appointee.

Each applicant will be rated only for the level and occupational series for which the applicant is being considered for employment. No numerical ratings will be assigned. Applicants will be determined eligible or ineligible only. *OPM Handbook X–118: Qualifications Standards for Positions Under the General Schedule* will be used to determine an applicant's basic qualifications, except that NBS will not use the testing requirements. Selective or special qualification factors will be considered where warranted.

NBS may appoint any individual who is certified eligible. Although no registers will be maintained, NBS will accept applications on an open-continuous basis for all direct hire categories.

All selections will be subject to the Department of Commerce Priority Placement and Reemployment Priority Programs, the OPM Displaced Employees Program, and the Interagency Placement Assistance Program. If there are available priority placement candidates, NBS will appoint a priority candidate or justify why priority candidates were not appointed.

Direct Examination and Hiring: Critical Shortage Highly-Qualified Candidates

Candidates who meet high academic and training standards are also a critical shortage category. Critical shortage highly qualified candidates may be directly hired for entry level positions in the Scientific and Engineering, Scientific and Engineering Technician, and Support Career Paths.

Under the Demonstration Project, quality candidates (those with bachelors degrees with a 2.9 GPA, out of 4.0, or masters degrees) may be directly hired at Level I or II of the Scientific and Engineering path. Quality candidates for Level I or II Technicians positions must have a 2.9 GPA, out of 4.0, in 2 or 4 years of study in an accredited college, junior college, or technical institute. Candidates who apply on the basis of superior academic achievement must submit verification that they meet all requirements prior to entering on duty.

The procedures for recruiting and examining critical shortage highly qualified candidates will be the same as those used above for critical shortage occupations, except that veteran preference candidates who meet the minimum quality-candidate standard will be given priority consideration. NBS will justify the nonselection of any quality candidate with veteran preference.

If any of these categories of critical shortage occupations or critical shortage highly-qualified candidates cease to be shortage categories, NBS will place them in the agency-based hiring system. If additional shortage categories arise, they will be negotiated with OPM before being included for direct hire.

Agency-Based Staffing

NBS will carry out the examination and certification of applicants in the agency-based system. Agency-Based Staffing will follow competitive principles, requiring that each position be advertised within NBS, at OPM Federal Job Information Center(s), and at State Employment Services. Each selection will be subject to the Department of Commerce Priority Placement and Reemployment Priority Programs, the OPM Displaced Employees Program, and the Interagency Placement Assistant Program.

NBS will publicize each vacancy, examine and certify applicants (except that tests will not be used), develop rating schedules where needed, evaluate and rank applicants, issue lists of best qualified candidates, and select candidates in accordance with applicable regulations. NBS will adjudicate rating appeals, act on objections to eligibles or passover of veterans with less than 30 percent disability, answer inquiries from applicants for the posted vacancy, and maintain records of all applicants.

When a position is announced under Agency-Based Staffing, all applications from non-status candidates will be received and rated. All applications must be signed and contain information on citizenship, date of birth, removals, and convictions. A rating plan will be established for each case. Selective factors may be used as discussion above. Applicants will be given numerical scores which will be placed in rank order. Ten and five-point veteran preference will be applied. Current procedures for the rule of three will be followed. All non-selected candidates will be notified of the outcome of their application with a statement that the NBS rating is not applicable for other Federal government positions and does not place the applicant on any competitive register. NBS will maintain case records for two years from the date of selection.

Merit Assignment, Reassignment, and Reinstatement

NBS will use its current Merit Assignment Plan (MAP). This plan allows managers to select status candidates for positions with greater known promotion potential than the position the selectee currently holds. This plan will be followed for status applicants requiring MAP competition for promotion, reassignment, or other competitive personnel actions. Appropriate changes will be made to the

plan to convert GS-grades to pay levels. There will be no change in current reassignment and reinstatement procedures, except for the appropriate changes converting GS-grades to pay levels. The reassignment and reinstatement procedures also allow managers to select status candidates for positions which have no promotion potential beyond that which the selectee currently holds (or held) in the Federal Government.

Paid Advertising and Recruiting Services

NBS will continue to recruit at colleges and universities and will make greater use of paid advertisements in journals, professional magazines, and newspapers to expand recruiting sources and attract the best candidates. Advertising will become one of the first steps in recruitment. Procedures will also be developed for using private sector employment services.

Probation Period

The hiring system will include a flexible probation period for all Scientific and Engineering Career Path hires. A formal process will be developed and put in place under which the probation period may be extended up to 3 years for employees on career conditional appointments in this career path. Employees appointed prior to the implementation of the project will not be affected.

The 3-year probation will apply to non-status hires after January 1, 1988. That is, it will apply only to new employees hired after that date who do not come from another Federal Government position or do not have reemployment or reinstatement rights. At designated points in the service of the employee, the responsible manager will be asked to decide whether to:

(a) End probation (change the employee from probationary to nonprobationary status);

(b) Continue the employee on probation; or

(c) Terminate the employee.

These automatic requests for a decision will come at month 9, month 21, and month 33, so that decisions can be made by months 12, 24, and 36, respectively. The manager may, however, decide to terminate an employee at any time during probation, or end probation at any time after month 12. The manager must make a decision to terminate the employee or change the employee from probationary to nonprobationary status before the end of month 36. Other aspects of probation will not change, including the limited notice and appeal rights granted to probationary employees under law and regulation.

Qualification Standards

The qualifications required for placement within a pay band and within a career path will be based on present qualifications found in *OPM Handbook X–118*, except that testing requirements will not be used. The minimum qualifications for the occupation and for the General Schedule grade corresponding to the lowest grade incorporated in the pay band will apply. In a few cases NBS will update these standards to reflect current practices in the scientific, engineering, and computer science fields and to reflect modern curricula in recognized degree programs. Where new occupational series are defined, new minimum qualification standards will be written following the pattern of *OPM Handbook X–118*.

Recruitment and Retention Allowances

Recruitment and Retention Allowances will be established to provide incentives for individuals to enter or remain in Federal service. Allowances may be provided in appropriate circumstances, not to exceed $10,000. Decisions on allowances will be based on market factors such as salary comparability and salary offer issues; relocation/dislocation issues; programmatic urgency; emerging technologies; turnover rates; special qualifications; and shortage categories or scarcity positions unique to NBS as defined by the PMB.

All professional and hard-to-fill positions are eligible. Based on the determination factors above, Recruitment Allowances will be paid by authority of the appropriate MOU Director, and Retention Allowances will be paid by authority of the PMB.

Receipt of a Recruitment Allowance represents a commitment by the employee to remain in Federal service for a specified time period of from 6 to 36 months, to be determined between the individual and the hiring official or supervisor. The service agreement will outline amount of allowance, time requirements of agreement, payment schedule, and repayment requirements if the individual separates from Federal service before the end of the agreed period, other than having been involuntarily separated from Federal service by reason of reduction-in-force. Actions to collect repayment may be terminated under appropriate circumstances and in accordance with generally applicable standards for termination. A Retention Allowance does not require a continued service agreement.

A Recruitment Allowance may be paid in a lump sum at or soon after entry on duty or may be paid in increments over a period of time determined by the PMB, not to exceed 36 months. A Retention Allowance may not be paid in a lump sum but must be paid in increments over a period of time determined by the MOU Director, not to exceed 36 months.

Recruitment and Retention Allowances will not be considered part of an individual's basic pay.

Travel Expenses

At the discretion of the NBS Director, travel and transportation expenses, reimbursement of expenses, and advancement of funds may be provided to new hires in the same manner as is authorized in sections 5723 and 5724 of title 5, U.S. Code. The selecting official, with approval of the MOU Director or the MOU Director's designee, will make application decisions. Recipients must sign service agreements indicating commitment of at least 12 months continued service. Service agreements will contain provisions for repayment in the event the recipient separates from Federal service before the end of the agreement. Actions to collect repayment may be terminated under appropriate circumstances and in accordance with generally applicable standards for termination.

Affirmative Action/Equal Employment Opportunity

NBS is committed to positive affirmative action/equal employment opportunity goals. Line managers will be accountable for understanding and implementing policies designed to meet these goals.

Promotion

A promotion is a move from one level (pay band) to a higher level within a career path, or a move from a level in one career path to a level with a higher pay range in another career path. Promotions will follow basic Federal merit promotion practices. In the scientific and engineering fields the qualifications for promotions will rest largely upon the qualifications of the individual. Some of this emphasis on individual knowledges, skills, and abilities will be applied to other career paths. Each position will have promotion potential to a specific level within a career path, but not all positions in a career path will have promotion potential to the same level. Movement from one career path to another will depend upon individual knowledges, skills, and abilities and

VOL 52 ISS 191 OCT 2 1987 UMI

upon the availability of positions requiring them.

Link Between Promotion and Performance

Non-competitive promotions will be linked to current performance ratings and the locations of current salaries in pay bands. The salary range of each pay band is divided into three intervals (see "Pay for Performance" for a description of the pay band matrix). To be promoted noncompetitively, an employee in the bottom interval must have a performance rating of outstanding, an employee in the middle interval must have a rating of at least commendable, and an employee in the top interval must have a rating of at least fully successful.

Reduction in Force

Introduction

The current NBS process for reduction in force will be essentially maintained. Current reduction-in-force procedures will be adjusted in the context of the career path and pay band classification system. Retention registers will maintain the elements of career status, veteran preference, length of service, and service computation date adjustments based on performance ratings. Position descriptions will become a better tool for reduction in force by focusing on specific knowledges, skills, and abilities required.

Competitive Areas

Each of the four career paths will be a separate competitive area. This will place employees with similar knowledges, skills, abilities and in similar occupations together. It will also eliminate the disruptions caused by scientists or engineers displacing administration or support staff. Displacements, bumps, and retreats will occur only within career paths. Current reduction-in-force regulations will be modified by substituting "same level" for "same grade" and "one level lower" for "three grades lower". Whereas in the current system an employee may bump another employee in a lower retention subgroup and at the same grade or up three grades below the bumping employee, in the demonstration system an employee may bump another employee in a lower retention subgroup and at the same level or up to one level below the bumping employee.

Saved Grade and Pay

Saved grade and pay will follow current regulations, except that career path "level" will substitute for "grade."

Pay Administration

Introduction

The objective is to establish a pay system that will improve the ability of NBS to attract and retain quality employees. The new system will be a pay-for-performance system and, when implemented, will result in a redistribution of current pay resources based upon individual performance. The authorizing legislation states that "the rate of basic pay of each participating employee will be reviewed annually, and shall be adjusted on the basis of the appraised performance of the employee."

The first decision in the annual pay-setting process is the Director's selection of the percentage comparability increase that must be given to all covered employees rated fully successful or higher (see "Comparability Decision by the Director" above). The minimum and maximum rates of each pay band must also be increased by this percentage.

Pay for Performance

Pay increases will be allocated to employees through organizational pay pools. These pools will have three components: (A) Comparability increases; (B) performance increases; and (C) bonuses and awards. The first component, comparability increases, will consist of the percentages selected by the Director in the comparability process, and will be given as a minimum pay increase to all covered employees rated fully successful or higher. The second component, performance increases, will be made up of money previously available for within-grade increases, quality step increases, merit pay increases, and promotions from one grade to another where both grades will now be in the same pay band. Decisions on these pay increases will take into account all of the following: (1) The employee's performance; (2) the salary range of the employee's pay band; and (3) the employee's current salary in that range. The third and final component will be bonuses and awards, composed of former cash awards.

A matrix will be developed for each pay band of each career path. The vertical component of the matrix will be salary. The salary range of a pay band will be divided into three intervals, from the minimum rate to the maximum rate of the band. Employees will then be placed in an interval according to their salary. The percentage of performance-related salary increase will be highest for those in the bottom interval. Those employees in the middle interval will receive a smaller percentage increase than those in the bottom interval, and those in the top interval will receive a smaller percentage increase than those in the other two intervals.

The horizontal component of the matrix is organized by performance rating. The performance ratings are Outstanding, Commendable, Fully Successful, Marginal, and Unsatisfactory. No employees receiving a rating below fully successful will receive a performance-related pay increase. This increase, as a percentage of current base salary, will be higher for each successive rating. The highest percentage increases, therefore, will be given to employees who are in the bottom intervals of their pay ranges and who have outstanding ratings.

Placement in a Lower Pay Band

An employee whose performance rating is less than fully successful will not receive the comparability increase. Because the minimum pay rate for each pay band will be increased each year by at least the amount of the comparability increase, it is possible that the new minimum rate of a pay band will exceed the basic pay of an employee in that pay band who did not receive the comparability increase. When this happens, the employee will be placed in the next lower pay band. The legislation specifically allows for this and provides that it will not be considered an adverse action.

Supervisory and Managerial Pay Differentials

The legislation provides that "appropriate supervisory and managerial pay differentials (which shall be considered a part of basic pay) shall be provided." The differential will not apply to SES and 5 U.S.C. 3104 positions.

The managers and supervisors who qualify for the differential include division chiefs and group leaders in the Scientific and Engineering Career Path, supervisors who formally supervise three or more subordinates doing the substantive work of the unit, and others with supervisory responsibilities as approved case-by-case by the PMB. The amounts of the differentials will be up to 6 percent of base salary (see "Pay Bands" above for a description of the supervisory pay bands and their maximum rates). The total basic pay for an employee receiving a supervisory/managerial differential, including the differential, may not exceed the prevailing basic pay for pay level 3 of the SES.

Upon conversion to the project, all eligible positions wil be placed in the supervisory pay bands. The incumbents

of these positions will be converted at their basic pay at the time of conversion, except that division chiefs and group leaders, who are not now compensated for supervision, will begin receiving the added differential upon conversion. New hires into eligible positions after the date of conversion will have their pay set at the supervisor's discretion within the pay range of the applicable pay band.

Pay and Compensation Ceilings

The legislation specifies the following two overall pay ceilings: (1) The basic pay under any pay band may not exceed the basic pay of Executive Level IV. (2) An employee's total monetary compensation for a fiscal year may not exceed the basic pay of Executive Level I. Any amount that cannot be paid to an employee in a given fiscal year because of the ceiling on total monetary compensation shall be paid in the following fiscal year.

In addition, each pay band will have its own pay ceiling, just as do grades in the current system. Pay rates for the various pay levels will be directly keyed to the General Schedule rates with consideration given to the special pay rates. Basic pay will be limited to the maximum rates payable for each pay band. In the case of the special pay bands established for individuals receiving the supervisory/managerial pay differential, the top of the band will not exceed pay level 3 of the Senior Executive Service.

Pay Setting for New Hires

The setting of initial salaries within pay bands for new appointees will be flexible, particularly for hard-to-fill positions in the scientific and engineering career path. Determinations on setting pay will be based on the same factors applicable to granting recruitment and retention allowances (see "Recruitment and Retention Allowances" above).

Pay Setting for Promotion

The minimum basic pay increase upon promotion to a higher level will be 6 percent.

Conversion of Employees to the Demonstration System

Current grades will translate directly to the new career-path and pay-band structure. Employees will be converted at their current salaries at the time of conversion, except for the non-SES and non-3104 division chiefs and group leaders in the Scientific and Engineering Career Path who qualify for a supervisory/managerial pay differential upon conversion. No one's salary will be reduced as a result of the conversion. At the time of conversion each converted employee will be given a lump sum cash payment for the time credited to the employee toward what would have been the employee's next within-grade (step) increase or PMRS merit increase.

The payment for a General Schedule employee will be computed by (1) calculating the ratio of the number of days the employee will have spent in the employee's current step through the day prior to the day of conversion, to the total number of days in the employee's current waiting period for a regular within-grade increase (365, 730, or 1,095 days), and (2) multiplying that ratio by the dollar value of the employee's next within-grade increase, using the GS pay scale effective the first pay period of 1988.

The payment for a PMRS employee will be computed by multiplying (1) the percentage increase of the employee's last merit increase by (2) the employee's basic pay to be effective the first pay period of 1988 by (3) 30 percent (the proportion of a full year to the credit of the employee), or a lesser percentage for an employee who has entered on duty since October 1, 1987.

Performance Evaluation

Introduction

The Performance Appraisal System will link pay and promotions to performance through annual performance evaluations and performance ratings. Individual performance objectives will be tied to organizational goals and objectives. The proposed performance appraisal system will use peer comparison and ranking wherever appropriate.

Process

The current Department of Commerce (DoC) Performance Management Recognition System (PMRS) will be the model for the project performance appraisal system. Performance plans will be developed each year by the employee and supervisor to clarify NBS and DoC goals and objectives and identify individual accountability for their accomplishment. Critical elements for each position will be established and weighted on the basis of importance. Performance standards developed by DoC will be used along with specific supplemental performance standards developed by the supervisor to evaluate levels of accomplishment for each critical element. A mid-year review will determine whether objectives are being met and whether critical elements should be modified to reflect changes in planning, work-load, and resource allocation. Additional reviews may be held if needed. There are five rating categories: Outstanding, Commendable, Fully Successful, Marginal, and Unsatisfactory.

After the initial rating is given, an employee's performance will, if appropriate, be reviewed at higher levels and ranked in relation to the employee's peers (all other employees in the same pay band and career path). This peer ranking process may take place at divison, center, and MOU level, and will result in assignment of a final rating. Pay adjustments will be based on employee ratings. The performance appraisal cycle for all covered employees will begin October 1 and end September 30 of the following year.

All performance plans and appraisals will be reviewed by at least the next higher level of management. A written performance review at the end of the rating period will be required.

An employee who disagrees with the rating received may comment in writing to the approving official. The approving official makes the final decision and must document any changes in the rating.

Senior Executive Service

Members of the Senior Executive Service will remain under the current DoC/NBS SES performance appraisal system. 5 U.S.C. 3104 employees will be under the structure of the project performance evaluation system, but will not be in the project pay-for-performance pay system.

Awards

Introduction

NBS currently has an extensive awards program consisting of both internal and external awards. Performance recognition bonuses will replace current performance recognition awards (Quality Step Increases, Sustained Superior Performance Awards, and PMRS Performance Awards). The Special Act or Service Awards (SAS), internal NBS awards, and suggestion awards will continue. Department of Commerce Medal Awards and other honorary non-cash awards will also be retained.

Performance Bonuses

Bonuses are cash awards to recognize and encourage special contributions. Bonuses must be supported by a total summary rating of at least Fully Successful. They must be approved at a managerial level at least one level higher than the official who recommended the bonus. Cash bonuses

VOL
52
ISS
191
OC
2
1987
UMI

will not become a party of employee base pay.

Senior Executive Service and 5 U.S.C. 3104 Employees

Members of the Senior Executive Service (SES) will remain under their current awards system and will not participate in the project performance recognition bonus awards program. SES members will continue to be eligible for the SES bonus awards and the Presidential Rank Awards.

5 U.S.C. 3104 employees will be eligible for cash awards.

Employee Development

Introduction

The objective of NBS's Employee Development Program is to develop the competence of employees for maximum achievement of Bureau goals and objectives. The legislation mandates the continuation of an employee development program including, in appropriate circumstances, a sabbatical program. The legislation requires that any sabbatical program be consistent with the terms and conditions of the sabbatical program currently applicable to members of the Senior Executive Service.

Sabbaticals

The proposed NBS Sabbatical Program under the Project will cover all career appointees whose current performance is above the fully successful level. Employees will be eligible after completion of seven years of Federal service. One sabbatical of 3 to 11 months may be granted to an employee in any 10-year period. Each sabbatical should benefit NBS, as well as increase the employee's individual effectiveness. Various learning or developmental experiences may be considered for purposes of granting a sabbatical, such as advanced academic teaching or research, or on-the-job work experience with public, private, or non-profit organizations.

Final approval authority for all training during the project will be the major organizational unit (MOU) director or designated management level. The personnel offices will provide policy guidance, training design, evaluation, information, scheduling, and administrative processing.

Employee Relations

Introduction

The legislation mandates that employees covered by the project are to be evaluated under a performance evaluation system that affords appeal rights comparable to those provided currently under chapter 43 of title 5, United States Code., NBS will maintain, under the project, the substantive and procedural appeal rights that employees now have.

Placement in a Lower Pay Band

Employees whose ratings are marginal or unsatisfactory will receive no pay increase and may move to a lower pay band as the minimum rates of basic pay in a pay band increase (as the result of comparability increases). Such placement in a lower pay band, with no decrease in pay, and due to a failure to attain a performance rating of fully successful, will not be considered an adverse action.

Safeguards for Employees

Employees may be removed from their positions or reduced to a lower level for unacceptable performance. These performance-based actions will follow the same procedures and allow the same appeal rights as current performance-related removals and reductions in grade.

Evaluation

Introduction

The Demonstration Project legislation mandates evaluations and reports by organizations external to NBS.

The Office of Personnel Management is to have the Project evaluated annually by a contractor. The contractor must be especially qualified to perform the evaluation based on its expertise in matters relating to personnel management and compensation. The contractor is to report the findings to OPM in writing. After reviewing the report, OPM is to transmit the report, along with comments by OPM, the Department of Commerce, and NBS, to Congress.

The Comptroller General must submit a final report to Congress no later than 4 years after the commencement of the project. This report is to include any recommendations for legislation or other action which the Comptroller General considers appropriate.

The Evaluation Plan incorporates both internal and external evaluation efforts. Elements of the plan are outlined below.

Evaluation Methodology

The evaluation effort will be carried out in four phases. The *design phase* is intended to aid in the structuring of the demonstration project and is primarily an internal NBS effort.

Baseline data will be collected prior to implementation of the demonstration scheduled for January 1988. These data will be made available to the OPM contract evaluator.

Following the implementation of the project, the monitoring of the *implementation* phase begins. An evaluation of this phase is necessary to determine whether the project is implemented as designed and whether the stated processes are stable and operational.

The *formative evaluation phase* begins once it has been determined that the project is stable and operational. This phase will extend over the full 5-year experimental period. Data will be collected annually and periodic reports will be issued. The *summative phase* will assess the overall impact of the project upon conclusion of the experiment.

The evaluation will focus on overall personnel management issues and will be based on before-and-after comparisons of the personnel management data, using both quantitative and qualitative criteria. Personnel records and reports, as well as previously validated survey instruments, will be used to develop appropriate measures. New data collection methods and measures, or modifications to existing instruments, may be required for some criteria. A private research firm will design, conduct, and analyze the results of employee attitude surveys in order to ensure the validity of results and to protect the confidentiality of individual employee responses. In addition to the specific requirements, as mandated by the legislation, the design of the survey will benefit from the experience of the Office of Personnel Management, the Department of Commerce, the National Bureau of Standards, and other organizations. The first survey is scheduled for the fall of 1987.

Evaluation criteria will be derived from the following Demonstration Project goal and objectives:

Goal: Demonstrate improved personnel management by tying pay more closely to the job market, linking pay increases to performance, and introducing efficient personnel structures and processes.

Objectives: Compete more effectively for high-quality staff; motivate staff and retain key employees; increase management responsibility and accountability; remain budget neutral; and create a model that could be adopted by other government agencies.

Project Training

One of the keys to the success or failure of the project will be the training provided to all participants. Training

will not only provide the necessary knowledge and skills to carry out the proposed changes, but will also promote a commitment to the program on the part of all participants.

Training will be structured to meet the specific needs of:

1. Supervisors 2. Administrative Staff: generally personnel specialists, personnel assistants, and administrative officers
3. Employees.

Training will also include orientation and periodic status updates. This training will focus on overviews and in-depth descriptions of all elements of the demonstration project, including:

1. Objectives
2. Implementation plan and timetable
3. Organization for the demonstration project
4. How employees will enter the project
5. Pay adjustment process
6. Position classification/position description preparation
7. Promotion
8. Staffing
9. Performance evaluation
10. Bonuses
11. Link between management accountability and personnel office oversight
12. Automation
13. Internal and external evaluation processes

Supervisors

The focus of the demonstration project on management-centered personnel administration, with increased supervisory and managerial personnel management authority and accountability, demands thorough training of supervisors and managers in the knowledges and skills that will prepare them for their new responsibilities. Training will include detailed information on the policies and procedures of the demonstration project, skills training in classification, position description preparation, and performance evaluation using peer comparison and ranking.

Administrative Staff

The administrative staff, generally personnel specialists, technicians, and administrative officers, will play a key role in advising, training, and coaching supervisors and employees in implementing the demonstration project. This staff will also need training in the procedural and technical aspects of the project. They will undergo at least the same block of training provided to all supervisors.

Employees

NBS will train employees for the demonstration project. In the months leading up to the implementation date, meetings will be held for employees to fully inform them of all project decisions, procedures, and processes.

Costs

Although the project legislation does not require budget neutrality, NBS has set for itself an objective to control total compensation costs associated with the project. NBS programs must have the flexibility to respond to emerging technologies and to industry and other agency demands. Nearly half of NBS resources come from government and private sector customers. The proposed measures will allow NBS to meet these demands and yet control total compensation costs.

NBS intends to maintain total compensation during the project at the level it would have reached under the current Government-wide system. The proposed procedure will permit changes in NBS expenditures which result from legislatively mandated program changes and changes in Federal pay and benefits. NBS may offset selected salary increases with savings by reducing turnover, eliminating unnecessary overhead, and cutting other personnel costs. NBS will measure its adherence to cost control by preparing budget estimates which are based on prescribed Federal Budget processes and monitor actual spending under the Demonstration Project against this budget estimate.

Implementation

NBS intends to strike an appropriate balance between supervisors' personnel management authority and accountability and personnel office oversight responsibility. Supervisors will be thoroughly trained for exercising their delegated authorities in accordance with demonstration procedures and safeguards.

Conversion to the Demonstration Project

Initial entry into the demonstration project for covered employees will be accomplished through a full employee protection approach that ensures each employee an initial place in the appropriate career path and pay band without loss of pay (see "Conversion of Employees to the New System" under "Pay Administration" above).

Personnel Administration

All personnel laws, regulations, and guidelines not superseded by Pub. L. 99–574 authorizing the project or waived by this plan will remain in effect. Basic employee rights will be safeguarded and merit principles will be maintained. The personnel offices will oversee the personnel management decisions made by supervisors, and will continue to process all personnel and payroll actions.

Automation

NBS will continue using the U.S. Department of Agriculture's National Finance Center automated personnel/payroll processing system. NBS will automate internal personnel processes and systems associated with the demonstration project wherever proper and appropriate, and will design a personal computer system to handle the production of position descriptions.

Conversion Back to the Former System

In the event the project ends and the demonstration system is not made permanent, a conversion back to the former (regular) Federal civil service system will be required for positions equivalent to GS/GM–15 and below (SES and 3104 position classification will not change under the project).

The conversion will be conducted according to the following steps:

1. All employees will be converted at their current base pay at the time of conversion, except where a General Schedule employee's base pay falls between two steps of a grade and must be raised to the higher step.

2. All employees in a pay band corresponding to a single General Schedule (GS) grade will be converted to that grade.

3. Employees in a pay band corresponding to two or more GS grades will be converted to one of those grades according to the following procedures:

a. A mid-point will be calculated for each GS grade, which will be the dollar figure half-way between the minimum rate and maximum rate of the grade in the current GS pay schedule at the time of conversion.

b. An employee's basic pay at the time of conversion will be compared to the GS grade mid-points to establish the grade mid-point that is closest, whether higher or lower, to the employee's basic pay.

c. The employee will be converted to the GS grade whose mid-point is closest to the employee's basic pay, except that an employee converting to a two-grade-interval occupational series will be converted to an appropriate grade for that series whose mid-point is closest to the employee's basic pay. If the employee's basic pay is equally distant from the mid-points of two appropriate

VOL
52
ISS
191
OC
2
1987
UMI

grades, the employee will be converted to the higher grade.

4. Employees will be placed in GS or GM (PMRS) categories according to coverage criteria that exist at the time of conversion.

5. Once these conversions have taken place, evaluations will be conducted to ensure proper classification.

Experimentation and Revision

Many aspects of a demonstration project are experimental. Modifications must be made from time to time as experience is gained, results are analyzed, and conclusions are reached on how the system is working. The Bureau, with DoC and OPM approval, will make minor modifications, such as changes in the occupational series in a career path, without further notice. Major changes, such as a change in the number of career paths, will be published in the **Federal Register.**

Project Management and Oversight

In accordance with the project legislation, the project will be "conducted by the Director of the National Bureau of Standards." The Director will delegate management and oversight of the project to the Personnel Management Board (PMB) under the chairmanship of the NBS Deputy Director. The directors of the major organizational units will be voting members and the Personnel Officer and EEO Officer will be non-voting members. The PMB will be the NBS body to manage, evaluate, and make policy and procedural changes to project systems when needed. When necessary, the PMB will interpret and clarify project policy. The PMB will establish the management and administrative structure for running and evaluating the project and will oversee the delegations of authorities to managers, supervisors, and management bodies, including the withdrawal of authority when warranted. The PMB will have the authority to make exceptions to normal project procedures on a case-by-case basis when it believes an exception is warranted. The PMB will also have the authority to establish itself as the approving body for any type of project personnel action for which NBS has authority.

Authorities and Waiver of Laws and Regulations Required

Public Law 99–574 gave the National Bureau of Standards the authority to experiment with several specific personnel system innovations which are otherwise prohibited by law and regulations. In addition to the authorities granted by act, the following waivers of law and regulation are necessary:

Title 5, U.S. Code

Section 5333(a) Minimum rate for new appointments

Title 5, Code of Federal Regulations

Section 315.801 Requirement for one-year probationary period

Section 315.802 Length of probationary period

Section 351.401 Scope of competition in RIF

Section 351.402 Competitive area in RIF

Section 351.403 Competitive level in RIF

Section 351.701 Assignment involving displacement

Section 531.203 Minimum rate for new appointments

Health Care Financing Administration

[BERC-354-N]

Medicare Program; Schedule of Limits for Skilled Nursing Facility Inpatient Routine Service Costs

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final notice of schedule of limits.

SUMMARY: This notice sets forth a revised schedule of limits on skilled nursing facility inpatient routine service costs that are paid for under Medicare. This schedule applies to cost reporting periods beginning on or after October 1, 1987.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Steve Kirsh, (301) 597–1803.

SUPPLEMENTARY INFORMATION:

I. Background

Sections 1861(v)(1) and 1888 of the Social Security Act (the Act) authorize the Secretary to set prospective limits on allowable costs incurred by a provider of services that will be paid for under Medicare. These limits are based on estimates of the costs necessary for the efficient delivery of needed health services. Implementing regulations appear at 42 CFR 413.30. Section 1888 of the Act directs the Secretary to set limits on per diem inpatient routine service costs for hospital-based and freestanding skilled nursing facilities (SNFs) by urban or rural area location.

Under the authority of section 1888 of the Act, we published a final notice on April 1, 1986 (51 FR 11253) announcing a schedule of limits for freestanding and hospital-based SNFs, for cost reporting periods beginning on or after May 1, 1986.

That final notice contained provisions relating to: (1) Limits on adjusted SNF per diem inpatient routine service costs; (2) a "market basket" index developed to reflect changes in the price of goods and services purchased by SNFs; (3) adjustments to the cost limits by an area wage index developed from hospital industry wages; (4) a classification system based on whether the SNF is hospital-based or freestanding and whether it is located in an urban or rural area; (5) a cost-of-living adjustment for the nonlabor portion of the limits for SNFs located in Alaska, Hawaii, Puerto Rico, and the Virgin Islands; (6) freestanding SNF cost limits set at 112 percent of the average per diem labor-related and nonlabor costs; (7) hospital-based SNF cost limits set at the limit for freestanding SNFs, plus 50 percent of the difference between the freestanding limit and 112 percent of the average per diem routine service costs of hospital-based SNFs; and (8) an administrative and general (A&G) add-on for hospital-based SNFs.

II. Summary of Provisions

In developing the limits set forth in this notice, we have retained the same provisions as in the current limits and the same methodology. We have, however, used the most recent SNF cost data for calculating the limits, as well as the most recent projections of the rates of increases in the costs included in the SNF market basket.

This new schedule of cost limits applies to all SNFs including those low Medicare volume SNFs that are eligible to receive the optional prospective payment rate for routine services. Under section 1888(d) of the Act, an SNF's prospective payment rate excluding capital-related costs cannot exceed its routine service cost limits. The prospective payment system is described in section 2820 of the Provider Reimbursement Manual (HCFA Pub. 15–1).

This schedule of cost limits is effective with cost reporting periods beginning on or after October 1, 1987. We are using the same updated SNF data base for these cost limits as that used to develop the inpatient prospective payment rates for low Medicare volume SNFs, to be effective October 1, 1987. The updated data base reflects, to the best possible extent, current economic conditions affecting the operation of an SNF. We believe that by not publishing updated cost limits, the current lower cost limits would create a disincentive for SNFs to participate in the Medicare program, thus reducing the availability of SNF services to Medicare beneficiaries. In addition, we believe that using a comparable data base would allow eligible SNFs to make a more informed decision regarding the election of prospective payment.

Due to the length of time involved in receiving audited cost report data, the 1984 data base, as in prior cost limit data bases, includes data from unaudited cost reports. Many of these unaudited cost reports include unallowable Medicare costs. Basing the cost limits on these data causes the limits to be higher than they would be if we were to use audited data. This results in higher reimbursement to those SNFs that have costs at or above the cost limits. At this time, we have not quantified the amount by which the costs should be reduced to reflect only allowable Medicare costs. However, we are in the process of developing a methodology that will approximate the amount of allowable Medicare costs in the data base. When the methodology is developed, we will incorporate it into the next revision of the SNF cost limits.

The schedule provides for the following:

A. Separate Group Limits for Labor-Related and Nonlabor Components of Per Diem Routine Service Costs

We are retaining separate group limits for the labor-related and nonlabor components of per diem routine service cost. We calculate these separate limits as follows:

1. Actual SNF per diem inpatient routine service cost data are obtained for each SNF.

2. To make the data reflect current conditions more accurately, the data are adjusted from the midpoints of the cost reporting periods represented in the data collection to the midpoint of the initial cost reporting period to which the limits apply.

3. Each SNF's per diem cost is separated into labor-related and nonlabor portions. The labor-related portion is divided by the wage index for the SNF's location (see Tables II and III).

4. Finally, separate group means are computed for the labor-related and nonlabor components. Each group mean is multiplied by 112 percent.

B. Adjustment of SNF Cost Data by Wage Index

We are continuing use of the HCFA survey-based hospital wage index to account for area wage differences. This is necessary because industry-specific data are not available on SNF wages. Since hospitals and SNFs generally compete in essentially the same labor market for employees, we believe an index based on geographic variations in hospital wages provides an accurate measure of geographic variations in wages paid by SNFs. The wage index is unchanged from the wage index effective for cost reporting periods beginning on or after May 1, 1986. For an explanation of how we developed the wage index, see 51 FR 11253.

C. Use of SNF Market Basket

We are continuing to base the cost limits on reported costs, adjusted for actual and projected cost increases by applying the SNF market basket index. This market basket index is used to adjust the SNF cost data to reflect cost

increases occurring between the cost reporting periods represented in the data collection to the midpoints of the cost reporting periods to which the limits apply.

The market basket index is comprised of the most commonly used categories of SNF routine service expenses. The categories we are using are based primarily on those used by the National Center for Health Statistics in its National Nursing Home Surveys.

The categories of expenses are weighted according to the estimated proportion of SNF routine services costs attributable to each category (see the Appendix to this notice). The weights for all major categories of SNF costs are based on the National Nursing Home Surveys of 1973/1974 and 1977, conducted by the Office of Health Research, Statistics and Technology, National Center for Health Statistics of the Public Health Service. (As noted in footnote 1 at the end of the appendix, the 1973/1974 survey obtained 1972 cost data and the 1977 survey obtained 1976 cost data.) These are the most current and comprehensive sources of national data on the distribution of costs in SNFs. (The second column of the appendix specifies the weights used for each category.)

In developing the market basket index, we obtained historical and projected rates of increase in the price of goods and services in each category. The market basket index table, in the third and fourth columns, identifies the price variables used and the source of the forecast for calendar years 1982 through 1988 (Appendix).

The market basket index also provides for adjustments in the limits if our forecasts of economic trends prove erroneous. If the final rate of change in the market basket index for a year differs from the estimated rate of change by at least .3 of one percentage point, we would adjust the limits. We will advise the Medicare intermediaries to use the actual rate to adjust each SNF's limit retroactively at final settlement of the SNF's cost report. This approach is the same as that used for the current limits.

D. Application of the Hospital Wage Index to Employee Benefits, Health Service Costs, Costs of Business Services, and Other Miscellaneous Expenses

In developing the current schedule of limits (published April 1, 1986 (51 FR 11253)), we applied the wage index discussed above to five categories of labor-related costs; wages, employee benefits, health service costs, business service costs, and other miscellaneous costs. We retained that method in developing this schedule of limits. The proportion of adjusted routine service costs that we adjust by the wage index is 82.150 percent for cost reporting periods beginning on or after October 1, 1987.

For purposes of applying the wage index, employee benefits include such items as FICA tax, health insurance, life insurance, facility contributions to employee retirement funds, and all other compensation that the SNF records in the "employee health and welfare" cost center on its Medicare cost report.

Health services costs is a category used by the National Nursing Home Survey conducted in 1977, noted above. This category includes the costs of routine services that are purchased under arrangement from outside sources.

Business services costs include costs of banking, contract laundry, telephone, and other services that SNFs purchase at retail from outside suppliers.

Other miscellaneous costs include various types of routine operating costs not allocated to any other category of the market basket.

Thus, we are continuing to apply the wage index to the total portion of cost (82.150 percent attributable to wages, fringe benefits, health service costs, business service costs, and other miscellaneous expenses) rather than to the wage portion (61.903 percent for cost reporting periods beginning on or after October 1, 1987) only. We are continuing to use this method because our analysis of the data shows that area variations in routine per diem costs in these additional categories are closely related to area variations in prevailing wage levels. We believe that applying the wage index to the other categories of labor-related costs specified above, rather than to wages only, results in individual limits that are more equitable and more appropriate to each SNF's actual market environment.

E. Freestanding SNF Limits Set at 112 Percent of Mean

For cost reporting periods beginning on or after October 1, 1987, we will continue to maintain the revised limits at 112 percent of the average labor-related and average nonlabor-related costs of each group. We will continue to use the same methodology for freestanding SNFs as described in the April 1, 1986 notice (51 FR 11253) and in September 29, 1982 SNF cost limits notice (47 FR 42894).

F. Hospital Based SNF Limits

For cost reporting periods beginning on or after October 1, 1987, the revised hospital-based limit will continue to equal the revised freestanding limit plus 50 percent of the difference between the revised freestanding limit and 112 percent of the mean per diem routine service costs of hospital based SNFs. The methodology for hospital-based SNFs will be the same as that used for current hospital-based SNF limits, as described in the April 1, 1986 notice (51 FR 11253). We are continuing to provide an add-on adjustment for A&G costs. The purpose of this add-on is to make an adjustment for the allocation of costs in the A&G cost center for hospital-based SNFs.

G. Cost of Living Adjustment for Alaska, Hawaii, Puerto Rico, and the Virgin Islands

To avoid disadvantaging SNFs located in Alaska, Hawaii, Puerto Rico, and the Virgin Islands, we are continuing to provide a cost-of-living adjustment for these areas. This is an adjustment of the nonlabor component of the limit that applies to these areas based on the amount of the most recently determined cost-of-living differentials developed by the Office of Personnel Management. Since we adjust the labor-related component by the applicable wage index, this cost-of-living adjustment applies only to the nonlabor component.

H. Exception to Cost Limits

A provider may request an exception to the cost limits under the provisions of § 413.30(f). The request must be made to HCFA central office through the appropriate Medicare fiscal intermediary.

I. Classification System

We are retaining the classification system based on whether an SNF is located within a metropolitan statistical area (MSA), as defined by the Office of Management and Budget (OMB).

III. Methodology for Determining Per Diem Routine Service Cost Limit

A. Development of Published Limits

1. Data

As previously mentioned, we are using actual freestanding and hospital-based SNF inpatient routine service cost data, less capital-related costs allocated to general inpatient routine services, obtained from Worksheet D–1 of the latest Medicare cost reports available as of June 1984. The data have been adjusted to exclude the inpatient routine nursing salary cost differential.

We adjusted these data using the market basket index discussed above, to inflate costs from the cost reporting

periods in the data base to the midpoint of the first cost reporting period to which the limits apply. The annual percentage increases in the market basket over the previous year that we used for this projection are:

1982	7.3
1983	5.5
1984	4.3
1985	3.1
1986	[1] 2.6
1987	[1] 2.5
1988	[1] 3.9
1989	[1] 3.8

[1] Forecasted increase.

An adjustment will be made to the limits if the forecasted market basket rate differs from the actual rate by at least .3 of one percentage point. Following the end of each year that the limits are in effect, we determine the actual rate of increase or decrease in the market basket for that year. The data necessary to make this determination are usually available in the second quarter of the following year. This allows us to make the determination of the actual rate by June 30 of each year.

If the forecasted market basket rate differs from the actual rate by at least .3 of one percentage point, we will notify the Medicare intermediaries of the actual rate of increase or decrease and advise them to adjust each SNF cost limit at the time of final settlement.

2. Use of Wage Index to Adjust Cost Data

We divided each SNF's adjusted per diem routine service costs into labor-related and nonlabor portions. We determined the labor-related portion by multiplying each SNF s adjusted per diem routine service cost by 82.150 percent, which is the labor-related portion of cost from the market basket. We then divided the labor-related portion of each SNF's per diem cost by the wage index value applicable to the SNF's location (see Tables II and III) to arrive at an adjusted labor-related portion of routine cost.

3. Group Means

We calculated separate means of labor-related and nonlabor adjusted routine service costs for each SNF group established in accordance with the SNF's MSA or non-MSA location.

4. Components of Limit

For each freestanding group, we multiplied the mean labor-related and mean nonlabor costs by 112 percent to arrive at the freestanding limits (Table I).

We then subtracted the freestanding limit for each group from 112 percent of the hospital-based mean for each group and multiplied the result by 50 percent. To arrive at the hospital based limit (Table I), the 50 percent described above is added to the appropriate freestanding limit.

COST LIMIT DATA—HOSPITAL-BASED SNFS

[Effective 10/1/87]

112 percent of hospital-based mean cost	Urban (MSA)	Rural (non MSA)
Labor	$97.25	$83.11
Non-Labor	23.81	15.72
Total	121.06	98.83

CALCULATION OF 50 PERCENT DIFFERENCE BETWEEN 112 PERCENT OF HOSPITAL-BASED MEAN COST AND FREESTANDING LIMIT

	Labor	Non-Labor
Urban (MSA)		
112 percent of Hospital-Based Mean Cost	$97.25	$23.81
Freestanding Limit (Table I)	49.47	11.94
Difference	$47.78	$11.87
50 percent of Difference	$23.89	$5.94
Plus Freestanding Limit	49.47	11.94
Hospital-Based Limit (MSA)	$73.36	$17.88
Rural (Non-MSA)		
112 percent of Hospital-Based Mean Cost	$83.11	$15.72
Freestanding Limit (Table I)	51.50	9.95
Difference	$31.61	$5.77
50 percent of Difference	$15.81	$2.89
Plus Freestanding Limit	51.50	9.95
Hospital-Based Limit (Non-MSA)	$67.31	$12.84
A & G Difference	**Urban**	**Rural**
1. Hospital-Based SNF A & G Mean [1]	$8.09	$6.49
2. Freestanding SNF A & G Mean [1]	−3.99	−4.03
3. Difference	$4.10	$2.46
Amount of A & G Included in the 50-percent Difference between 112 percent of the Hospital-Based Mean Costs and the Freestanding Limit:		
4. A & G Difference (line 3)	$4.10	$2.46
5. 112 percent of Hospital-Based Mean Cost (Total)	$121.06	$98.83
6. Average Routine Cost (line 5 Divided by 112percent)	$108.09	$88.24
7. Percent of A & G Difference to Average Routine Cost (line 4 divided by line 6)	3.79%	2.79%
8. 50 percent of Difference between 112 percent of Hospital-Based SNF Mean Cost and Freestanding SNF Limit	$29.83	$18.70
9. Amount of A & G Difference Included on line 8 (line 7 times line 8)	$1.13	$0.52
A & G ADD-ON:		
10. A & G Difference from line 3	$4.10	$2.46
11. Less Amount from line 9	$1.13	$0.52
12. A & G Add on (line 10 less 11)	$2.97	$1.94
13. Labor-Related Component of A & G Add-on (line 12 times 82.150 percent)	$2.44	$1.59

CALCULATION OF 50 PERCENT DIFFERENCE BETWEEN 112 PERCENT OF HOSPITAL-BASED MEAN COST AND FREESTANDING LIMIT—Continued

	Labor	Non-Labor
14. Nonlabor Component of A & G Add-on (line 12 times 17.850 percent)	$0.53	$0.35

[1] Wage Deflated Means.

B. Adjustment of Published Limits

1. Adjustment of Labor-Related Component by Wage Index

a. *Freestanding SNFs.* To arrive at a labor-adjusted limit for each SNF, we multiply the labor-related component of the limit for the SNF's group by the wage index developed from wage levels for hospital workers in the area in which the SNF is located (see Tables II and III). The adjusted limit that applies to an SNF is the sum of the nonlabor component, plus the adjusted labor-related component, unless the SNF qualifies for the cost reporting year adjustment discussed in paragraph 2, below.

EXAMPLE—CALCULATION OF ADJUSTED LIMIT FOR FREESTANDING SNF (A) LOCATED IN DALLAS, TEXAS

Labor-Related Component.	$49.47	(Table I)
Nonlabor Component.	$11.94	(Table I)
MSA Wage Index Value.	1.0733	(Table II)

Computation of Adjusted Limit

Labor-related component	$49.47
Wage index value	×1.0733
Adjusted Labor component	$53.10
Nonlabor component	+11.94
Adjusted limit	$65.04

b. *Hospital-Based SNFs.* To arrive at a labor-adjusted limit for each hospital-based SNF, we add the labor-related component of the limit and the labor-related component of the A&G add-on for the hospital-based SNF's group and multiply the sum by the wage index developed from wage levels for hospital workers in the area in which the hospital-based SNF is located (see Tables II and III). We then add the nonlabor component of the limit and the nonlabor component of the A&G add-on. The adjusted limit that applies to a hospital-based SNF is the sum of the adjusted labor component and add-on and the nonlabor component and add on unless the facility qualifies for the cost reporting year adjustment discussed in paragraph 2, below.

EXAMPLE.—CALCULATION OF ADJUSTED LIMIT FOR HOSPITAL-BASED SNF (B) LOCATED IN SCRANTON, PENNSYLVANIA

Labor Related Component:		
Limit	$73.36	(Table I)
Add-on	$2.44	(Table I)
Nonlabor Component:		
Limit	$17.88	(Table I)
Add-on	$0.53	(Table I)
MSA Wage Index Value.	0.9982	(Table II)

COMPUTATION OF ADJUSTED LIMIT

Labor-related component:	
Limit	$73.36
Add-on	+2.44
	$75.80
Wage index value	×.9982
Adjusted Labor Component	$75.66
Nonlabor Component:	
Limit	+17.88
Add-on	+0.53
Adjusted limit:	$94.07

2. *Adjustment for Cost Reporting Year.* If a facility has a cost reporting period beginninq after October l, 1987 and before October l, 1988, the intermediary will increase the limit that otherwise would apply to the SNF by the factor from Table IV that corresponds to the month and year in which the cost reporting period begins. Each factor represents the compounded monthly increase derived from the projected annual increase in the market basket index, and is used to account for inflation in costs that would occur after the date on which the limits are effective.

Example: The following is a computation of a revised hospital-based limit for previously cited SNF (B). Hospital-based SNF (B) has a cost reporting period that begins November 1, 1987. The base adjusted limit for SNF (B) is $94.07. The revised limit for SNF (B) applicable to the cost reporting period is $94.38.

Individual SNF adjusted limit	$94.07
Adjustment factor from Table IV	×1.00325
Revised Limit	$94.38

If a facility uses a cost reporting period that is not 12 months in duration, a special adjustment factor must be calculated. This is necessary because projections are computed to the midpoint of a cost reporting period and the adjustment factors in Table IV are based on an assumed 12-month reporting period. For cost reporting periods of other than 12 months, the calculation must be done for the midpoint of the specific cost reporting period. The SNF's intermediary would obtain this adjustment factor from our central office.

IV. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 requires us to prepare and publish a regulatory impact analysis for any major rule. A major rule is defined as any document that is likely to—

(1) Have an annual effect on the economy of $100 million or more;

(2) Cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or

(3) Result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We estimate that the revised limits will result in a loss of savings to the Medicare program of approximately $20 million in FY 1988 and $35 million in FY 1989, compared to expenditures under the prior limits. This loss of savings is applicable for cost reporting periods beginning on or after October l, 1987 and before October 1, 1988.

Because the impact does not exceed $100 million annually, or any other threshold criterion under Executive Order 12291, we have determined that this is not a major rule and a regulatory impact analysis is not required.

BEST COPY AVAILABLE

VOL 52 ISS 191 OCT 2 1987 UMI

B. Regulatory Flexibility Act

For notices such at this, we prepare and publish a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that the notice does not have a significant economic impact on a substantial number of small entities. We consider all SNFs to be small entities under the RFA.

A substantial number of SNFs are affected by this rule. However, it is our practice not to consider an economic impact on small entities to be significant unless the annual total costs or revenues of a substantial number of entities would be increased or decreased by at least three percent. The revised limits will not result in facility total revenues being reduced by three percent or more over the limits that would otherwise apply. Medicare does not account for a high proportion of SNF utilization or revenue. In 1983, for example, Medicare SNF expenditures accounted for only 1.8 percent of total national nursing home expenditures. Therefore, we have determined, and the Secretary certifies, that this notice does not have a significant economic impact on a substantial number of small entities.Thus, we have not prepared a regulatory flexibility analysis.

V. Paperwork Burden

This notice does not impose information collection requirements; consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 through 3511).

VI. Waiver of Proposed Rulemaking

Generally, we issue notices of changes in SNF limits in proposed form to provide a period for public comment. Also, we normally publish notices of this kind thirty days before the effective date. However, if adherence to these procedures would be impractical, unnecessary, or contrary to the public interest, we may waive the procedures.

As explained previously, we developed the revised limits set forth below by using the same basic methodology that we used to develop the current SNF cost limits, which were published on April 1, 1986 (51 FR 11253). On November 22, 1985, we published a proposed notice that described in detail our methodology for developing and applying those limits, and provided a 30-day period for public comment (50 FR 48304). In developing the schedule of limits now in effect, we considered all comments received in response to the November 22, 1985 notice. These comments, and our responses to them, are described in the April 1, 1986 notice.

Because the methodology used for the revised schedule has previously been published for public comment, and because the updating of the cost data and SNF market basket projections are in the nature of routine and minor technical changes, we do not believe it would be either necessary or useful to request comment on that methodology again. Moreover, without publication of this notice, the current limits would remain in effect using adjustment factors based upon earlier and less accurate estimates of the rates of inflation than those contained in this notice. We believe it would be contrary to the public interest to permit this to occur.

In addition, we are updating the limits to be effective for cost reporting periods beginning on or after October 1, 1987 so that the update will occur concurrently with the updates of the SNF inpatient prospective payment rates, established under section 1888(d) of the Act, to be effective on October 1, 1987. Concurrent updating is necessary in order to provide SNFs eligible for prospective payment a comparison as a basis on which to make a decision as to whether to elect prospective payment. If we were to provide a 30-day delay in the effective date of these limits, those SNFs whose next cost reporting periods begin before that effective date (which would be in early October 1987 but, in any case, later than October 1, 1987) would be deprived of a comparison to cost limits that are based on the same data base and adjustment factors for rates of inflation. Thus, a 30-day delay in the effective date would be impractical and contrary to the public interest.

For these reasons, we find good cause to waive publication of a proposed notice and the normal 30-day delay in the effective date, and to publish this notice of updated limits in final form.

VII. Schedule of Limits

Under the authority of sections 1861(v) and 1888 of the Act, the following group per diem limits apply to the adjusted SNF inpatient routine service costs paid for under Medicare for cost reporting periods beginning on or after October 1, 1987. Medicare fiscal intermediaries will compute the adjusted limits for SNFs using the methodology set forth in this notice and will notify each SNF of its applicable limit. These limits, as adjusted by the wage indexes in Tables II and III, and the cost reporting year adjustment in Table IV, will remain in effect for cost reporting periods beginning on or after October 1, 1987.

TABLE I.—SNF GROUP LIMITS

[Cost Reporting Periods Beginning on or after 10/1/87]

Location	Labor related component	Nonlabor component [1]
Freestanding:		
MSA	$49.47	$11.94
Non-MSA	51.50	9.95
Hospital-Based MSA:		
Limit	73.36	17.88
Add-on	2.44	0.53
Non-MSA:		
Limit	67.31	12.84
Add-on	1.59	0.35

[1] The nonlabor portion of the limits for SNFs located in the States of Alaska and Hawaii, the commonwealth of Puerto Rico, and the Virgin Islands will be increased by the following cost-of-living adjustments:

	Adjustment factor
Alaska	1.250
Hawaii	
Oahu	1.225
Kauai	1.175
Maui, Lanai and Molokai	1.200
Hawaii (island)	1.150
Puerto Rico	1.100
Virgin Islands	1.125

TABLE IV.—COST REPORTING YEAR ADJUSTMENT FACTORS [1]

If a SNF cost reporting period begins	The Adjustment Factor is—
November 1, 1987	1.00325
December 1, 1987	1.00641
January 1, 1988	1.00969
February 1, 1988	1.01289
March 1, 1988	1.01590
April 1, 1988	1.01912
May 1, 1988	1.02225
June 1, 1988	1.02549
July 1, 1988	1.02864
August 1, 1988	1.03191
September 1, 1988	1.03518

[1] Based on compounded projected market basket inflation rates of 3.9 percent for 1988 and 3.8 percent for 1989. These adjustment factors are subject to change based on later estimates of cost increases or decreases.

If, for any reason, we do not publish a new schedule of limits to be effective on October 1, 1988 or do not announce other changes in the current schedule by that date, the current limits will continue in effect with the last adjustment factor above multiplied by 1.00317 once for each month between September 1, 1988 and the month in which the cost reporting period begins, until a new schedule of limits or other provision is issued. For example, if a cost reporting period begins on November 1, 1988, 1.03518 would be multiplied by 1.00317 twice and the resulting factor would equal 1.04175 (1.03518×1.00317×1.00317=1.04175).

APPENDIX—DERIVATION OF "MARKET BASKET" INDEX FOR SNF ROUTINE SERVICE COSTS COST LIMITS EFFECTIVE OCTOBER 1, 1987

Category of costs	Relative [1] importance 1988	Forecaster percent changes (1982–1988)	Price variable used
Payroll Expenses	61.903	DRI–CFS [2]	Percentage changes in average hourly earnings of employees in nursing and personal care facility. (SIC 805). Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Employment and Earnings* (monthly), Table C–2.
Employee Benefits	8.453	DRI–MM [3]	Supplements to wages and salaries per worker in nonagricultural establishments. For supplements to wages. Source: U.S. Dept. of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, Table 1.11. For total employment. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Employment and Earnings* (monthly), Table B–4.
Food	8.184	DRI–MM	Processed foods and feeds component of producer price index. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23.

[1] The basic weights for all major categories of skilled nursing home costs were obtained from the DHEW-National Center for Health Statistics (NCHS) National Nursing Home Surveys (NNHS) for 1972 and 1976 for homes certified for participation in the Medicare program. See *Nursing Home Costs 1972, United States: National Nursing Home Survey, August 1973—April 1974, DHEW, NCHS: National Nursing Home Survey: 1977 Summary for the United States, Vital and Health Statistics, Series 13, Number 43.*

A Laspeyres price index was constructed using 1977 weights and price variables indicated in this table. In calendar year 1977 each "price" variable has an index of 100.0. The relative routine service cost weights change each period in accordance with price changes for each price variable. Cost categories with relatively higher "price" increases get relatively higher cost weights and vice versa.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 24

[Docket No. R-87-831; FR-1676]

Debarment, Suspension and Limited Denial of Participation; Contractors and Participants

AGENCY: Office of the Secretary, HUD.

ACTION: Interim rule.

SUMMARY: This interim rule improves and clarifies the procedural guarantees afforded under existing regulations governing debarment, suspension and ineligibility of HUD contractors and participants (including grantees and loan recipients). It also incorporates provisions contained in the Office of Federal Procurement Policy's (OFPP) Policy Letter 82-1 concerning Government-wide debarment, suspension and ineligibility of contractors, and amends HUD's existing regulations to conform to provisions of the OFPP Policy Letter, the Federal Acquisition Regulation, and to certain provisions contained in the OMB final Guidelines for Nonprocurement Debarment and Suspension (Guidelines) promulgated pursuant to Executive Order 12549.

DATES: Under section 7(o)(3) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)(3)), this interim rule cannot become effective until after the first period of 30 calendar days of continuous session of Congress which occurs after the date of the rule's publication. HUD will publish a notice of the effective date of this rule following expiration of the 30-session-day waiting period. Whether or not the statutory waiting period has expired, this rule will *not* become effective until HUD's separate notice is published announcing a specific effective date.

Comments due December 1, 1987.

ADDRESS: Interested persons are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Patricia M. Black, Assistant General Counsel for Inspector General and Administrative Proceedings, Department of Housing and Urban Development, Room 10266, 451 Seventh Street, SW., Washington, DC 20410, (202) 755-7200. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION: 24 CFR Part 24 sets forth procedures relating to debarment, suspension and ineligibility of contractors and grantees with respect to participation in programs administered by the Department of Housing and Urban Development. HUD's procedures cover exclusion from both procurement and nonprocurement activities of the Department. A proposed comprehensive revision of Part 24 was published on July 8, 1980 (45 FR 46012). On July 1, 1982, the Office of Federal Procurement Policy of the Office of Management and Budget (OFPP) published Policy Letter 82-1, establishing criteria for suspension and debarment of Government contractors and subcontractors throughout the Executive Branch (47 FR 28854). Based on a review of the public comments received on the proposed rule published in December 1980 and on the OFPP Policy Letter, HUD published a revised proposed rule on October 11, 1983 (48 FR 46072). The revised rule:

1. Replaced the term "contractor or grantee" in the present regulations with the terms "contractor" and "participant" in order to distinguish between procurement contractors and all others with whom the Department does business.

2. Included definitions to specify the level of proof necessary to establish "adequate evidence" and "preponderance of the evidence." Adequate evidence is comparable to the probable cause necessary for an arrest, a search warrant or a preliminary hearing in a criminal matter and is the standard used in suspensions, while the greater burden of preponderance is applied to debarments.

3. Amended the definition of "affiliate" to include individuals and to emphasize the control aspect of the relationship.

4. Combined the sanctions of "Temporary Denial of Participation" and "Conditional Denial of Participation" into a single sanction entitled "Limited Denial of Participation" which includes the causes available under the prior sanctions.

5. clarified that a debarment includes all divisions or organizational elements of a participant or contractor unless the debarment is, by its terms, limited to specific divisions or elements.

6. Provided that the debarment or suspension of a contractor is effective throughout the Executive Branch of Government unless an agency head makes a written finding of compelling reasons for doing business with the contractor.

7. Limited the time period in which HUD may impose a debarment or suspension.

8. Provided for Department-wide exclusion of a participant or contractor found to be in violation of section 109 of the Housing and Community Development Act of 1974, section 504 of the Rehabilitation Act of 1973, or the Age Discrimination Act of 1975, in addition to Title VI of the Civil Rights Act of 1954, as currently provided.

9. Authorized HUD to debar a participant or contractor who knowingly does business with a person named on the Consolidated List or the HUD List (but see section B of preamble regarding proposed conforming changes to OMB final Guidelines).

10. Authorized debarment, suspension or limited denials of participation based on a similar action by another Federal agency for any reason sufficient to justify a debarment, suspension, or limited denial of participation under this part.

11. Prescribed the contents of the notice of imposition of sanction.

12. Limited appeal rights to the written record in those cases where the suspension or debarment is based on an indictment, a conviction, or a sanction by another agency.

13. Generally reduced the period of debarment to a term not to exceed three years (including any period of suspension).

HUD received four public comments, along with comments from within the Department, on the proposed revised rule. In addition to changes made in response to these comments, this rule also includes changes based on the "Debarment, Suspension and Ineligibility" procedures of the Federal Acquisition Regulation, 48 CFR Subpart 9.4, the Office of Management and Budget's final Guidelines for Nonprocurement Debarment and Suspension (Guidelines), 52 FR. 20360 (issued May 29, 1987 pursuant to Executive Order 12549), and organizational changes within the Department.

The Department had reviewed this rule in light of the recently published final Guidelines and has identified nonsubstantive as well as substantive differences between these two documents. These differences are discussed in Section B of the preamble. The Department has incorporated the nonsubstantive, technical provisons into this rule and will publish a proposed rule to seek prior public comment on the substantive provisions needed to

conform to the Guidelines. The Department believes that the public has had a fair opportunity to comment on the substance of this rule through HUD's October, 1983 proposed rule on debarment, and OMB's publication of proposed Guidelines in February, 1986 (51 FR 6372) on which 60 public comments were received. The Department believes that it would be contrary to the public interest to further delay the effectiveness of this rule. Given the amount of time since the last proposed rule was published and the issuance of the final Guidelines, however, the Department is publishing this rule for effect as an interim rule that solicits public comment. Comments received on both this interim rule and the proposed rule to be published will be considered in developing the final rule on Part 24.

Public Comments

Three commenters stated that a hearing should be granted before imposition of a suspension or a limited denial of participation. The courts have held, however, that appropriate pre-hearing sanctions do not violate due process (*see Horne Bros., Inc. v. Laird,* 463 F.2d 1268 (D.C. Cir. 1972). The Existing Part 24 contains these same provisions and the record shows no history of abuse. Furthermore, pre-termination hearings would defeat the purpose of providing immediate public protection.

The regulations provide for a hearing to be scheduled promptly under § 24.13. In the case of a limited denial of participation, § 24.29 gives the sanctioned participant or contractor a right to a prompt conference with the official actually imposing the sanction or his or her designee. This procedure, which is also contained in existing Part 24, has resulted in rapid resolution of most such sanctions at the local level without recourse to the formal hearing process. These provisions protect the public interest by ensuring speedy resolution of the issues. Consequently, this comment was not adopted.

Two commenters stated that the name of a sanctioned person should be kept confidential until the action has been upheld by a hearing officer and a final determination has been made. A debarment, in fact, is not included on the HUD List until a final determination has been issued. However, suspensions and limited denials of participation by their very nature require immediate publication to assure that the person is excluded pending the appeal. This is necessary to protect the Department and the public. Moreover, under the Government-wide system of debarment of procurement contractors (published by the OFPP), HUD is required to inform other agencies of the suspension or debarment of any contractor. In addition, under 24 CFR Part 26, these hearings are public. Finally, letters of sanctions must be made available under the Freedom of Information Act and are frequently released by HUD under that Act. Thus, confidentiality would be contrary to law.

One commenter was critical of § 24.6(c)(13) which authorizes the imposition of sanctions for "any other cause . . . of so serious or compelling a nature that it affects the present responsibility of a contractor or participant." The commenter found this provision to be too vague. Unfortunately, it is impossible to specify in our regulations every conceivable situation involving nonresponsibility, and an "omnibus" provision is required to protect the public interest. However, this provision is limited specifically to violations which seriously or directly affect the responsibility of a participant on contractor.

Several commenters requested that we change the standard under § 24.11(b), which currently permits the imputation of conduct to a principal, to one requiring actual knowledge of the conduct. This requested change would permit, for example, a corporate officer to avoid responsibility for the conduct of employees merely by claiming that he or she was unaware of the conduct. While this comment has not been adopted, we have modified the provision to apply only where the principal knew or should have known of the conduct or approved or acquiesced in the conduct. In addition, under our regulations the decision to sanction an affiliate is discretionary and is made on an *ad hoc* basis. It should be noted that this imputation may only be made where fraudulent, criminal or other seriously improper conduct is involved. If an entity determined to be irresponsible can exercise control over another entity, the Department may properly act to protect the public interest by excluding the controlled entity (see Section B of preamble).

One commemter requested that we abolish "failure to honor contractual obligations" from the causes for sanction under § 24.26(4) because of the availability of contractual remedies. However, the purpose of a limited denial of participation is not to punish or to remedy past wrongs, but to protect the public and HUD from future harm—an area not addressed by contractual remedies. Therefore, we did not adopt this comment.

One commenter requested that the violation of a contract between one participant and another be included as a basis for imposing a limited denial of participation under § 24.26. This comment drew the Department's attention to an oversight in the proposed rule. Under HUD's current rule, violations of both private contracts and public agreements constitute grounds for debarment under § 24.6. This provision was unintentionally limited in the proposed rule to only those violations involving public agreements. In this interim rule, the Department is retaining its practice of imposing debarment for contractual violations that are so serious as to affect the present responsibility of a contractor or participant, or that result in a conviction or civil judgment under circumstances indicating a lack of business integrity or honesty, regardless of whether the violation relates to a private contract or to a public agreement.

A commenter also urged that we include, as a basis for imposing a limited denial of participation under § 24.26, the making of false certifications to another participant. We agree that a false certification made in connection with a HUD program should be a cause for imposing a limited denial of participation, whether the certification is made to HUD or to a participant, and have so provided at § 24.26(a)(7).

Some commenters expressed confusion as to whether the subject of a limited denial of participation is entitled to a formal hearing. We have modified the language of § 24.28(c) to clarify that a limited denial of participation gives rise to the same right to a formal appeal before an impartial hearing officer as in suspension and debarment cases. We have also retained the right to a conference with the original decision maker, as provided under the existing Part 24. In practice, this provision has enabled the Department quickly to resolve causes for local sanction.

Finally, one commenter objected to giving a limited denial of participation program-wide effect under § 24.27 whenever the participant has been indicted, convicted, or suspended or debarred by another agency—regardless of whether the offense was HUD-related. This provision was adopted to enable local HUD officials to take immediate action to exclude those who are already subject to criminal actions or exclusion by another agency. In such cases, due process has already been accorded, and the person's rights have been safeguarded. For example, to require local HUD offices to continue to do business with a person who has been

convicted of submitting false statements in veteran housing programs, merely because the offense was not HUD-related, would insufficiently protect the public interest. Nor would it be reasonable to exclude from one program a person convicted of submitting false statements to HUD, while permitting that person to do business in another program.

Internal Comments and Organizational Changes

The interim rule contains the following changes in response to internal comments and organizational changes within the Department:

(1) The designation "Area Manager" no longer exists within HUD. Therefore, the authority to impose a limited denial of participation sanction has been given to HUD Office Managers and to Directors of Indian Housing Programs.

(2) The renewability provision for limited denials of participation has been removed. Limited denials of participation are now limited to one year under § 24.27.

(3) Imposition of a limited denial of participation by one HUD field office has been added as a cause for imposing a limited denial of participation by other field offices under § 24.26(a)(11), as provided in the existing Part 24.

(4) The Department has added a provision at § 24.26(a)(12) which clarifies that a limited denial of participation may be imposed whenever a contractor or participant has been debarred or suspended by another Federal agency for any cause substantially the same as provided in § 24.6, "causes for debarment".

(5) This interim rule retains the exception under § 24.3 that permits contractors and participants to purchase HUD-owned housing units offered for all-cash sale, even though sanctions under this part have been imposed. However, because of significant abuse of this exception, the Department has determined that a separate rulemaking proceeding is needed to deal with the all-cash sale exception. The forthcoming regulation will supersede relevant language contained in § 24.3 of this interim rule.

Section A: Federal Acquisition Regulation

The model debarment and suspension procedures contained in Appendix A to Policy Letter 82–1 were incorporated into Subpart 9.4, captioned "Debarment, Suspension, and Ineligibility," of the Federal Acquisition Regulation (FAR) published on September 19, 1983 (48 FR 42103). In the proposed rule published in October 1983, HUD generally conformed its defintions of key terms to those contained in Policy Letter 82–1. In the interim rule published herein, other segments of the rule are revised to conform to provisions of Subpart 9.4 of the FAR (48 CFR 9.400–407.5). These conforming changes generally are nonsubstantive and are intended to promote uniformity in the debarment and suspension procedures of Federal agencies.

However, the Department does intend to solicit public comment in its forthcoming proposed rule on substantive modifications to the government-wide effect of procurement sanctions. These revisions would reflect proposed changes to the FAR that were published on July 31, 1987 (52 FR 28642), including expansion of the government-wide effect of procurement sanctions by extending debarment and suspension ineligibility to subcontracts exceeding $25,000. Under current practice, government-wide effect of procurement sanctions is limited to contractors and federally approved subcontractors.

Section B: OMB Guidelines for Nonprocurement Debarment and Suspension

The OMB final Guidelines for Nonprocurement Debarment and Suspension (Guidelines) published on May 29, 1987 (52 FR 20360) provide a minimum model rule for the development of a government-wide nonprocurement debarment and suspension system mandated by Executive Order 12549. The Guidelines prescribe government-wide criteria and minimum due process procedures in order to "curb fraud, waste, and abuse in Federal programs, increase agency accountability, and ensure consistency among agency regulations concerning debarment and suspension of participants in Federal programs" (51 FR 6370). Executive agencies and departments are required to conform to these minimum agency requirements, although it is anticipated that agencies may elaborate upon the basic model in order to accommodate differing substantive programs.

The Guidelines anticipate that the government-wide nonprocurement system will be implemented by agencies publishing proposed rules that seek prior public participation. As discussed above, the Department believes that it is in the public interest to make this rule effective. The Department has incorporated in this interim rule several nonsubstantive, technical provisions to conform to the Guidelines, which include:

1. Section 24.4 contains the Guidelines' definitions of "proposal", "subsidiary", "agency", and "notice".

2. Section 24.7(c) requires that the grounds for debarment be specified in the notice of sanction.

3. The notice to a participant or contractor under § 24.19(b) must state that the suspension is for a temporary period pending the completion of an investigation, debarment, or legal proceedings.

4. Section 24.21(b) provides for notification of the Department of Justice of an impending termination of suspension.

5. Sections 24.8(c) and 24.20(c) adopt the Guidelines' standard for continuation of agreements that are in existence at the time a person is suspended, debarred, declared ineligible or voluntarily excluded. In addition, § 24.34(b) incorporates the Guidelines' standard for granting an exception to participants and contractors that are included on the HUD List. Such an exception would permit a debarred, suspended or excluded person to participate in a particular transaction upon a written determination by the agency head or authorized designee stating the reasons for deviating from the Presidential policy established by Executive Order 12549. These modifications, however, are nonsubstantive since the Guidelines' standards are no more stringent than those previously promulgated by HUD under existing Part 24 or the October 1983 proposed rule.

6. Sections 24.11 and 24.27 adopt the Guidelines' standard on the scope of debarments, suspensions and limited denials of participation, providing that such sanctions may include "any other affiliate of the participant or contractor that is specifically named and given written notice . . . and an opportunity to respond". This interim rule provides further that "[T]he burden of proving that a particular affiliate or organizational element is currently responsible and is not controlled by the primary sanctioned party (or by an entity that itself is controlled by the primary sanctioned party) is placed on the affiliate or organizational element". The Department considers this language to be appropriately included in this interim rule since it merely makes explicit that which is implicit under the Guidelines. Moreover, the Department included closely analogous language in its October 1983 proposed rule, so that the public has had ample opportunity to comment on this provision.

In addition to these changes, the Department intends to publish a

proposed rule that will invite public comment on the revisions necessary to implement substantive provisions contained in the Guidelines, as well modifications based on proposed changes to the FAR. These include:

1. Implementing the government-wide provisions of the Guidelines. It should be noted that under current practice, Subpart 9.4 of the FAR provides for government-wide effect only as to procurement contractors and federally approved subcontractors (but see item (10) below concerning proposed changes to the FAR), whereas the Guidelines would extend government-wide effect of sanctions to all tiers of nonprocurement participants. HUD intends to carve an exception for agency-specific sanctions (such as § 24.6(c)(6) which provides that the material violation of a limited denial of participation constitutes grounds for imposing a debarment) which would have a purely intra-Departmental effect.

2. Establishing a comprehensive reporting system to the General Services Administration of participants who have been debarred, suspended, declared ineligible, or subjected to limited denials of participation. In addition, any exception granted by the Department under § 24.34 that would allow a sanctioned participant to continue business dealings with HUD shall be reported to GSA. The Department is also considering whether to retain the current HUD List at § 24.32 or to replace it with a more comprehensive Consolidated List of Sanctioned Nonprocurement Participants.

3. Developing a participant certification process that would require certain participants to verify that they (or any person in specified capacities with respect to the participant or the particular covered transaction) have not in the preceding three years been: (a) Debarred, suspended or declared ineligible; (b) formally proposed for debarment, with a final determination still pending; (c) voluntarily excluded from participation; or (d) indicted, convicted, or had a civil judgment rendered against them for any of the offenses listed in § 24.6(a). Other participants would be required to conform to the FAR standard of checking the Consolidated List to verify that participants with whom they have dealings in covered transactions are not listed.

4. Abolishing the time limitation on the decision to order a debarment or suspension at §§ 24.5(b) and 24.17(b). The Department believes this three-year limitation to be inimical to the mandate of Executive Order 12549 and intends to adopt the Guidelines' approach which does not include any such time limitation.

5. Expanding the definition of "legal proceedings" at § 24.4(r) to include proceedings by Federal, state, local or quasi-governments. This will increase the instances in which the Department can suspend an individual "pending the completion of . . . legal proceedings" under § 24.21. HUD currently defines this term to include only civil or criminal judicial proceedings in which the Federal government is a party. However, in order to carry out the strict mandate of Executive Order 12549, HUD will adopt the expanded definition.

6. Modifying the language of § 24.6(c)(2) under causes for debarment from "doing business with a debarred, suspended or otherwise excluded person, in connection with an assistance transaction, where it is know that the person is debarred, suspended or otherwise excluded from participation in such transactions" to "where it is known or reasonably should have been known." This will enable the Department to debar an individual under this subsection who could otherwise merely allege a lack of such knowledge.

7. Abolishing the requirement that a shareholder have a 10% or greater equity interest before his or her seriously improper conduct can be imputed to a participant or contractor under § 24.11(b).

8. Permitting conduct to be imputed to a contractor or participant under § 24.11(b) either when the conduct occurred in connection with the individual's performance of duties for or on behalf of the contractor or participant OR when the participant or contractor knew, or should have know, or approved or acquiesced in, the conduct. Under this interim rule, conduct may be imputed only when both factors are satisfied, making it more difficult for the Department to curb fraud and waste in HUD programs.

9. Specifying that debarred and suspended individuals are also excluded from participation in covered transactions in various capacities such as: (1) An owner or partner holding a controlling interest; (2) a director or officer of the participant; (3) a principal investigator, project director, or other position involved in the management of covered transactions; (4) a provider of federally-required audit services; or (5) in any other position to the extent that the incumbent is responsible for the administration of Federal funds, or in any other position charged as a direct cost under the covered transaction.

10. Expanding the government-wide effect of procurement sanctions based on proposed changes to the FAR that were published on July 31, 1987 (52 FR 28642). This would include extending debarment and suspension ineligibility to those subcontracts that exceed $25,000.

Other Matters. A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50 which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk at the above address.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities, since it will have applicability only to a very small percentage of the total number of entities which have dealings with the Department.

This rule was listed as Item 888 in the Department's Semi-Annual Agenda of Regulations published on April 27, 1987 (52 FR 14362, 14363) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

This rule impacts upon the full range of loan, loan guarantee, grant, insurance, interstate land sales, and manufactured housing programs administered by the Department and that are designated Catalog of Federal Domestic Assistance program numbers 14.103–14.852.

List of Subjects in 24 CFR Part 24

Administrative practice and procedure, Government contracts, Organization and functions (Government agencies), Government procurement, Grant programs: housing and community development, Loan

programs: housing and community development.

Accordingly, the Department revises 24 CFR Part 24 as follows:

PART 24—DEBARMENT, SUSPENSION AND LIMITED DENIAL OF PARTICIPATION

Subpart A—General

Sec.
24.1 Policy.
24.2 Scope.
24.3 Applicability.
24.4 Definitions.

Subpart B—Debarment

Sec.
24.5 General.
24.6 Causes for debarment.
24.7 Debarment procedures.
24.8 Effect of debarment.
24.9 Voluntary exclusion.
24.10 Period of debarment.
24.11 Scope of debarment.
24.12 Appeal procedures.
24.13 Hearing procedures.
24.14 Determination of Hearing Officer; review of determination.
24.15 Requests for reinstatement.
24.16 Settlement.

Subpart C—Suspension

Sec.
24.17 General.
24.18 Causes for suspension.
24.19 Procedures.
24.20 Effect of suspension.
24.21 Period of suspension.
24.22 Scope of suspension.
24.23 Appeal procedures.
24.24 Settlements.

Subpart D—Limited Denial of Participation

Sec.
24.25 General.
24.26 Causes for a Limited Denial of Participation.
24.27 Period and scope of a Limited Denial of Participation.
24.28 Notice.
24.29 Conference.
24.30 Appeal.

Subpart E—Lists of Excluded Participants and Contractors

Sec.
24.31 The Consolidated List of Debarred, Suspended, or Ineligible Contractors.
24.32 Establishment and Maintenance of the HUD List of Debarred, Suspended and Ineligible Participants.
24.33 Classifications for entry on the HUD List.
24.34 Effect of sanctions.
24.35 Retroactivity.

Authority: Section 7(d) of the Department of HUD Act (42 U.S.C. 3535(d)).

Subpart A—General

§ 24.1 Policy.

It is essential to the accomplishment of the Department's mission that grants, loans and contracts are awarded or insured by the Department and by those entities with whom it does business, and that participation in HUD financial assistance programs is limited, only to responsible contractors, grantees, and other participants. Accordingly, for the protection of the public interest, including the deterrence of irresponsible conduct in Department programs, and not for punitive purposes, persons, firms, and other entities may be excluded from participation in HUD programs, and from contracts and subcontracts throughout the Executive Branch, in accordance with this part.

§ 24.2 Scope.

(a) This part—

(1) Prescribes policies and procedures governing the debarment, suspension and limited denial of participation of contractors and participants for the causes given in §§ 24.6, 24.18 and 24.26.

(2) Provides for the listing of debarred and suspended contractors and participants and of contractors and participants declared ineligible; and

(3) Sets forth the consequences of this listing.

(b) Although this part does cover the listing of ineligible contractors (§ 24.31) and the effect of this listing (§ 24.34), it does not prescribe policies and procedures governing declarations of ineligibility.

§ 24.3 Applicability.

(a) The sanctions set forth in this part apply to participation in Departmental programs as described in paragraphs (a)(1), (2) and (3) of this section.

(1) *Covered program transactions.* Covered transactions (whether involvement is as a contractor or participant or as one receiving HUD funds directly or indirectly from a contractor or participant) include all programs funded or administered by this Department, except as noted in paragraph (a)(3) of this section. These transactions include, but are not limited to: grants, cooperative agreements, contracts of assistance, loans, and loan guarantees, subsidies, insurance, payments for specified use, donation agreements; awards, subawards, contracts, subcontracts and transactions at any tier that are charged as direct costs, regardless of type (including subtier awards under awards that are statutory entitlement or mandatory awards); and specially covered activities identified in paragraph (a)(2) of this section. Persons may be subject to sanctions whether or not they were engaged in a HUD program at the time of the conduct on which the sanction is based, or whether they acted individually, on behalf of others, or in a private or public capacity. Sanctions against ultimate beneficiaries such as subsidized tenants and subsidized mortgagors may be taken only upon evidence of fraud or serious program abuse.

(2) *Specially covered activities.* In addition to those transactions identified in paragraph (a)(1) of this section, participants in the loan, loan guarantee, or insurance programs of the Department or in the interstate land sales or manufactured housing programs of the Department and those in business relationships with such participants in connection with such programs are also subject to the provisions of this part, whether or not their participation involves the actual receipt of Federal funds.

(3) *Exceptions.* Sanctions taken under this part shall not preclude: receipt of statutory entitlement or mandatory awards (but not subtier awards thereunder which are not themselves mandatory), including but not limited to contracts with, or grants made to, owners or occupants of real property in connection with eminent domain proceedings and relocation payments made to eligible displaced parties; benefits from the sale of the personal residence of an excluded individual; purchase of HUD-owned housing units offered for all-cash sale without qualification at public sales; incidental benefits derived from ordinary governmental operations; and participation in or benefits from other transactions where the application of this part would be prohibited by law.

(b) *Relationship to other Federal administrative sanction procedures*—(1) *Sanctions provided pursuant to contract provisions.* Nothing in this part shall impair or limit the right to impose any sanction provided for by contract, including guaranty agreements with the Government National Mortgage Association.

(2) *Other departmental sanctions.* Where an office of the Department is required by statute, regulation, or Executive Order to follow administrative sanction procedures that may differ from the requirements of this part, the requirements of the statute, regulation or Executive Order shall take precedence. These alternate procedures include, but are not limited to: Part 200 Previous Participation Review and Clearance procedures, Part 25 Mortgagee Review Board administrative actions, and Part 570 Community Development Block Grant corrective and remedial actions.

§ 24.4 Definitions.

The following terms are used in this part:

(a) "Adequate evidence". Information sufficient to support the reasonable belief that a particular act or omission has occurred.

(b) "Affiliates". Individuals or business concerns are affiliates if, directly or indirectly: (1) Either one controls or can control the other; or (2) a third individual or concern controls or can control both.

(c) "Agency". Any executive department, military department or defense agency, or other agency of the executive branch, excluding the independent regulatory agencies

(d) "Assistance transactions". Those covered departmental assistance transactions denoted by § 24.3 (a)(1) and (a)(2).

(e) "Benefits." Money or any other thing of value provided by, or realized because of, the Department. "Thing of value" includes insurance or guarantees of any kind.

(f) "Consolidated List of Debarred, Suspended, and Ineligible Contractors." A list compiled, maintained, and distributed by the General Services Administration (GSA) (see § 24.31) containing the names of contractors debarred or suspended by agencies under the procedures of this part as well as contractors declared ineligible under other statutory or regulatory authority.

(g) "Contractor." Any individual or other legal entity that:

(1) Submits offers for or is awarded, or reasonably may be expected to submit offers for or be awarded, a Government contract or a subcontract under a Government contract; or

(2) Conducts business with the Government as an agent or representative of another contractor.

(h) "Control." The power to exercise, directly or indirectly, a controlling influence over the management, policies, or activities of a person, whether through the ownership of voting securities, through one or more intermediary persons, or by other means. For purposes of actions under this part, a person who owns or has the power to vote more than 25 percent of the outstanding voting securities of another person, or more than 25 percent of total equity if the other person has no voting securities, is presumed to control. This presumption may be rebutted by evidence.

(i) "Conviction." A judgment of conviction of a criminal offense by any court of competent jurisdiction, whether entered upon a verdict or a plea, including a plea of nolo contendere.

(j) "Debarment." An action taken by a Debarring Official in accordance with Subpart B of this part to exclude a Contractor from Government contracts or federally approved subcontracts under contracts, or to exclude a person from directly or indirectly participating in assistance transactions. "Debarment" also includes an action taken by any other Federal agency (as defined in 48 CFR 9.403) in accordance with agency regulations to exclude a Contractor from Government contracts or federally approved subcontracts under contracts for a reasonable, specified period. A Contractor or other person so excluded is "debarred."

(k) "Debarring Official." Any Assistant Secretary of HUD, the General Counsel of HUD or the President of the Government National Mortgage Association.

(l) "Grant." An award of financial assistance, including cooperative agreements, in the form of money, or property in lieu of money, by the Federal Government to an eligible recipient. The term does not include technical assistance which provides services instead of money, or other assistance in the form of revenue sharing, loans, loan guarantees, interest subsidies, insurance or direct appropriations. Also, the term does not include assistance, such as a fellowship or other lump sum award, which the grantee is not required to account for.

(m) "Grantee." The government to which a grant is awarded and which is accountable for the use of the funds provided. The grantee is the entire legal entity even if only a particular component of the entity is designated in the grant award document.

(n) "Hearing Officer." An Administrative Law Judge or Board of Contract Appeals Judge authorized by HUD's Secretary, or by the Secretary's designee, to conduct proceedings under this part.

(o) "HUD List of Debarred, Suspended or Ineligible Participants." A list compiled, maintained and distributed by the HUD Inspector General in accordance with § 24.32 containing the names of all participants and contractors debarred, suspended or determined to be ineligible in accordance with this part.

(p) "Indictment." Indictment for a criminal offense. An information or other filing by competent authority charging a criminal offense shall be given the same effect as an indictment.

(q) "Ineligible." Excluded from participation in Departmental programs or Government contracting (and subcontracting, if appropriate) pursuant to statutory, Executive Order, or regulatory authority other than the Department's debarment, suspension or limited denial of participation procedures, such as the Davis-Bacon Act and its related statutes and implementing regulations, the Service Contract Act, the Equal Opportunity Acts and Executive Orders, the Walsh-Healey Public Contracts Act, the Buy American Act, and the Environmental Protection Acts and Executive Orders.

(r) "Legal proceedings." Any civil judicial proceedings to which the Government is a party, or any criminal proceeding. The term includes appeals from such proceedings.

(s) "Limited denial of participation." An action taken to exclude immediately from direct or indirect participation, or immediately to impose conditions on the direct or indirect participation, of any person in a program of the Department within a limited geographical area.

(t) "Notice." A written communication served in person or sent by certified mail, return receipt requested, or its equivalent, to the last known address of a party, its identified counsel, its agent for service or process, or any partner, officer, director, owner, or joint venturer of the party. Notice, if undeliverable, shall be considered to have been received by the addressee five days after being properly sent to the last address known by the agency.

(u) "Participant." Any person who directly or indirectly participates, or who may reasonably be expected to participate in HUD programs. (For example, a participant in housing programs of another Federal agency or State government is a participant.) "Participant" encompasses any recipient of HUD benefits, either directly or indirectly, through non-Federal sources or other recipients, and includes grantees and subgrantees as well as loan recipients. No sanction shall be imposed against a direct recipient of Community Development Block grant funds, however, except as provided by 24 CFR Part 570.

"Participant" includes, but is not limited to, State and local governments, bonding companies, borrowers, builders, HUD contractors, principals in multifamily projects (as defined in 24 CFR Part 200 Subpart G), purchasers at sales of HUD-owned housing units offered with conditions for sale, purchasers of a property with a HUD-insured or Secretary-held mortgage, recipients under assistance agreements, ultimate beneficiaries of HUD programs, mortgagees, fee appraisers and inspectors, real estate agents and brokers, area management brokers, management and marketing agents, or

persons employed by or in a business relationship with participants, such as accountants, consultants, investment bankers, architects, engineers, contractors with participants, and attorneys.

(v) "Person." Any individual, corporation, partnership, association, unit of government or legal entity, however organized, including any subsidiary of any of the foregoing.

(w) "Preponderance of the evidence." Proof by information that, compared with that opposing it, leads to the conclusion that the fact at issue is more probably true than not.

(x) "Proposal." A solicited or unsolicited bid, application, request, invitation to consider or similar communication by or on behalf of a person seeking a benefit, directly or indirectly, under a covered transaction.

(y) "Respondent". A person against whom a debarment, suspension, or limited denial of participation action has been initiated.

(z) "Subsidiary". Any corporation, partnership, association or legal entity however organized, owned or controlled by another person.

(aa) "Suspending Official". Any Assistant Secretary of HUD, the General Counsel of HUD, or the President of the Government National Mortgage Association.

(bb) "Suspension". An action taken by a Suspending Official in accordance with Subpart C of this part immediately to exclude a Contractor from Government contracts or federally approved subcontracts under contracts, or immediately to exclude a person from directly or indirectly participating in assistance transactions for a temporary period, pending completion of an investigation or administrative or legal proceedings. A person so excluded is suspended.

(cc) "Ultimate beneficiaries". Ultimate beneficiaries of HUD programs include, but are not limited to, subsidized tenants and subsidized mortgagors such as those assisted under Section 8 Housing Assistance Payments Contracts, Section 236 Rental Assistance, or by Rent Supplement payments. Sanctions may be taken against ultimate beneficiaries only upon evidence of fraud or serious program abuse.

(dd) "Voluntary exclusion". A status of nonparticipation or limited participation in assistance transactions assumed by a person under the terms of a settlement.

Subpart B—Debarment

§ 24.5 General.

(a) *Officials who may initiate debarment.* Any Debarring Official may initiate debarments. No debarment may be initiated against HUD–FHA approved mortgagees, however, without approval of the Mortgagee Review Board. A Debarring Official, acting in the public interest, may debar a participant or contractor for any cause set forth in § 24.6. In each case, even if the offense or violation is of a criminal, fraudulent or other serious nature, the decision to initiate debarment shall be within the discretion of the Debarring Official and in the best interests of the Government.

(b) *Time limitations on decision to debar.* The notice of proposed debarment shall be issued within three years of—

(i) A criminal conviction;

(ii) Completion of an investigation or audit which is a basis for the debarment action; or

(iii) Discovery of the cause on which the debarment action is based, whichever event is later.

§ 24.6 Causes for debarment.

Debarment may be imposed in accordance with the provisions of §§ 24.5 and 24.7 for:

(a) *Conviction.* Conviction of, or civil judgment for, any offense indicating a lack of business integrity or honesty which affects the present responsibility of a contractor or participant, including but not limited to:

(1) Fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public or private agreement;

(2) Bribery, embezzlement, false claims, false statements, falsification or destruction of records, forgery, obstruction of justice, receiving stolen property, or theft; or

(3) Unlawful price fixing between competitors, allocation of customers between competitors, bid rigging, or any other violation of Federal or State antitrust laws that relates to the submission of bids or proposals.

(b) Violation of a contract or the terms of a public agreement so serious as to affect the present responsibility of a contractor or participant, including but not limited to:

(1) A willful or material failure to perform under one or more contracts or agreements; or

(2) A history of substantial noncompliance with the terms of one or more contracts or agreements.

(c) *Other Causes.* Any of the following causes:

(1) Debarment or equivalent exclusionary action by any public agency or instrumentality for causes substantially the same as provided for in § 24.6;

(2) Doing business with a debarred, suspended or otherwise excluded person, in connection with an assistance transaction, where it is known that the person is debarred, suspended or otherwise excluded from participation in such transactions;

(3) Conduct indicating a lack of business integrity or honesty which affects the present responsibility of a contractor or participant;

(4) Loss or denial of the right to do business or practice a profession under circumstances indicating a lack of business integrity or honesty or otherwise affecting the present responsibility of a contractor or participant;

(5) Failure to pay a debt (including disallowed costs and overpayments) owed to any Federal agency or instrumentality, provided the debt is uncontested by the debtor or, if contested, provided that the debtor's legal and administrative remedies have been exhausted; or

(6) Violation of a material provision of a voluntary exclusion or of any settlement of a debarment, suspension or limited denial of participation action;

(7) Failure to comply with Title VIII of the Civil Rights Act of 1968 or Executive Order 11063, HUD's Affirmative Fair Housing Marketing regulations or an Affirmative Fair Housing Plan;

(8) Violation of Title VI of the Civil Rights Act of 1964, section 109 of the Housing and Community Development Act of 1973, section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975;

(9) Violation of any law, regulation, or agreement relating to conflict of interest;

(10) Violation of any nondiscrimination provisions included in any agreement or contract;

(11) Violation of any law, regulation, or obligation relating to applications for financial assistance, insurance, or guarantees, or to the performance of obligations under an assistance award or conditional or final commitment to insure or guarantee;

(12) Making or causing to be made any false statement for the purpose of influencing in any way an action of the Government; or

(13) Any other cause determined by a Debarring Official to be of so serious or compelling a nature that it affects the present responsibility of a contractor or participant.

§ 24.7 Debarment procedures.

(a) *Decision-making process.* The debarment decision-making process shall be as informal as practicable, consistent with principles of fundamental fairness.

(b) *Notice of proposal to debar.* Debarment shall be initiated by advising the participant or contractor and any specifically named affiliates, by certified mail, return receipt requested—

(1) That debarment is being proposed;

(2) Of the reasons for the proposed debarment in terms sufficient to put the participant or contractor on notice of the conduct or transaction(s) upon which it is based;

(3) Of the cause(s) relied upon under § 24.6 for proposing debarment;

(4) Of the right to request in writing, within 30 days of receipt of the notice, a hearing purusant to § 24.13;

(5) Of the following potential effects of debarment:

(i) For a participant, that the participant will be excluded from all participation, direct or indirect, in any HUD program, including any program funded, guaranteed or insured by HUD;

(ii) For a contractor, that in addition to exclusion from direct or indirect participation in HUD programs, the contractor will be excluded from receiving any Federal Government contract, and Federal agencies shall not solicit offers from, or award contracts or subcontracts to, the contractor unless the acquiring agency's head or designee determines that there is a compelling reason for such action.

(6) Of HUD's procedures governing debarment decision-making, including a statement that, if no response is made within 30 days, the decision will be made final.

(c) Notice of Debarring Official's final decision. If no request for hearing is received within 30 days, the Debarring Official, or designee, shall give the participant or contractor and any affiliates prompt notice of the final decision to debar by certified mail, return receipt requested—

(1) Referring to the notice of proposed debarment;

(2) Specifying the reasons for debarment;

(3) Stating that the debarment is effective immediately; and

(4) Stating the period of debarment, including effective dates.

§ 24.8 Effect of debarment.

a. *Contractors.* In addition to exclusion from direct or indirect participation in HUD programs, a contractor's debarment from procurement shall be effective throughout the Executive Branch of the Government, in accordance with 48 CFR 9.406–1(c), unless a contracting agency's head, or designee, states in writing the compelling reasons justifying continued business dealings between that agency and the contractor.

b. *Participants.* A participant's debarment is limited to direct or indirect participation in HUD programs. Such participation includes receipt of any direct or indirect benefit or financial assistance through grant or contractual arrangments; direct or indirect benefit or assistance in the form of loan guarantees or insurance; and award of procurement contracts, notwithstanding any quid pro quo given or whether the Department gives anything in return.

c. Notwithstanding the debarment, voluntary exclusion, or ineligible status of any person, agencies and participants may continue agreements in existence at the time the person was debarred, declared ineligible or voluntarily excluded. A decision as to the type of termination action, if any, to be taken should be made only after thorough review to ensure the propriety of the proposed action.

Agencies and participants shall not renew or extend the duration of current agreements with any person who is debarred, declared ineligible or under a voluntary exclusion, except as provided under § 24.34.

§ 24.9 Voluntary exclusion.

A contractor or participant and an agency may enter into a settlement agreement providing for the exclusion of the contractor or participant. Such exclusion shall be entered on the Consolidated List (see Subpart E).

§ 24.10 Period of debarment.

Debarment shall be for a period commensurate with the seriousness of the cause(s), generally not to exceed three (3) years. If suspension precedes a debarment, the suspension period shall be considered in determining the debarment period. Where the offense is willful or egregious, a longer term of debarment may be imposed, up to an indefinite period.

§ 24.11 Scope of debarment.

(a) *Scope in general.* (1) Debarment of a person or affiliate under this part constitutes debarment of all its subsidiaries, divisions, and other organizational elements unless the debarment decision is limited by its terms to one or more specifically identified individuals or organizational elements or to specific types of agreements.

(2) The debarment action may include any other affiliate of the participant or contractor that is—

(i) Specifically named; and

(ii) Given written notice of the proposed debarment and an opportunity to respond as set forth in § 24.7(b).

An affiliate may be included in a debarment solely on the basis of its affiliation and regardless of its knowledge of or participation in the acts. The burden of proving that a particular affiliate or organizational element is currently responsible and is not controlled by the primary debarred party (or by an entity that itself is controlled by the primary debarred party) is placed on the affiliate or organizational element.

(b) *Imputing conduct.* For purposes of determining the scope of debarment, conduct may be imputed as follows:

(1) *Conduct imputed to contractor or participant.* The fraudulent, criminal, or other seriously improper conduct of any officer, director, shareholder having a 10 percent or greater interest, partner, employee, or other individual associated in a business context with a contractor or participant may be imputed to the contractor or participant when the conduct occurred in connection with the individual's performance of duties for or on behalf of the contractor or participant, and the participant or contractor knew, or should have known of, or approved or acquiesced in, the conduct.

(2) *Conduct imputed to individuals associated with participant.* The fraudulent, criminal, or other seriously improper conduct of a contractor or participant may be imputed to any officer, director, shareholder having a 10 percent or greater interest, partner, employee, or other individual associated in a business context with the contractor or participant who participated in, knew of, or had reason to know of the contractor's or participant's conduct.

(3) *Conduct of one contractor or participant imputed to other participants in a joint venture.* The fraudulent, criminal, or other seriously improper conduct of one contractor or participant in a joint venture or similar arrangement may be imputed to other participating parties if the conduct occurred for or on behalf of the joint venture or similar arrangement, or with the knowledge, approval, or acquiescence of the contractors or participants. Acceptance of the benefits derived from the conduct shall be presumptive evidence of such knowledge, approval or acquiescence.

VOL 52 ISS 191 OC 2 1987 UMI

§24.12 Appeal procedures.

Within 30 days of receipt of a notice of proposed debarment, any participant or contractor including any affiliate, desiring a hearing shall file a written request for a hearing with the Debarment Docket Clerk, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. If no appeal is filed within the time limit, the proposed decision to debar shall be final.

§ 24.13 Hearing procedures.

(a) *General.* Hearings shall be governed by the procedures set forth at 24 CFR Part 26, except as provided herein.

(b) *Right to hearing.* A participant or contractor, including any affiliate, that has requested a hearing has the right to be heard before a Hearing Officer and to be represented by counsel as follows:

(1) Except as provided in paragraphs (b) (2) and (3) of this section, the participant or contractor may request an oral hearing before a Hearing Officer. Where debarment is based on a finding of civil rights noncompliance after a hearing, however, the hearing officer is bound by the finding of noncompliance reached in the prior hearing.

(2) Where the Department of Justice advises, in writing, and a Suspending Official determines that a suspension is based on the same facts as pending or contemplated legal proceedings; and that substantial interests of the Government in those proceedings would be prejudiced by a hearing, there shall be no right to a hearing under this part. However, the participant may submit documentary evidence and written briefs for consideration by the Suspending Official;

(3) Where the action is based solely upon an indictment or conviction, or upon suspension or debarment by another Federal Government agency, the hearing shall be limited to the opportunity to submit documentary evidence and written briefs for consideration by a Hearing Officer;

(c) *Standard of proof.* The cause for debarment must be established by a preponderance of the evidence. If the proposed debarment is based upon a conviction, a civil judgment, or debarment by another Federal Government agency, the standard shall be deemed to have been met. The cause for suspension and Limited Denial of Participation must be established by adequate evidence. If the action is based upon an indictment or suspension by another Federal Government agency, the standard shall be deemed to have been met. If the Limited Denial of Participation is based upon a Limited Denial of Participation by another HUD regional or field office, the standard shall be deemed to have been met.

(d) *Consolidation of hearing.* Where a sanction under this part is accompanied or followed by another sanction under this part, the hearings may be consolidated.

§ 24.14 Determination of Hearing Officer; review of determination.

(a) *Written determination.* After the participant or contractor has been afforded an opportunity to be heard, the Hearing Officer shall make a written determination on the evidence presented, including any evidence of mitigating circumstances. The Hearing Officer may issue a determination in accordance with Part 26. If it is proposed that the sanction include an affiliate, the Hearing Officer shall rule specifically whether, and to what extent, the determination applies to the affiliate. The Hearing Officer's determination shall be transmitted to all appealing parties by certified mail, return receipt requested.

(b) *Transmission of determination.* The Hearing Officer's determination also shall be transmitted promptly to the HUD official who invoked the administrative sanction, and to the Office of the General Counsel.

(c) *Finality and Secretarial Review.* The Hearing Officer's determination shall be final unless, pursuant to 24 CFR Part 26, the Secretary, or designee, decides as a matter of discretion to review the finding of the Hearing Officer. Any party may request such a review in writing within 15 days of receipt of the Hearing Officer's determination.

§ 24.15 Requests for reinstatement.

(a) *Grounds.* Requests for reinstatement shall be made in writing, addressed to the official imposing the sanction, as follows:

(1) Immediately upon proof of:

(i) Discovery of new and material evidence not previously available;

(ii) Dismissal of the indictment or reversal of the conviction or judgment, or reversal of the suspension or debarment by another agency upon which HUD's sanction was based; or

(iii) Bona fide change in ownership or management sufficient to justify a finding of present responsibility.

(2) Not less than six months after the final determination of debarment or imposition or affirmation of the suspension or Limited Denial of Participation, upon proof that the causes for the sanction have been eliminated and upon certification that the requirements of applicable statutes and administrative rules and regulations are understood by the participant or contractor and will be followed in the future.

(b) *Procedures.* The request for reinstatement shall be forwarded by the official imposing the sanction to a Hearing Officer for a recommendation on reinstatement. The determination whether to reinstate shall be based on the written submission of evidence, without a further hearing. Upon consideration of the written submission and any departmental response, the Hearing Officer shall recommend to the official imposing the sanction whether or not reinstatement is warranted under the standards of paragraph (a) of this section.

§ 24.16 Settlement.

A Debarring Official may settle an administrative action under this part in the interest of the Government at any time.

Subpart C—Suspension

§ 24.17 General

(a) *Officials who may initiate suspensions.* Any Suspending Official may issue suspensions. No suspension may be issued against a HUD–FHA approved mortgagee, however, without approval of the Mortgagee Review Board. A Suspending Official, acting in the public interest, may suspend a participant or contractor for any cause set forth in § 24.18. In each case, even if the offense or violation is of a criminal, fraudulent or other serious nature, the decision to suspend shall be within the discretion of the Suspending Official and in the best interests of the Government.

(b) *Time limitations on decision to suspend.* The notice of suspension shall be issued within three years of—

(1) A criminal conviction;

(2) Completion of an investigation or audit which is a basis for suspension; or

(3) HUD's discovery of the cause on which the suspension is based, whichever event is later.

§ 24.18 Causes for suspension.

(a) *Causes.* Suspension may be imposed in accordance with the provisions of §§ 24.17 and 24.19 upon adequate evidence:

(1) To suspect the commission of an offense listed in § 24.6(a); or

(2) That a cause for debarment under § 24.6 may exist.

(b) *Indictment.* Indictment shall constitute adequate evidence for the purpose of suspension actions.

(c) *Suspension.* Suspension by another Federal agency for any cause specified

in paragraph (a) of this section shall constitute adequate evidence for a concurrent suspension.

§ 24.19 Procedures.

(a) *Decision-making process.* The supension decision-making process shall be as informal as practicable, consistent with principles of fundamental fairness. Suspension is a serious action to be imposed on the basis of adquate evidence, pending the completion of an investigation, administrative proceedings or legal proceedings, when it has been determined that immediate action is necessary to protect the Government's interest. In assessing the adequacy of the evidence, the Suspending Official shall consider how much information is available, how credible it is given the circumstances, whether or not important allegations are corroborated, and what inferences can reasonably be drawn as a result.

(b) *Notice of suspension.* Suspension shall be made effective by advising the participant or contractor and any specifically named affiliates, by certified mail, return receipt requested—

(1) That suspension is being imposed;

(2) That suspension is based on an indictment or other adequate evidence that the participant or contractor has committed irregularities: (i) Of a serious nature in business dealings with the Government; or (ii) seriously reflecting on the propriety of further Government dealings with the participant or contractor. Any such irregularities shall be described in terms sufficient to place the participant or contractor on notice without disclosing the Government's evidence;

(3) Of the cause(s) relied upon under § 24.18 for imposing suspension;

(4) That the suspension is for a temporary period pending the completion of an investigation and such legal or debarment proceedings as may ensue;

(5) Of the right to request within 30 days, in writing, a hearing pursuant to § 24.13;

(6) Of the following potential effect(s) of suspension:

(i) For a participant, that the participant is excluded from all participation, direct or indirect, in any HUD program, including any program funded, guaranteed or insured by HUD; and

(ii) For a contractor, that in addition to being excluded from direct or indirect participation in HUD programs, the contractor is excluded from receiving any Federal Government contract, and Federal agencies shall not solicit offers from, or award contracts or subcontracts to, the contractor unless the contracting agency's head or designee determines that there is a compelling reason for such action.

(7) Of HUD's procedures governing suspension decision-making, including the right to request a hearing within 30 days of receipt of the notice of suspension.

§ 24.20 Effect of suspension.

(a) *Contractors.* In addition to exclusion from direct or indirect participation in HUD programs, a contractor's suspension from procurement shall be effective throughout the Executive Branch of the Government in accordance with 48 CFR 9.407–1(d), unless a contracting agency's head, or designee, states in writing the compelling reasons justifying continued business dealings between that agency and the contractor.

(b) *Participants.* A participant's suspension extends to both direct and indirect participation in HUD programs. Such participation includes receipt of any direct or indirect benefit or financial assistance through grant or contractual arrangements; direct or indirect benefit or assistance in the form of loan guarantees or insurance; and award of procurement contracts, notwithstanding any quid pro quo given or whether the Department gives anything in return.

(c) Notwithstanding the suspension, voluntary exclusion, or ineligible status of any person, agencies and participants may continue agreements in existence at the time the person was suspended, declared ineligible or voluntarily excluded. A decision as to the type of termination action, if any, to be taken should be made only after thorough review to ensure the propriety of the proposed action.

Agencies and participants shall not renew or extend the duration of current agreements with any person who is suspended, declared ineligible or under a voluntary exclusion, except as provided in § 24.34.

§ 24.21 Period of suspension.

(a) All suspensions shall be for a temporary period pending the completion of an investigation or administrative or legal proceedings. A suspension shall become effective immediately upon issuance of the notice specified in § 24.19(b). In cases involving suspected violations of Federal law where prosecutive action has not been initiated by the Department of Justice within 12 months from the date of the notice of suspension, the suspension shall be terminated unless an Assistant Attorney General or a United States Attorney requests, in writing, a continuance for an additional six months. In no event shall a suspension continue beyond 18 months unless prosecutive action has been initiated within that period. The time limitations for suspension contained in this section may be waived by the affected party.

(b) The suspending official shall notify the Department of Justice of an impending termination of a suspension, at least 30 days before the 12-month period expires, to give that Department an opportunity to request an extension.

§ 24.22 Scope of suspension.

The scope of a suspension shall be the same as the scope of a debarment (see § 24.11), except that the procedures of § 24.19 shall be used in imposing a suspension.

§ 24.23 Appeal procedures.

Within 30 days of receipt of a notice of suspension, a participant or contractor, including any affiliate, desiring a hearing shall file a written request for a hearing with the Debarment Docket Clerk, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. If a hearing is requested, it shall be held in accordance with sections §§ 24.12 through 24.14.

§ 24.24 Settlements.

A Suspending Official may settle an administrative action under this part in the interest of the Government at any time.

Subpart D—Limited Denial of Participation

§ 24.25 General.

Officials who may order a Limited Denial of Participation. A Regional Administrator, Office Manager, or Director of an Office of Indian Programs is authorized to order a Limited Denial of Participation affecting any participant or contactor and its affiliates except HUD–FHA approved mortgagees. In each case, even if the offense or violation is of a criminal, fraudulent or other serious nature, the decision to order a Limited Denial of Participation shall be discretionary and in the best interests of the Government.

§ 24.26 Causes for a Limited Denial of Participation.

(a) *Causes.* A Limited Denial of Participation shall be based upon adequate evidence of any of the following causes:

(1) That approval of an applicant for insurance would constitute an unsatisfactory risk;

BEST COPY AVAILABLE

(2) Irregularities in a participant's or contractor's past performance in a HUD program;

(3) Failure of a participant or contractor to maintain prerequisites of eligibility to participate in a HUD program;

(4) Failure to honor contractual obligations or to proceed in accordance with contract specifications or HUD regulations;

(5) That requirements of an assistance agreement or contract will not be satisfied upon completion;

(6) Construction deficiencies in ongoing projects;

(7) Making a false certification in connection with any HUD Program, whether or not the certification was made directly to HUD;

(8) Commission of an offense listed in § 24.6(a);

(9) Violation of any law, regulation, or procedure relating to the application for financial assistance, insurance or guarantee, or to the performance of obligations incurred pursuant to a grant of financial assistance or a conditional or final commitment to insure or guarantee.

(10) Making or procuring to be made any false statement for the purpose of influencing in any way the action of the Department.

(11) Imposition of a Limited Denial of Participation by any other HUD regional or field office.

(12) Debarment or suspension by another Federal agency for any cause substantially the same as provided in § 24.6.

(b) *Indictment.* Indictment shall constitute adequate evidence for the purpose of Limited Denial of Participation actions.

(c) *Limited Denial of Participation.* Imposition of a Limited Denial of Participation by any other HUD regional or field office shall constitute adequate evidence for a concurrent Limited Denial of Participation.

§ 24.27 Period and scope of a Limited Denial of Participation.

(a) *Generally.* A Limited Denial of Participation extends to both direct and indirect participation in the program under which the cause arose, except that where it is based on an indictment, conviction or suspension or debarment by another agency it need not be based on offenses against HUD and it may apply to all programs. Such participation includes receipt of any direct or indirect benefit or financial assistance through grant or contractual arrangements; direct or indirect benefit or assistance in the form of loan guarantees or insurance; and award of procurement contracts, notwithstanding any quid pro quo given or whether the Department gives anything in return. The sanction may be imposed for a period not to exceed 12 months and is effective only within the geographic jurisdiction of the office imposing it. For the purpose of this subpart, the term "program" may, in the discretion of the authorized official, include any or all of the functions within the jurisdiction of an Assistant Secretary.

(b) *Effectiveness.* This sanction shall be effective immediately upon being signed by the authorized official and shall remain effective up to 12 months. However, if the cause for the Limited Denial of Participation is resolved before the expiration of the 12-month period, the authorized official may terminate the sanction. The imposition of a Limited Denial of Participation shall not affect the right of the Department to suspend or debar any party under this part.

(c) *Affiliates.* An affiliate or organizational element may be included in a Limited Denial of Participation solely on the basis of its affiliation and regardless of its knowledge of or participation in the acts providing cause for the sanction. The burden of proving that a particular affiliate or organizational element is currently responsible and not controlled by the primary sanctioned party (or by an entity that itself is controlled by the primary sanctioned party) is on the affiliate or organizational element.

§ 24.28 Notice.

(a) *Generally.* A Limited Denial of Participation shall be initiated by advising a participant or contractor and any specifically named affiliate, by certified mail, return receipt requested—

(1) That the sanction is imposed on the date of the notice;

(2) Of the reasons for the sanction in terms sufficient to put the participant or contractor on notice of the conduct or transaction(s) upon which it is based;

(3) Of the cause(s) relied upon under § 24.26 for imposing the sanction;

(4) Of the right to request in writing within 30 days of receipt of the notice, a conference on the sanction;

(5) Of the Department's procedures governing Limited Denial of Participation; and

(6) Of the potential effect of the sanction and the impact on the participant's or contractor's participation in Departmental programs, specifying the program involved and the geographical area affected by the action.

(b) *Notification of action.* After 30 days, the official imposing the Limited Denial of Participation shall notify the Participation and Compliance Officer for Housing Programs if no conference has been requested. If a conference is requested within the 30-day period, no notice shall be given unless a decision to affirm all or a portion of the remaining period of exclusion is issued. The Participation and Compliance Officer will be responsible for notifying all HUD field offices of sanctions imposed.

§ 24.29 Conference.

Upon receipt of a request for a conference, the official imposing the sanction shall arrange such a conference with the participant or contractor and may designate another official to conduct the conference. The participant shall be given the opportunity to be heard within 10 business days of receipt of the request. This conference precedes, and is in addition to, the formal hearing provided if an appeal is taken under § 24.30. Although the formal rules of procedure contained in 24 CFR Part 26 do not apply to the conference, the participant or contractor may be represented by counsel and may present all relevant information and materials to the official, or designee. After consideration of the information and materials presented, the official shall, in writing, advise the participant or contractor of the decision to withdraw, modify or affirm the Limited Denial of Participation. If the decision is to affirm all or a portion of the remaining period of exclusion, the participant shall be advised of the right to request in writing, within 30 days of receipt of notice of the decision, a formal hearing. This decision shall be issued promptly, but in no event later than 20 days after the conference and receipt of materials.

§ 24.30 Appeal.

Where the decision is to affirm all or a portion of the remaining period of exclusion, any participant desiring an appeal shall file a written request for a hearing with the Debarment Docket Clerk, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. This request shall be filed within 15 days of receipt of the decision to affirm. If a hearing is requested, it shall be held in accordance with the procedures set forth at §§ 24.12 through 24.14.

Subpart E—Lists of Excluded Participants and Contractors

§ 24.31 The Consolidated List of Debarred, Suspended, or Ineligible Contractors.

(a) The Inspector General shall compile and transmit to the General Services Administration (GSA) a list of

all contractors debarred, suspended, or declared ineligible by the Department. The list shall indicate:

(1) The names and addresses of all debarred, suspended, or ineligible contractors, in alphabetical order, with cross references when more than one name is involved in a single action;

(2) The cause of the action or other statutory or regulatory authority;

(3) The effect of the action;

(4) The termination date for each listing;

(5) The name and telephone number of the point of contact for the action; and

(6) The DUNS No. for the contractor.

(b) The Inspector General shall:

(1) Notify GSA of the information required by paragraph (a) of this section within five working days after the action becomes effective;

(2) Notify GSA within five working days after modifying or rescinding an action; and

(3) Notify GSA of the names and addresses of offices within HUD that are to receive the Consolidated List and the number of copies to be furnished to each.

(4) In accordance with internal retention procedures, maintain records relating to each suspension or debarment action taken by the Department;

(5) Establish procedures to provide for the effective use of the List, to ensure that the Department does not solicit offers from, award contracts to, or consent to subcontracts with listed contractors, except as provided in § 24.34;

(6) Direct inquiries concerning listed contractors to the agency or other authority that took the action.

§ 24.32 Establishment and Maintenance of the HUD List of Debarred, Suspended and Ineligible Participants.

(a) *Maintenance of HUD Lists.* The HUD Inspector General shall maintain and consolidate lists relating to the debarment, suspension or ineligibility of participants and contractors. All lists shall be kept current. Procedures for issuance of notices of additions and deletions shall be established by the Inspector General. Each Suspending or Debarring Official under this part shall appoint a liaison officer responsible for providing the Office of Inspector General with current information. The Office of Inspector General shall, in cooperation with other offices of HUD, establish procedures for assuring the timely receipt of information relevant to updating the lists.

(b) *Information in the List.* The HUD List shall contain, at a minimum, the following information:

(1) An alphabetical listing of those persons against whom HUD has invoked administrative sanctions of debarment or suspension, and those persons voluntarily excluded, with appropriate cross-references where more than one name is involved in a single action.

(2) The basis of authority for such action;

(3) The extent of the restrictions imposed, including their expiration date;

(4) the name of the office initiating the action; and

(5) designation of whether debarred as a participant or contractor.

(c) *Distribution of the HUD List.* The Inspector General shall arrange for reproduction and distribution of the HUD List. The List shall be distributed among HUD employees and to others outside HUD whose duties require access to the List, as authorized by the Assistant Secretaries, Office Managers, Directors of Indian Housing Programs, and Regional Administrators. Distribution shall also be made upon request. Procedures for submitting requests for information contained in the HUD List and distribution of such information shall be established by the Office of Inspector General. Names of persons on the HUD List shall be available upon request to that office.

§ 24.33 Classifications for entry on the HUD List.

Persons may be listed on the HUD List in accordance with the following classifications:

(a) Those listed by the Comptroller General in accordance with the provisions of section 3 of the Walsh-Healy Public Contracts Act (41 U.S.C. 35, *et seq.*), or the Service Contract Act (41 U.S.C. 351, *et seq.*) as found by the Secretary of Labor to have violated any of the agreements or representations required by those Acts.

(b) Those listed by the Comptroller General in accordance with the provisions of section 3 of the Davis-Bacon Act (40 U.S.C. 276a–2(a)), as found by the Comptroller General to have violated that Act.

(c) Those listed by the Comptroller General as found by the Department of Labor to have failed to satisfy obligations arising out of a contract incorporating the nondiscrimination and affirmative action provisions of Executive Order 11246, as amended, the Rehabilitation Act of 1973, as amended (12 U.S.C. 793), or the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended (38 U.S.C. 2012), implementing regulations (41 CFR Chapter 60), and orders issued in connection therewith.

(d) Those listed by the Comptroller General in accordance with the provisions of 29 CFR 5.6(b) of the regulations of the Secretary of Labor as found by the Secretary of Labor to be in aggravated or willful violation of the prevailing wage or work hour provisions of the applicable statutes listed in 29 CFR 5.1.

(e) Those listed by the Director of the Office of Federal Contract Compliance on the Contract Ineligibility List because of noncompliance with the equal opportunity clause (41 CFR 60–1.3) or affirmative action clauses (41 CFR 60–250.4 and 60–741.4).

(f) Those persons debarred, suspended or voluntarily excluded by HUD in accordance with this part.

(g) Those determined by an Executive agency in accordance with section 3(b) of the Buy American Act (41 U.S.C. 10b(b)) to have failed to comply with the provisions of section 3(a) of that Act under a contract containing the specific provisions required by section 3(a) and made by the agency for the construction, alteration, or repair of any public building or public work.

§ 24.34 Effect of sanctions.

(a) *Consolidated list*—(1) *Debarred or suspended contractor.* Debarred or suspended contractors who are included on the Consolidated List are excluded from receiving contracts, and HUD shall not solicit offers from, award contracts to, or consent to subcontracts with, these contractors, unless the Secretary or designee determines in writing that there is a compelling reason for such action.

(2) *Contractors listed as ineligible.* Contractors listed on the Consolidated List as ineligible on the basis of statutory or other regulatory procedures are excluded from receiving contracts and, if applicable, subcontracts, under the conditions and for the period set forth in the statute or regulation. Agencies shall not solicit offers from, award contracts to, or consent to subcontracts with, these contractors except under the conditions and for the duration specified in the statute or regulation.

(b) *HUD List.* The Department may grant an exception permitting a debarred, suspended or excluded person to participate in a particular transaction upon a written determination by the agency head or authorized designee stating the reason(s) for deviating from the Presidential policy established by Executive Order 12549. However, the Order states that it is the President's intention that exceptions to this policy should be granted only infrequently

Exceptions shall be reported in accordance with § 24.31.

§ 24.35 Retroactivity.

Limitations on participation in HUD programs proposed or imposed prior to the effective date of these regulations under an ancillary procedure shall not be affected by this part. This part shall apply to sanctions initiated after the effective date of these regulations regardless of the date of the cause giving rise to the sanction.

Authority: Section 7(d) of the Department of HUD Act (42 U.S.C. 3535(d)).

Dated: August 21, 1987.

Samuel R. Pierce, Jr.,

Secretary.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 52, No. 192
Monday, October 5, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

7 CFR Part 736

[Amdt. No. 3]

Grain Warehouses; Definitions, Financial Requirements and Warehouse Bonds

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to amend the regulations at 7 CFR Part 736 relating to grain warehouses licensed under the United States Warehouse Act to: (1) Add definitions; (2) increase the total net asset requirements; (3) require warehousemen to have and maintain total current assets equal to or exceeding total current liabilities; (4) allow the Secretary to accept a letter of credit for a deficiency in total net assets above the minimum requirement; (5) permit a warehouseman to deposit with the Secretary for the protection of depositors, United States public debt obligations as security in lieu of a bond furnished by a corporate surety; (6) allow a waiver of the requirements for an individual financial statement from a warehouseman wholly-owned by another business entity which other entity is willing to furnish an acceptable financial statement and guarantee the storage obligations of the licensed warehouseman; (7) accept certain appraisals of real and personal property to supplement financial statements; and (8) provide for the acceptance of a continuous form of bond.

EFFECTIVE DATE: January 1, 1988.

FOR FURTHER INFORMATION CONTACT: R. Ford Lanterman, 202–475–4032.

SUPPLEMENTARY INFORMATION:

Rulemaking Matters

This final rule has been reviewed in conformity with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "non-major." This action does not constitute a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures.

Milton J. Hertz, Administrator, ASCS, has determined that this action is not a major rule since implementation will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local governments, or a geographic region; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S. based enterprises to compete with foreign-based enterprises in domestic or export markets.

The information collection requirements proposed by this rule will not become effective until they have been approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980. Such approval has been requested and is under consideration.

Comments concerning the information collection requirements contained in these rules may be addressed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer ASCS/USDA, Washington, DC 20503. Telephone (202) 395–7340.

Milton J. Hertz, Administrator, ASCS, has certified that this action will not have a significant economic impact on a substantial number of small entities because: (1) This action imposes only moderate economic costs on small entities; and (2) the use of the service is voluntary. Therefore, no regulatory flexibililty analysis was prepared.

This rule is not expected to have any significant impact on the quality of the human environment. In addition, this action will not adversely affect environmental factors such as wildlife habitat, water qualilty, or land use and appearance. Accordingly, neither an environmental assessment nor an environmental impact statement is required and none was prepared.

This action will not have a significant impact specifically upon area and community development, therefore review as established by Executive Order 12291 (February 17, 1981) was not used to assure that units of local government are informed of this action.

Background

The U.S. Warehouse Act [7 U.S.C. 241 *et seq.*] [the "Act"] provides that warehousemen who apply to the Secretary of Agriculture and who meet certain statutory and regulatory standards may be federally licensed. The primary objectives of the Act are to: (a) Protect producers and others who store their property in public warehouses; (b) assure the integrity of warehouse receipts as documents of title, thereby facilitating trading of agricultural commodities in interstate commerce; and (c) set and maintain a standard for sound warehouse operations.

The Department of Agriculture has sought to attain these objectives by: Research and development of basic standards for good warehousing practices; requiring original and continuing examinations of applicants and licensees; establishing financial and bonding requirements; and establishing licensing and regulatory requirements. Rules and regulations have been promulgated by the Department from time to time, under authority of section 7 U.S.C. 268.

Changes in the economy, governmental administrative policy, grain warehousing industry, and needs of grain warehousemen have necessitated continuous Departmental review of operations and requirements under the Act. A notice of proposed rulemaking was published by the Department on Monday, March 30, 1987 in the **Federal Register** at 52 FR 10104 requesting comments with respect to several proposed changes in the regulations for grain warehouses. The comment period ended on April 29, 1987.

Amendments were proposed which would (1) add definitions, (2) increase the net asset requirements for licensing and continuation of licensing, (3) accept deposit of United States Bonds, Treasury Notes or other public debt obligations in lieu of surety bonds and to accept a continuous form of surety bond, (4) permit acceptance of letters of credit for a deficiency in net assets above the minimum required, (5) accept financial statements of a parent entity for a wholly owned subsidiary under certain conditions, (6) accept appraisals

VOL
52
ISS
192
OC
5
1987
UMI

of land, building and equipment under specified conditions and (7) provide for a continuous license and bond.

Comments were received from five entities. One comment was from a large multi-state grain warehouseman expressing approval of all the proposed changes. The remainder of the comments were from trade associations. Three comments concerned the proposed use of letters of credit and stated that letters of credit are not recognized as insured deposits by the Federal Deposit Insurance Corporation (FDIC). One commentator also stated that the use of the term "unconditional" as used in the proposed regulation is incorrect.

Contrary to the opinion expressed however, letters of credit may be insured by the FDIC if they are the result of a deposit as opposed to a loan. The original intent of the proposed rule was to require that a letter of credit be backed by a deposit of funds and therefore be insured. The final rule is clarified.

One comment addressed the proposed change in the surety bond from a cumulative to a non-cumulative, continuous form. The comment agreed with the need to change this regulation but stated that the proposed bond language did not place the bond and the deposit of government securities on an equal basis. Therefore, the bond language has been clarified to define the surety's maximum and aggregate liability for any and all claims no matter how many years the bond remains in force.

Another trade association expressed approval of the proposal to accept Government Securities in lieu of a surety bond but requested that consideration be given to including the Government Securities as a net asset in the analysis of the financial statement. After due consideration it has been determined that these funds are committed, are not available as working capital and are only available for payment of any indebtedness in the case of failure by the warehouseman.

These securities may also be provided by a third party, therefore, they would not be available to the warehouseman. Generally accepted accounting principles also preclude their usage for the purpose of determining net assets. Accordingly, it has been determined that the bonding provisions of the proposed rule should be adopted. A comment also disagreed with the proposal to increase the net worth requirements. In view of the increasing losses being suffered by depositors in warehouse insolvencies, the Department has determined that the increase in net worth requirements is prudent for the protection of all depositors. The net asset requirements for Uniform Grain Storage Agreement Warehouses were increased on April 1, 1987, to 25 cents per bushel, $50,000 minimum with no maximum. Since most Federally licensed warehousemen are approved under the Uniform Grain Storage Agreement they are currently required to meet this requirement. Therefore, it has been determined that this provision of the proposed rule should be adopted as a final rule.

In review of the proposed rule, it was determined that the effect paragraph of the bond had been omitted. That paragraph has been reinstated in the final rule.

List of Subjects in 7 CFR Part 736

Definitions, Warehouse licenses, Financial requirements, Warehouse bonds.

Final Rule

Accordingly the regulations for grain warehouses, 7 CFR Part 736, are amended as follows:

PART 736—GRAIN WAREHOUSES

1. The authority citation for 7 CFR Part 736 continues to read as follows:

Authority: Sec. 28, 39 Stat. 490 (7 U.S.C. 268).

2. Section 736.2 is amended by adding paragraphs (w), (x), (y), and (z) as follows:

§ 736.2 Terms defined.

* * * * *

(w) *Net assets.* The difference remaining when liabilities are subtracted from allowable assets as determined by the Secretary after review of the warehouseman's financial statement. In determining total net assets, credit may be given for insurable property such as buildings, machinery, equipment, and merchandise inventory only to the extent that such property is protected by insurance against loss or damage by fire, lightning, and tornado. Such insurance shall be in the form of lawful insurance policies issued by insurance companies authorized to do such business and subject to service of process in suits brought in the State in which the warehouse is located.

(x) *Warehouse capacity.* Warehouse capacity is defined as the maximum number of bushels of grain that the warehouse could accommodate when stored in the manner customary to the grain for the warehouse, as determined by the Secretary.

(y) *Current assets.* Assets, including cash, that are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business or within one year if the operating cycle is shorter than one year.

(z) *Current liabilities.* Those financial obligations which are expected to be satisfied during the normal operating cycle of the business or within one year if the operating cycle is shorter than one year.

3. Section 736.6 is amended by revising paragraphs (d) and (f) and by adding a paragraph (i) to read as follows:

§ 736.6 Financial requirements.

* * * * *

(d) Each warehouseman conducting a warehouse which is licensed under the regulations in this part, or for which application for such a license has been made, shall have and maintain:

(1) Total net assets liable and available for the payment of any indebtedness arising from the conduct of the warehouse of at least 25 cents multiplied by the warehouse capacity in bushels, however, no person may be licensed or remain licensed as a warehouseman under this part unless that person has allowable net assets of at least $50,000. (Any deficiency in net assets above the $50,000 minimum may be supplied by an increase in the amount of the warehouseman's bond in accordance with § 736.14(c) of this part.); and

(2) Total current assets equal to or exceeding total current liabilities or assurance that funds will be available to meet current obligations.

* * * * *

(f) Subject to such terms and conditions as the Secretary may prescribe and for the purposes of determining allowable assets and liabilities under paragraphs (d) and (e) of this section:

(1) Capital stock shall not be considered a liability;

(2) Appraisals of the value of fixed assets in excess of the book value claimed in the financial statement submitted by warehousemen to conform with paragraphs (b) and (c) of this section may be allowed by the Secretary if prepared by independent appraisers acceptable to the Secretary;

(3) Financial statements of a parent company which separately identifies the financial position of a wholly owned subsidiary and which meets the requirements of paragraphs (b), (c), and (d) of this section may be accepted by the Secretary in lieu of the warehouseman meeting such requirements; and

(4) Guaranty agreements from a parent company submitted on behalf of a wholly owned subsidiary may be accepted by the Secretary as meeting the requirements of paragraphs (b), (c), and (d) of this section, if the parent company submits a financial statement which qualifies under this section.

* * * * *

(i) When a warehouseman files a bond in the form of either a deposit of public debt obligations of the United States or other obligations which are unconditionally guaranteed as to both interest and principal by the United States as provided for in § 736.13(c):

(1) The obligation deposited shall not be considered a part of the warehouseman's assets for purposes of § 736.6(d), (1) and (2);

(2) A deficiency in total allowable net and current assets as computed for § 736.6(d), (1) and (2) may be offset by the licensed warehouseman furnishing a corporate surety bond for the difference;

(3) The deposit may be replaced or continued in the required amount from year to year; and

(4) The deposit shall not be released until one year after termination (cancellation or revocation) of the license which it supports or until satisfaction of any claim against the deposit, whichever is later.

Nothing in these regulations shall prohibit a person other than the licensed warehouseman from furnishing such bond or additions thereto on behalf of and in the name of the licensed warehouseman subject to provisions of § 736.13(c).

* * * * *

§ 736.7 [Amended]

4. Section 736.7 is amended by changing "$25,000" to "$50,000."

5. Section 736.9(a) is amended by changing "$25,000" to "$50,000."

6. Section 736.13 is revised to read as follows:

§ 736.13 Bond required; time of filing.

Each warehouseman applying for a warehouse license under the Act shall, before such license is granted, file with the Secretary or his designated representative a bond either:

(a) In the form of a bond containing the following conditions and such other terms as the Secretary or his disignated representative may prescribe in the approved bond forms, with such changes as may be necessary to adapt the forms to the type of legal entity involved:

Now, therefore, if the said license(s) or any amendments thereto be granted and said principal, and its successors and assigns operating said warehouse(s), shall faithfully perform during the period of this bond all obligations of a licensed warehouseman under the terms of the Act and regulations thereunder relating to the above-named products;

Then this obligation shall be null and void and of no effect, otherwise to remain in full force. For purposes of this bond, the aforesaid obligations under the Act and regulations and contracts include obligations under any and all modifications of the Act, the regulations, and the contracts that may hereafter be made, notice of which modifications to the surety being hereby waived.

This obligation shall be and remain in full force and effect for a minimum of one year beginning with the effective date and shall be considered a continuous bond thereafter until terminated as herein provided. The total liability of the surety is limited to the penal amount hereof, for liabilities that accure during the term hereof.

This obligation shall be and remain in full force and effect from date of issue until one hundred twenty (120) days after notice in writing of cancellation shall have been received by the Secretary from the principal or surety. If said notice shall be given by the surety, a copy thereof shall be mailed on the same day to the principal. Cancellation of this bond and cancellation of any of its provisions shall not affect any liability accrued thereon at the time of said notice or which may accrue thereon during the one hundred twenty (120) days after such notice.

A bond in this form shall be subject to 7 CFR 736.6, and 736.14 through 736.17, and 31 CFR Part 225, or (b) In the form of a certificate of participation in and coverage by an indemnity or insurance fund as approved by the Secretary, established and maintained by a State, backed by the full faith and credit of the applicable State, and which guarantees depositors of the licensed warehouse full indemnification for the breach of any obligation of the licensed warehouseman under the terms of the Act and regulations. A certificate of participation and coverage in such fund shall be furnished to the Secretary annually. If administration or application of the fund shall change after being approved by the Secretary, the Secretary may revoke his approval. Such revocation shall not affect a depositor's rights which have arisen prior to such revocation. Upon such revocation the licensed warehouseman then must comply with paragraph (a). Such certificate of participation shall not be subject to §§ 736.14 and 736.15, or

(c) In the form of a deposit with the Secretary as security, United States, bonds, Treasury notes, or other public debt obligations of the United States or obligations which are unconditionally guaranteed as to both interest and principal by the United States, in a sum equal at their par value to the amount of the penal bond required to be furnished, together with an irrevocable power of attorney and agreement in the form prescribed, authorizing the Secretary to collect or sell, assign and transfer such bonds or notes so deposited in case of any default in the performance of any of the conditions or stipulations of such penal bond. Obligations posted in accordance with this paragraph may not be withdrawn by the warehouseman until one year after license termination or until satisfaction of any claims against the obligations whichever is later. A bond in this form shall be subject to 7 CFR 736.6 and 736.14 through 736.17 and 31 CFR Part 225.

7. Section 736.14 is amended by revising paragraph (c) to read as follows:

§ 736.14 Amount of bond; additional amounts.

* * * * *

(c) In case of a deficiency in net assets above the $50,000 minimum required under § 736.6(d), (1), there shall be added to the amount of bond determined in accordance with paragraph (a) of this section an amount equal to such deficiency or a letter of credit in the amount of the deficiency issued to the Secretary for a period of not less than two years to coincide with the period of any deposit of obligation under 7 CFR 736.13(c). Any letter of credit must be clean, irrevocable, issued by a commerical bank, payable to the Secretary by sight draft and insured as a deposit by the Federal Deposit Insurance Corporation. If the Secretary, or his designated representative, finds that conditions exist which warrant requiring additional bond, there shall be added to the amount of bond as determined under the other provisions of this section, a further amount to meet such conditions.

8. Section 736.16 is revised to read as follows:

§ 736.16 New bond required each year.

A continuous form of license shall remain in force for more than one year from its effective date or any subsequent extension thereof, provided that the warehouseman has on file with the Secretary a bond meeting the terms and conditions as outlined in 7 CFR 736.13. Such bond must be in the amount required by the Secretary and approved by him or his designated representative. Failure to provide or renew a bond shall result in immediate and automatic termination of the warehouseman's license.

7 CFR Part 910

[Lemon Regulation 581]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 581 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 265,000 cartons during the period October 4 through October 10, 1987. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 581 (§ 910.881) is effective for the period October 4 through October 10, 1987.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (REA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act", 7 U.S.C. 601 through 674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987-88. The committee met publicly on September 29, 1987, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended by a unanimous vote a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market is good for large sized lemons, poor for smaller sizes.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 910.881 is added to read as follows:

§ 910.881 Lemon regulation 581.

The quantity of lemons grown in California and Arizona which may be handled during the period October 4 through October 10, 1987, is established at 265,000 cartons.

Dated: September 30, 1987.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

7 CFR Part 920

Kiwifruit Grown in California; Changes in Quality and Reporting Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action, unanimously recommended by the California Kiwifruit Administrative Committee (the committee), tightens the minimum quality requirements for kiwifruit to provide better quality fruit to the marketplace and help improve sales and returns to growers. Export markets are particularly sensitive to lower quality fruit. In order to facilitate compliance with order provisions this action requires handlers to inform the committee whenever fruit is returned to growers. The committee needs to be able to identify sources of cull fruit to prevent its being sold in established markets. These actions are not expected to short the market, as ample supplies of good quality. Kiwifruit are expected to be available from the 1987 crop to meet market needs. The committee works with the USDA in administering the marketing order program for California kiwifruit.

EFFECTIVE DATE: October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V Division, AMS, USDA, P.O. Box 96458, Room 2523-S, Washington, DC 20090-6456; telephone 202-447-5697.

SUPPLEMENTARY INFORMATION: This rule is issued under Order No. 920 (7 CFR Part 920), regulating the handling of kiwifruit grown in California.

This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), hereinafter referred to as the Act.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507,) the information collection requirements included in this rule were submitted for approval to the Office of Management and Budget (OMB). The requirements

have been approved by OMB and assigned OMB No. 0581–0149.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 65 handlers of kiwifruit subject to regulation under the California kiwifruit marketing order and approximately 1,100 producers in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The great majority of these handlers and producers may be classified as small entities.

California kiwifruit are grown throughout the entire State of California. Kiwifruit shipments in 1986–87 totaled 6,525,000 trays and tray equivalents. Shipments in 1987–88 are expected to be 10 to 20 percent greater. Most of the crop is marketed fresh.

A proposed rule inviting comments on this action was published in the August 3, 1987, **Federal Register** (52 FR 28725). Interested persons were given until August 18, 1987, to file written comments. One comment, endorsing the proposal and urging its swift approval, was received from the committee.

The regulatory action in this instance will up-grade the quality requirements for kiwifruit and develop a way for the committee to gather information on the movement of fruit within the production area. Current quality requirements specify that California kiwifruit must grade at least 85 percent U.S. No. 2 provided that no more than 8 percent be allowed for defects other than badly misshapen fruit. Under the standards for U.S. No. 2 fruit, such defects may constitute "serious damage." U.S. No. 2 fruit must contain at least 6.5 percent soluble solids, unless otherwise specified. Since, under current regulations, kiwifruit must grade at least 85 percent U.S. No. 2, badly misshapen fruit is limited to 15 percent. Included in the 8 percent allowed for serious damage defects under the standards for U.S. No. 2 fruit is not more than 4 percent for sunscald, insects, internal breakdown or decay, and in this latter amount not more than 1 percent for fruit affected by internal breakdown or decay.

Export markets demand high quality fruit, although lower grade shape requirements are acceptable. However, the existing tolerances for defects have led to problems involving the breakdown of fruit both in storage and during shipment to export markets. This has caused some domestic marketing problems and aggravated the existing image problem for California kiwifruit in certain countries, notably Japan. This action will require that a lot of kiwifruit contain not more than 8 percent defects causing "damage" other than shape, and will result in requiring U.S. No. 1 grade fruit except for the shape requirement which will continue to be that specified for U.S. No. 2 grade. This is because, under the grading standards, No. 2 grade allows for "serious damage". Since the U.S. No. 2 shape requirements have not been a problem in domestic and export markets, tightening the grade requirements for shape to U.S. No. 1 is not necessary at this time. Tightening the requirements to permit only those defects causing damage will serve to help provide better quality fruit and thus enhance the image of California kiwifruit. This will tend to increase domestic and export sales, thus helping growers to move their crop at a profit.

This action also establishes a committee recommendation to require a mandatory 6.5 percent soluble solids content. The current grading standards require 6.5 percent "unless otherwise specified." Fruit harvested when the sugar (soluble solids) content is below 6.5 percent indicates a less mature product, and the fruit may not ripen properly. Because some packers are harvesting and packing fruit below the 6.5 percent level, the committee believes this action is necessary to maintain a high quality product. Requiring a 6.5 percent soluble solids content in kiwifruit will assure a sweet, mature product that should prompt repeat sales by consumers.

The committee also recommended that a form be sent to the committee office by handlers returning fruit to their growers. This will enable the committee to gather information on the movement of cull fruit in the production area.

The committee believes that peddlers of cull fruit are buying the culls and selling them in established markets. This is a very disruptive practice that adversely affects the markets for all kiwifruit. When cull fruit is sold in established markets, it puts downward pressure on growers prices for all fruit, including that of good quality, and tends to bring about disorderly maketing conditions. Requiring handlers to report returned fruit should help compliance by pinpointing potential sources of cull fruit entering established markets. The necessary information will be minimal and will be recorded on a new committee form. The total time required to fill out the form should not exceed five minutes per form.

Although this action will upgrade the quality and increase the reporting requirements for kiwifruit shipped from the production area, regulatory exemptions will continue in effect. For example, any handler may handle, other than for resale, up to, but not to exceed 200 pounds net weight of kiwifruit per day without regard to the requirements of the handling regulation. In addition, shipments for charity, relief, and commercial processing are exempt from the grade, size, container, and inspection requirements of the order and the handling regulation. Reporting provisions of the handling regulation apply to such shipments.

The actual cost to handlers for complying with these changes cannot be precisely determined, but it is expected to be minimal. On the other hand, the increased returns expected from both domestic and export sales of better quality kiwifruit and better compliance controls on cull fruit movement should more than offset the anticipated slight increase in handler costs in meeting the requirements. On the basis of the foregoing, the impact of these changes on growers and handlers is expected to be beneficial, and the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

Therefore, after consideration of the information and recommendation submitted by the committee, the information in the proposal, and other information, it is hereby found and determined that this action, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The harvest, packing, grading, and shipping

VOL

UMI

of the 1987 crop is expected to start in early October, and it is important that this action be effective as soon as possible; (2) this action is based upon the unanimous recommendation of the committee at a public meeting; (3) the provisions in this final rule are the same as those contained in the proposal (except for a minor clarification) which was published in the **Federal Register** on August 3, 1987; and (4) handlers are prepared to conduct their operations in accordance with this rule and do not require any additional time for preparation.

List of Subjects in 7 CFR Part 920

Marketing agreements and orders, Kiwifruit, California.

For the reasons set forth in the preamble, 7 CFR Part 920 is amended as follows:

PART 920—KIWIFRUIT GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 920 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 920.302 is amended by revising paragraph (a)(1); redesignation (a)(4) as (a)(5), redesignating (a)(3) as (a)(4), and adding a new (a)(3) to read as follows:

§ 920.302 Grade, size, pack, and container regulations.

(a) * * *

(1) *Grade requirements.* Fresh shipments of kiwifruit shall grade at least 85 percent U.S. No. 2: *Provided,* That not more than 8 percent shall be allowed for defects other than shape causing damage, including not more than 4 percent for defects other than shape causing serious damage, and including in this latter amount not more than 1 percent shall be allowed for fruit affected by internal breakdown or decay.

* * * * *

(3) *Maturity requirements.* Such kiwifruit shall have a minimum of 6.5 percent soluble solids at the time of inspection.

* * * * *

3. Section 920.160 is amended by adding a new § 920.160(c) as follows:

§ 920.160 Reports.

* * * * *

(c) *Handler report of returned fruit.* After fruit is returned to a grower, each handler shall file with the committee, no later than five days from the date the fruit is returned, or such other time as the committee may establish, a Return Receipt of Kiwifruit to Grower Form.

Dated: September 30, 1987.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

7 CFR Part 967

Celery Grown in Florida; Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of Florida celery which handlers may market fresh during the 1987–88 season at 6,789,738 crates or 100 percent of producers' Base Quantities. The action is intended to provide consumers with adequate supplies and lend stability to the industry.

EFFECTIVE DATES: August 1, 1987, through July 31, 1988.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: 202/447–5697 .

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601 through 674), as amended, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that seven handlers of celery under the marketing order for Florida celery will be subject to regulation during the course of the current season. There are 13 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2 (1985)) as those having average annual gross revenues for the last three years of less than $100,000, and small agricultural service firms have been defined as those whose gross annual receipts are less than $3,500,000. Some handlers and producers of Florida celery may be classified as small entities.

The final rule limits the quantity of Florida celery which handlers may purchase from producers and ship to fresh markets during the 1987–88 season to 6,789,738 crates. This Marketable Quantity is about 18 percent more than the approximately 5.75 million crates expected to be marketed fresh during the 1986–87 season and about 25 percent more than the average number of crates marketed fresh during the 1981–82 through 1985–86 seasons. It is expected that the 6,789,738-crate Marketable Quantity will be above actual production and shipments for the 1987–88 season. Thus, the 6,789,738-crate Marketable Quantity is not expected to restrict the amount of Florida celery which growers produce or the amount of celery which handlers ship.

Based on the above, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Notice of this action was published in the **Federal Register** on July 20, 1987 (FR 52 27205). Written comments were invited until August 19, 1987. None were received.

This final rule is issued under Marketing Agreement No. 149 and Marketing Order No. 967, both as amended, regulating the handling of celery grown in Florida. The marketing agreement and order are effective under the Act. The action is based upon the recommendation and information submitted by the Florida Celery Committee and upon other available information.

The committee met on May 20, 1987, and recommended a Marketable Quantity of 6,789,738 crates of fresh celery for the 1987–88 marketing year beginning August 1, 1987. Additionally, a Uniform Percentage of 100 percent was recommended which would allow each producer registered pursuant to § 967.37(f) of the order to market 100 percent of such producer's Base Quantity. These recommendations were based on an appraisal of expected supply and prospective market demand.

This recommendation encourages Florida celery growers to assume the risks of planting celery by placing a ceiling on the amount of Florida celery which may be shipped to fresh markets and helps to provide consumers with an adequate supply. However, as in past seasons, the limitation on the quantity of

Florida celery handled for fresh shipment is not expected to restrict the quantity of Florida celery actually produced or shipped to fresh markets, since production and shipments are anticipated to be less than the allotment.

As required by § 967.37(d)(1) of the order, a reserve of 6 percent of the 1986–87 total Base Quantities is authorized for new producers and for increases by existing producers for the 1987–88 season. However, there were no applications for new or additional base submitted for the 1987–88 season.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is found that the rule as hereinafter set forth will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is hereby found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This action applies to all Florida celery handled by handlers during the 1987–88 crop year, which began August 1, 1987, and (2) handlers are aware of this action, which was recommended by the Committee at a public meeting, and need no additional time to comply with the requirements.

List of Subjects in 7 CFR Part 967

Marketing agreements and orders, Celery, Florida.

For the reasons set forth in the preamble, 7 CFR Part 967 is amended as follows:

PART 967—CELERY GROWN IN FLORIDA

1. The authority citation for 7 CFR Part 967 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Subpart—Rules and Regulations

2. Add a new § 967.323 under Subpart—Rules and Regulations to read as follows:

§ 967.323 Handling regulation, Marketable Quantity, and Uniform Percentage for the 1987–88 season beginning August 1, 1987.

(a) The Marketable Quantity established under § 967.36(a) is 6,789,738 crates of celery.

(b) As provided in § 967.38(a), the Uniform Percentage shall be 100 percent.

(c) Pursuant to § 967.36(b), no handler shall handle any harvested celery unless it is within the Marketable Allotment of a producer who has a Base Quantity and such producer authorizes the first handler thereof to handle it.

(d) As required by § 967.37(d)(1) a reserve of 6 percent of the total Base Quantities is hereby authorized for:

(1) New producers and

(2) Increases for existing Base Quantity holders.

(e) Terms used herein shall have the same meaning as when used in the said marketing agreement and order.

Dated: September 30, 1987.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

FARM CREDIT ADMINISTRATION

12 CFR Part 624

Farm Credit System Regulatory Accounting Practices; Temporary Regulations

AGENCY: Farm Credit Administration.

ACTION: Final rule with request for comments.

SUMMARY: The Farm Credit Administration (FCA), by the FCA Board, adopts a final regulation relating to the retirement of stock of Farm Credit System (System) institutions operating under regulatory accounting practices (RAP). The final regulation prohibits a System institution from retiring stock or participation certificates in accordance with RAP when the net worth of such institution reaches zero in accordance with generally accepted accounting principles (GAAP) and/or, in the case of a System bank, when that bank is unable to meet its statutory and regulatory requirements to have sufficient collateral on hand at the time of issuance of any consolidated or Systemwide securities in the national money markets.

DATES: The final regulation was effective September 22, 1987. Written comments must be received on or before November 2, 1987.

ADDRESS: Submit comments on the final regulation in writing (in triplicate) to Anne E. Dewey, Acting General Counsel, Farm Credit Administration, McLean, VA 22102–5090. Copies of all communications received will be available for examination by interested parties in the Office of the General Counsel, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT: John Barkell, Assistant Chief, Financial Analysis and Standards Division, Farm Credit Administration, 1501 Farm Credit Drive, McLean, VA 22102–5090, (703) 883–4495.

SUPPLEMENTARY INFORMATION: At a special meeting on September 22, 1987, the FCA Board adopted an amendment to the FCA regulations implementing the Farm Credit Act Amendments of 1986 (1986 Amendments), Pub. L. 99–509, relating to the use of RAP by System institutions and the reporting and disclosure requirements in accordance with RAP.

The RAP regulations were published in the **Federal Register** on December 24, 1986 (51 FR 46597), and amended on January 26, 1987 (52 FR 2670). The public was given until February 24, 1987, to submit comments on the regulations. A public hearing on the regulations was held at FCA offices in McLean, Virginia on February 27, 1987. The FCA Board responded to one matter raised by the comments relating to use of RAP by Federal land bank associations (FLBA) and adopted an amendment to the RAP regulations at its special meeting on April 17, 1987. The amendment was published in the **Federal Register** on April 23, 1987 (52 FR 13428). The FCA is in the process of reviewing the remainder of the comments and will act on and publish responses to those comments shortly. Due to the financial condition of certain System institutions, the FCA Board at its special meeting of September 22, 1987, concluded that it must take immediate action relating to the retirement of stock and participation certificates by institutions using RAP.

The current RAP regulations authorize System banks and production credit associations (PCAs) to use RAP to amortize a portion of their provisions for loan losses and banks to amortize a portion of their interest costs over a period not to exceed 20 years, provided the institutions meet the conditions set forth in the regulations. The existing regulation authorizes System banks and PCAs which have stock and participation certificates with a book value less than par or face amount in accordance with GAAP to retire such equities at par or face amount as long as the book value is equal to our greater than par or face amount in accordance with RAP and other regulatory criteria are satisfied. 12 CFR 624.105. In addition, if a Federal land bank (FLB) is retiring its stock at par in accordance with RAP, the FLBAs which own the FLB may use RAP to value their investment in the FLB as necessary to maintain the book value of the FLBA's stock or participation certificates at par or face amount. 12 CFR 624.104.

Generally, a financially deteriorating System bank would exhaust its collateral available for supporting the issuance of consolidated or Systemwide

obligations and be precluded from issuing securities in the national money markets before its net worth reached zero under GAAP or through the use of RAP. However, several System banks have recently adopted collateral sharing agreements which enable them to continue to issue securities in the national money markets and to continue operations, including retiring borrower stock and participation certificates in the normal course of business. Because a bank may continue issuing securities based on collateral transferred from other banks under such agreements, it is possible for an institution to reach the point of operating with zero or less net worth under GAAP and have positive net worth under RAP. This condition and the financial condition of certain System institutions requires that the FCA must now consider whether an institution should be permitted to continue to retire stock or participation certificates when its net worth reaches zero under GAAP. To address this issue, the FCA Board amends the regulation at 12 CFR 624.105 relating to stock retirement to make clear that an institution may not use RAP to retire stock or participation certificates at par or face amount when its net worth reaches zero in accordance with GAAP.

The primary purpose of RAP was to enable a System institution to spread its high financing costs and/or loan losses over a longer period (up to 20 years) in order to give the institution time to correct its financial problems. By amortizing these costs, the institution would be paying for part of these costs from future earnings. However, in order for an institution to accomplish this process successfully it must operate in a manner that preserves its viability in order to achieve those future earnings.

The FCA Board determined that retiring stock or participation certificates when an institution reaches zero net worth under GAAP threatens the viability of that and other System institutions, constitutes an unsafe and unsound practice, and is a result not intended by the 1986 Amendments. The FCA Board reasoned that if an institution continues to dissipate its assets through stock retirement when its net worth has reached zero under GAAP, that action increases the likelihood that the institution will not be able to meet its obligations as they become due and increases the need for the institution to call on other System institutions under loss-sharing arrangements or statutory provisions to meet such obligations. The eventual consequences could have a negative impact on the ability of the System as a whole to continue to obtain funds in the national money markets.

The FCA Board concluded that the 1986 Amendments did not intend to authorize the use of RAP by System institutions in a manner that may endanger the financial viability of the institution. H.R. Rep. No. 967, 99th Cong., 2d Sess. 6–8 (1986). The 1986 Amendments did not alter an institution's responsibility to conduct operations in a safe and sound manner nor authorize the use of RAP to the detriment of the institution's viability. Congress made clear that System institutions should follow GAAP and only use RAP for a limited period to lessen the impact of high borrowing costs and loan losses. Id. at 6–8. The FCA must continue to take appropriate regulatory and enforcement actions to insure that an institution does not use RAP in a manner that threatens the institution's financial viability. H.R. Rep. No. 1012, 99th Cong., 2d Sess. 230 (1986).

The amendment is issued with an immediate effective date. Because of the financial condition of certain System institutions, the FCA Board has determined that the Board must take immediate action.

Therefore, for good cause and in accordance with 5 U.S.C. 553 (b) and (d), prior public comment and a delay in the effective date are impracticable, unnecessary, and contrary to the public interest. For the same reasons, the FCA Board has determined, in accordance with 12 U.S.C. 2252(b), that an emergency exists that justifies publication of this amendment to the regulations without prior review by the appropriate congressional committees. As noted above, the public will have 30 days to submit written comments to the FCA after publication of the final regulation.

List of Subjects in 12 CFR Part 624

Accounting, Agricultural, Banks, Banking, Credit, Rural areas.

As stated in the preamble, Chapter VI, Title 12, Code of Federal Regulations is amended as follows:

PART 624—[AMENDED]

1. The authority citation for Part 624 continues to read as follows:

Authority: 12 U.S.C. 2001, 2014, 2073, 2093, 2122, 2159, 2205, 2254, Pub. L. 99–509.

2. Section 624.105 is amended by adding the following to the end of the section to read as follows:

§ 624.105 Retirement of equities.

* * * * *

Notwithstanding the provisions of paragraph (a) or (b), an institution shall cease retirement of stock and participation certificates when the net worth of the institution is zero or less as determined in accordance with GAAP. In addition to the requirements of the preceding sentence, a System bank shall cease such equity retirements when the bank is unable to meet statutory collateral requirements established in section 4.3(c) of the Act and regulatory requirements of Part 615, Subpart B—Collateral.

David A. Hall,

Secretary, Farm Credit Administration Board.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 113

[T.D. 87–124]

Customs Regulations Amendment Relating to Carrier Liabilities for Unlawful Lading, Exportation or Disposition of Export-Controlled Merchandise

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to provide for the assessment of liquidated damages under the international carrier's bond for unlawfully lading, exporting, or disposing of merchandise which is subject to the export control laws. Under the new bond provision, Customs would demand the redelivery of merchandise which has been seized or detained for violations of export control laws. Customs woud also demand the redelivery of merchandise where reasonable cause exists to believe it was exported in violation of the export control laws, but which is still in the carrier's possession on the date of the demand for redelivery. Failure to comply with these demands would result in the assessment of liquidated damages in an amount equal to three times the value of the merchandise that is not redelivered. This amendment is necessary for more effective enforcement of the export control laws.

EFFECTIVE DATE: November 4, 1987.

Carriers Drawback and Bonds Division (202–566–5856).

SUPPLEMENTARY INFORMATION:

Background

The Export Administration Regulations continued in title 15, Code of Federal Regulations, Parts 368 through 399 (15 CFR Parts 368 through 399), and the International Traffic in Arms Regulations found in Title 22, Code of Federal Regulations, Parts 120 through 130 (22 CFR Parts 120 through 130), provide for sanctions in the event that export-controlled merchandise is exported or attempted to be exported without a valid license issued by either the Department of Commerce or the Department of State. Among these sanctions are the issuance of monetary penalties against those responsible for the illegal attempted or completed exportation, seizure and forfeiture of the merchandise involved, and subsequent denial of export privileges. In addition, Title 22, United States Code, section 401 (22 U.S.C. 401), provides for the seizure and detention of any vessel, vehicle or aircraft which has been or is being used in exporting or attempting to export munitions of war or other export-controlled merchandise. Also, Title 18, United States Code, section 549 (18 U.S.C. 549), provides for ciminal penalties for unlawfully removing any merchandise from Customs custody.

Customs has been delegated the authority to enforce the Export Administration Regulations and the International Traffic in Arms Regulations pursuant to 15 CFR 386.8 and 22 CFR 127.4, respectively. Under this authority Customs may demand, pursuant to 15 CFR 386.9, the redelivery or retention of merchandise which is known or suspected to be in violation of the export control regulations.

Customs also has the authority to enforce the export control regulations by virtue of the authority granted the Secretary of the Treasury, pursuant to 22 U.S.C. 401, to seize and forfeit illegal exportations of war materials and other articles, as well as the conveyances used to export the articles. Also, under section 113 of the Export Administration Amendments Act of 1985 (Pub. L. 99–64), effective July 12, 1985, Customs was given additional authority to enforce the export control regulations.

Customs has been enforcing the export control laws and regulations under its Operation Exodus program. During the past two years, however, Customs has become aware that some carriers are exporting detained or seized merchandise, despite the presence of warning labels on the merchandise indicating that it is under Customs seizure or detention, and despite notification to the carrier management of the detention or seizure. There have also been instances where carriers have not complied with Customs demand to redeliver or retain already exported merchandise subsequently found or suspected to be in violation of the export control laws, even though it is still in the carriers' possession.

Although the carriers' action may subject the conveyance to seizure and forfeiture under 22 U.S.C. 401 for its use in the illegal exportation, Customs views this as a drastic remedy which would entail much time and resources expended in effecting the seizure. Instead, it is believed that seeking liquidated damages under the international carrier's bond for exportations in violation of the export control laws would be more expeditious, effective, and less of a drain upon Customs resources. Also, this sanction is within Customs control and can be used for every transgression, whereas a seizure action would require the U.S. Attorney to institute legal proceedings, which is very time-consuming.

The provisions of the international carrier's bond are contained in § 113.64, Customs Regulations (19 CFR 113.64). In § 113.64, however, there is no existing provision setting forth liquidated damages for illegal exportations of export-controlled merchandise. Customs has the authority to enact such a provision by virtue of section 623(a), Tariff Act of 1930, as amended (19 U.S.C. 1623(a)), which provides that "In any case in which bond or other security is not specifically required by law, the Secretary of the Treasury may by regulation or specific instruction require, or authorize customs officers to require, such bonds or other security as he, or they, may deem necessary for the protection of the revenue or to assure compliance with any provision of law, regulation, or instruction which the Secretary of the Treasury or the Customs Service may be authorized to enforce." Pursuant to 15 CFR 386.8 and 22 CFR 127.4, Customs is authorized to enforce the export control laws and regulations. Under the authority of 19 U.S.C. 1623(a), Customs may therefore require a bond to assure compliance with these laws and regulations.

In response to this situation Customs published a notice in the **Federal Register** on May 22, 1986 (51 FR 18801), proposing to amend Part 113, Customs Regulations (19 CFR Part 113), by adding a provision to the international carrier's bond that would provide for the assessment of liquidated damages for illegal exportations under the export control laws. This would be accomplished by adding a paragraph to § 113.64 that would require the carrier to redeliver to Customs, within 30 days after a demand for redelivery: (1) Illegally disposed of, laded or exported merchandise that has been placed under seizure or detention; and/or (2) merchandise which has been exported and is subsequently found or suspected to be in violation of the export control laws, but which is still in the carrier's possession. Under the proposal, demand for redelivery would be made within 20 days of Customs discovery of the unlawful or suspected unlawful disposition or exportation. Any demand under this proposed paragraph would specify the terms and conditions of compliance. If the carrier fails to comply with the redelivery notice, it would be liable for liquidated damages in an amount equal to three times the value of the merchandise that is not redelivered.

Discussion of Comments

A discussion of the comments received in response to the proposal follows:

Comment: A demand for redelivery issued 20 days after discovery of export control law violations would be received by the carrier after the merchandise had left its possession. Also, the carrier would have difficulty redelivering merchandise within 30 days because of distances to be covered or possibly because of conflicting laws in a foreign country.

Response: We agree that the 20-day period in which Customs would notify the carrier to redeliver the merchandise is too long and could result in notification to the carrier after the merchandise has been released into the foreign commerce. The final rule has been modified to allow only a 10-day period in which Customs must issue the demand for redelivery. This 10-day period is necessary for Customs to investigate the matter to determine whether an export violation has occurred and that a notice of redelivery should be issued.

With respect to the comments opposing the 30-day redelivery period as insufficient to allow for the redelivery in many cases, we note that, as in other violations in which redelivery is ordered, the district director may grant an extension of the redelivery period upon the petitioner's request if warranted. In most cases, however, we believe the 30-day period is sufficient to allow for redelivery.

As to the comments noting that in certain cases timely redelivery may not be possible due to foreign or

VOL 52 ISS 192 OCT 5 1987 UMI

international laws which prevent the removal of the merchandise from the carrier or from the foreign jurisdiction, we note that in this situation the petitioner would have to satisfy Customs that the failure to redeliver was beyond its control. This would be a factor Customs would consider in deciding whether to grant relief from a liquidated damages claim.

Comment: Allowing Customs to order redelivery of merchandise that "may have been" exported in violation of export control laws is too lenient a standard and may result in redelivery of merchandise exported legally.

Response: Because of these comments, proposed § 113.64(e)(2) has been modified to make the basis of a demand for redelivery a reasonable cause to believe that the export control laws have been violated. That will clarify the limits of Customs authority and will bring the regulation into conformity with 15 CFR 386.9(b) and with general customs law.

Comment: This proposal would impose burdens on carriers without statutory authority.

Response: We disagree. As stated in the preamble to this document, 19 U.S.C. 1623(a) provides that "In any case in which bond or other security is not specifically required by law, the Secretary of the Treasury may by regulation, or specific instruction require, or authorize customs officers to require, such bonds or other security as he, or they, may deem necessary for the protection of the revenue or to assure compliance with any provision of law, regulation, or instruction which the Secretary of the Treasury or the Customs Service may be authorized to enforce." The Secretary of the Treasury and Customs have been authorized to enforce the export control laws and regulations pursuant to 22 U.S.C. 401. Included among the Export Administration Regulations which Customs is authorized to enforce is 15 CFR 386.9, which provides for the return or unloading and holding of merchandise where there is reasonable ground to believe that a violation has occurred or will occur. Customs may therefore institute a bonding program to assure compliance with this regulation as well as to protect its forfeiture under 22 U.S.C. 401.

Comment: This amendment is unnecessary because illegal exportation of export-controlled merchandise is not a problem. If the problem does exist, it is because Customs allows seized merchandise to remain on the carrier's premises.

Response: Customs officers have determined that the problem is prevalent among air carriers in the New York and Los Angeles areas and that instances have occurred at other ports. The frequency of occurrences is apparently increasing.

Merchandise is left at the carrier's premises to avoid the costs and delay that removing it to Customs seizure facilities would entail. Seized export-controlled merchandise is frequently released upon the obtaining of a proper license and payment of an amount demanded in mitigation of the forfeiture. Movement of the merchandise after release is both easier and quicker if the merchandise has not been removed to a Customs seizure facility. The costs of the seizure to the shipper are also likely to be less.

Comment: Requiring a carrier to redeliver merchandise will force it to use space on its conveyance that otherwise could have been used to transport something for a paying customer. This lost business amounts to an unconstitutional taking of property from the carrier without compensation. This is particularly onerous where there may be no fault on the carrier's part for the export control law violation.

Response: Loss of profits which may result from a carrier using space on a conveyance to redeliver merchandise is not a "taking of property" as that term is used in constitutional law. (See *Briggs & Stratton Corp. v. Baldrige*, 539 F. Supp. 1307 (1982), where a taking argument under the Export Administration Act was rejected by the court on the grounds that a loss of profits unaccompanied by any physical restriction on property is not a taking). Assuming arguendo that expectation of profits from the operation of a conveyance is property, requiring a carrier to redeliver merchandise is not a taking of that property. As to the argument that requiring a carrier to redeliver merchandise is unfair when the carrier is not at fault, Customs cannot allow any party to an export control law violation to relieve itself of liability by claiming it was not its responsibility to see that laws were upheld. To accept such a claim would make enforcement impossible. Carriers can conduct their business relationships in such a way as to reduce the chance of participating in an export control law violation, and we do not believe it is unfair to expect them to do so.

Comment: The proposed rule should not be aimed at carriers because it is not the carrier that is responsible for obtaining export licensing or for giving an accurate shipper's export declaration.

Response: We do not believe that export control laws are confined to regulating the shipper. Carriers are also subject to the statutory and regulatory schemes in place; i.e.: 22 U.S.C. 401 which provides for the forfeiture of transporting conveyances and 15 CFR 386.8 which provides for the search, seizure and unloading of conveyances and for the return by the carrier of shipments that have been exported despite notice that an inspection is to be made. Likewise, 15 CFR 386.9 provides for the redelivery of merchandise by an exporting carrier or any person in possession or control of the merchandise when there exist reasonable grounds to believe that a violation of the Export Administration Regulations has occurred or will occur. These provisions are not gratuitous. Carriers are as legitimate a target of export control enforcement as shippers of the merchandise.

Comment: Carriers may not be adequately warned of seized merchandise if notice of the seizure is limited to labels on the merchandise.

Response: In addition to placing seizure labels on the violative merchandise, Customs notifies the carrier management that the merchandise is under seizure and may not be removed from the carrier. This notification is most often telephonic, given the fact that time is of the essence in many of these cases since the carrier may depart at any point. We believe that the notification provided the carriers is appropriate.

It also should be noted that the notification to the carrier provided by Customs is, in most cases, in addition to the notification the carrier receives from the exporter of record. Customs notifies the carrier as an added precaution against its removal of the merchandise under seizure or detention. Thus, in most cases the carrier receives ample notification of the seizure or detention.

Comment: The liquidated damages provision is in essence a penalty and should be treated as such. The primary function of a customs bond is to protect the revenue, and liquidated damages serve no punitive or deterrent effect. Also, there are other Customs Regulations available for amendment to correct any perceived problems with violations of export control laws.

Response: We disagree that the liquidated damages provision in the carrier's bond is in essence a penalty and that liquidated damages are intended to protect the revenue only, rather than serving a deterrent effect. The carrier's bond is a contract between the carrier and the Customs. As with any other contract, damages will result for any violation of the contract. The damages set under the contract are

designed to both ensure compliance with its terms and to compensate the aggrieved party for any violation. The amendment to the carrier's bond providing for liquidated damages for violations concerning export-controlled merchandise accomplishes both of these objectives.

We also disagree with the comment that it would be more appropriate to amend Parts 4, 18 and 113, Customs Regulations, rather than the carrier's bond to ensure the carrier's compliance with the export control laws. It is administratively easier for Customs to have the new liquidated damages provision in one place—the bond—rather than to amend different Customs Regulations to provide for the same thing. Also having the provision in the bond itself would enhance enforcement efforts since it makes compliance with the export control regulations by the carrier a condition of the bond and therefore enforceable under the bond contract without having to resort to Customs or other agencies' regulations. Furthermore, it should be noted that Parts 4 and 18, Customs Regulations, for the most part concern importations into the U.S. It would be confusing to include this one provision dealing with exportations in these regulations.

Amending the international carrier's bond is also easier for the carriers since, to understand their obligations with respect to export-controlled merchandise, they would have to refer only to the provisions of their own bond, rather than to an agency's regulations.

Comment: Liquidated damages in an amount three times the value of the merchandise not redelivered is excessive. Damages should be assessed in an amount based on what the carrier receives in payment for transporting the merchandise. Also, the amendment should provide for mitigation.

Response: The purpose of liquidated damages under bonds is to recompense the Government for the damage it has suffered through failures to meet the obligations of the bonds. The measure of liquidated damages to be assessed for a failure to redeliver export-controlled merchandise is the damage suffered by the Government and the interest of the carrier in the cargo or the fault behind the failure to redeliver. We find that three times the value of merchandise not returned is not excessive for the damage that the Government would suffer to its export control program by a failure to redeliver.

Inasmuch as 19 U.S.C. 1623 allows for the cancellation of charges against a bond caused by breach of a condition upon payment of a lesser sum deemed sufficient, it is not necessary to provide for mitigation in the rule. It is to be expected that guidelines will be formulated and implemented for these liquidated damages as they have been for other liquidated damages provisions.

After careful analysis of all the comments and further review of the matter, it has been decided to adopt the proposal with the modifications discussed. This amendment is necessary for more effective enforcement of the export control laws.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that the amendment will not have a significant economic impact on a substantial number of small entities. Accordingly, the amendment is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Drafting Information

Amendment to the Regulations

Part 113, Customs Regulations (19 CFR Part 113), is amended as set forth below.

PART 113—CUSTOMS BONDS

1. The authority citation for Part 113 continues to read as follows:

Authority: 19 U.S.C. 66, 1623, 1624. Subpart E also issued under 19 U.S.C. 1484.

2. Section 113.64 is amended by adding a new paragraph (e) to read as follows:

§ 113.64 International carrier bond conditions.

* * * * *

(e) *Unlawful disposition.* (1) Principal agrees that it will not allow seized or detained merchandise, marked with warning labels of the fact of seizure or detention, to be placed on board a vessel, vehicle, or aircraft for exportation or to be otherwise disposed of without written permission from Customs, and that if it fails to prevent such placement or other disposition, it will redeliver the merchandise to Customs within 30 days, upon demand made within 10 days of Customs discovery of the unlawful placement or other disposition.

(2) Principal agrees that it will act, in regard to merchandise in its possession on the date the redelivery demand is issued, in accordance with any Customs demand for redelivery made within 10 days of Customs discovery that there is reasonable cause to believe that the merchandise was exported in violation of the export control laws.

(3) Obligors agree that if the principal defaults in either of these obligations, they will pay, as liquidated damages, an amount equal to three times the value of the merchandise which was not redelivered.

William von Raab,

Commissioner of Customs.

Approved: September 17, 1987.

John P. Simpson,

Acting Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF-258; Ref. Notice No. 628]

Establishment of Viticultural Area; San Benito

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Final rule; Treasury decision.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) has decided to establish a viticultural area in San Benito County, California, to be known as "San Benito." This decision is the result of a petition submitted by Almaden Vineyards, a winery and grape grower in the area. The establishment of viticultural areas and the subsequent use of viticultural area names in wine labeling and advertising enables winemakers to label wines more precisely and helps consumers to better identify the wines they purchase.

EFFECTIVE DATE: November 4, 1987.

FOR FURTHER INFORMATION CONTACT: Steve Simon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW., Washington, DC 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 provide for the establishment of definite viticultural areas. The regulations also

allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

Part 9 of 27 CFR provides for the listing of approved American viticultural areas, the names of which may be used as appellations of origin.

Section 4.25a(e)(1), Title 27 CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Section 4.25a(e)(2) outlines the procedures for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

Petition

ATF received a petition from Almaden Vineyards, proposing that a portion of San Benito County, California, be established as a viticultural area to be known as "San Benito." The area is located along and near the San Benito River, approximately two miles south of Hollister, California.

The area contains about 45,000 acres of land, of which approximately 2,500 are planted to grapes. The petitioner stated that at least three major wineries are operating within the area, and that approximately 23 different varieties of winegrapes are grown there.

The area is located inside the approved "Central Coast" viticultural area, and contains within it the approved "Paicines," "Cienega Valley," and "Lime Kiln Valley" areas. (See the discussion of overlapping viticultural areas below, under "Boundaries of the Area.")

Notice of Proposed Rulemaking

In response to the petition, ATF published a notice of proposed rulemaking, Notice No. 628, in the **Federal Register** on Friday, April 10, 1987 (52 FR 11689). That notice proposed establishment of the "San Benito" viticultural area and solicited public comment concerning the proposal.

Public Comment

No comments were received in response to the notice of proposed rulemaking. Accordingly, this Treasury decision establishes the "San Benito" viticultural area exactly as proposed in Notice No. 628.

Name of the Area

The association of the name "San Benito" with the new viticultural area goes back far into history. The San Benito River flows through the area, and one of the principal streets of nearby Hollister was already called "San Benito Street" in 1874, when the surrounding territory, including the viticultural area, was organized as "San Benito County." (See *Crimes and Career of Tiburcio Vasquez*, San Benito County Historical Society, pp. nine and seventeen.) The town of San Benito is about 15 miles southeast of the area, and San Benito Mountain is about 30 miles farther southeast, near the source of the San Benito River and the eastern boundary of San Benito County.

The history of viticulture in the area was described by John P. Ohrwall in a talk given to the San Benito County Historical Society on July 29, 1965. A copy of the talk was submitted to ATF by the petitioner. In that talk, Mr. Ohrwall related that the first vineyard in San Benito County was planted near the new viticultural area by Theophile Vache in the early 1850's. Other vineyards were planted too, and the area where vineyards were sited became known locally as the "Vineyard District." Before the end of the nineteenth century, the vineyard planted by Vache had been named "San Benito Vineyard," and, under that name, wines made in the area "were said to have won prizes at various expositions and fairs, including some held in France and Italy" (quote from Ohrwall). Gradually, additional vineyards and wineries were established. In the 1950's, Almaden Vineyards arrived and began greatly expanding the area's grape acreage. Almaden soon became the dominant grape grower in the area.

Unfortunately, the original vineyard planted by Theophile Vache is no longer in production, because the soil in that vicinity has become permeated with boron salts. (See the discussion of boron below, under "Geography of the Area.") Thus, the original "San Benito Vineyard" is excluded from the new viticultural area for a geographical reason, but the name that this vineyard gave to the area remains.

Although there are some scattered grape plantings elsewhere is San Benito County, by far the preponderance of viticulture in that county is practiced in the viticultural area established by this Treasury decision. According to the petitioner, 95 percent of the vinifera grapes from San Benito County are grown in this area. The other 5 percent are grown in other areas with different climates, according to the petitioner, who declared, "We are not aware of any other area within San Benito County that could be known as 'San Benito' or that would have comparable climatic and growing conditions." ATF agrees with these assertions, since it appears likely that much of the other 5 percent of the vinifera in San Benito County is planted in the already-established "Pacheco Pass" viticultural area (located north of Hollister, straddling the border of San Benito and Santa Clara Counties).

Further evidence was offered by the petitioner, concerning its use of the name "San Benito" on wine labels. Since 1959, labels have appeared on wines of the petitioner, made from grapes from the viticultural area, indicating "San Benito" or "San Benito County" as the appellation of origin.

Geography of the Area

The petitioner presented evidence that the viticultural area is distinguished geographically from the surrounding areas, as follows:

(a) To the north, the area is distinguished from the Hollister Valley by a relative absence of fog. There are presently few or no grapes grown in the Hollister Valley, but if there were, according to the petitioner, they would be of different character from grapes grown in the "San Benito" area. According to the petitioner, "Even an extra hour of fog daily, which is the situation around Hollister, can create a different characteristic in the wine. The grapes would be slower ripening and would result in higher acid."

(b) Additionally, the viticultural area is distinguished from certain areas to its north and northeast which are burdened, to quote the petitioner, with "a high amount of boron in the water which deforms and destroys the leaves; the vines cannot grow properly and the grapes cannot ripen." This area of boron contamination includes the site of the original "San Benito Vineyard," discussed above.

Boron contamination is a natural feature of the subsoil north of the "San Benito" viticultural area. Groundwater percolating through this subsoil dissolves some of the boron salts. If such groundwater is later drawn up through wells and used for irrigation, boron contaimination begins to build up in the topsoil. This apparently is what happened over a period of years in the original "San Benito Vineyard" land. Although famous for grapes for over 50 years, that land today is unsuitable for viticulture.

By contrast, vineyards located inside the new viticultural area are irrigated by water from "deep wells with an extremely low level of boron. There is no toxicity and this condition is monitored on a yearly basis," the petitioner stated.

(c) The eastern, southern, and western boundaries of the area correspond closely to a climatic change as indicated

in *Western Garden Book*, published by Sunset Books.

According to this book, the area inside the viticultural area is an "inland area with some ocean influence" which moderates the climate. By contrast, the surrounding areas to the east, south, and west are designated in the book as areas with more "sharply defined seasons," due to their higher elevations.

(d) Distinctions to the east and west, and to a lesser extent to the south as well, exist on the basis of topography. Those neighboring areas are, for the most part, too steep to be suitable for viticulture. This topographic distinction is apparent from examination of the applicable U.S.G.S. maps.

(e) Finally, the mountain areas to the east and west of the viticultural area would generally be too cold for viticulture, according to a statement made to ATF by the University of California Farm Advisor for San Benito County.

Boundaries of the Area

The boundaries of the new viticultural area may be found on six U.S.G.S. maps of the 7.5 minute series, titled Hollister Quadrangle, Tres Pinos Quadrangle, Quien Sabe Valley Quadrangle, Mt. Harlan Quadrangle, Paicines Quadrangle, and Cherry Peak Quadrangle. The boundaries are described in § 9.110, as added to regulations by this Treasury decision. These boundaries are slightly altered from the boundaries that were originally proposed in the petition, so that the San Benito viticultural area, as established by this document, would completely encompass the following approved viticultural areas: "Lime Kiln Valley" (§ 9.27), "Cienega Valley" (§ 9.38), and "Paicines" (§ 9.39). Further, the "San Benito" viticultural area would lie entirely within the approved "Central Coast" area (§ 9.75).

In establishing a viticultural area based on geographical features which affect viticultural features, ATF recognizes that the distinctions between a smaller area and its surroundings are more refined than the differences between a larger area and its surroundings. It is possible for a viticultural area to contain smaller approved viticultural areas, if each area fulfills the requirements for establishment of a viticultural area.

Miscellaneous

ATF does not want to give the impression, by approving "San Benito" as a viticultural area, that it is approving or endorsing the quality of the wine from this area. ATF is approving this area as being distinct, but not better than other areas. By approving this area, ATF will allow wine producers to claim a distinction on labels and advertisements as to the origin of the grapes. Any commercial advantage can only come from consumer acceptance of "San Benito" wines.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule, because it will not have a significant economic impact on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities. Further, the final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291 of February 17, 1981, the Bureau has determined that this final rule is not a major rule, since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule, because no requirement to collect information is imposed.

Drafting Information

The principal author of this document is Steve Simon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedures, Consumer protection, Viticultural areas, Wine.

Issuance

Accordingly, 27 CFR Part 9 is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph A. The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. B. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.110, to read as follows:

* * * * *

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.110 San Benito.

* * * * *

Par. C. Subpart C of 27 CFR Part 9 is amended by adding § 9.110, which reads as follows:

§ 9.110 San Benito.

(a) *Name.* The name of the viticultural area described in this section is "San Benito."

(b) *Approved maps.* The appropriate maps for determining the boundaries of San Benito viticultural area are six U.S.G.S. maps. They are titled:

(1) Hollister Quadrangle, 7.5 minute series, 1955 (photorevised 1971).

(2) Tres Pinos Quadrangle, 7.5 minute series, 1955 (photorevised 1971).

(3) Quien Sabe Valley Quadrangle, 7.5 minute series, 1968.

(4) Mt. Harlan Quadrangle, 7.5 minute series, 1968.

(5) Paicines Quadrangle, 7.5 minute series, 1968.

(6) Cherry Peak Quadrangle, 7.5 minute series, 1968.

(c) *Boundary*—(1) *General.* The San Benito viticultural area is located in San Benito County, California. The starting point of the following boundary description is the point where the eastern border of Section 17 of Township 15 South, Range 7 East, crosses the latitude 36°37'30" (on the Cherry Peak map).

(2) *Boundary Description*—(i) From the starting point, westward along latitude 36°37'30" to the Range Line R.6E./R.7E. (on the Paicines map).

(ii) Then northward along that range line to the southern border of Section 1, Township 15 South, Range 6 East.

(iii) Then westward along that southern border to the western border of the same section.

(iv) Then northward along that western border to the 800-foot contour line.

(v) Then northwestward along that contour line to the Township Line T.14S./T.15S.

(vi) Then westward along that township line to the southern border of Section 34, Township 15 South, Range 6 East.

(vii) Then continuing westward along that southern border to the 1200-foot contour line.

(viii) Then generally northwestward along that contour line until it crosses for the second time the southern border of Section 28, Township 14 South, Range 6 East.

(ix) Then westward along that southern border to the 1400-foot contour line.

(x) Then following the 1400-foot contour line through the folloowing sections: Sections 28, 29, and 30, Township 14 South, Range 6 East; Section 25, Township 14 South, Range 5 East; Sections 30, 19, 20, and returning to 19, Township 14 South, Range 6 East; to the point where the 1400-foot contour line intersects the section line between Sections 19 and 18, Township 14 South, Range 6 East.

(xi) From there in a straight line due northward to the 1200-foot contour line in Section 18, Township 14 South, Range 6 East.

(xii) Then following the 1200-foot contour line generally northwestward to the northern border of Section 10, Township 14 South, Range 5 East (on the Mt. Harlan map).

(xiii) Then following that northern border northwestward to the 1600-foot contour line.

(xiv) Then following the 1600-foot contour line generally northward to an unimproved road.

(xv) Then looping southward along the unimproved road and continuing eastward past the designated "Spring" and then northward parallel with Bonanza Gulch to the Vineyard School on Cienega Road (on the Hollister map).

(xvi) From there in a straight line northeastward, crossing Bird Creek and the San Benito River, to the northwestern corner of Section 19, Township 13 South, Range 6 East (on the Tres Pinos map).

(xvii) From there following the northern border of Sections 19 and 20, Township 13 South, Range 6 East, to the northeastern corner of Section 20.

(xviii) From there in a straight line due eastward to the Range line R.6E./R7E.

(xix) Then southward along that Range line to the Township line T.13S./T.14S.

(xx) Then eastward along that Township line to the eastern border of Section 6, Township 14 South, Range 7 East (on the Quien Sabe Valley map).

(xxi) Then southward along the eastern border of Sections 6, 7, and 18, Township 14 South, Range 7 East, to the northern border of Section 20, Township 14 South, Range 7 East (on the Cherry Peak map).

(xxii) Then eastward along that northern border to the eastern border of Section 20.

(xxiii) Then southward along the eastern border of Sections 20, 29, and 32, Township 14 South, Range 7 East, and continuing southward along the eastern border of Sections 5, 8, and 17, Township 15 South, Range 7 East, to the starting point.

Signed: September 8, 1987.

Stephen E. Higgins,

Director.

Approved: September 17, 1987.

John P. Simpson,

Deputy Assistant Secretary Regulatory, Trade and Tariff Enforcement).

[FR Doc. 87-22939 Filed 10-2-87; 8:45 am]

BILLING CODE 4810-31-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 795 and 799

[OPTS-42043C; FRL-3273-3]

Testing Requirement; Final Test Standards and Reporting Requirements; 1,2-Dichloropropane

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is issuing a final rule under section 4(a) of the Toxic Substances Control Act (TSCA) that requires manufacturers and processors of 1,2-dichloropropane (DCP; CAS Number 78-87-5) to: (1) Conduct pharmacokinetic (absorption, distribution, metabolism, and excretion) testing with this chemical substance, (2) utilize certain TSCA test guidelines as the test standards for previously and currently required studies for DCP, and (3) submit test data within specified timeframes.

DATES: In accordance with 40 CFR 23.5, this rule shall be promulgated for purposes of judicial review at 1 p.m. eastern ("daylight" or "standard" as appropriate) time on October 19, 1987.

This rule shall become effective on November 18, 1987.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Room E-543, 401 M Street SW., Washington, DC 20460, (202-554-1404).

SUPPLEMENTARY INFORMATION: This document promulgates a final single-phase test requirement for pharmacokinetic testing of DCP, and a final Phase II rule specifying the test standards and reporting requirements for the testing required in the September 9, 1986 (51 FR 32079) final Phase I test rule.

I. Background

On September 9, 1986 (51 FR 32079), EPA issued a final Phase I rule under TSCA section 4 that established testing requirements for manufacturers and processors of DCP. This Phase I rule specified the following testing requirements for DCP: (1) Neurotoxicity, (2) mutagenicity (chromosomal aberrations), (3) reproductive effects, (4) developmental toxicity, (5) acute toxicity to marine and freshwater algal and mysid shrimp, and (6) chronic toxicity to mysid shrimp and *Daphnia magna*.

Also on September 9, 1986 (51 FR 32107), EPA proposed applicable TSCA guidelines as test standards. Since TSCA test guidelines were available for all the testing requirements included in the final Phase I rule, they were proposed as the test standards. A 45-day comment period was provided to allow the public, including the manufacturers and processors subject to the Phase I rule, to comment on the use of the TSCA guidelines.

As discussed in the September 9, 1986 proposal, under the two-phase process, persons subject to a final Phase I rule are normally required to submit proposed study plans after the effective date of the Phase I rule. However, because EPA proposed applicable TSCA test guidelines as the test standards for the studies required by the final DCP Phase I rule, persons subject to the rule, i.e., manufacturers and processors of DCP, were exempted from this requirement Persons subject to the rule, however, were still required to submit notices of intent to test or exemption applications in accordance with 40 CFR 790.45. For the DCP Phase I rule, Dow Chemical Company notified EPA of its intent to sponsor all the required testing (Ref. 6). The responsibilities of manufacturers and processors of DCP for testing or requesting exemption from testing responsibilities were discussed in the DCP Phase I final rule (51 FR 32079).

After review of the public comments, EPA is now promulgating a final Phase II rule requiring the manufacturers and processors of DCP to conduct the health and environmental effects studies contained in the final Phase I test rule in

accordance with the test standards for DCP proposed in 51 FR 32107. Persons who notified EPA of their intent to test must now submit study plans (which adhere to the promulgated test standards) no later than 45 days before the initiation of each required test.

Also proposed in 51 FR 32107 was a single-phase test rule for pharmacokinetic (absorption, distribution, metabolism, and excretion) testing with DCP, including test standards and reporting requirements. After review of public comments, EPA is now promulgating a final single-phase rule requiring the manufacturers and processors of DCP to conduct the pharmacokinetic testing. As stated in Unit IV.D. of this preamble, manufacturers and processors of DCP are now required to submit notices of intent to conduct pharmacokinetic testing or exemption applications in accordance with 40 CFR 790.45.

II. Proposed Rule

A. Proposed Pharmacokinetic Testing

In the September 9, 1986 proposed rule, EPA proposed oral-inhalation comparative pharmacokinetic testing for DCP based on the authority of section 4(a)(1)(B) of TSCA. EPA found that DCP is produced and released to the environment in substantial quantities, and that its manufacture, processing, and use may result in substantial human exposure to this substance. The detailed basis for this finding is found in Unit IV.A. of the final Phase I test rule for DCP (51 FR 32079).

EPA also found that there are insufficient data to reasonably predict and compare the distribution and metabolism of DCP in the body as a result of oral or inhalation exposure due to DCP's manufacture, processing, and use, and that an oral-inhalation comparative pharmacokinetic study of DCP is necessary to develop such data.

B. Proposed Test Standards

In the final Phase I test rule for DCP, the required testing included neurotoxicity, mutagenic effects (chromosomal aberrations), developmental effects, reproductive effects, mysid shrimp acute toxicity, algal acute toxicity, and daphnid and mysid chronic toxicity.

In the September 9, 1986 proposed rule, EPA proposed that: (1) The tests for neurotoxicity, i.e., neuropathology, motor activity, and functional observational battery, be conducted according to 40 CFR 798.6400, 798.6200, and 798.6050, respectively; (2) the dominant lethal assay be conducted according to 40 CFR 798.5450; (3) the developmental toxicity study be conducted according to 40 CFR 798.4900; (4) the reproductive effects test be conducted according to 40 CFR 798.4700; and (5) the oral-inhalation comparative pharmacokinetic test (absorption, distribution, metabolism, and excretion) be conducted according to the guideline proposed in the **Federal Register** of November 6, 1985 (50 FR 46104) as § 798.7475 (codified as § 795.230 in this final rule).

With regard to environmental effects testing, EPA proposed that: (1) The algal acute tests with marine and freshwater algae be conducted according to 40 CFR 797.1050 using systems that control for DCP evaporation; (2) the acute toxicity test with mysid shrimp be conducted according to 40 CFR 797.1930 using flow-through systems and measured concentrations; and (3) the chronic toxicity tests with *Daphnia magna* and mysid shrimp be conducted according to 40 CFR 797.1330 and 797.1950, respectively, using flow-through systems and measured concentrations.

C. Proposed Reporting Requirements

The Agency proposed the following specific reporting requirements:

1. The pharmacokinetic, neurotoxicity, dominant lethal assay, and all environmental effects tests would be completed and the final reports submitted to the Agency within 1 year of the effective date of the final Phase II test rule. A progress report on each study would be provided 6 months after the effective date of the final single-phase test rule or final Phase II test rule, whichever is applicable.

2. The developmental toxicity test would be completed and the final report submitted to the Agency within 18 months of the effective date of the final Phase II test rule. Interim progress reports would be provided every 6 months.

3. The two-generation reproductive effects test would be completed and the final report submitted to the Agency within 29 months of the effective date of the final Phase II test rule. Interim progress reports would be provided every 6 months.

III. Response to Public Comments

In the September 9, 1986 proposed rule, EPA invited comments on the following topics:

1. The proposed testing requirement for an oral-inhalation comparative pharmacokinetic study with DCP.

2. Requiring the oral, rather than inhalation, route of administration in conducting health effects tests with DCP.

3. The proposed use of the TSCA test guidelines as the test standards for the required testing of DCP.

4. The proposed schedule for the required testing.

The Agency received written comments (Ref. 1) from Dow Chemical Company (also referred to in this document as "Dow"). A public meeting was not requested. Dow Incorporated by appendix their previous comments on all of the guidelines proposed as standards for the DCP required testing: (1) Comments submitted on October 12, 1979, and March 11, 1981, when the guidelines were first proposed, and (2) comments submitted on March 20, 1986, in response to revisions of some of the guidelines proposed in the **Federal Register** of January 14, 1986 (51 FR 1522). The revisions have been modified and finalized (52 FR 19056; May 20, 1987) after careful consideration of all industry comments, including those of Dow. The Agency believes that all of the revisions to the test standards required in this document are appropriate as test standards for DCP. The remainder of Dow's comments are discussed below.

A. Pharmacokinetic Testing

1. *General comments.* Dow agrees that pharmacokinetic studies can be useful in hazard evaluation, but only when these studies are designed to answer specific questions posed by data generated from toxicity tests. Dow maintains that pharmacokinetic data that cannot be related to specific aspects of toxicity are difficult to interpret and have little value. Since pharmacokinetic data should answer specific questions related to toxicity, Dow believes that these studies are not suited for standard protocols and should be custom-designed for each chemical substance. Dow further commented that if the Agency mandates the use of standard protocols, these protocols should be highly flexible. This flexibility is needed to allow the use of new approaches and to make appropriate chemical-specific adaptations where necessary.

EPA does not agree with Dow that pharmacokinetic data have little value unless they are related to a specific toxicity question. Some aspects of the pharmacokinetic test, such as absorption kinetics, produce data that will help the regulatory toxicologist perform route-to-route extrapolations. Other aspects, such as tissue distribution, may indicate the need for further toxicity testing as a result of the sequestering of the chemical substance or the detection of high levels in non-target tissues. The Agency agrees with Dow that, at times, these data will be

BEST COPY AVAILABLE

difficult to interpret, as in the hypothetical case proposed by Dow in which sex-related differences in metabolism are observed but no sex-related differences in toxicity are detected. The Agency does not believe that the potential for generating data that is difficult to interpret is a sound rationale for determining that a given test should not be conducted. In the above example, the results of the pharmacokinetic study would have raised concern about the adequacy of the available data to support an evaluation of potential human risk from exposure.

EPA also believes that standard protocols are advantageous from a regulatory standpoint. The use of standard protocols provides a consistent body of data from which regulatory decisions can be made. Because this data set is consistent, comparisons between chemical substances can be made more easily and the historical results of regulatory decisions on substances that have been determined to be similar can be used to provide confidence in present and future decisionmaking processes.

Moreover, the Agency considers the standard protocols as used by the Agency to be highly flexible. As has occurred with many test rules, the standard protocol may be modified as a result of the chemical-specific needs of testing. This ability to modify a standard protocol provides the flexibility needed to address the special characteristics of a substance, or in the absence of such characteristics, allows the Agency to invoke the standard protocol.

2. *Specific comments.* Dow submitted specific written comments on several aspects of the proposed pharmacokinetic test procedure: Animal selection (required species, weight ranges, animal care, and testing of both sexes); administration of test substance (determinations of high dosage and manner of dosing); determination of bioavailability (time intervals for collection of excreta, measuring the concentration of test substance in expired air, and meaning of the term "saturability"); and observation of animals (time intervals for collection of blood). Comments were also submitted on proposed data analysis and reporting requirements, evaluation of results (use of statistics vs. a kinetic model), and the test report (tissue distribution and biotransformation pathways).

The Agency disagrees with some of the points raised by Dow, and a detailed explanation of the Agency's position may be found in the support document (Ref. 2) prepared for EPA by Syracuse Research Corporation (SRC) and a memorandum written by EPA's Health and Environmental Review Division of the Office of Toxic Substances (Ref. 3). Other Dow comments have resulted in guideline modifications and are described below.

a. Dow objected to the designation of specific weight ranges for the Fischer 344 rats to be used in the proposed pharamacokinetic test. In the proposed test guideline, a range of 125 to 175 grams was specified for males while a range of 110 to 150 grams was specified for females. Dow contends that these ranges are needlessly restrictive and will result in the pointless sacrifice of otherwise useful animals. Dow further maintains that the weight ranges are too low, and that the use of such small animals will hinder blood collection from both a technical consideration in obtaining samples and as a result of the relatively small blood volume. Dow recommends that the reference to specific animal weights either be eliminated from the proposed rule or the acceptable weight ranges be increased to 180 to 250 grams for males and 130 to 160 grams for females.

The Agency objective in specifying animal weights was to obtain data on young adult male and female animals. The ages of animals in each group should be close and the range should be comparable from group to group, even when sex differs. Otherwise, age differences may complicate the interpretation of experimental data (Refs. 4 and 5). Consequently, the specified weight ranges have been deleted from 40 CFR 795.230(c)(1)(ii), and instead it is specified that all animals used in the test must be 7 to 9 weeks old. This requirement will ensure that age differences do not affect test results.

b. Dow contended that the specific environmental conditions proposed for animal maintenace are too restrictive and are not consistent with the guidelines in the *Guide for the Care and Use of Laboratory Animals* (Publication No. (NIH)–7–23, 1978). The guide recommends the use of room temperatures between 18 and 26° C and humidity of 40 to 70 percent. In the proposed test guideline, the temperature and humidity are specified as 25 ± 2° C and 50 ± 10 percent, respectively.

EPA believes the range of temperatures and humidity suggested by Dow for animal care is too great because broader ranges of temperature and humidity create more variables in the study and the greater ranges could stress the animals. The NIH guide is a general guide for care of laboratory animals, and not necessarily a standard for changing the temperature requirement of 25 ± 2° C as proposed in §798.7475(c)(1)(iii) (November 6, 1985; 50 FR 46104) to 24 ± 2° C in §795.230(c)(1)(iii) of this final rule to avoid the use of 27° C a temperature above the range recommended in the guide. The Agency believes that a humidity requirement of 50 ± 10 percent is not unduly restrictive and is unchanged in the final test guideline.

c. Dow maintained that methods are not available to distinguish between concentrations of test substance in the inspired and expired air, and stated that the term "saturability" as used in the proposed test guideline is unclear.

The Agency agrees with this comment and has modified § 795.230(c)(2)(iii)(D) to eliminate the measurement of the concentration of test substance in expired air. The concentration of test substance in inspired air does not need to be "measured," since it is equal to the administered dose level (concentration in the test chamber). The calculation of percentage test substance retention, body burden, and "saturability" has also been deleted, along with the test report requirement for these values.

d. Dow objected to the proposed requirement that all results be subjected to statistical analysis. Dow maintains that statistical analysis requires the generation of hypotheses and that the proposed test rule does not provide guidance as to what hypotheses should be tested. Dow contends that there is little value in identifying statistically significant differences, since these differences are usually meaningless for pharmacokinetic studies. Dow recommends that instead of statistical analysis, the data be described using appropriate kinetic models. In addition, the proposed test guideline requires that all results, both quantitative and incidental, shall be analyzed, and Dow is unclear as to what is meant by "incidental results."

The Agency does not agree that statistical analysis is not useful for pharmacokinetic data. Data are statistically analyzed not only to test hypotheses, but also to provide a measure of the amount of variability associated with reported pharmacokinetic parameters. These parameters, such as Km or Vmax, are usually reported along with a standard error or standard deviation that is calculated using the results from a number of experimental determinations This statistical analysis is needed to ensure that the study has been conducted in a competent manner and that results presented are not meaningless random values. For this reason, the Agency believes that

statistical analysis of pharmacokinetic data does provide useful and necessary information.

The Agency does agree, however, with Dow that pharmacokinetic and metabolism data should be described by an appropriate kinetic model. These models provide descriptions of pharmacokinetic processes and assist in the prediction of such values as body burden and elimination half-life, which are useful in assessing the hazard associated with exposure to a chemical substance. Pharmacokinetic models, however, should be employed in addition to, and not in place of, the statistical analyses of the data. Therefore, the test report section of the pharmacokinetic guideline in § 795.230(d)(3) is modified to ask for any pharmacokinetic model(s) developed from the experimental data.

With regard to Dow's comment on the meaning of the term "incidental" in § 795.230(d)(2), the phrase "quantitative or incidental" has been deleted to reduce any possible confusion. The section now reads, "All observed results shall be evaluated by an appropriate statistical method."

e. The language of proposed § 795.230(c)(2)(iii)(C), (3)(i)(B), (ii), and (iii) have been modified slightly in this final rule for the purpose of clarification. Collection of excreta from 0 to 24 hours and then from 24 to 48 hours is more accurate than "*at* 24 and 48 hours." EPA believes that terminating collection when 90 percent of the dose has been excreted will yield adequate information, and eliminate the possible situation of collecting for additional days only to account for 1 to 2 percent more of the administered dose.

B. Environmental Effects Testing

Dow raised issues concerning the availability of facilities to perform the proposed testing of DCP with mysid shrimp and algae during the proposed time frames.

With regard to algal toxicity testing, Dow believes that stoppering the test vessel, as recommended when testing volatile chemical substances such as DCP, will result in invalid results because decreased CO_2 levels will limit algal growth. Dow recommends that EPA withdraw the proposed test requirement until suitable methodology is developed. The Agency agrees that algal growth will be limited by the decreased CO_2 level in the test vessel; however, the growth will be limited in both control and treatment test vessels, allowing a comparison to be made. Due to this limitation effect, EPA is withdrawing the proposed requirement of § 797.1050(c)(4)(iv) that algal growth in controls reach the logarithmic growth phase by 96 hours.

Dow also raised concern about the availability of suitable cultures to use in conducting the proposed acute and chronic mysid shrimp toxicity tests. Laboratories that have been conducting mysid testing have experienced upsets in the rearing of mysids or have had difficulty in obtaining suitable cultures for testing, e.g., cultures may suffer excessive (greater than 10 percent) mortality. The upsets may be due to poor viability of the young organisms and may be related to nutrient balance.

While EPA acknowledges that some laboratories have had this problem, the Agency believes that it is not insurmountable with regard to the mysid shrimp testing requirements for DCP. The Agency believes that adequate mysid cultures will be available to conduct the acute and chronic toxicity testing within the time alloted by this test rule (1 year).

IV. Final Test Rule

A. Pharmacokinetics

1. Findings

EPA is basing its oral-inhalation comparative pharmacokinetic testing requirement on the authority of section 4(a)(1)(B) of TSCA. EPA finds that DCP is produced and released to the environment in substantial quantities, and that its manufacture, processing, and use may result in substantial human exposure to this chemical substance. The detailed basis for this finding is found in Unit IV.A. of the final Phase I test rule for DCP (51 FR 32079; September 9, 1986).

EPA also finds that there are insufficient data to reasonably predict and compare the absorption, distribution, metabolism, and excretion of DCP in the body as a result of oral or inhalation exposure due to DCP's manufacture, processing, and use, and that an oral-inhalation comparative pharmacokinetic study of DCP is necessary to develop such data. EPA believes that the data resulting from this testing will be relevant to a determination as to whether the manufacture, processing, and use of DCP does or does not present an unreasonable risk of injury to health.

2. Required Testing

EPA is requiring that an oral-inhalation pharmacokinetic study be conducted with DCP.

3. Other Provisions

Test substance specification, persons required to test (as amended in Unit IV.D. of this document), and enforcement provisions presented in the final Phase I rule for DCP (51 FR 32079) are applicable to the pharmacokinetic testing of DCP.

B. Final Test Standards

The TSCA test guidelines (40 CFR Parts 797 and 798) specified in Unit II.B. for neurotoxicity, mutagenicity (chromosomal aberrations), reproductive effects, developmental toxicity, acute toxicity to marine and freshwater algae and mysid shrimp, chronic toxicity to mysid shrimp and *Daphnia magna*, and oral and inhalation pharmacokinetics, as modified in this rule, shall be the test standards for the testing of DCP required under 40 CFR 799.1550. The Agency believes that the conduct of the required studies in accordance with these test standards is necessary to ensure that the results are reliable and adequate.

C. Final Reporting Requirements

EPA requires that all data developed under this rule be reported in accordance with the TSCA Good Laboratory Practice (GLP) Standards, which appear in 40 CFR Part 792.

Test sponsors are required to submit individual study plans at least 45 days prior to the initiation of each study in accordance with 40 CFR 790.50.

The Agency is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. On the basis of its experience with health and environmental effects testing, EPA is adopting the proposed schedule for the submission of final test results as the final schedule (see Unit II.C.).

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will publish a notice of receipt in the **Federal Register** as required by section 4(d).

D. Persons Required To Test

EPA does not intend for any persons who manufacture or process DCP solely as an impurity to be subject to the DCP Phase I test rule or this rule for pharmacokinetic testing of DCP. The phrase "other than as an impurity" was inadvertently omitted from § 799.1550(b)(1) in the final Phase I rule (51 FR 32079) and from § 799.1550(b)(5) in the proposed rule for pharmacokinetic testing (51 FR 32107). Therefore, those paragraphs are revised in this final rule to reflect the Agency's intention.

E. Conditional Exemptions Granted

The test rule development and exemption procedures (40 CFR 790.87) indicate that, when certain conditions are met, exemption applicants will be notified by certified mail or in the final Phase II test rule for a given substance that they have received conditional exemptions from test rule requirements. The exemptions granted are conditional because they will be given based on the assumption that the test sponsors will complete the required testing according to the test standards and reporting requirements established in the final Phase II test rule for the given substance. TSCA section 4(c)(4)(B) provides that if an exemption is granted prospectively (that is, on the basis that one or more persons are developing test data, rather than on the basis of prior test data submissions), the Agency must terminate the exemption if the testing has not been conducted in accordance with the test rule.

Since a sponsor has indicated to EPA by letter of intent (Ref. 6) its agreement to sponsor all of the tests required for DCP in the final Phase I test rule for this substance (51 FR 32079; September 9, 1986) and EPA has adopted test standards and reporting requirements in this final Phase II test rule for DCP, the Agency is hereby granting conditional exemptions to all exemption applicants for all of the testing required for DCP in 40 CFR 799.1550 by the final Phase I test rule. However, manufacturers and processors who are subject to the testing requirements of this rule must comply with the test rule and exemption procedures in 40 CFR Part 790 with regard to pharmacokinetic testing. Manufacturers (including importers) subject to this rule are required to submit either a letter of intent to perform the pharmacokinetic testing or an exemption application on or before 30 days after the effective date of this final test rule. The required procedures for submitting such letters and applications are described in 40 CFR Part 790. A detailed discussion of persons required to test and procedures to be followed are presented in Unit IV.D. of the final Phase I rule for DCP (51 FR 32079).

F. Judicial Review

The promulgation date for the DCP final Phase I rule was established as 1 p.m. eastern standard time on September 23, 1986. To EPA's knowledge, no petitions for judicial review of that final Phase I rule were filed. Any petition for judicial review of this final rule will be limited to a review of the test standards and reporting requirements for the Phase II rule and to the pharmacokinetic test requirement, standards, and reporting requirements established in this rule.

V. Economic Analysis of Final Rule

To assess the economic impact of this final rule, EPA has prepared an economic evaluation (Ref. 7) that examines the cost of the required testing, both for pharmacokinetic testing alone and in conjunction with testing required in the DCP final rule, and analyzes four market characteristics of DCP: (1) Demand sensitivity, (2) cost characteristics, (3) industry structure, and (4) market expectations. The economic evaluation for the DCP final test rule, which estimates a testing cost of $144,610 to $191,680 for pharmacokinetic testing, and a total testing cost of $470,230 to $608,350 for both the tests required in the final Phase I rule and the pharmacokinetic testing, indicates that the potential for adverse economic effects due to the estimated cost of testing is low. The annualized total test costs for DCP range from $121,855 to $157,648. This conclusion is based on the following observations (Ref. 7):

1. Propylene oxide (PO), the main product in DCP production, is used mainly as a captive intermediate and has a relatively inelastic demand.
2. The market expectations for PO and many of its derivatives are favorable.
3. Dow manufacturers DCP and PO at two highly integrated plants where minor cost increases can be dispersed over numerous end products.
4. The estimated total unit test costs (i.e., the test costs for DCP and PO) are negligible, or less than 0.02 cent per pound or 0.04 percent of PO price in the upper-bound case.

Refer to the economic analysis (Ref. 7) for a complete discussion of test cost estimation and the potential for economic impact resulting from these costs.

VI. Availability of Test Facilities and Personnel

Section 4(b)(1) of TSCA requires EPA to consider "the reasonably foreseeable availability of the facilities and personnel needed to perform the testing required under the rule." Therefore, EPA conducted a study to assess the availability of test facilities and personnel to handle the additional demand for testing services created by section 4 test rules and test programs negotiated with industry in place of rulemaking. Copies of the study, "Chemical Testing Industry; Profile of Toxicological Testing," October, 1981, can be obtained through the National Technical Information Service, 5285 Port Royal Road, Springfield, Va., 22161, under publication number PB 82-140773. On the basis of this study, the Agency believes that there will be available test facilities and personnel to perform the testing required in this final rule.

VII. Rulemaking Record

EPA has established a record for this rulemaking, [docket number OPTS-42043C]. This record includes basic information considered by the Agency in developing this final rule, and appropriate **Federal Register** notices. This record includes the following information:

A. Supporting Documentation

The supporting documents for this rulemaking consist of the **Federal Register** documents containing the proposed and final Phase I and proposed Phase II and single-phase test rules on DCP.

(5) *Calabrese, E.J. "Age and Susceptibility to Toxic Substances."* New York: John Wiley & Sons. (1986)

(6) *Dow.* The Dow Chemical Company. Letter of intent to conduct testing with 1,2-dichloropropane. Submitted to TSCA Public Information Office (TS-793). Office of Pesticides and Toxic Substances, USEPA. Washington, DC. Control Number OPTS 42043. (November 14, 1986)

(7) *EPA.* Economic Impact Analysis of Final Test Rule for 1,2-Dichloropropane. U.S. Environmental Protection Agency, Washington, DC. (1986)

Confidential Business Information (CBI), while part of the record, is not available for public review. A public version of the record, from which CBI has been deleted, is available for

inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in Room NE–G004, 401 M Street SW., Washington, DC.

VIII. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirements of a Regulatory Impact Analysis. This test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order. The economic analysis of the testing of DCP is discussed in Unit V of this notice.

This rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, (5 U.S.C. 601 *et seq.*, Pub. L. 96–354, September 19, 1980), EPA is certifying that this rule will not have a significant impact on a substantial number of small businesses for the following reasons:

(1) There are no small manufacturers of 1,2-dichloropropane.

(2) Small processors are not expected to perform testing themselves, or to participate in the organization of the testing efforts.

(3) Small processors will experience only very minor costs, if any, in securing exemption from testing requirements.

(4) Small processors are unlikely to be affected by reimbursement requirements, and any testing costs passed on to small processors through price increases will be small.

C. Paperwork Reduction Act

OMB has approved the information collection requirements contained in this final rule under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*, Pub. L. 96–511, December 11, 1980), and has assigned OMB control number 2070–0033.

List of Subjects in 40 CFR Parts 795 and 799

Chemicals, Environmental protection, Hazardous substances, Testing, Laboratories, Recordkeeping and reporting requirements.

Dated: September 25, 1987.

J.A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR Chapter I, is amended as follows:

PART 795—[AMENDED]

1. In Part 795:

a. The authority citation for Part 795 is revised to read as follows:

Authority: 15 U.S.C. 2603.

b. Section 795.230 is added, to read as follows:

§ 795.230 Oral and inhalation pharmacokinetic test.

(a) *Purpose.* The purpose of these studies is to determine:

(1) Bioavailability of test substance after oral and inhalation exposure.

(2) Whether or not the biotransformation of the test substance is qualitatively and quantitatively the same after oral and inhalation exposure.

(3) Whether or not the biotransformation of the test substance is changed qualitatively or quantitatively by repeated dosing.

(b) *Definitions.* Bioavailability refers to the rate and extent to which an administered chemical substance compound is absorbed, i.e., reaches the systemic circulation.

(c) *Test procedures*—(1) *Animal selection*—(i) *Species.* The preferred species is the rat for which extensive data on the toxicity and carcinogenicity of numerous chemical substances are available.

(ii) *Animals.* Adult male and female Fischer 344 rats shall be used. The rats shall be 7 to 9 weeks old. Prior to testing, the animals are selected at random for each group. Animals showing signs of ill health shall not be used.

(iii) *Animal care.* Animals shall be housed in environmentally controlled rooms with 10 to 15 air changes per hour. The rooms shall be maintained at a temperature of 24 ±2 °C and humidity 50 ± 10 percent with a 12-hour light/dark cycle per day. The rats shall be isolated for at least 7 days prior to use, and their health status shall then be evaluated. The animals shall be acclimated to the experimental environment for a minimum of 48 hours prior to treatment. Certified feed and water shall be provided *ad libitum.*

(iv) *Numbers.*—(A) At least 8 animals (4 males and 4 females) shall be used at each dose level.

(B) Females shall be nulliparous and nonpregnant.

(2) *Administration of the test substance*—(i) *Test substance.* The test substance shall be at least 99 percent pure. The studies require the use of both nonradioactive and ^{14}C-labeled test substance. Both preparations are needed to investigate the provisions of paragraph (a)(2) of this section. The use of ^{14}C-test substance is recommended for the provisions in paragraphs (a)(1), (a)(2), and (a)(3) of this section in order to facilitate the work, improve the reliability of quantitative determinations, and increase the probability of observing previously unidentified metabolites.

(ii) *Dosage and treatment*—(A) *Oral study.* At least two doses shall be used in the study, a "low" and "high" dose. When administered orally, the "high" dose should induce some overt toxicity such as weight loss. The "low" dose shall not induce observable effects attributable to the test substance. Oral dosing shall be performed by gavage using an appropriate vehicle.

(B) *Inhalation study.* Three concentrations shall be used in the study. Upon exposure, the two higher concentrations should ideally induce some overt symptoms of toxicity, although the intermediate concentration may be excluded from this condition. The lowest concentration shall not induce observable effects attributable to the test substance.

(iii) *Determination of bioavailability*—(A) *Oral studies.* (*1*) Group A (a minimum of 8 animals, 4 males and 4 females) shall be dosed once *per os* with the low dose of ^{14}C-labeled test substance.

(*2*) Group B (a minimum of 8 animals, 4 males and 4 females) shall be dosed once *per os* with the high dose of ^{14}C-labeled test substance.

(B) *Inhalation studies.* (*1*) Group C (a minimum of 8 animals, 4 males and 4 females) shall be exposed (6 hours) to a mixture of non-radioactive test substance in air at the prescribed low test substance concentration.

(*2*) Group D (a minimum of 8 animals, 4 males and 4 females) shall be exposed (6 hours) to a mixture of non-radioactive test substance in air at the prescribed intermediate test substance concentration.

(*3*) Group E (a minimum of 8 animals, 4 males and 4 females) shall be exposed (6 hours) to a mixture of non-radioactive test substance in air at the prescribed high concentration.

(*4*) Group F (a minimum of 8 animals, 4 males and 4 females) shall be exposed (6 hours) to a mixture of ^{14}C-labeled test substance in air at the prescribed low test substance concentration.

(*5*) Group G (a minimum of 8 animals, 4 males and 4 females) shall be exposed (6 hours) to a mixture of ^{14}C–labeled test substance in air at the prescribed intermediate test substance concentration.

(*6*) Group H (a minimum of 8 animals, 4 males and 4 females) shall be exposed (6 hours) to a mixture of ^{14}C-labeled test

VOL 52 ISS 192 OCT 5 1987 UMI

substance in air at the prescribed high test substance concentration.

(C) *Collection of excreta.* After oral administration (Groups A and B) and inhalation exposure (Groups F through H) the rats shall be placed in individual metabolic cages and excreta (urine, feces and expired air) shall be collected from 0 to 24 hours and then from 24 to 48 hours post-treatment, or until 90 percent of the dose has been excreted, whichever occurs first.

(D) *Kinetic studies.* Groups C through E shall be used to determine the concentration of the test substance in blood at 0, 5, 10, 15, and 30 minutes, and at 1, 2, 4, 8, 16, 24, and 48 hours after initiation of inhalation exposure.

(E) *Repeated dosing study.* Rats (a minimum of 8 animals, 4 males and 4 females) shall receive a series of single daily oral doses of non-radioactive test substance over a period of at least 7 days, followed at 24 hours after the last dose by a single oral dose of ^{14}C-labeled test substance. Each dose shall be at the low-dose level. Urine shall be collected from 0 to 24 hours and then 24 to 48 hours after administering the ^{14}C-labeled test substance.

(3) *Observation of animals*—(i) *Bioavailability*—(A) *Blood levels.* The levels of total ^{14}C-label shall be determined in whole blood, blood plasma, or blood serum of each rat at 0, 4, 8, 16, 24, and 48 hours after dosing rats in Groups A–B and F–H.

(B) *Expired air, urinary and fecal excretion.* The quantities of total ^{14}C-label eliminated in expired air, urine, and feces by each rat in Groups A and B and F through H shall be determined in collections made from 0 to 24 hours and then 24 to 48 hours after dosing and, if necessary, daily thereafter until at least 90 percent of the dose has been excreted or until 7 days after dosing, whichever occurs first.

(C) *Tissue distribution.* The concentration and quantity of ^{14}C-label in tissue and organs shall be determined at the time of sacrifice for each rat in Groups A and B, F through H, and the repeated-dosing group.

(ii) *Biotransformation after oral and inhalation exposure.* Appropriate qualitative and quantitative methods shall be used to assay urine specimens collected from each rat in groups A and B and F through H. Suitable enzymatic steps should be used to distinguish, characterize, and quantify conjugated and unconjugated metabolites of the test substance.

(iii) *Change(s) in biotransformation.* Appropriate qualitative and quantitative assay methodologies shall be used to compare the composition of ^{14}C-labeled components of urine collected from 0 to 24 and then from 24 to 48 hours after dosing rat Group A with those components in the urine collected over the same intervals after administering the radioactive dose in the repeated dosing study.

(d) *Data and reporting*—(1) *Treatment of results.* Data should be summarized in tabular form.

(2) *Evaluation of results.* All observed results shall be evaluated by an appropriate statistical method.

(3) *Test report.* In addition to the reporting requirements as specified in the EPA Good Laboratory Practice Standards (Subpart J, Part 792 of this chapter) the following specific information should be reported:

(i) Labeling site of the test substance.

(ii) A full description of the sensitivity and precision of all procedures used to produce the data.

(iii) Quantity of isotope, together with percent recovery of the administered dose in feces, urine, expired air, and blood for both routes of administration.

(iv) Quantity and distribution of ^{14}C-test substance in bone, brain, fat, gonads, heart, kidney, liver, lung, muscle, spleen, tissue which displayed pathology, and residual carcass.

(v) Biotransformation pathways and quantities of test substance and its metabolites in urine, feces, and expired air collected after oral administration (single low and high doses) and inhalation exposure (low, intermediate, and high concentrations).

(vi) Biotransformation pathways and quantities of the test substance and its metabolites in urine collected after repeated administration of test substance to rats.

(vii) Pharmacokinetic model(s), if any, developed from the experimental data.

(4) *Counting efficiency.* Data should be made available to the Agency upon request.

PART 799—[AMENDED]

2. In Part 799:

a. The authority citation for Part 799 continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. Section 799.1550 is amended by revising paragraph (b)(1) and adding paragraphs (b)(5), (c)(1)(ii) and (iii), (2)(ii) and (iii), (3)(ii) and (iii), (4)(ii) and (iii) and (5), and (d)(1)(ii) and (iii), (2)(ii) and (iii), (3)(ii) and (iii), and (4)(ii) and (iii), and (e) to read as follows:

§ 799.1550 1,2-Dichloropropane.

* * * * *

(b) * * *

(1) All persons who manufacture or process 1,2-dichloropropane, other than as an impurity, from October 23, 1986 to the end of the reimbursement period, shall submit letters of intent to conduct testing or exemption applications, conduct tests, and submit data as specified in paragraphs (c)(1), (c)(2), (c)(3), and (c)(4), and (d) of this section, Subpart A of this Part, and Parts 790 and 792 of this chapter for two-phase rulemaking.

* * * * *

(5) All persons who manufacture or process 1,2-dichloropropane, other than as an impurity, from November 18, 1987 to the end of the reimbursement period, shall submit letters of intent to conduct testing or submit exemption applications, conduct tests, and submit data as specified in paragraph (c)(5) of this section, Subpart A of this part, and Parts 790 and 792 of this chapter for single-phase rulemaking.

(c) * * *

(1) * * *

(ii) *Test standards.* The neurotoxicity testing with 1,2-dichloropropane, consisting of a neuropathology test, a motor activity test, and a functional observational battery, shall be conducted in accordance with §§ 798.6400, 798.6200, and 798.6050 of this chapter, respectively, using the oral route of exposure. The animals shall be dosed with DCP for a minimum of 5 days per week, over a period of at least 90 days.

(iii) *Reporting requirements.* (A) The neurotoxicity tests shall be completed and the final reports submitted to EPA within 1 year of the effective date of the final Phase II rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final Phase II rule.

(2) * * *

(ii) *Test standards.* The dominant lethal assay with 1,2-dichloropropane shall be conducted in accordance with § 798.5450 of this chapter

(iii) *Reporting requirements.* (A) The dominant lethal assay shall be completed and the final report submitted to EPA within 1 year of the effective date of the final Phase II rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final Phase II rule.

(3) * * *

(ii) *Test standard.* The developmental toxicity test with 1,2-dichloropropane shall be conducted in accordance with § 798.4900 of this chapter, using the oral route of exposure.

(iii) *Reporting requirements.* (A) The developmental toxicity test shall be completed and the final report submitted to EPA within 18 months of the effective date of the final Phase II rule.

(B) Interim progress reports shall be submitted to EPA at 6-month intervals, beginning 6 months after the effective date of the final Phase II rule and ending with the submission of the Final Test Report.

(4) * * *

(ii) *Test standard.* The two-generation reproductive effects testing with 1,2-dichloropropane shall be conducted in accordance with § 798.4700 of this chapter, using the oral route of exposure.

(iii) *Reporting requirement* (A) The two-generation reproductive effects test shall be completed and the final report submitted to EPA within 29 months of the effective date of the final Phase II rule.

(B) Interim progress reports shall be submitted to EPA at 6-month intervals, beginning 6 months after the effective date of the final Phase II rule and ending with the submission of the Final Test Report.

(5) *Pharmacokinetic studies*—(i) *Required testing.* An oral and inhalation pharmacokinetic test shall be conducted with 1,2-dichloropropane.

(ii) *Test standard.* The oral and inhalation pharmacokinetic testing with 1,2-dichloropropane shall be conducted in accordance with § 795.230 of this chapter.

(iii) *Reporting requirements.* (A) The pharmacokinetic test shall be completed and the final report submitted to EPA within 1 year of the effective date of the final single-phase pharmacokinetics rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final single-phase rule.

(d) * * *

(1) * * *

(ii) *Test standard.* The mysid shrimp acute toxicity test with 1,2-dichloropropane shall be conducted as a flow-through test with measured concentrations using *Mysidopsis bahia* in accordance with § 797.1930 of this chapter.

(iii) *Reporting requirements.* (A) The mysid acute toxicity test shall be completed and the final report submitted to EPA within 1 year of the effective date of the final Phase II rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final Phase II rule.

(2) * * *

(ii) *Test standard.* (A) The algal acute toxicity tests with 1,2-dichloropropane shall be conducted with marine and freshwater algae using systems that control for 1,2-dichloropropane evaporation in accordance with § 797.1050 of this chapter, except for the provisions in § 797.1050(c)(4)(iv).

(B) For the purpose of this section, the following provisions also apply to the algal acute toxicity tests:

(*1*) *Definitive test.* The test begins when algae from 7 to 10-day-old stock cultures are placed in the test chambers containing test solutions having the appropriate concentrations of the test substance. At the end of 96 hours the algal growth response (number or weight of algal cells/ml) in all test containers and controls should be determined by an indirect (spectrophotometry, electronic cell counters, dry weight, etc.) or a direct (actual microscopic cell count) method. Indirect methods should be calibrated by a direct microscopic count. The percentage inhibition or stimulation of growth for each concentration, EC_{10}, EC_{50}, EC_{90}, and the concentration-response curves are determined from these counts.

(*2*) [Reserved]

(iii) *Reporting requirements.* (A) The algal acute toxicity tests shall be completed and the final report submitted to EPA within 1 year of the effective date of the final Phase II rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final Phase II rule.

(3) * * *

(ii) *Test standard.* The daphnid chronic toxicity test with 1,2-dichloropropane shall be conducted as a flowthrough test using *Daphnia magna* in accordance with § 797.1330 of this chapter.

(iii) *Reporting requirements.* (A) The daphnid chronic toxicity test shall be completed and the final report submitted to EPA within 1 year of the effective date of the final Phase II rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final Phase II rule.

(4) * * *

(ii) *Test standard.* The mysid shrimp chronic toxicity test with 1,2-dichloropropane shall be conducted as a flowthrough test using *Mysidopsis bahia* in accordance with § 797.1950 of this chapter.

(iii) *Reporting requirements.* (A) The mysid chronic toxicity test shall be completed and the final report submitted to EPA within 1 year of the effective date of the final Phase II rule.

(B) An interim progress report shall be submitted to EPA 6 months after the effective date of the final Phase II rule.

(e) *Effective date.* The effective date of the final Phase II rule and the final single-phase pharmacokinetics rule for 1,2-dichloropropane is November 18, 1987.

[FR Doc. 87–22914 Filed 10–2–87; 8:45 am]
BILLING CODE 6560–50–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 2

Testimony by Employees and the Production of Documents in Proceedings Where the United States is Not a Party

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: This rule adds a new Part 2 to Title 45 of the Code of Federal Regulations. It generally provides that Department of Health and Human Services employees may not give testimony as part of their official duties without the approval of the head of their agency in litigation where the United States or other federal agencies are not parties. The purpose of this regulation is to maintain the Department of Health and Human Services policy of strict impartiality with respect to private litigants and to minimize the disruption of official duties. This regulation is also intended to provide for the orderly and efficient processing of all written requests for documents.

EFFECTIVE DATE: November 4, 1987.

FOR FURTHER INFORMATION CONTACT: Darrel J. Grinstead, Associate General Counsel, Business and Administrative Law Division, Office of the General Counsel, Room 5362 HHS North Buliding, 330 Independence Avenue SW., Washington, DC 20201 (202) 475–0150.

SUPPLEMENTARY INFORMATION: With increasing frequency, Department of Health and Human Services employees are requested or subpoenaed to give testimony or provide documents in litigation in which the United States is not a party. This regulation is intended to address this problem by prohibiting both voluntary appearances and compliance by employees with subpoenas for testimony as part of their official duties except where the agency head determines that the appearance would promote the objectives of the Department of Health and Human Services. In addition, this housekeeping regulation provides for the orderly handling of subpoenas duces tecum by treating these as requests for documents under the Freedom of Information Act (5 U.S.C. 552).

VOL
52
ISS
192
OC
5
1987
UMI

Subpoenas to testify concerning information which employees have acquired in the course of performing their official duties, or to produce documents, are essentially legal actions against the United States as to which there has been no statutory waiver of sovereign immunity. The courts have recognized the authority of federal agencies to limit compliance with such subpoenas. *See United States ex rel. Touhy* v. *Ragen*, 340 U.S. 462 (1951); *Swett* v. *Schenk*, 792 F.2d 1447 (9th Cir. 1986); *Giza* v. *Secretary of HEW*, 626 F.2d 748 (1st Cir. 1980); *Reynolds Metals Co.* v. *Crowther*, 572 F. Supp. 288 (D. Mass. 1982).

Accordingly, this regulation prohibits Department of Health and Human Services employees from complying with requests or subpoenas for testimony in private litigation or other proceedings without the approval of the agency head. In addition, the regulation provides that a subpoena duces tecum directed to a Department employee will be handled as a request for documents under the Freedom of Information Act.

This regulation does not apply to situations where an employee serves as an expert witness in connection with professional and consultative services performed as non-official activities; in situations where an employee makes an appearance in a legal or administrative proceeding (such as cases arising out of traffic accidents, crimes, domestic relations, etc.) that does not relate to the Department of Health and Human Services and does not involve the employee's professional and consultative services; or to consultative services and technical assistance provided by the Department of Health and Human Services in carrying out its normal program activities. Also, this regulation is not applicable to Congressional subpoenas or requests for information. The Food and Drug Administration, a component of this Department, has promulgated its own regulations on this subject (21 CFR Part 20, Subpart A). This part does not apply to employees of that agency. This part also does not apply to the handling of subpoenas directed to the Social Security Administration which are covered under regulations found at 20 CFR Part 401.

The regulation does not specifically address situations in which Department of Health and Human Services health care personnel in the Public Health Service are asked to participate in legal proceedings in connection with the health care actually provided by them directly to individual patients as a part of their official duties. However, the Assistant Secretary for Health intends to make appropriate delegations of authority so that, in such circumstances, lower level Public Health Service officials will be able to permit participation by these employees in appropriate cases without the Assistant Secretary's involvement.

These regulations would apply where a state or local government, but not the United States or a Federal agency, is a party in litigation.

The Freedom of Information Act requires agencies to provide nonexempt documents in response to written request, and a subpoena duces tecum amounts to a written request for documents. Accordingly, subpoenas duces tecum except as otherwise specified will be handled as Freedom of Information Act requests under Department of Health and Human Services' regulations, 45 CFR Part 5, unless the agency head or designee has granted approval to respond in strict accordance with the terms of the subpoena.

Finally, Department of Health and Human Services agencies are sometimes asked to certify the authenticity of copies of official documents. Provisions of such services is addressed in the regulations implementing the Freedom of Information Act, 45 CFR Part 5.

Paperwork Reduction Act

This regulation is not subject to the Paperwork Reduction Act because it deals solely with internal rules governing Department of Health and Human Services personnel.

Cost/Regulatory Analysis

The Secretary has determined, in accordance with Executive Order 12291, that this rule will not constitute a "major" rule and therefore is not subject to the regulatory impact and analysis requirements of the Order. Major rules are those which impose a cost on the economy of $100 million or more a year and have certain other economic impacts.

The rule will not have a significant impact on small businesses; therefore, preparation of a regulatory flexibility analysis is not required.

List of Subjects in 45 CFR Part 2

Administrative practice and procedure, Freedom of Information, Government employees.

Dated: September 4, 1987.

Otis R. Bowen,

Secretary.

For reasons stated in the preamble, Part 2 is added, as set forth below, to Title 45 of the Code of Federal Regulations.

PART 2—TESTIMONY BY EMPLOYEES AND PRODUCTION OF DOCUMENTS IN PROCEEDINGS WHERE THE UNITED STATES IS NOT A PARTY

Sec.

2.1 Scope, purpose, and applicability.
2.2 Definitions.
2.3 Policy on presentation of testimony and production of documents.
2.4 Procedures when voluntary testimony is requested or when an employee is subpoenaed.
2.5 Subpoenas duces tecum.
2.6 Certification and authentication of records.

Authority: 5 U.S.C. 301, 5 U.S.C. 552.

§ 2.1 Scope, purpose, and applicability.

(a) This part sets forth rules to be followed when a Department of Health and Human Services employee, other than an employee of the Food and Drug Administration or the Social Security Administration, is requested or subpoenaed to provide testimony, in a deposition, trial, or other similar proceeding, concerning information acquired in the course of performing official duties or because of the employee's official capacity. This part also sets forth procedures for the handling of subpoenas duces tecum for any document in the possession of the Department of Health and Human Services other than the Food and Drug Administration and the Social Security Administration, and to requests for certification of copies of documents. Separate regulations, 21 CFR Part 20 and 20 CFR Part 401, govern the Food and Drug Administration and the Social Security Administration and those regulations will not be affected by this part.

(b) It is the policy of the Department of Health and Human Services to provide information, data, and records to non-federal litigants to the same extent and in the same manner that they are available to the general public. The availability of Department of Health and Human Services' employees to testify in litigation not involving Federal parties is governed by the Department of Health and Human Services' policy on maintaining strict impartiality with respect to private litigants and to minimize the disruption of official duties.

(c) This part applies to state and local court, administrative, and legislative proceedings and Federal court and administrative proceedings.

(d) These procedures do not apply to:

(1) Any civil proceedings where the United States, the Department of Health

and Human Services, and agency thereof, or any other Federal agency is a party.

(2) Congressional requests or subpoenas for testimony or documents.

(3) Consultative services and technical assistance provided by the Department of Health and Human Services, or any agency thereof, in carrying out its normal program activities.

(4) Employees serving as expert witnesses in connection with professional and consultative services as approved outside activities in accordance with 45 CFR 73.735–704 and 73.735–708. (In cases where employees are providing such outside services, they must state for the record that the testimony represents their own views and does not necessarily represent the official position of the Department of Health and Human Services.)

(5) Employees making appearances in their private capacity in legal or administrative proceedings that do not relate to the Department of Health and Human Services (such as cases arising out of traffic accidents, crimes, domestic relations, etc.) and not involving professional and consultative services.

§ 2.2 Definitions.

Agency Head refers to the head of the relevant operating division or other major component of the Deparment of Health and Human Services, or his or her delegatees. For each component of the Department, the Agency Head for the purposes of this part is as follows:

(1) Office of the Secretary—Assistant Secretary for Management and Budget;

(2) Office of Human Development Services—Assistant Secretary for Human Development Services;

(3) Public Health Service—Assistant Secretary for Health;

(4) Health Care Financing Administration—Administrator;

(5) Family Support Administration—Administrator; and

(6) Social Security Administration—Commissioner.

Employee includes commissioned officers in the Public Health Service Commissioned Corps, as well as regular and special Department of Health and Human Services employees (except employees of the Food and Drug Administration).

Testify and testimony includes both in-person, oral statements before a court, legislative or administrative body and statements made pursuant to depositions, interrogatories, declarations, affidavits, or other formal participation.

§ 2.3 Policy on presentation of testimony and production of documents

(a) No Department of Health and Human Services employee may provide testimony or produce documents in any proceedings to which this part applies concerning information acquired in the course of performing official duties or because of the employee's official relationship with the Department of Health and Human Services unless authorized by the Agency head pursuant to this part based on a determination by the Agency head, after consultation with the Office of the General Counsel, that compliance with the request would promote the objectives of the Department of Health and Human Services.

(b) The Office of the General Counsel will request the assistance of the Department of Justice where necessary to represent the interests of the Department of Health and Human Services and its employees under this part.

§ 2.4 Procedures when voluntary testimony is requested or when an employee is subpoenaed.

(a) All requests for testimony by a Department of Health and Human Services employee in his or her official capacity and not subject to the exceptions set forth in § 2.1(d), of this part, must be in writing and must state the nature of the requested testimony, why the information sought is unavailable by any other means, and the reasons why the testimony would be in the interests of the Department of Health and Human Services or the Fedeal Government.

(b) If the Agency head denies approval to comply with a subpoena for testimony, or if the Agency head has not acted by the return date, the employee will appear at the stated time and place, unless advised by the Office of the General Counsel that responding to the subpoena would be inappropriate (in such circumstances as, for example, an instance where the subpoena was not validly issued or served, where the subpoena has been withdrawn, or where discovery has been stayed), produce a copy of these regulations, and respectfully decline to testify or produce any documents on the basis of these regulations.

§ 2.5 Subpoenas duces tecum.

(a) Subpoenas duces tecum for records of the Department of Health and Human Services shall be deemed a request for records under the Freedom of Information Act and shall be handled pursuant to the rules governing public disclosure established in 45 CFR Part 5.

(b) Whenever a subpoena duces tecum, in appropriate form, has been lawfully served upon a Department of Health and Human Services' employee commanding the production of any record, such employee, after consultation with the Office of the General Counsel, shall appear in response thereto, respectfully decline to produce the record(s) on the ground that it is prohibited by this section, and state that the production of the record(s) involved will be handled by the procedures and disclosure rules established in 45 CFR Part 5.

§ 2.6 Certification and authentication of records.

Upon request, Department of Health and Human Services' agencies will certify the authenticity of copies of records that are to be disclosed pursuant to 45 CFR Part 5 and will authenticate copies of records previously disclosed. Fees for such certification are set forth in 45 CFR 5.43.(e)(5).

BILLING CODE 4150–04–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Final Frameworks for Late Season Migratory Bird Hunting Regulations; California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes final late-season frameworks from which California may select season dates, limits and other options for the 1987–88 migratory bird hunting seasons in those areas of the State designated for nontoxic shot use, as described in the July 21, 1987, **Federal Register** (52 FR 27368).

The U.S. Fish and Wildlife Service (hereinafter the Service) annually prescribes hunting regulations frameworks to the States to facilitate their selection of hunting seasons and to further the establishment of the late-season migratory bird hunting regulations. Final late-season frameworks for the States (including California) were published in the September 18, 1987, **Federal Register** (52 FR 35248). However, in the absence of California's approval for the

VOL 52 ISS 192 OCT 5 1987 UMI

implementation and enforcement of nontoxic shot regulations in those areas described in the July 21, 1987, **Federal Register** the final frameworks specific to California did not authorize the hunting of waterfowl and coots in those nontoxic shot use areas. On September 29, 1987, California gave its approval for the implementation and enforcement of those nontoxic shot use areas.

EFFECTIVE DATE: This rule takes effect on October 5, 1987.

ADDRESS: Comments received on the proposed late-season frameworks are available for public inspection during normal business hours in Room 536, Matomic Building, 1717 H Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240. Telephone (202) 254–3207.

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918, (40 Stat. 755; 16 U.S.C. 703 *et seq.*), as amended, authorizes and directs the Secretary of the Interior, having due regard for the zone of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported or transported.

On January 15, 1987, and July 21, 1987, the Service published proposed and final rules, respectively, in the **Federal Register** (52 FR 1636 and 27352, respectively) describing zones in which the use of lead shot is prohibited for hunting waterfowl, coots and certain other species in the 1987–88 season. In both documents the Service gave notice that if States do not approve nontoxic shot zones when current Service guidelines and criteria indicate that such zones are necessary to protect migratory birds, the Service will not open the areas to waterfowl and coot hunting.

On September 18, 1987, the Service published final late-season frameworks from which States may select season dates, limits and other options for the 1987–88 migratory bird hunting season. However, because California had withdrawn it approval of the nontoxic shot ares, as described in the July 21, 1987, **Federal Register**, the final frameworks did not authorize the hunting of waterfowl and coots in those areas.

Subsequently, on September 29, 1987, California approved the nontoxic shot areas. Therefore, this rulemaking document establishes the final frameworks for late-season migratory bird hunting regulations for the 1987–88 season in California's nontoxic shot zones. The final frameworks for the late-season migratory bird hunting regulations for California, as published in the September 18, 1987, **Federal Register** (52 FR 35248) are applicable to California's nontoxic shot zones and are repeated in their entirety in this document.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council of Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975, (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement. Copies of the environmental assessments are available from the Service at the address indicated under the caption **ADDRESS.** As noted in the March 13, 1987, **Federal Register** (52 FR 7905), the Service is preparing a Supplemental Environmental Impact Statement (SEIS) on the FES. A draft SEIS will be available in early October.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act" [and shall] "insure that any action authorized, funded, or carried out * * * is not likely to jeopardize the continued existence of such endangered or threatened species or result in the destruction or adverse modification of [critical] habitat * * *" The Service therefore initiated section 7 consultation under the Endangered Species Act for the proposed hunting season frameworks.

On June 15, 1987, the Office of Endangered Species gave a biological opinion that the proposed action was not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of their critical habitats.

As in the past, hunting regulations this year are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species.

The Service's biological opinion resulting from its consultation under section 7 is considered a public document and is available for public inspection in or available from the Office of Endangered Species and the Office of Migratory Bird Management, Department of the Interior, Washington, DC.

Regulatory Flexibility Act, Executive Order 12291 and the Paperwork Reduction Act

In the **Federal Register** dated March 13, 1987, (52 FR 7900), the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing a Determination of Effects and an updated Final Regulatory Impact Analysis, and publication of a summary of the latter. These regulations have been determined to be major under Executive Order 12291 and they have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act. This determination is detailed in the aforementioned documents which are available upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240. These final regulations contain no information collections subject to Office of Management and Budget review under the Paperwork Reduction Act.

Memorandum of Law

The Service published its Memorandum of Law, required by section 4 of Executive Order 12291, in the **Federal Register** dated August 3, 1987 (52 FR 28717).

Authorship

The primary author of this final rule is Morton M. Smith, Office of Migratory Bird Management, working under the direction of Rollin D. Sparrowe, Chief.

Regulations Promulgation

The rulemaking process for migratory bird hunting must, by its nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed late hunting season rulemakings were published on March 13, June 3, and August 14, 1987, the Service established what it believed

were the longest periods possible for public comment. In doing this, the Service recognized that at the close of each period time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the Service is of the opinion that the States would have insufficient time to select season dates, shooting hours and limits; to communicate those selections to the Service; and to establish and publicize the necessary regulations and procedures that implement their decisions.

Therefore, the Service under authority of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755; 16 U.S.C. 703 *et seq.*), prescribes final frameworks setting forth the species to be hunted, the daily bag and possession limits, the shooting hours, the season lengths, the earliest opening and latest closing season dates, and hunting areas, from which State conservation agency officials may select hunting season dates and other options. Upon receipt of season and option selections from State officials, the Service will publish in the **Federal Register** a final rulemaking amending 50 CFR Part 20 (§§ 20.104 through 20.107 and 20.109) to reflect seasons, limits and shooting hours for the conterminous United States for the 1987–88 season.

The Service therefore finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and these frameworks will, therefore, take effect immediately upon publication.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

The rules that eventually will be promulgated for the 1987–88 hunting season are authorized under the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 701–708h); the Fish and Wildlife Improvement Act of 1978 (92 Stat. 3112; 16 U.S.C. 712); and the Alaska Game Act of 1925 (43 Stat. 739; as amended, 54 Stat. 1103–04).

Final Regulations Frameworks for 1987–88 Late Hunting Seasons on Certain Migratory Game Birds

Pursuant to the Migratory Bird Treaty Act, the Secretary of the Interior has approved final frameworks for season lengths, shooting hours, bag and possession limits and outside dates within which California may select seasons for hunting waterfowl and coots. Frameworks are summarized below.

Pacific Flyway

The Pacific Flyway includes Arizona, California, Colorado (west of the Continental Divide), Idaho, Montana (including and to the west of Hill, Chouteau, Cascade, Meagher and Park Counties), Nevada, New Mexico (the Jicarilla Apache Indian Reservation and west of the Continental Divide), Oregon, Utah, Washington and Wyoming (west of the Continental Divide including the Great Divide Basin).

Ducks, Coots, Common Moorhens, and Common Snipe

Outside dates: Between October 3, 1987, and January 10, 1988.

Hunting seasons: Seasons may be split into two segments. Concurrent 79-day seasons on ducks (including mergansers), coots, common moorhens (gallinules) and common snipe may be selected except as subsequently noted.

Duck limits: The basic daily bag limit is 5 ducks, including no more than 4 mallards but only 1 female mallard, 4 pintails but only 1 female pintail, and either 2 canvasbacks or 2 redheads or 1 of each. The possession limit is twice the daily bag limit.

Coot and common moorhen (gallinule) limits: The daily bag and possession limit of coots and common moorhens is 25 singly or in the aggregate.

Common snipe limits: The daily bag and possession limit of common snipe is 8 and 16, respectively.

California—waterfowl zones: Season dates for the Colorado River Zone of California must coincide with season dates selected by Arizona. Season dates for the Northeastern and Southern Zones of California may differ from those in the remainder of the State.

Geese (Including Brant)

Outside dates, season lengths and limits on geese (including brant): Seasons may be split into two segments. Between October 3, 1987, and January 17, 1988, a 93-day season on geese (except brant) may be selected, except as subsequently noted. The basic daily bag and possession limit is 6, provided that the daily bag limit includes no more than 3 white geese (snow, including blue, and Ross' geese) and 3 dark geese (all other species of geese). Between October 3, 1987, and January 10, 1988, California may select an open season for brant with daily bag and possession limits of 2 and 4 brant, respectively. The brant season may not exceed 30 consecutive days in California and must run concurrent with the duck season.

Aleutian Canada goose closure: There will be no open season on Aleutian Canada geese. Emergency closures may be invoked for all Canada geese should Aleutian Canada goose distribution patterns or other circumstances justify such actions.

California—cackling Canada goose closure: There will be no open season on the cackling Canada geese in California.

California—Canada goose and dark goose closures: Three areas in California, described as follows, are restricted in the hunting of certain geese:

(1) In the counties of Del Norte and Humboldt there will be no open season for Canada geese.

(2) In the Sacramento Valley in that area bounded by a line beginning at Willows in Glenn County proceeding south on Interstate Highway 5 to the junction with Hahn Road north of Arbuckle in Colusa County; then easterly on Hahn Road and the Grimes-Arbuckle Road to Grimes on the Sacramento River; then Southerly on the Sacramento River to the Tisdale By-pass; then easterly on the Tisdale By-pass to where it meets O'Banion Road; then easterly on O'Banion Road to State Highway 99; then northerly on State Highway 99 to its junction with the Gridley-Colusa Highway in Gridley in Butte County; then westerly on the Gridley-Colusa Highway to its junction with the River Road; then northerly on the River Road to the Princeton Ferry; then westerly agross the Sacramento River to State Highway 45; then northerly on State Highway 45 to its junction with State Highway 162; then continuing northerly on State Highway 45–162 to Glenn; then westerly on State Highway 162 to the point of beginning in Willows, there will be no open season for Canada geese. In this area, the season on dark geese must end on or before November 30, 1987.

(3) In the San Joaquin Valley in that area bounded by a line beginning at Modesto in Stanislaus County proceeding west on State Highway 132 to the junction of Interstate Highway 5; then southerly on Interstate Highway 5 to the junction of State Highway 152 in Merced County; then easterly on State Highway 152 to the junction of State Highway 59; then northerly on State Highway 59 to the junction of State Highway 99 at Merced; then northerly and westerly on State Highway 99 to the point of beginning; the hunting season for Canada geese will close no later than November 23, 1987.

California (Northeastern Zone)—geese: In the Northeastern Zone of California the season may be from October 10, 1987, to January 10, 1988, except that white-fronted geese may be taken only during October 10 to

November 1, 1987. Limits will be 3 geese per day and 6 in possession, of which not more than 1 white-fronted goose or 2 Canada geese shall be in the daily limit and not more than 2 white-fronted geese and 4 Canada geese shall be in possession.

California (balance of the state zone)—geese: In the Balance of the State Zone the season may be from October 31, 1987, through January 17, 1988, except that white-fronted geese may be taken only during October 31, 1987, to January 3, 1988. Limits shall be 3 geese per day and in possession, of which not more than 1 may be a dark goose. The dark goose limits may be expanded to 2 provided that they are Canada geese (except Aleutian and cackling Canada geese for which the season is closed).

California: In California, the Colorado River Zone where the season must be the same as that selected by Arizona and the Southern Zone, the season for Canada may be no more than 86 days. The daily bag and possession limit is 2 Canada geese except in that portion of California Department of Fish and Game District 22 within the Southern Zone (i.e. Imperial Valley) where the daily bag and possession limits for Canada geese are 1 and 2, respectively.

Date: September 30, 1987.

William P. Horn.

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-55-M

---

50 CFR Part 20

Migratory Bird Hunting; Late Seasons, and Bag and Possession Limits for Certain Migratory Birds in the United States; California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule amendment.

SUMMARY: This rule prescribes the late open seasons, hunting hours, hunting areas, and daily bag and possession limits for general waterfowl and coot hunting seasons in those areas of California designated for nontoxic shot use as described in the July 21, 1987, **Federal Register** (52 FR 27368).

DATE: Effective on October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC 20240. Phone (202) 254-3207.

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918, (40 Stat. 755; 16 U.S.C. 703 *et seq.*), as amended, authorizes and directs the Secretary of the Interior, having due regard for the zone of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported or transported.

On January 15, 1987, and July 21, 1987, the U.S. Fish and Wildife Service (hereinafter the Service) published purposed and final rules, respectively, in the **Federal Register** (52 FR 1636 and 27352, respectively) describing zones in which the use of lead shot is prohibited for hunting waterfowl, coots and certain other species in the 1987–88 season. In both documents the Service gave notice that if States do not approve nontoxic shot zones when current Service guidelines and criteria indicate that such zones are necessary to protect migratory birds, the Service will not open the areas to waterfowl and coot hunting.

On September 18, 1987, the Service published final late-season frameworks in the **Federal Register** (52 FR 35248) from which States may select season dates, limits and other options for the 1987–88 migratory bird hunting season. However, because California had withdrawn its approval of the nontoxic shot areas, as described in the July 21, 1987, **Federal Register**, the final frameworks did not authorize the hunting of waterfowl and coots in those areas.

On September 29, 1987, the Service published in the **Federal Register** (52 FR 36496) seasons, limits and shooting hours for waterfowl and certain other migratory game birds. In § 20.105 (at 52 FR 36530) the entry for seasons, limits and shooting hours for waterfowl and coots in California was accompanied by a footnote (i.e., footnote (2)) that indicated no hunting of waterfowl and coots is authorized in those areas of California designated for nontoxic shot use as described in the July 21, 1987, **Federal Register** (52 FR 27368).

On September 29, 1987, California approved the areas designated for nontoxic shot use. The Service therefore has published a final rule elsewhere in this issue of the **Federal Register** that establishes final frameworks for waterfowl and coot hunting regulations for the 1987–88 season in those areas of California.

This document serves to establish the open seasons, hunting hours, hunting areas, and daily bag and possession limits for waterfowl and coot hunting in those areas of California designated for nontoxic shot use as described in the July 21, 1987, **Federal Register** (52 FR 27368). The entry for seasons, limits and shooting hours for waterfowl and coots in California in § 20.105 of the September 29, 1987, **Federal Register** (at 52 FR 36496) is now applicable to the areas of California designated for nontoxic shot use, and the accompanying footnote is removed.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council of Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975, (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement. Copies of the environmental assessments are available from the Service at the address indicated under the caption ADDRESS. As noted in the March 13, 1987, **Federal Register** (52 FR 7905), the Service is preparing a Supplemental Environmental Impact Statement (SEIS) on the FES. A draft SEIS will be available in early October.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act" [and shall] "insure that any action authorized, funded, or carried out * * * is not likely to jeopardize the continued existence of such endangered or threatened species or result in the destruction or adverse modification of [critical] habitat * * *" The Service therefore initiated section 7 consultation under the Endangered Species Act for the proposed hunting season frameworks.

On June 15, 1987, the Office of Endangered Species gave a biological opinion that the proposed action was not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of their critical habitats.

As in the past, hunting regulations this year are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species.

The Service's biological opinion resulting from its consultation under section 7 is considered a public document and is available for public inspection in or available from the Office of Endangered Species and the Office of Migratory Bird Management, Department of the Interior, Washington, DC.

Regulatory Flexibility Act, Executive Order 12291 and the Paperwork Reduction Act

In the **Federal Register** dated March 13, 1987, (52 FR 7900), the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing a Determination of Effects and an updated Final Regulatory Impact Analysis, and publication of a summary of the latter. These regulations have been determined to be major under Executive Order 12291 and they have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act. This determination is detailed in the aforementioned documents which are available upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240. These final regulations contain no information collections subject to Office of Management and Budget review under the Paperwork Reduction Act.

Memorandum of Law

The Service published its Memorandum of Law, required by section 4 of Executive Order 12291, in the **Federal Register** dated August 3, 1987 (52 FR 28717).

Authorship

The primary author of this final rule is Morton M. Smith, Office of Migratory Bird Management, working under the direction of Rollin D. Sparrowe, Chief.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

PART 20—[AMENDED]

For the reasons set out in the preamble, Title 50, Chapter I, Subchapter B, Part 20, Subpart K, § 20.105 is amended as follows:

1. The authority citation for Part 20 continues to read as follows:

Authority: Migratory Bird Treaty Act, sec. 3, Pub. L. 65–186, 40 Stat. 755 (16 U.S.C. 701–708h); sec. 3(h), Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712); Alaska Game Act of 1925, 43 Stat. 739, as amended, 54 Stat. 1103–04.

Note: The annual hunting regulations provided for in § 20.104, 20.105, 20.106, 20.107 and 20.109 of 50 CFR Part 20 will not appear in the Code of Federal Regulations because of their seasonal nature.

§ 20.105 [Amended]

2. The Service amends § 20.105 of 50 CFR Part 20 at 52 FR 35248 and 52 FR 36496 by removing footnote (2) for California.

Date: September 30, 1987.

William P. Horn,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–55–M

---

50 CFR Part 20

Migratory Bird Hunting: Zones in Which Lead Shot Will Be Prohibited for the Taking of Waterfowl, Coots and Certain Other Species in the 1987–88 Hunting Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule amendment.

SUMMARY: This final rule amendment describes zones, in which the use of lead shot is prohibited for hunting waterfowl, coots and certain other species in the 1987–88 season, that were omitted from the rulemaking dated Tuesday, July 21, 1987 (52 FR 27352). The zones described below for the State of Washington consist of (1) the same areas that were already identified as nontoxic shot zones for waterfowl and coot hunting in § 20.108 of Title 50 of the Code of Federal Regulations (50 CFR) for the 1986–87 hunting season and (2) the added counties identified for 1987–88 in Appendix N of the Final Supplemental Environmental Impact Statement on the Use of Lead Shot for Hunting Migratory Birds in the United States (see Table 1 in 52 FR 27352 Supplementary Information).

EFFECTIVE DATE: October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. and Wildlife Service, Room 536, Matomic Building, Washington, DC 20240 (202/254–3207).

SUPPLEMENTARY INFORMATION: Since 1978, the Fish and Wildlife Service (FWS) has not been able to implement or enforce nontoxic shot zones in a State without approval of the appropriate State authorities. This restriction on use of funds by the FWS has been contained in the appropriations act for the Department of the Interior each year since 1978 (see, e.g., Pub. L. 98–473, sec. 305; Pub. L. 99–190, sec. 313; Pub. L. 99–591, sec. 317). As a consequence of this restriction, the FWS can only implement and enforce nontoxic shot zones for waterfowl and coot hunting with the approval of State authorities. If States do not approve nontoxic shot zones when current FWS guidelines and criteria indicate that such zones are necessary to protect migratory birds, the FWS will not open the areas to waterfowl and coot hunting. This action is taken pursuant to the FWS' responsibilities under the Migratory Bird Treaty Act, as amended (16 U.S.C. 703 *et seq.*; 40 Stat. 755) and, in the case of zones established for bald eagle protection, the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 through 1543; 87 Stat. 884), the Bald and Golden Eagle Protection Act of 1940, as amended (16 U.S.C. 668 through 668d; 54 Stat. 250).

At the time that the parent rule for this amendment was published (referenced above) the State of Washington had not yet responded positively to the proposed rulemaking published Thursday, January 15, 1987 (52 FR 1636). This proposed rulemaking requested consent for the Service to implement and enforce nontoxic shot zones in Washington. (The background for this issue is given at 52 FR 27362.) Thus, in compliance with the Stevens amendment requirements and the Migratory Bird Treaty Act, the FWS advised the State of Washington in the July 21, 1987, final rule that "* * * nontoxic shot zones described for the State of Washington * * * will not be opened to waterfowl hunting in the 1987–88 waterfowl hunting season, barring timely consent to implement and enforce steel shot regulations." Subsequently, the Washington Department of Game was able to provide the required consent and the FWS is in this rulemaking, publishing the descriptions of Washington nontoxic shot zones. This consent serves to have nullified the FWS' intent to not open Washington waterfowl seasons in nontoxic shot zones as stated in the proposed rulemaking on frameworks for late season migratory bird hunting regulations published on Friday, August 14, 1987 (52 FR 30395), and allows opening those nontoxic shot areas to waterfowl hunting in the 1987–88 season. The final rule on late season frameworks that will effect an open season for Washington in these nontoxic shot zones and elsewhere is expected to

be published in mid- to late-September 1987.

Economic Effect

Executive Order 12291, "Federal Regulations," of February 17, 1981, requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which includes small businesses, organizations and/or government jurisdictions.

In accordance with Executive Order 12291, a determination has been made that this rule is not a major rule. In accordance with the Regulatory Flexibility Act, a determination has been made that this rule, if implemented without adequate notice, could result in lead shot ammunition supplies for which there would be no local demand. Conversely, nontoxic shot zones could conceivably be established where little or no nontoxic shot ammunition would be available to hunters. The Service believes, however, that adequate notice has been provided and that sufficient supplies of nontoxic shot ammunition will be available to hunters. Therefore, this rule would not have a significant economic effect on a substantial number of small entities.

Paperwork Reduction Act

This rule will not result in the collection of information from, or place recordkeeping requirements on, the public under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Environmental Considerations

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), a Final Environmental Statement (FES) on the use of steel shot for hunting waterfowl in the United States was published in 1976. As stated above, a supplement to the FES was completed in June 1986. In this supplement, pursuant to the Endangered Species Act, a section 7 consultation was done on the potential impacts of the provisions of this rule on bald eagles. The section 7 opinion concluded that implementation of the preferred alternative would not be likely to jeopardize the continued existence of the bald eagle.

Authorship

The primary author of this rule is Keith A. Morehouse, Office of Migratory Bird Management, working under the direction of Rollin D. Sparrowe, Chief.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

Accordingly, Part 20, Subpart B, Chapter I of Title 50 of the *Code of Federal Regulations* is amended as follows:

PART 20—[AMENDED]

1. The authority citation for Part 20 continues to read as follows:

Authority: Migratory Bird Treaty Act, sec. 3, Pub. L. 65–186, 40 Stat. 755 (16 U.S.C. 701–708h); sec. 3(h), Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712); Alaska Game Act of 1925, 43 Stat. 739, as amended, 54 Stat. 1103–04, unless otherwise noted.

2. Section 20.108 is amended by adding the Washington description under the Pacific Flyway to read as follows (the introductory paragraph is being republished):

§ 20.108 Nontoxic shot zones.

The areas described within the States indicated below are designated for the purpose of § 20.21(j) as nontoxic shot zones for hunting waterfowl, coots and certain other species.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 217 and 227

[Docket No. 70227–7207]

Sea Turtle Conservation; Shrimp Trawling Requirements

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: The Secretary of Commerce issues this final rule to implement a technical amendment to the regulations requiring shrimp trawlers in the Gulf of Mexico and the Atlantic Ocean off the Southeastern United States to use measures to reduce the incidental catch and mortality of sea turtles in shrimp trawls. This rule changes the definitions of "inshore" and "offshore" to more

clearly delineate the two areas, and adds an additional "soft" turtle excluder device (TED) to the approved TEDs. The intended effect is to clarify the regulations and to increase the options of fishermen required to use TEDs.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Charles A. Oravetz, 813–893–3366, Charles Karnella, 202–673–5349, or David Cottingham, 202–377–5181.

SUPPLEMENTARY INFORMATION:

a. Background

The Secretary of Commerce issued a final rule on June 29, 1987 (52 FR 24244) which requires shrimp trawlers 25 feet and longer to use qualified turtle excluder devices (TEDs) in certain offshore waters of the Southeastern United States during certain times of the year and to limit trawl tow times to 90 minutes (or use TEDs) in inshore waters during these same times. Shrimp trawlers less than 25 feet in length are required to limit trawl tow times to 90 minutes in inshore and offshore waters during certain times.

The final rule was designed to reduce the incidental catch and mortality of sea turtles in shrimp trawls. The rule allows the use of four types of TEDs. It also contains a provision for qualification of new TEDs if these TEDs are tested according to procedures specified in the rule and found to be 97 percent effective in releasing sea turtles from trawls.

b. Soft TED Testing

In June 1987, the University of Georgia Sea Grant program tested three soft (i.e., made of flexible material) TEDs in the Cape Canaveral, Florida, Navigation Channel. The tests were conducted under NMFS supervision according to a research protocol developed by the NMFS. Of the three soft TEDs tested, one was found to effectively release sea turtles.

This TED, commonly called the Morrison soft TED or the Morrison TED, is a one or three piece webbing panel that is inserted inside a shrimp trawl at approximately a 25 degree angle from the horizontal when the trawl is deployed. One or three panels are used depending on the configuration of the trawl. Turtles are released through a 56–60 inch long opening in the top of the trawl. The Morrison TED is constructed of number 42 (3 millimeters) polypropylene webbing with 8 inch meshes (stretched measure). The main panel and side panels (jibs) can be modified in size depending on the size and design of the trawl used.

During the Canaveral testing in 15 forty-five minute tows, the trawl equipped with the Morrison soft TED did not catch any turtles but the control trawl (without a TED) caught 42 turtles. These catch rates satisfied the requirements for a 97 percent turtle exclusion rate at the 90 percent confidence level.

Based on the performance at Canaveral, Georgia Sea Grant and NMFS gear specialists believe the reason that the Morrison soft TED worked while other very similar devices did not work well is that the exit opening for the Morrison TED is an open slit in the webbing whereas the opening for other TEDs was covered by a webbing flap. Additionally, the arrangement of the meshes in a diamond pattern and at a shallow angle reduces the likelihood of turtles becoming entangled in the webbing.

Shrimp trawls are generally constructed of nylon twine and dipped in a preservative to prolong life. Net dips are usually green, black or blue in color. The polypropylene used in the Morrison TED is colored blue, light green or orange. If the Morrison TED is installed in the trawl before dipping it will to some degree take on the same color as the trawl and be difficult to distinguish from the trawl.

These rules require that the Morrison soft TED be constructed of untreated number 42 (3 millimeters thick) or larger braided or heat-set knotted polypropylene of a different color from the trawl, e.g., orange/green; green/black; blue/green; orange/blue; green/blue.

c. Inshore and Offshore Definition

In the final rule, "Inshore" was defined as marine or tidal waters landward of the baseline from which the territorial sea of the United States is measured and marine or tidal waters on the mainland side of any baseline on offshore islands. "Offshore" was defined as waters seaward of the baseline from which the territorial sea of the United States is measured.

These definitions left doubt as to the closing lines across passes such as at Mississippi, Breton, and Chandeleur Sounds in the northern Gulf of Mexico. To eliminate this confusion this rule defines Offshore and Inshore using the 72 COLREGS (International Regulations for Preventing Collisions at Sea, 1972) demarcation line. This line is depicted or noted on NOAA Coast Charts of 1:80.000 scale for the Atlantic and Gulf of Mexico and is described in 33 CFR Part 80. Most shrimpers affected by these regulations use NOAA nautical charts for navigation. The 72 COLREGS demarcation line is slightly less restrictive than the baseline demarcation and will assist shrimpers in more readily identifying areas where restrictions apply.

Classification

This action is in compliance with Executive Order 12291. Notice and comment on this final rule are unnecessary and contrary to the public interest because it makes no significant change in the boundaries of "inshore" and "offshore", but it merely reduces slightly the area where TEDs are required and provides more convenient delineation. It would be contrary to the public interest to delay the effect of this technical amendment beyond the effective date of the rule it amends (52 FR 24244). Delayed effectiveness is not required because this technical amendment relieves a restriction.

Addition of the Morrison soft TED gives the public notice that it has passed the test and may be used lawfully.

As no statute requires notice and comment on this final rule, it is not subject to the Regulatory Flexibility Act requirement for a regulatory flexibility analysis and none has been prepared.

The rule does not contain a collection-of-information requirement for purpose of the Paperwork Reduction Act.

List of Subjects in 50 CFR Parts 217 and 227

Endangered species, Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: Sepember 30, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the the reasons set out in the preamble, 50 CFR Parts 217 and 227 are amended as follows:

PART 217—GENERAL PROVISIONS

1. The authority citation for Part 217 continues to read as follows:

Authority: 16 U.S.C. 1521–1543 and 16 U.S.C. 742a *et seq.*

2. In § 217.12, the definitions for *"Inshore"* and *"Offshore"* are revised to read as follows:

§ 217.12 Definitions.

* * * * *

"Inshore" means marine and tidal waters landward of the 72 COLREGS demarcation line (International Regulations for Preventing Collisions at Sea, 1972), as depicted or noted on nautical charts published by the National Oceanic and Atmospheric Administration (Coast Charts, 1:80.000 scale) and as described in 33 CFR Part 80.

* * * * *

"Offshore" means marine and tidal waters seaward of the 72 COLREGS demarcation line (International Regulations for Preventing Collisions at Sea, 1972), as depicted or noted on nautical charts published by the National Oceanic and Atmospheric Administration (Coast Charts, 1:80,000 scale) and as described in 33 CFR Part 80.

* * * * *

PART 227—THREATENED FISH AND WILDLIFE

3. The authority citation for Part 227 continues to read as follows:

Authority: 16 U.S.C. 1531 *et seq.*

4. In § 227.72, a new paragraph (e)(4)(ii)(E) is added to read as follows:

§ 227.72 Exceptions to prohibitions.

* * * * *

(e) * * *

(4) * * *

(ii) * * *

(E) *Morrison TED (Figure 5).* In the Morrison TED, webbing is substituted for the rigid deflector grids used in the TEDs described above. The webbing consists of number 42 (3 millimeters thick) or larger polypropylene, heat-set knotted or braided. The polypropylene must be untreated and of a color easily distinguished from the trawl net. The stretched opening of the mesh may not exceed 8". Depending on the trawl net type, the webbing may be installed as one panel or as a main and two side (jib) panels (Figure 6). In either case, the webbing must form a complete barrier to large objects inside the trawl net forward of the cod end. The base of the webbing must be attached to the trawl net not less than 16'8" forward of the point at which the cod end is attached to the trawl net. The apex of the webbing must be attached to the top center of the trawl net not more than 20" forward of the point at which the cod end is attached to the trawl net. Each point on the circumference of the webbing must be attached to the trawl net. The meshes of the webbing must be under tension when the cod end is pulled aft thus forming diamond patterns pointing toward the top of the trawl net. As an escape hole, a slit at least 4'8" in length must be cut in a fore and aft direction at the top of the trawl net immediately forward of the apex of the webbing. The slit may not be covered or closed in any manner.

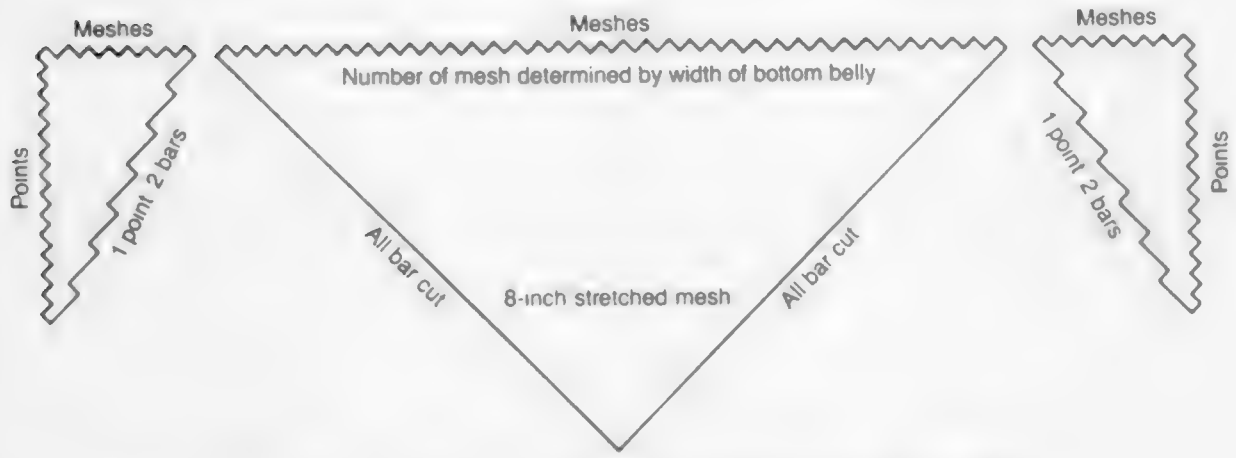

Figure 6 SCHEMATIC EXAMPLE OF MORRISON TED'S MAIN PANEL & JIBS

[FR Doc. 87-22971 Filed 10-1-87; 10:08 am]

BILLING CODE 3510-22-C

50 CFR Part 267

[Docket No. 40556-7063]

United States Standards for Grades of North American Freshwater Catfish and Products Made Therefrom

AGENCY: National Marine Fisheries Service, (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to establish grading standards for North American catfish and products made therefrom. These Standards for Grades provide a system to classify North American catfish and products made therefrom by quality into three U.S. Grade categories, A, B, and C. The intended effect is to permit identification of such quality levels on the product or product label for the benefit of the consumer and the industry. These Standards for Grades are intended to be used in a voluntary program of fishery products inspection and certification by NMFS.

EFFECTIVE DATES: The regulation is effective November 4, 1987. The incorporation by reference of the publications listed in the regulation is approved by the Director of the Federal Register as of November 4, 1987.

FOR FURTHER INFORMATION CONTACT: Tom Moreau, Technical Services Unit, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Emerson Avenue, Jones-Hunt Building, Gloucester, MA 01930, Phone 617-281-3600, ext. 319.

SUPPLEMENTARY INFORMATION: These Standards for Grades provide a system for Federal and State inspectors to classify North American catfish and products made therefrom by quality into three U.S. Grade categories (i.e., A, B, and C) and allow identification of the product quality level for the benefit of the consumer and the industry.

These Standards for Grades are expected to facilitate trade in North American freshwater catfish and products made therefrom. They will allow consumers to select purchases of a greater variety of products on the basis of identified quality.

These Standards for Grades were published as an interim rule with request for comments in the **Federal Register**, Thursday, July 5, 1984, 49 FR 27514. Two corrections were published September 24, 1984, 49 FR 37423. No formal comments were received in response to these notices. These Standards for Grades were used to examine over 2,000 sample units of various catfish products before August 1985. The results indicate that these Standards for Grades are workable without major alteration. Some editorial changes have been made to increase their readability. For example, reference is made to the Fourteenth edition (1984) of "Official Methods of Analysis" of the Association of Official Analytical Chemists instead of the Thirteenth edition (1980).

Because of the high level of interest expressed for the availability of these standards, the NMFS intends to use them in its voluntary program of fishery products inspection and certification.

Classification

The NOAA Administrator has reviewed this final rule in accordance with Executive Order 12291 and has determined that it is not a "major rule" since promulgation of these voluntary Standards for Grades will have no significant adverse effect on the economy, costs or prices, and no impact on competition, employment, investment or productivity. Accordingly, a regulatory impact analysis is not required.

The General Counsel certified that this rule will not have a significant economic impact on a substantial number of small entities because this rule applies to voluntary participants in the seafood inspection and grading program. As a result, a regulatory flexibility analysis was not prepared.

This contains no information collection requirements as defined by the Paperwork Reduction Act.

The Department has determined that this regulation will not significantly affect the quality of the human environment so therefore no draft or final Environmental Impact Statement was prepared.

The Department has determined that this final rule does not directly affect the coastal zone of any State with an approved coastal zone management program.

List of Subjects in 50 CFR Part 267

Food grades and standards, Seafood, Incorporation by Reference.

Dated: September 29, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the reasons set forth in the preamble, a new Part 267 is added to Chapter II of 50 CFR as follows:

PART 267—UNITED STATES STANDARDS FOR GRADES OF NORTH AMERICAN FRESHWATER CATFISH AND PRODUCTS MADE THEREFROM

Sec.

267.101 Scope and product description.
267.102 Product presentation.
267.103 Grades.
267.104 Grade determination.
267.105 Tolerances for lot certification.
267.106 Hygiene.
267.107 Methods of analysis.
Table 1—Defect Table

Authority: 16 U.S.C. 742e; 7 U.S.C. 1622, 1624

§ 267.101 Scope and product description.

(a) These U.S. Standards for Grades apply to products derived from farm-raised, or from rivers and lakes, North American freshwater catfish of the following common commercial species and hybrids thereof:

(1) Channel catfish (*Ictalurus punctatus*)
(2) White catfish (*Ictalurus catus*)
(3) Blue catfish (*Ictalurus furcatus*)
(4) Flathead catfish (*Pylodictis olivaris*)

(b) Fresh products will be packaged in accordance with good commercial practices and maintained at temperatures necessary for the preservation of the product. Frozen products will be frozen to 0°F (−18°C) at their center (thermal core) in accordance with good commercial practices and maintained at termperatures of ° F (−18° C) or less.

(c) These Standards for Grades will be implemented in accordance with the guidance set forth in Part II of NOAA Handbook 25, "Inspectors Instructions for Grading North American Freshwater Catfish and Products Made Therefrom".

§ 267.102 Product presentation.

Catfish products may be presented and labeled as follows:

(a) Types;
(1) Fresh, or
(2) Frozen.
(b) Styles;
(1) Skin on, or
(2) Skinless.

(c) Market forms include but are not limited to the following:

(1) Headed and gutted.

(2) Headed and dressed are headed and gutted usually with fins removed. This form may be presented with or without the dorsal spine and with or without the collar bone.

(3) Whole fillets are practically boneless pieces of fish cut parallel to the entire length of the backbone with the belly flaps and with or without the black membrane.

(4) Trimmed fillets are whole fillets without belly flaps.

(5) Fillet strips are strips of fillets weighing not less than ¾ ounce.

(6) Steaks are units of fish not less than 1½ ounces in weight which are sawn or cut approximately perpendicular (30 degrees to 90 degrees) to the axial length or backbone. They have two reasonably parallel surfaces. The number of tail sections that may be included in the package must not exceed the number of fish cut per package).

(7) Nuggets are pieces of belly flaps with or without black membrane and weighing not less than ¾ ounce.

§ 267.103 Grades.

(a) U.S. Grade A fresh or frozen products will possess good flavor and odor and be within the limits specified for defects for U.S. Grade A quality in § 267.104 of this part.

(b) U.S. Grade B fresh or frozen products will possess reasonably good flavor and odor and be within the limits specified for defects for U.S. Grade B quality in § 267.104 of this part.

(c) U.S. Grade C fresh or frozen products will possess reasonably good flavor and odor and be within the limits specified for defects for U.S Grade C quality in § 267.104 of this part.

§ 267.104 Grade determination.

(a) *Procedures for grade determination.* The grade will be determined by evaluating the fresh product in the fresh and cooked states or the frozen product in the frozen, thawed, and cooked states in accordance with applicable paragraphs in this section.

(b) *Sampling.* Lot size, number of sample units, and acceptance numbers will be selected in accordance with § 260.61 of this chapter, Tables II, V, or VI as applicable. A sample unit consists of 10 "portions" for market forms (1) and (2) as defined in § 267.102(c) of this part, or at least 2 pounds of "portions" for market forms (3) through (7). "Portion" is one unit of any of the market forms.

(c) *Evaluation of flavor and odor.*—(1) *Definition of flavor and odor* (i) Good flavor and odor (minimum requirements for a Grade A product) mean that the product has the normal, pleasant flavor and odor characteristics of the species, and it is free from off-odors and off-flavors of any kind.

(ii) Reasonably good flavor and odor (minimum requirements of Grade B and Grade C products) mean that the product may be somewhat lacking in good flavor and odor characteristics of the species but it is free from objectionable off-odors and off-flavors of any kind.

(2) *Procedure.* For raw odor evaluation, frozen portions are thawed. Fresh or thawed portions are broken apart and the exposed flesh immediately held close to the nose to detect any off-odors. To evaluate cooked flavor and odor, cook the sample units using the procedure referenced in § 267.107 of this part.

(d) *Examination for physical defects.* Each sample unit will be examined for physical defects using the defect definitions that follow. Deduction points are assigned in accordance with Table I.

(1) *Dehydration* applies to all frozen market forms. It refers to the loss of moisture from the surface resulting in a whitish, dry, or porous condition:

(i) *Slight:* surface dehydration which is not color masking (readily removed by scraping) and affecting 3 to 10 percent of the surface area.

(ii) *Moderate*: deep dehydration which is color masking, cannot be scraped off easily with a sharp instrument, and affects more than one percent but not more than 10 percent of the surface area.

(iii) *Excessive*: deep dehydration which is color masking, and cannot be easily scraped off with a sharp instrument and affects more than 10 percent of the surface area.

(2) *Condition of the product* applies to all market forms. It refers to freedom from packaging defects, cracks in the surface of a frozen product, and excess moisture (drip) or blood inside the package. Deduction points are based on the degree of this defect.

(i) Slight refers to a condition that is scarcely noticeable but that does not affect the appearance, desirability or eating quality of the product.

(ii) Moderate refers to a condition that is conspicuously noticeable but that does not seriously affect the appearance, desirability, or eating quality of the product.

(iii) Excessive refers to a condition that is conspicuously noticeable and that does seriously affect the appearance, desirability or eating quality of the product.

(3) *Discoloration* applies to all market forms. It refers to colors not normal to the species. This may be due to mishandling or the presence of blood, bile, or other substances.

(i) *Slight:* 1/16 square inch up to and including one square inch in aggregate area.

(ii) *Moderate:* greater than one square inch up to and including 2 square inches in aggregate area.

(iii) *Excessive:* over 2 square inches in aggregate area. Also, each additional complete one square inch is again assessed points under this category.

(4) *Uniformity* applies to size or weight controlled products. It refers to the degree of uniformity of the weights of the portions in the container. It is obtained by weighing individual portions to determine their conformity to declared weights. Uniformity will be assigned in accordance with weight tolerances as follows:

Weight of portion
0.75 to 4.16 ounces
Moderate: Over ⅛ ounce but not over ¼ ounce above or below declared weight of portion
Excessive: In excess of ¼ ounce above or below declared weight of portion
4.17 to 11.20 ounces
Moderate: Over ⅛ ounce but not over ½ ounce above or below declared weight of portion
Excessive: In excess of ½ ounce above or below declared weight of portion
11.21 to 17.30 ounces
Moderate: Over ⅛ ounce but not over ¾ ounce above or below declared weight of portion
Excessive: In excess of ¾ ounce above or below declared weight of portion

(5) *Skinning cuts* apply to skinless market forms. It refers to improper cuts made during the skinning operation as evidenced by torn or ragged surfaces or edges, or gouges in the flesh which detract from a good appearance of the product.

(i) *Slight:* 1/16 square inch up to and including 1 square inch in aggregate area.

(ii) *Moderate:* Over one square inch up to and including 2 square inches in aggregate area.

(iii) *Excessive:* Over 2 square inches in aggregate area. Also, each additional complete one square inch is again assessed points under this category.

(6) *Heading* applies to market forms (1) and (2) is defined in § 267.102(c) of this part. It refers to the presence of ragged cuts or pieces of gills, gill cover, pectoral fins or collar bone after heading. Deduction points also will be assigned when the product is presented with the collar bone and it has been completely or partially removed.

(i) *Slight:* 1/16 square inch up to and including one square inch in aggregate area.

(ii) *Moderate:* Over one square inch up to and including 2 square inches in aggregate area.

(iii) *Excessive:* Over 2 square inches in aggregate area. Also, each additional complete one square inch is again assessed points under this category.

(7) *Evisceration* applies to all market forms. It refers to the proper removal of viscera, kidney, spawn, blood, reproductive organs, and abnormal fat

(leaf). The evisceration cut should be smooth and clean. Deduction points are based on the degree of defect.

(i) *Slight:* 1/16 square inch up to and including 1 square inch in aggregate area.

(ii) *Moderate:* Over 1 square inch up to and including 2 square inches in aggregate area.

(iii) *Excessive:* Over 2 square inches in aggregate area. Also, each additional complete one square inch is again assessed points under this category.

(8) *Fins* refer to the presence of fins, pieces of fins or dorsal spines. It applies to all market forms except headed and gutted or headed and dressed catfish or catfish steaks. Deduction points also will be assigned when the product is intended to have the dorsal spine but it has been completely or partially removed.

(i) *Slight:* Aggregage area up to including one square inch.

(ii) *Moderate:* Over one square inch area up to and including 2 square inches.

(iii) *Excessive:* Over 2 square inches in aggregate area. Also, each additional complete one square inch is again assessed points under this category.

(9) *Bones* (including pin bone) apply to all fillet and nugget market forms. Each bone defect is a bone or part of a bone that is 3/16 inch or more at its maximum length *or* 1/32 inch or more at its maximum shaft width, or for bone chips, a length of at least 1/16 inch. An excessive bone defect is any bone which *cannot* be fitted into a rectangle, which has a length of 1 9/16 inch and a width of 3/8 inch.

(10) *Skin* refers to the presence of skin on skinless market forms. For semi-skinned forms, a skin defect is the presence of the darkly pigmented outside layers. Points will be assessed for each aggregate area greater than 1/2 square inch up to and including one square inch.

(11) *Bloodspots* refer to the presence of coagulated blood. *Bruises* refer to softening and discoloration of the flesh. Both bloodspots and bruises apply to all market forms. Points will be assessed for each aggregate area of bloodspots or bruises greater than 1/2 square inch up to and including one square inch.

(12) *Foreign material* refers to any extraneous material, including packaging material, not derived from the fish that is found on or in the sample. Each occurrence will be assessed.

(13) *Texture* applies to all market forms and refers to the presence of normal texture properties of the cooked fish flesh, i.e., tender, firm, and moist without excess water. Texture defects are described as dry, tough, mushy, rubbery, watery, and stringy.

(i) *Moderate:* Noticeably dry, tough, mushy, rubbery, watery, stringy.

(ii) *Excessive:* Markedly dry, tough, mushy, rubbery, watery, stringy.

(e) *Listing defect points.* Each sample unit is examined for physical defects, using the list of definitions given in this section. The point deductions for defects are listed for each sample unit, and the point values totaled. The total of the defect points determines the sample unit grade. The scoring system is based on a perfect score of zero.

(f) *Grade assignment.* Each sample unit will be assigned a grade in accordance with the limits for defects summarized as follows:

Grade assignment	Flavor and odor	Maximum number of defect points
U.S. Grade A	Good	15
U.S. Grade B	Reasonably Good	30
U.S. Grade C	Reasonably Good	40

If a sample unit has been assigned a grade for flavor and odor different than the grade indicated by the number of defect points, the sample unit grade will be the lower grade.

TABLE I.—DEFECT TABLE SCHEDULE OF POINT DEDUCTIONS OF NORTH AMERICAN FRESHWATER CATFISH AND PRODUCTS MADE THEREFROM

[Per sample unit unless otherwise indicated]

Scored factors	Degree of quality variation	Point value
Frozen Products		
(1) Dehydration:		
Each occurrence affecting 3 to 10% of surface area but readily removed by scraping.	Slight	5
Affecting more than 1% but not more than 10% of surface area and cannot be easily removed by scraping	Moderate	16
Affecting more than 10% of surface area and cannot be easily removed by scraping.	Excessive	30
Fresh or Frozen Products		
(2) Condition of product (pertains to the entire package or container)	Slight	1
	Moderate	3
	Excessive	5
(3) Discoloration:		
1/16 sq. in. to 1 sq. in.	Slight	4
Over 1 sq. in. to 2 sq. in.	Moderate	9
Over 2 sq. in. and each additional complete 1 sq. in.	Excessive	15
(4) Uniformity: Deviation above or below declared weight of portion—		
Weight of portion—Moderate:		
0.75 to 4.16 oz	Over 1/8 but not over 1/4 oz	5
4.17 to 11.20 oz	Over 1/8 but not over 1/2 oz	5
11.21 to 17.30 oz	Over 1/8 but not over 3/4 oz	5
Weight of portion—Excessive		
0.75 to 4.16 oz	Over 1/4 oz	10
4.17 to 11.20 oz	Over 1/2 oz	10
11.21 to 17.30 oz	Over 3/4 oz	10

TABLE I.—DEFECT TABLE SCHEDULE OF POINT DEDUCTIONS OF NORTH AMERICAN FRESHWATER CATFISH AND PRODUCTS MADE THEREFROM—Continued

[Per sample unit unless otherwise indicated]

Scored factors	Degree of quality variation	Point value
Fresh or thawed products		
(5) Skinning cuts [skinless market forms only]:		
1/16 sq. in. to 1 sq. in.	Slight	1
Over 1 sq. in. to 2 sq. in.	Moderate	3
Over 2 sq. in. and each additional complete 1 sq. in.	Excessive	1
(6) Heading (H&G or H&D fish only):		
1/16 sq. in. to 1 sq. in.	Slight	5
Over 1 sq. in. to 2 sq. in.	Moderate	16
Over 2 sq. in. and each additional complete 1 sq. in.	Excessive	30
(7) Evisceration:		
1/16 sq. in. to 1 sq. in.	Slight	5
Over 1 sq. in. to 2 sq. in.	Moderate	16
2 sq. in. or over	Excessive	30
(8) Fins:		
Up to 1 sq. in.	Slight	1
Over 1 sq. in. to 2 sq. in.	Moderate	5
Over 2 sq. in.	Excessive	10
(9) Bones (including pin bone) :		
Bones: 3/16 in. long or 1/32 in. wide	Each occurrence	5
Bone chip: 1/16 in. long	Each occurrence	5
Excessive: 1 9/16 in. long by 3/8 in. wide rectangle	Each occurrence	10
(10) Skin (skinless market forms only): Over 1/2 sq. in. to 1 sq. in.	Each occurrence	5
(11) Bloodspots, bruises: Over 1/2 sq. in. to 1 sq. in.	Each occurrence	5
(12) Foreign matter: Harmless material	Each occurrence	4
Cooked products		
(13) Texture	Moderate	5
	Excessive	16

§ 267.105 Tolerances for lot certification.

(a) The grade assigned to a lot is the grade indicated by the majority of the sample unit grades provided that the number of sample units in the next lower grade does not exceed the acceptance number as given in the sampling plans contained in § 260.61 of this chapter. All of the sample units must meet the provisions of § 260.21 of this chapter. In § 260.21, the 4 score points are additive, not subtractive.

(b) The grade assigned to a lot is one grade below the majority of all the sample unit grades if either:

(1) The number of sample units in the next lower grade does exceed the acceptance number as given in the sampling plans contained in § 260.61 of this chapter, or

(2) The grade of any one of the sample units is more than one grade below the majority of all the sample unit grades.

§ 267.106 Hygiene.

Products will be processed in official establishments as defined in § 260.6 of this chapter and maintained in accordance with §§ 267.101 to 267.107 of this part and of the good manufacturing practice regulations contained in 21 CFR Part 110.

§ 267.107 Methods of analysis.

Product samples will be analyzed in accordance with the "Official Methods of Analysis of the Association of Official Analytical Chemists", (AOAC), Fourteenth Edition (1984), section 18.004 (page 331) and sections 32.059 and 32.060 (page 613) which are incorporated by reference. Copies of the AOAC methods may be obtained from AOAC, 1111 North Nineteenth Street, Arlington, VA 22209 and are available for inspection at the Office of the Federal Register, 1100 L Street, Room 8401 Washington, DC. This incorporation by reference was approved by the Director of the Federal Register on November 4, 1987. These methods are incorporated as they exist on the date of this approval. A notice of any change in the sections of the AOAC methods cited herein will be published in the **Federal Register.**

BILLING CODE 3510-22-M

50 CFR Part 651

[Docket No. 70620-7184]

Northeast Multispecies Fishery; Corrections

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; corrections.

SUMMARY: This document corrects several typographical errors in the regulatory text of the final rule to implement Amendment 1 to the Fishery Management Plan for the Northeast Multispecies Fishery. This rule was published September 17, 1987 (52 FR 35093).

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Peter D. Colosi, Jr. (Multispecies Plan Coordinator), 617-281-3600, ext. 252.

PART 651—[AMENDED]

In rule document 87-21389 beginning on page 35093 in the issue of September 17, 1987, make the following corrections:

§ 651.3 [Corrected]

1. In § 651.3, paragraph (c), line 2, remove "or local" after "State".

§ 651.23 [Corrected]

2. In § 651.23, paragraph (a)(1), in the small table, line 1, remove "Beyond" before "Cod".

§ 651.25 [Corrected]

3. In § 651.25, paragraph (a), line 6, "bouys" is corrected to read "buoys".

4. In the same section, paragraph (b), line 9, "eastern most" is corrected to be one word reading "easternmost".

Authority: 16 U.S.C. 1801 et seq.

Dated: September 30, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 52, No. 192
Monday, October 5, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1405

Loans, Purchases and Other Operations

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend 7 CFR Part 1405 to set forth the manner in which the rate of interest that is generally applicable to Commodity Credit Corporation (CCC) loans will be determined and announced. This proposed rule would also delete obsolete references to the ability of trustees to pledge commodities as collateral for CCC loans or to sell such commodities to CCC.

DATE: Comments must be received on or before November 4, 1987, in order to be assured of consideration.

ADDRESS: Send comments to David Nichols, Supervisory Systems Account, Fiscal Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013 447–6616.

FOR FURTHER INFORMATION CONTACT: David Nichols, Supervisory Systems Account, Fiscal Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013 (202) 447–6616.

SUPPLEMENTARY INFORMATION: This notice has been reviewed in conformance with Executive Order 12291 and the Secretary's Memorandum 1521–1 and has been classifield as "not major." It has been determined that the provisions of this notice will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) significant adverse affects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprise to compete with foreign-based enterprise in domestic or export markets.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 291115 (June 29, 1983).

The titles and numbers of the Federal Domestic Assistance Programs that this notice applies to are: Commodity Loans and Purchases—10.051; Cotton Production Stabilization—10.055; Storage Facilities and Equipment Loans—10.056; Wheat Production Stabilization—10.058; Rice Production Stabilization—10.065 as found in the Catalog of Federal Domestic Assistance.

Background

A large portion of CCC's activities involves the making of loans to eligible program participants. Most significantly, these loans include nonrecourse price support loans made to producers in accordance with the Agricultural Act of 1949, as amended, and the CCC Charter Act, as amended. With respect to CCC loans, CCC assesses interest from the date of disbursement until repayment by the borrower. The rate of interest is the rate charged CCC by the U.S. Treasury for funds borrowed by CCC on the date a loan is disbursed by CCC. This rate is applicable to the loan until the following January 1. If the loan is outstanding as of the following January 1, the rate of interest is ajusted to the rate that is charged by the U.S. Treasury on CCC borrowings as of that date.

7 CFR 1405.1 provides that program provisions which require that the beneficial interest in a commodity must be in the producer offering the commodity for sale or as loan collateral shall not be interpreted as excluding a trustee from participating in a price support program. Since this is the longstanding position of CCC and is reflected in program contracts and regulations, it has been determined that this provision is no longer necessary. Accordingly, this proposed rule would delete this provision.

Accordingly, it is proposed that 7 CFR Part 1405 be revised as follows:

PART 1405—LOANS, PURCHASES AND OTHER OPERATIONS

Sec.
1405.1 Interest.
1405.2 Basic rule of fractions.

Authority: Secs. 4 and 5 of the Charter Act, as amended, 62 Stat. 1070, as amended, 1072 (15 U.S.C. 714b and 714c).

§ 1405.1 Interest.

(a) *General.* Except as may otherwise be determined by CCC as provided in individual program regulations, program contracts or such other means as deemed appropriate by CCC, interest shall be assessed as provided in this Part with respect to loans disbursed by CCC.

(b) *Rate in effect on disbursement.* The rate of interest that is applicable to CCC loans shall be equal to the rate charged by the U.S. Treasury for funds borrowed by CCC on the date the loan is disbursed by CCC. This rate of interest shall be in effect until the earlier of maturity of the loan or the next January 1.

(c) *Rate in effect as of January 1.* The rate of interest applicable to all CCC loans that are outstanding as of January 1 of any year shall be adjusted as of such date to equal the rate of interest charged by the U.S. Treasury for funds borrowed by CCC on such date. This rate shall be in effect until the earlier of the maturity of the loan or the next January 1. The rate of interest applicable to CCC loans as of January 1 of any year shall be announced by CCC by press release or other means.

§ 1405.2 Basic rule of fractions.

Fractions shall be rounded in accordance with the provisions of 7 CFR Part 793.

Signed at Washington, DC on September 29, 1987.

Milton Hertz,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 87–22953 Filed 10–2–87; 6.45 am]

BILLING CODE 3410–05–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 404

[Regulations No. 4]

Federal Old-Age, Survivors, and Disability; Determining Disability and Blindness Down Syndrome Evaluation

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rules.

SUMMARY: These proposed revisions to the medical critieria in the Listing of Impairments in Appendix 1 of Subpart P add a new Listing 110.06 to the Multiple Body Systems in Part B to provide for evaluation of Down syndrome claims according to the impairment criteria for the major system affected. These proposed changes also revise the introductory material in Listing section 110.00 to better identify what is meant by the term catastrophic congenital abnormalities or disease and to describe a level of severity which is considered sufficient to find a person disabled by these abnormalities or diseases.

DATE: Comments must be received on or before December 4, 1987.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, between 8:00 a.m. and 4:30 p.m. on regular business days. Comments may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Harry J. Short, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, Telephone (301) 594–7337.

SUPPLEMENTARY INFORMATION:

Throughout this preamble and the regulatory text we refer to the subject impairment as "Down syndrome" rather than "Down's syndrome." "Down" without the apostrophe "s" is the term currently being used by the National Down Syndrome Congress and the National Down Syndrome Society and is used in several major texts on childhood disability. We proposes to provide for the evaluation of Down syndrome in the multiple body system category of impairments in Part B of the Listing of Impairments. The purpose of establishing a listing is to simplify the evaluation process, not to change how disability is determined for Down syndrome claims. Part A of the Listing of Impairments describes, for each of the major body systems, impairments which are considered severe enough to prevent a person from doing any gainful activity, absent evidence to the contrary. Part B contains additional medical criteria that apply only to the evaluation of impairments of persons under age 18. Some children with Down syndrome may be evaluated under the criteria of Listing 112.05-Mental retardation-of Part B of the Listing of Impairments. However, when mental retardation is the only impairment, we are often unable to determine the severity of Down syndrome in infants and very young children since there are no psychometric instruments which accurately measure their intellectual functioning. Consideration of the extent of the attainment of developmental milestones is generally of limited value because the attainment of milestones by severely retarded and less retarded young infants shows wide variation.

Almost all children with Down syndrome have moderate to severe neuromusculosketal abnormalities, and many have other malformations such as cardiac, gastrointestinal, oral/facial, skeletal. These abnormalities are usually less problematical than mental and developmental impairments and we believe it is more appropriate to evaluate those abnormalities under the criteria of the affected body system(s). We, therefore, propose to add a new Listing 110.06 under the Multiple Body Systems Listing § 110.00 to provide for evaluation of Down syndrome claims according to the impairment criteria for the major system affected.

We also propose to revise the introductory material in Listing section 110.00 to better identify what is meant by catastrophic congenital abnormalities or diseases and describe a level of severity which is considered sufficient to find a person disabled by these abnormalities or diseases. We have expanded the introduction by including several major congenital abnormalities that do not fall into the "catastrophic" category described in Listing 110.06. The purpose of this expansion is to simplify the evaluation process, not to change how disabilities are determined. We believe these changes will help assure greater uniformity and equity in the adjudicative process for children with conditions that usually affect more than one body system. We do not propose similar changes to Part A of the Listing of Impairments. Part A contains medical criteria generally applied to persons age 18 or over. We have experienced little difficulty evaluating claims involving Down syndrome and other congenital abnormalities or disease in adults (age 18 and over) since these claims may be readily evaluated under the criteria of the affected body system(s), e.g. mental, musculoskeletal, cardiac.

Regulatory Procedures

Executive Order 12291

The Secretary has determined that this is not a major rule under Executive Order 12291 because the proposed changes will have little, if any, impact on costs. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

These proposed regulations will impose no new reporting or recordkeeping requirements subject to clearance by the Office of Management and Budget.

Regulatory Flexibility Act

We certify that these proposed regulations, it promulgated, will not have a signficant economic impact on a substantial number of small entities because they primarily affect only disabled individuals who are applying for Title II or Title XVI benefits because of disability.

List of Subjects in 20 CFR Part 404

Administrative practice and procedure, Death benefits, Disability benefits, Old-Age, Survivors and Disability Insurance

Dated: March 16, 1987.

Dorcas R. Hardy,

Commissioner of Social Security.

Approved: May 1, 1987.

Otis R. Bowen,

Secretary of Health and Human Services.

Part 404 of Chapter III of title 20 of the Code of Federal Regulations is amended as follows:

PART 404—[AMENDED]

1. The authority citation for Subpart P of Part 404 continues to read as follows:

Authority: Secs. 202, 205(a), (b), and (d)–(h), 216(i), 221(a) and (i), 222(c), 223, 225, and 1102 of the Social Security Act; 42 U.S.C. 402, 405(a), (b), and (d)–(h), 416(i), 421(a) and (i), 422(c), 423, 425, and 1302; sec. 505(a) of Pub. L. 96–265, 94 Stat. 473; secs. 2(d)(2), (5), (6)

VOL
52
ISS
192
OC
5
1987
UMI

and (15) of Pub. L. 98–460, 98 Stat. 1797, 1801, 1802, and 1808.

2. Listing 110.00, Multiple Body Systems, of Part B of Appendix 1 (Listing of Impairments) of Subpart P is amended by revising the text of paragraphs A and B, by adding new paragraphs C and D by adding new Listing 110.06 to read as follows:

110.00 Multiple Body Systems

A. *The impairments included* in this section usually involve more than a single body system.

B. *Hereditary disorders* and congenital or acquired abnormalities or disease include but are not limited to conditions such as anencephaly, Tay-Sachs, phenylketonuria (PKU), Down syndrome, fetal alcohol syndrome, and severe chronic neonatal infection, as described in 110.06. This listing refers to those life-threatening and other serious hereditary, congenital, or acquired disorders that usually affect two or more body systems and are expected to be incompatible with life and result in early death or produce long-term, if not lifelong, significant interference with age-appropriate major daily or personal care activities. (Significant interference with age-appropriate activities in an infant would be considered to exist where the developmental milestone age did not exceed two-thirds of the chronological age at the time of evaluation and such interference could be expected to last at least 12 months.)

C. *Documentation* must include confirmation of a positive diagnosis by definitive laboratory tests, including chromosomal analysis where appropriate (e.g., Down syndrome), and a clinical description of the condition and the usual associated morphological features. Documentation of immune deficiency disease must be submitted and may include quantitative immunoglobulins, skin tests for delayed hypersensitivity, lymphocyte stimulative tests, and measures of cellular immunity mediators.

D. *When multiple body system manifestations* do not meet one of the established criteria in this section, the combined impairments must be evaluated together to determine if they are equal in severity to a listed impairment.

* * * * *

110.06 *Multiple body dysfunction* due to any confirmed (see 110.00C) hereditary, congenital, or acquired condition with one of the following:

A. Persistent motor dysfunction as a result of hypotonia and/or musculoskeletal weakness and manifested by significant interference with age-appropriate major daily activities or personal care needs (in an infant such activities as head control, turning, sitting, crawling, walking, taking solids, feeding self); or

B. Mental impairment with one of the following:

1. Mental retardation as described in 112.05A or B; or

2. Resulting in the following:

a. IQ not greater than 69; or

b. Developmental milestones of not greater than two-thirds of chronological age; and

c. A physical or other mental impairment imposing additional and significant restrictions of function or development; or

C. Growth failure as described under the criteria in 100.02A or B; or

D. Significant interference with communication due to speech, hearing, or visual defect as described under the criteria in 102.00; or

E. Cardiovascular impairments as described under the criteria in 104.00; or

F. Other impairments such as, but not limited to, malnutrition, hypothyroidism, or seizures should be evaluated under the criteria in 105.08, 109.02 or 111.02 or the criteria for the affected body system.

BILLING CODE 4190–11–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 570

[Docket No. R–87–1341; FR–2164]

Community Development Block Grant Program; Escrow Accounts

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Proposed rule.

SUMMARY: The Department proposes to add a new section titled "Use of escrow accounts for rehabilitation of privately-owned residential propoety" to Subpart J of the Community Development Block Grant (CDBG) regulations at 24 CFR Part 570. The proposed rule would allow program recipients to use escrow accounts under certain circumstances in connection with CDBG-assisted residential rehabilitation programs.

DATES: Comments Due: December 4, 1987.

ADDRESS: Interested persons are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, 20410 Communications should refer to the above docket number and title. A copy of each communication will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Paul D. Webster, Director, financial Management Division, Office of Block Grant Assistance, Room 7180, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, (202) 755–1817. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Except as otherwise specifically indicated in the department's regulations in 24 CFR 570.513 (Lump sum drawdown for property rehabilitation financing), cash withdrawals by letter of credit or electronic funds transfer from the U.S. Treasury by a CDBG program recipient are required to be in accordance with U.S. Department of Treasury regulations on advances under Federal Programs (31 CFR Part 205) and OMB Circular A–102, Attachments G and J. In a recent audit, HUD's Office of Inspector General determined that some CDBG recipients may have violated U.S. Treasury Department regulations by maintaining in escrow accounts for extended time periods unnecessarily large amounts of program funds advanced from the Treasury before a real need existed to use the funds. The HUD Office of Community Planning and Development believes that the currently unregulated use of escrow accounts for residential rehabilitation is widespread among grantees.

This proposed rule is designed to ensure that where CDBG recipients use escrow accounts to fund residential rehabilitation loans and grants, the accounts are established and used in accordance with both the spirit and the letter of the above-mentioned Treasury and OMB requirements. Under these requirements—particularly 31 CFR 205.4—cash withdrawals must be timed to coincide with the actual immediate cash requirements *of the recipient* in carrying out the approved program or project. The timing of the withdrawals must be as close as is administratively feasible to actual disbursement *by the recipient* for program costs. Under the letter of these issuances, therefore, when the CDBG-assisted activity takes the form of a loan or grant by the recipient to a private property owner for rehabilitation of property by a private contractor, compliance with the Treasury/OMB cash withdrawal requirements is not to be judged in terms of when the property owner incurs costs under the rehabilitation contract, but when *the recipient* incurs the program cost for the eligible activity (the loan or grant). In this regard, the program cost is incurred by the recipient at the point that CDBG funds are required to be paid under the terms of the loan or grant agreement between the block grant recipient and the property owner.

Frequently, even typically, these rehabilitation loan or grant agreements

call for payment to the owner by means of the deposit of some or all of the loan or grant proceeds into an escrow account administered by the CDBG recipient or its agent in a private bank, to be disbursed from escrow when both the owner and the recipient are satisfied that work has been properly completed under the rehabilitation contract. Both rehabilitation contractors and property owners are pleased with this arrangement—contractors because they are assured that the money is available for payment upon the satisfactory completion of their work, and owners because they do not have to advance funds to the contractor to get the work underway, or pay a premium to a contractor who can afford to wait for payment for a longer period.

HUD recognizes that administrative convenience and cost savings to the owner, contractor, or CDBG recipient are not really material to the issue of whether Treasury/OMB grant drawdown requirements are being met, and that these requirements demand that there be an immediate cash need for each grant drawdown. Additionally, HUD recognizes that the mere inclusion of a provision regarding drawdown in the terms of a rehabilitation loan or grant contract is not sufficient, in and of itself, to justify the drawdown, since the grantee has the ability to control the terms governing the loan or grant and could use this procedure to circumvent grant drawdown requirements. Nonetheless, the Department is convinced that deposits into escrow accounts or payments to contractors of advances are necessary in many cases in order for owners of small residential properties to procure the services of rehabilitation contractors consistent with HUD or local program objectives (including the provision of opportunities for minority contractors). However, for HUD to make case-by-case determinations of need for an escrow account would be extremely time-consuming. Instead, the Department has developed criteria in this rule both to establish when escrow accounts may be regarded as necessary, consistent with Treasury-OMB guidelines, and to regulate escrow accounts to prevent unnecesary accumulation of funds.

Small, and often minority, contractors constitute a large majority of the firms that participate in CDBG-funded rehabilitation programs, and they are essential to the effective operation of these programs. The rehabilitation industry is, in fact, largely composed of such small contractors. These firms, generally operated personally by their owners as sole proprietorships, are characterized by a small number of full-time employees and an annual dollar volume of under $250,000. Generally, these are cash-basis operations working on many individual contracts averaging $15,000 or less. These firms usually do not have sufficient financial resources to carry receivables for the period of the local government's normal payment cycle. They often are either unable to obtain working capital financing or can do so only at prohibitive rates. These contractors require the timely progress essential to the operation of a CDBG rehabilitation program, particularly for smaller projects involving rehabilitation of primarily residential properties containing no more than four dwelling units, and since small contractors require very prompt payment, the use of escrow accounts in such cases serves a legitimate program need. In addition, it enhances program access by such contractors in accordance with OMB A-102, Attachment O, paragraph 9, which encourages grantor agencies to take "affirmative steps to assure that small and minority businesses are utilized when possible".

Under the proposed rule, a recipient would be permitted initially to withdraw funds from its letter of credit for deposit into an escrow account only after the property owner has executed the contract with the contractor selected to perform rehabilitation work. The terms of the rehabilitation contract between the owner and the contractor must provide expressly for payments through the escrow account. The amount of funds in the escrow account at any time must not exceed the amount the recipient expects to disturse from the account within 10 working days from the date of deposit. If the grantee has, for whatever reason, drawn down more than ten days cash needs, it shall immediately return the excess funds to its program account. In the program account, the excess funds would then be subject to the Treasury's usual rules governing erroneous drawdowns.

The rule would prohibit the use of escrowed amounts for noncontractual eligible costs, such as the recipient's administrative costs under § 570.206 or rehabilitation services under § 570.202(b)(9). The rule also would provide that interest credited to the escrow account, after deducting any service charges, will be remitted to HUD. Upon completion of the rehabilitation activities, unused funds would be required to be withdrawn from the escrow account and deposited into the recipient's program account, or, in the case of amounts over $10,000 which will not be disbursed within seven calendar days, remitted to HUD and restored to the recipient's letter of credit. Finally, the rule indicates that where a recipient fails to comply with these limitations, HUD may require the recipient to discontinue the use of escrow accounts, in addition to taking any other corrective and remedial actions that HUD may impose.

Note—The references in this preamble to OMB Circular A-102 and its attachments may be changed upon publication of a final rule because the A-102 Common Rule is currently being developed based on a revised circular. Also, references in this preamble and the rule text to other provisions of 24 CFR Part 570 may be changed upon publication of a final rule because of the pending, more comprehensive revision of Part 570 being developed. (Proposed rule published October 31, 1984, 49 FR 43852.)

Findings

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspecion during regular business hours in the Office of Rules Docket Clerk at the above address.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 issued by the President on February 17, 1981. Analysis of the proposed rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs of prices for consumers, individual industries, Federal State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under the Regulatory Flexibility Act (5 U.S.C. 601), the Undersigned certifies that this rule does not have a significant economic impact on a substnatial number of small entities. The rule reflects and clarifies existing Federal requirements that govern the disbursement of funds from the U.S. Treasury advanced to recipients in this CDBG program. Accordingly, the rule would not alter contract amounts, or

VOL
52
ISS
192
OC
5
1987
UMI

significantly affect current contracting practices relating to the use of small businesses in performing rehabilitation work.

This rule is listed as item number 1004 in the Department's Semiannual Agenda of Regulations published April 27, 1987 (52 FR 14362) under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalogue of Federal Domestic Assistance number is 14.1218—Community Development Block Grants/Entitlement Grants.

List of Subjects in 24 CFR Part 570

Community Development block grants, Grant programs: housig and community development, Loan programs: housing and community development, Low and moderate income housing, New communities, Pockets of proverty, Small cities.

Accordingly, the Department proposes to amend 24 CFR Part 570 as follows:

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

1. The authority citation for 24 CFR Part 570 would continue to read as follows:

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 570.511, the heading is revised and text is added to read as follows:

§ 570.511 Use of escrow accounts for rehabilitation of privatelfy owned residential property.

(a) *Limitations.* A recipient may withdraw funds from its letter of credit for immediate deposit into an escrow account for use in funding loans and grants for the rehabilitation of privately owned residential property under § 570.202(a)(1). The following additional limitations apply to the use of escrow accounts:

(1) The use of escrow accounts under this section is limited to loans and grants for the rehabilitation of primarily residential properties containing no more than four dwelling units (and accessory neighborhood-scale commercial space within the same structure, if any, *e.g.*, a store front below a dwelling unit).

(2) An escrow account shall not be used unless the contract between the property owner and the contractor selected to do the rehabilitation work specifically provides that payment to the contractor shall be made through an escrow account maintained by the recipient or its agent. No deposit to the escrow account shall be made until after the contract has been executed between the property owner and the rehabilitation contractor.

(3) All funds withdrawn pursuant to this section by a CDBG recipient shall be deposited into one interest earning escrow account with a financial institution. The recipient shall not establish separate bank accounts for individual loans and grants. Interest shall be treated as provided for in paragraph (b) of this section.

(4) The amount of funds deposited into an escrow account shall be limited to the amount expected to be disbursed for all contracts for which the account has been established within 10 working days from the date of deposit. If the escrow account, for whatever reason, at any time contains funds exceeding 10 days immediate cash needs, the grantee immediately shall transfer the excess funds to its program account. In the program account, the excess funds shall be treated as funds erroneously drawn in accordance with the requirements of U.S. Treasury Fiscal Requirements Manual, paragraph 6–2080.30.

(5) Funds deposited into an escrow account shall not be used to pay any eligible costs related to the rehabilitation loan or grant other than actual costs of rehabilitation incurred by the owner under contract with a private contractor. For example, the recipient's administrative costs under § 570.206 or rehabilitation services costs under § 570.202(b)(9) are not permissible uses of escrowed funds, whether or not they may be related to the administration of the rehabilitation activities covered by the contracts.

(b) *Interest.* Interest earned on escrow accounts established in accordance with this section, less any service charges for the account, shall be remitted to HUD at least quarterly but not more frequently than monthly.

(c) *Remedies of noncompliance.* If HUD determines that a recipient has failed to use an escrow account in accordance with this section, HUD may, in addition to imposing any other sanctions provided for under this part, require the recipient to discontinue the use of escrow accounts.

Dated: August 7, 1987.

Jack R. Stokvis,

General Deputy, Assistant Secretary for Community Planning and Development.

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 773

Requirements for Surface Coal Mining and Reclamation Permit Approval; Ownership and Control

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of reopening of public comment period.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) of the United States Department of the Interior (DOI) previously has published a proposed rule which would amend its regulations dealing with the permit approval provisions of the Surface Mining Control and Reclamation Act of 1977. The proposed rule would define the terms "ownership" and "control," and would change the compliance review which regulatory authorities are required to make prior to permit approval. OSMRE is now reopening and extending the comment period for the proposed rule.

DATE: The comment period on the proposed rule is reopened and extended until November 4, 1987.

ADDRESSES: Written comments may be mailed to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131–L, 1951 Constitution Avenue NW., Washington, DC 20240; or hand-delivered to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Andrew F. DeVito, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone: 202–343–5241 (Commercial or FTS).

SUPPLEMENTARY INFORMATION: OSMRE previously has published a proposed rule which would amend its regulations dealing with the permit approval process by (1) defining the terms "ownership" and "control" as those concepts are used in the Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1201 *et seq;* and (2) amending the scope of the compliance review which regulatory authorities are required to make prior to permit approval. The proposed rule was published in the **Federal Register** on April 5, 1985 (50 FR 13724).

The comment period for the proposed rule was reopened and extended on April 16, 1986 (51 FR 12879), and again on May 4, 1987 (52 FR 16275). Both of those notices described options being considered for the final rule that would determine the scope of the compliance review that is required to be made prior to permit issuance. OSMRE is now considering another option for the final rule for which further notice and public comment is appropriate.

OSMRE also is drafting guidelines for rebutting the presumptions contained in the options being considered and has received a request to make the current draft of the guidelines available for public comment.

In response to OSMRE's May 4, 1987 notice, a number of interesting and useful comments were received which the agency is considering for the final rule. OSMRE is therefore reopening the public comment period until November 4, 1987, to allow the commenters to see how their suggestions would be reflected in the final draft. Accordingly, OSMRE solicits comments on the option discussed below and on the draft guidelines for rebutting the presumptions contained in the definitions of "owned or controlled" and "owns or controls."

List of Subjects in 30 CFR Part 773

Administrative practice and procedure, Reporting and recordkeeping requirements, Surface mining, Underground mining.

OSMRE is considering adopting as the final rule the following definitions and compliance review provisions:

PART 73—[AMENDED]

1. The authority citation for Part 773 would continue to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*, 16 U.S.C. 470 *et seq.*, 16 U.S.C. 1531 *et seq.*, 16 U.S.C. 661 *et seq.*, 16 U.S.C. 703 *et seq.*, 16 U.S.C. 668a *et seq.*, 16 U.S.C. 469 *et seq.*, 16 U.S.C. 470aa *et seq.*

2. Section 773.5 would be added and § 773.15(b)(1) introductory text would be revised to read as follows:

§ 773.5 Definitions.

Owned or controlled and *owns or controls mean*—

(a)(1) Being a permittee of a surface coal mining operation;

(2) Based on instruments of ownership or voting securities, owning of record in excess of 50 percent of an entity; or

(3) Having any other relationship which gives one person authority directly or indirectly to determine the manner in which an applicant, an operator, or other entity conducts surface coal mining operations.

(b) The following relationships are presumed to constitute ownership or control unless a person can demonstrate that the person subject to the presumption does not in fact have the authority directly or indirectly to determine the manner in which the relevant surface coal mining operation is conducted:

(1) Being an officer or director of an entity;

(2) Being the operator of a surface coal mining operation;

(3) Having the ability to commit the financial or real property assets or working resources of an entity;

(4) Being a general partner in a partnership; or

(5) Based on the instruments of ownership or the voting securities of a corporate entity, owning of record 10 through 50 percent of the entity.

§ 773.15 Review of permit applications.

* * * * *

(b) * * *

(1) Based on available information concerning Federal and State failure-to-abate cessation orders, unabated Federal and State imminent harm cessation orders, delinquent civil penalties issued pursuant to section 518(h) of the Act, bond forfeitures, delinquent abandoned mine reclamation fees, and unabated violations of Federal and State laws, rules, and regulations pertaining to air or water environmental protection incurred in connection with any surface coal mining operation, the regulatory authority shall not issue the permit if any surface coal mining and reclamation operation owned or controlled by either the applicant or by any person who owns or controls the applicant is currently in violation of the Act or such other law, rule or regulation referred to in this paragraph. In the absence of a failure-to-abate cessation order, the regulatory authority may presume that a notice of violation issued pursuant to § 843.12 of this chapter or under a Federal or State program, except a notice of violation issued for nonpayment of abandoned mine reclamation fees or civil penalties, is being corrected to the satisfaction of the agency with jurisdiction over the violation. If a current violation exists, the regulatory authority shall require the applicant or person who owns or controls the applicant, before the issuance of the permit, to either—

* * * * *

The above definitions and compliance review provision will not result in a substantial increase in the amount of information concerning owners and controllers that must be submitted to a regulatory authority by a permit applicant. If the option discussed in this notice is adopted as the final rule, then the information collection requirements proposed on May 28, 1987 (52 FR 20032) may be substantially reduced when that rule is promulgated.

Discussion of Rule Language

Definitions

The present option like the May 4, 1987 option contains a definition of the terms "owned or controlled" and "owns or controls" which focuses on those relationships which allow one person or entity to influence or compel compliance with the Act by another person or entity

Paragraph (a)(1) of the definition expressly includes the permittee as a controller of a surface coal mining operation. This was implicit in the two previous options but never stated.

Paragraph (a)(2) includes ownership of record in excess of 50 percent of an entity. This paragraph would cover direct owners only.

Paragraph (a)(3) includes in the definition any other relationship which gives one person authority directly or indirecly to determine the manner in which an applicant, an operator, or other entity conducts surface coal mining operations. This paragraph would include persons who exercise control over a surface coal mining and reclamation operation even though they may have no official title, or direct authority over a particular entity. "Any relationship" can include one between family members, a lessor and a lessee, an owner of coal and a contract miner, as well as others. Whether such relationships actually give a person authority to determine the manner in which an applicant or an operator, if other than an applicant, conducts surface coal mining operations will be determined on a case-by-case basis. In particular, OSMRE intends to scrutinize the relationships of persons who are linked to violators of the Act and to determine the persons who actually control such violators if any. Under paragraph (a)(3), no limit exists on the examination of corporate structures or the manner in which control may be established.

Paragraph (b) of the definition lists certain relationships which OSMRE will presume to constitute ownership or control unless some person can demonstrate that the person subject to the presumption does not in fact have the authority directly or indirectly to determine the manner in which the relevant surface coal mining operation is conducted. Under paragraph (b)(1) all officers and directors are included in this category. This is different from the May 4, 1987 option which only the chief executive officer, chief operating officer and chairman of the board were

VOL
52
ISS
192
OC
5
1987
UMI

automatically considered to be controllers. OSMRE is proposing to allow officers to rebut the presumption of control because there may be a situation where an officer or chairman of the board does not in fact exercise control.

Paragraph (b)(2) establishes a presumption of control for the operator of a surface coal mining operation. The presumption was included because in some instances, a person other than the operator could possibly be exercising control over the surface coal mining operation.

Paragraph (b)(3) establishes a presumption of control for anyone having the ability to commit the financial or real property assets or working resources of an entity. OSMRE considers such an ability a sufficient indication to imply control.

Paragraph (b)(4) establishes a presumption of control for a general partner in a partnership. OSMRE proposes to establish a presumption of control for general partners because in most instances a general partner is authorized to cause the partnership to act. However, in certain cases, it is possible that an individual partner may not control the partnership.

Paragraph (b)(5) of the definition contains presumptions of control for owners of less than a majority interest. Ownership of record of 10 through 50 percent would result in a presumption of control unless some person can demonstrate that the person to whom the definition applies cannot exercise control. Setting 10 percent as the minimum level for the presumption would be consistent with section 507(b)(4) of the Act which requires permit applicants to submit information on all record owners of greater than 10 percent. The Act does not require regulatory authorities to consider persons owning of record less than 10 percent of the applicant when reviewing the permit application.

The proposed definition reflects the purpose for which the Congress enacted section 510(c). Where an applicant has a current violation, under section 510(c) the regulatory authority cannot approve a permit unless the applicant takes remedial action and then "submits proof that such violation has been corrected or is in the process of being corrected * * *." Thus, by its own terms the purpose of section 510(c) is to prevent the issuance of new permits to parties ultimately responsible for operations currently in violation of the Act or a wide range of other environmental requirements. The proposed definitions would provide an effective inducement to permit applicants and their owners and controllers to correct violations by including within the permit review persons in a position to have such violations corrected.

In order to speed decisions on permit applications, OSMRE intends to establish guidelines by which OSMRE and State regulatory authorities can make determinations on whether individuals who seeks to rebut the presumption of control contained in paragraph (b) have done so adequately. These guidelines will not be a part of the final rule because OSMRE expects them to undergo continual refinement as OSMRE and the State Regulatory authorities gain experience in applying the definitions during the permit approval process.

Section 773.15(b)(1) Compliance Review Provision

As originally proposed, this option would have required that the regulatory authority make a finding that any surface coal mining operation owned or controlled by either the applicant or by any person who owns or controls the applicant is not currently in violation of the Act or in violation of any Federal law, rule or regulation pertaining to air or water environmental protection. To assist the regulatory authority, proposed § 773.15(b)(1) would include a list of the violations upon which the regulatory authority would base its compliance review. The list includes Federal and State failure-to-abate cessation orders, unabated Federal and State imminent harm cessation orders, delinquent civil penalties issued pursuant to section 518(h) of the Act, bond forfeitures, delinquent abandoned mine reclamation fees, and unabated violations of Federal and State laws, rules and regulations pertaining to air or water environmental protection related to surface coal mining operations. The proposed provision would track section 510(c) of the Act by preventing issuance of permits when violations currently exist, but would no longer require a finding by the regulatory authority.

OSMRE is proposing to block issuance of permits on the basis of all bond forfeitures, both interim and permanent program. OSMRE specifically seeks comments on the equity of this proposal, particularly in instances where reclamation of the site on which the bond was forfeited has been completed.

The proposed rule also contains a presumption concerning notices of violations. It states that in the absence of a failure-to-abate cessation order, the regulatory authority may presume that a notice of violation, except for a notice of violation issued for nonpayment of abandoned mine reclamation fees or civil penalties, is being corrected to the satisfaction of the agency with jurisdiction over the violation. The intent of this provision is to provide a more accurate description of the stage at which a violation is considered unabated when performing the review required by section 510(c), while still requiring that money owed the government is paid in a timely fashion.

Until such time as OSMRE adopts final definitions for "ownership" and "control" and revises 30 CFR 773.15(b)(1), OSMRE will continue to process permit applications according to the requirements set out in paragraphs 1 through 3 of the Court Order issued in the case of *Save Our Cumberland Mountains, Inc., et al v. Clark,* Civil Action No. 81–2134 (D.D.C. 1985). Those are the criteria OSMRE has been following since the Court Order was issued on January 31, 1985.

Guidelines for Rebutting Presumptions

Under the proposed definition of "owned or controlled" and "owns or controls," certain relationships would be presumed to constitute ownership or control. To rebut the presumptions, a person in such a relationship would have to submit to the regulatory authority clear and convincing evidence to the contrary. While the content and form of this evidence would depend on the particular circumstances in each case, OSMRE is considering the adoption of advisory guidelines for use by regulatory authorities and affected persons on the type of evidence that in most instances would be sufficient to rebut the presumptions.

The draft guidelines OSMRE currently is considering specify the following circumstances as evidence to rebut the presumtion:

(a) The corporate charter, bylaws, articles of incorporation, or other legal instrumentalities establishing the mechanisms or processes by which the entity carries out its business, specifically prohibits by name or title the individual from compelling action to abate the violation or pay penalties or other financial assessments remaining unpaid and no evidence exists to the contrary.

(b) That the ability of the individual seeking to rebut control is legally prohibited from undertaking any or all of the actions indicated above and in fact cannot do so.

(c) Based on other evidence, the individual cannot, or could not at the

time the violation occurred, cause the entity to perform the actions mentioned above.

To document this evidence, the draft guidelines provide that the individual seeking to rebut the presumption should submit to the regulatory authority the following information:

(1) Copies of the charter, bylaws, articles of incorporation or other legal instruments which clearly establish that the individual is not a controller of the entity. Specific citations and reference should be made and a legal opinion of the corporation counsel or legal advisor attesting to the legal sufficiency of the claim of non-control should accompany the documentation.

(2) If non-control is being attributed to a legal prohibition, copies of the statute or statutes cited together with a copy of a legal opinion from the corporation counsel or other legal advisor attesting to the legal sufficiency of the statute or statutes for establishing a position of non-control.

(3) Affidavits or notarized personal statements describing actions taken by the individual or group of individuals seeking to rebut the presumption of control which clearly indicate what action the individual has taken to compel the entity to correct the violation or pay the debt owed. The affidavit or personal statement should be specific as to times, places and actions taken.

As these guidelines are only at a draft stage, OSMRE solicits comments on alternative or additional guidelines that might be adopted for rebutting the presumptions established by the definition. For example, the assets of a corporate parent and its subsidiary may be relevant in determining whether a parent or its officers lacks control of the subsidiary. Or publicly held entities might be evaluated differently from those which are privtely held.

As noted previously, the guidelines will be advisory only. They will not be adopted as regulations or otherwise be included in the final rule. OSMRE has decided no this approach to give regulatory authorities adequate discretion to evaluate the presumptions in each case in a way that best will achieve the purposes of the Act.

Date: October 1, 1987.

Jed D. Christensen,

Director, Office of Surface Mining Reclamation and Enforcement.

[FR Doc. 87-23039 Filed 10-2-87; 8:45 am]

BILLING CODE 4310-05-M

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 202

[Docket No. RM85-4A]

Registration of Claims to Copyright; Registration and Deposit of Databases Proposed Regulations

AGENCY: Copyright Office, Library of Congress.

ACTION: Proposed regulations.

SUMMARY: The Copyright Office of the Library of Congress issues this notice to advise the public that it is considering adopting a new regulation that would permit group registration of an automated database, including revisions and updates, 37 CFR 202.3(b)(4), and would make changes in existing regulations for the registration and deposit of databases. The proposed amendments would implement a portion of section 408 of the Copyright Act of 1976, title 17 of the U.S. Code. This section embodies the deposit requirements for copyright registration. These amendments would not only formalize the procedure now being used by the Copyright Office for the deposit and registration of databases but would also permit the group registration of a single database and revisions and updates of the database, even though published at different times.

DATES: All comments should be received on or before December 4, 1987.

ADDRESSES: Ten copies of written comments should be addressed, if sent by mail, to: Library of Congress, Department 100, Washington, DC 20540.

If delivered by hand, copies should be brought to: Office of General Counsel, James Madison Memorial Building, Room 407, First and Independence Avenue, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dorothy Schrader, General Counsel, U.S. Copyright Office, Library of Congress, Washington, DC 20559, (202) 287-8380.

SUPPLEMENTARY INFORMATION: Under the Copyright Act of 1976, Title 17, U.S. Code, copyright may ordinarily subsist in an automated database either as an original compilation or as some other original work of authorship. Databases provide special problems for copyright deposit and examination, however, because many of them are constantly changing or the updates may consist of small increments of information. To the extent the basic database and the updates are copyrightable, questions arise as to how best to register the claims.

Under current practice, the Office essentially allows the claimant to determine how frequently to register updates of a database, but does not allow grouping of separately published updates on a single registration. Special relief provisions already provide some flexibility in deposit requirements. *See* H.R. Rep. 94-1476, 94th Cong., 2d Sess. 151 (1976). The specific provision relating to the registration of machine-readable databases is found in 37 CFR 202.20(c)(2)(vii)(B), while the special relief provision is § 202.20(d).

Pursuant to 17 U.S.C. 103, "copyright in a compilation or derivative work extends only to the material contributed by the author of such work, as distinguished from the preexisting material employed in the work, and does not imply any exclusive right in the preexisting material."

The Copyright Act of 1976 encourages registration by conferring special benefits on the registrant. Registration is a prerequisite to suit, 17 U.S.C. 411(a); if the registration is made before publication or within five years of first publication, the certificate of registration is *prima facie* evidence of the facts it states and of the validity of the copyright, 17 U.S.C. 410(c); and by registering the work within three months of the publication, the copyright owner preserves the right to claim statutory damages and discretionary counsel fees. 17 U.S.C. 412.

Section 408 of the statute requires deposit of material in connection with applications for copyright registration of unpublished and published works. Subsection 408(c)(1) authorizes the Register of Copyrights to specify classes into which works may be placed for purposes of deposit and registration. One of the alternatives is "a single registration for a group of related works."

When the Copyright Office issued its 1978 deposit regulations, several comments requested special provisions for group registration of revisions and updates of automated databases. 43 FR 763 (Janaury 4, 1978). At that time the Office invited further comments and suggestions as to the type of related works that could be covered by group registration and the deposit and registration requirements applicable in those cases. The possibility of providing for "a single registration for a group of related works," however, was "reserved for implementation in a separate proceeding," if any. 43 FR 965 (Janaury 5, 1978). Whether to allow any group registrations is discretionary with the Copyright Office except in the case of certain published contributions to

periodicals, 17 U.S.C. 408(c), and the Office has elected not to exercise this discretionary authority to date.

On February 14, 1985 (50 FR 6208), the Copyright Office requested public comment on proposed amendments to the regulations governing deposit. In their response to this request, the Association of American Publishers (AAP) and the Information Industry Association (IIA) commented specifically on the deposit and registration of databases. AAP stated that the Copyright Office should develop regulations to meet the problems of deposit for dynamic databases subject to regular revision, expansion, or other change. AAP proposed regulations that would permit a single "group" registration for varying versions (enhancements, updates, and other modifications) of a database, and related databases, published within a twelve-month period, or any lesser period within twelve months, on the basis of a single deposit and application. AAP also urged that deposit material reflect reasonable portions of output, rather than "raw data" or the like, and that the Office should relax deposit requirements in the case of successively ("group") registered revisions.

IIA also proposed the addition of a new regulation that would permit group registration of databases if certain conditions are met. The group registration would require that works have the same copyright claimant, the same general title, and similar general content, including subject and organization. If the works are published, each must bear a separate copyright notice as first published and have the same copyright owner, and the work or works must be first published within three months prior to registration.

IIA suggested that the deposit for databases cannot serve as documentation of the complete identity of the work's content, either to show the extent of registration or the entirety of the work. IIA recommended that relevant evidence in the examination of authorship would be documentary evidence of the continuing process of creation, hard copy extracts (for example, the first and last 25 pages), and the same direct online access as is offered the customer.

IIA also advocated the use of special relief that would allow the Register of Copyrights to "permit the deposit of identifying material which does not comply with § 202.21 of these regulations."

On June 10, 1985 (50 FR 24240), the Copyright Office published a Notice of Inquiry inviting public comment on the depo it requirements for machine-readable databases including revisions and derivative works based upon previously registered databases.

In response to this Notice of Inquiry, seven commentators submitted letters to the Copyright Office. Having reviewed both the original proposals and the comments, the Copyright Office has decided to propose group registration of certain databases and their updates. It invites comments on the details of the registration and deposit proposals.

1. Group Registration for Automated Databases

As noted in the original IIA proposal, 17 U.S.C. 408(c)(1) authorizes the Register of Copyrights "to specify by regulation the administrative classes into which works are to be placed for purposes of deposit and registration * * *. The regulations may require or permit * * * a single registration for a group of related works." Five of the commentators supported the group registration of databases; three emphasized the burden of registering under the present regulations, which require multiple registrations for dynamic databases. One commentator noted the virtual impossibility of registering their daily updates under the present regulations. The attorney for the Online Computer Library Center (OCLC) emphasized the uncertainty of what is covered in the OCLC registrations, which are currently made on a monthly basis.

Three responses addressed what the minimum frequency period should be for the registration of group works. Initially IIA had supported a three month period on the grounds that it would "(1) spur claimants to register as soon as possible, so as to retain all of the remedies provided by the statute and (2) avoid unnecessary confusion, because three months is a period already of significance under the Act as the grace period under Section 412(2) for preserving all remedies for published works." AAP maintained its earlier position that called for a twelve-month registration period but noted that those who wished to register at three-month intervals should be permitted to do so. Dunn and Bradstreet also endorsed the twelve-month registration period.

On the basis of the comments received and its own analysis of the issues, the Copyright Office has concluded that it should permit a single group registration for varying updates of a database over a three month period of time. This group registration would be limited to a single automated database and its updates. The Copyright Office finds that sufficient factors such as size, complexity and technological characteristics, exist to distinguish the automated database from other groups of related works and that these factors justify group registration for automated databases under a certain set of facts, at least on an experimental basis. The Office has selected the three month registration period to encourage earlier registration, to be consistent with other statutory provisions in the nature of a grace period, and to keep the scope of the registration within manageable proportions for purposes of judicial review. Of course, claimants may elect to apply for group registration of databases more frequently than at three-month intervals. However, if claimants seek registration of updates covering more than a three-month period, then they cannot avail themselves of the group registration option, although they could register as a single work a particular version of a database on a given day.

The Copyright Office remains concerned about the administrative costs of processing and examining related works for a single fee. It will monitor the experience with database registrations under any final regulations and revisit the issue as necessary. Because of the serious concerns about processing costs and administrative burdens in the case of group registrations, the Office will apply the database regulation narrowly and will not now apply its discretionary authority to other related works.

The Office does not propose a special fee for group registration of a database and its updates. The normal $10 application filing fee applies.

2. Deposit Based on Reasonable Portions of Output

Under current regulations governing registration for a single-file database, applicants deposit "one copy of identifying portions of the work reproduced in a form visually perceptible without the aid of a machine or device, either on paper or in microform." In practice, "identifying portions" is equivalent to the first and last 25 pages.

Deposit for a multi-file database calls for representative portions of each file—50 data records or the entire file, whichever is less, plus a descriptive statement containing: The title of the database; the name and address of the copyright claimant; the name and content of each separate file within the database, including subject matter, origin of data and number of separate records within each file; for published databases, a description of the exact contents of any machine-readable

copyright notice used in or with the database (plus manner and frequency of display) and a sample of any visually perceptible copyright notice affixed to the copies or container. In the case of registration for revisions of a previously registered database, the required representative portions shall reflect the copyrightable changes.

The commentators urged that the Office not require the database deposit to serve as documentation of the complete identity of the work's content, either to show the extent of registration or the entirety of the work. Three commentators agreed with the IIA position that the focus of the deposit requirements should be on a deposit that would enable the Copyright Office to determine copyrightability. They agreed that a simplified deposit of identifying portions, *e.g.*, the first and last 25 pages of a printout, should be sufficient.

The commentators did not agree, however, whether the deposit of identifying portions should disclose the raw data itself, or should reflect the "output" of the database.

With respect to updates, three commentators urged that the deposit should consist of a "descriptive statement" which incorporates by reference the material representations made to the Office at the time of the original registration. Then these commentators suggested that subsequent deposits should consist of new identifying material or a statement that the prior material is still representative of the database.

The Copyright Office has concluded, however, that the existing requirements for single, multi-file, and revised databases should not be reduced in the case of group registration of databases. The Office finds that, in order to determine copyrightability and develop an adequate administrative record for judicial review, it needs as much deposit material for the group registration of a database and its updates as it now receives for individual registration of databases. In summary these deposit materials are: (1) For a single-file database, one copy of identifying portions of the work reproduced in a form visually perceptible without the aid of a machine or device, either on paper or in microform; (2) for a multiple-file database or revised database, representative portions showing copyrightable content, accompanied by the requisite descriptive statement.

The Office therefore proposes to establish essentially a unform set of deposit requirements, whether database registration is sought on a group basis, pursuant to the proposed new regulations, or is sought only for a given day's verision of the database. The Office proposes to maintain the existing regulations, recast in form and modified as follows:

(1) For a revised database, the deposit material would be marked to show representative copyrightable changes and the descriptive statement would show the location generally of the remaining copyrightable changes, not disclosed in the deposit;

(2) For group registrations, the claimant would select a representative creation or publication date, depending on whether the work is unpublished or published, and deposit accordingly.

Current practice permits registration of encoded databases without a key or explanation of the code under the rule of doubt upon receipt of the copyright owner's written confirmation that the work as deposited represents copyrightable authorship. This practice will be maintained.

If an applicant is unable or unwilling to meet the deposit requirements because if trade secrets contained in the work, the applicant can request special relief from these requirements.

Those who responded to the Notice of Inquiry did not address the special relief issue. In its original proposal of March 29, 1985, IIA supported adding an amendment to § 202.20 stating that the Register may "permit the deposit of identifying material which does not comply with § 202.21 of these regulations."

Section 202.21 establishes the general requirements for the deposit of identifying material instead of copies. In 1986, the special relief provision, § 202.20(d), was amended to allow waiver of the identifying material standards. 51 FR 6402. The special relief regulation provides sufficient recourse or those who are unable or unwilling to meet the deposit requirements. The Copyright Office will continue to consider special relief for databases that cannot meet the ordinary deposit requirements.

3. Copyrightability of Database Updates

For the typical automated database, consisting of a large volume of information or data, the Copyright Office can generally determine without much difficulty that the initial form or version of the database is a copyrightable work of original authorship. The determination that subsequent updates are also original works of authorship cannot be so readily made. Several different types of databases exist. Updates vary in content, nature, and frequency. In *Financial Information, Inc. v. Moody's Investor Service, Inc.*, 751 F.2d 501 (2d Cir 1984), 808 F.2d 204 (2d Cir. 1986), the Second Circuit held that the daily updates of bond rating information were not copyrightable.

In proposing group registration of automated databases and their copyrightable updates, the Copyright Office recognizes that it cannot determine by examination that each update in the group of upates registered at three months intervals is copyrightable at every point in time when information is added to the basic database. The Office seeks, however, to assure that *representative* portions of the changing database are deposited which disclose adequately the copyrightable content of the changes. The Office also provides in this proposal that the updates occurring within the three month period should be submitted for group registration only if they are individually copyrightable, that is, if each daily or less frequent update meets the statutory standard of original work of authorship.

Undoubtedly, this first administrative regulation of group registration is experimental. The Office will continue to monitor the emerging decisional law with respect to automated databases, will evaluate the administrative experience under any final regulation, and will reconsider the proper scope of, and conditions for, group registration of databases as appropriate.

With respect to the Regulatory Flexibility Act, the Copyright Office takes the position that this Act does not apply to Copyright Office rulemaking. The Copyright Office is a department of the Library of Congress and is part of the legislative branch. Neither the Library of Congress nor the Copyright Office is an "agency" within the meaning of the Administrative Procedure Act of June 11, 1946, as amended (Title 5, Chapter 5 of the U.S. Code, Subchapter II and Chapter 7). The Regulatory Flexibility Act consequently does not apply to the Copyright Office since that Act affects only those entities of the Federal Government that are agencies as defined in the Administrative Procedure Act.[1]

---

[1] The Copyright Office was not subject to the Administrative Procedure Act before 1978, and it is now subject to it only in areas specified by section 701(d) of the Copyright Act (i.e., "all actions taken by the Register of Copyrights under this title [17]." except with respect to the making of copies of copyright deposits). [17 U.S.C. 706(b)]. The Copyright Act does not make the Office an "agency" as defined in the Administrative Procedure Act. For example, personnel actions taken by the Office are not subject to APA–FOIA requirements.

VOL 52 ISS 192 OCT 5 1987 UMI

List of Subjects in 37 CFR Part 202

Registration of claims to copyright. Claims to copyright, Copyright registration.

Proposed Regulations

In consideration of the foregoing, the Copyright Office proposes to amend Part 202 of 37 CFR, Chapter II.

PART 202—[AMENDED]

1. The authority citation for Part 202 would continue to read as follows:

Authority: Sec. 702, 90 Stat. 2541, 17 U.S.C. 702; §§ 202.19, 202.20 and 202.21 are also issued under 17 U.S.C. 407 and 408.

2. Section 202.3(b)(4) would be revised to read as follows:

§ 202.3 [Amended]

* * * * *

(b) * * *

(4) Group registration of automated databases.

(i) Pursuant to the authority granted by section 408(c)(1) of Title 17 of the United States Code, the Register of Copyrights has determined that a single registration, on the basis of a single application, deposit, and registration fee, may be made for automated databases and their updated, copyrightable versions if all of the following conditions are met:

(A) In cases where a database (or updates thereof), if unpublished, are fixed, or if published are published only in the form of machine-readable copies:

(*1*) All of the updates are owned by the same copyright claimant;

(*2*) All of the updates have the same collective title;

(*3*) All of the updates are similar in their general content, including their subject;

(*4*) All of the updates are similar in their organization;

(*5*) Each of the updates, if published, bore a separate copyright notice as first published and the name of the owner of copyright in each work (or an abbreviation by which the name can be recognized, or a generally known alternative designation of the owner) was the same in each notice;

(*6*) Each of the updates, if published, was first published within a three-month period;

(*7*) Each of the updates, if unpublished, was created within a three-month period;

(*8*) The deposit accompanying the application complies with § 202.20(c)(2)(vii)(B).

(*B*) [Reserved for works other than automated databases].

(ii) Registration may be made for both a database published on a single date and for subsequent copyrightable updates of the earlier material, including added, incremental updates. An application for group registration of automated databases under section 408(c)(1) of Title 17 and this subsection shall consist of:

(A) A basic initial application for registration of an automated database on Form TX, which shall contain the information required by the form and its accompanying instructions;

(B) In the case of updates of a previously registered automated database, an adjunct form prescribed by the Copyright Office and designated "Adjunct Application for Registration of Updates of Automated Databases" (Form GR/DB), which shall contain the information required by the form and its accompanying instructions and shall comply with all the conditions of this subsection;

(C) A filing fee of $10; and

(D) The deposit required by § 202.20(c)(2)(vii)(B).

3. Section 202.20(c)(2)(vii)(B) would be revised to read as follows:

§ 202.20 [Amended]

* * * * *

(c) *Nature of required deposit.*

(1) * * *

(2) * * *

(vii) * * *

(B) For published and unpublished automated databases, compilations, statistical compendia, and other literary works so fixed or published, one copy of identifying portions of the work, reproduced in a form visually perceptible without the aid of a machine or device, either on paper or in microform. For these purposes:

(*1*) "Identifying portions" shall generally mean either the first and last 25 pages or equivalent units of the work if reproduced on paper or in microform.

(*2*) "Data file" and "file" shall mean a group of data records pertaining to a common subject matter regardless of their size or the number of data items in them.

(*3*) If the work is an automated database comprising separate or distinct data files, "identifying portions" shall instead consist of 50 complete data records from each data file or the entire data file, whichever is less, and the descriptive statement required by paragraph (c)(2)(vii)(B)(*4*).

(*4*) In the case of a revised or updated version of a database, the claimant shall deposit identifying portions that contain 50 representative pages or equivalent units, or representative data records, which have been marked to disclose the copyrightable revisions added on at least one representative publication date if published or one representative creation date, if unpublished, and shall also deposit a brief typed or printed descriptive statement containing the notice of copyright information required under "(5)" or "(6)" immediately below and:

(*i*) The title of the database;

(*ii*) A subtitle, date of creation or publication, or other information, to distinguish any separate or distinct data files for cataloging purposes;

(*iii*) The name and address of the copyright claimant;

(*iv*) For each separate file, its name and content, including its subject, the origin(s) of the data, and the approximate number of data records it contains; and

(*v*) In the case of a revised or updated version of an automated database, information as to the nature and frequency of changes in the database and some identification of the location within the database or the separate data files of the copyrightable changes.

(*5*) For a copyright notice embodied in machine-readable form, the statement shall describe exactly the visually perceptible content of the notice which appears in or with the database, and the manner and frequency with which it is displayed (*e.g.*, at user's terminal only at sign-on, or continuously on terminal display, or on printouts, etc.).

(*6*) If a visually perceptible copyright notice is placed on any copies of the work (or on magnetic tape reels or containers therefor), a sample of such notice must also accompany the statement.

* * * * *

Dated: September 17, 1987.

BILLING CODE 1410-07-M

VETERANS ADMINISTRATION

38 CFR Part 3

Improvements in Veterans' Benefits

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration (VA) is proposing to amend its adjudication regulations to improve and extend eligibility for certain veterans' benefits. These amendments are necessary because the Veterans'

Benefits Improvement and Health-Care Authorization Act of 1986 changed the eligibility and entitlement criteria for those benefits. The effect of these amendments will be the addition of new presumptively service-connected disabilities for former prisoners of war, improvement in compensation payable for certain multiple disabilities, exclusion of certain income in computing pension entitlement, extension of eligibility for special home adaptation grants and a change in the effective date of reduction for certain hospitalized incompetent veterans. Additional amendments are also proposed to implement opinions of the VA General Counsel and a settlement agreement.

DATES: Comments must be received on or before November 4, 1987. Comments will be available for public inspection until November 18, 1987. It is proposed to make these amendments effective October 28, 1986, with the exception of the amendments to 38 CFR 3.309(c) which are proposed to be effective October 1, 1986, as provided by law, and the amendments to 38 CFR 3.22, 3.23, 3.271, 3.272 (h) and (m), and 3.557(c) and 3.800 which are proposed to be effective 30 days after publication of the final rule.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these regulations to Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Service Unit, Room 132 at the above address, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays), until November 18, 1987.

FOR FURTHER INFORMATION CONTACT: Robert M. White, chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, (202) 233–3005.

SUPPLEMENTARY INFORMATION: The Veterans' Benefits Improvement and Health-Care Authorization Act of 1986 (Pub. L. 99–576) made several changes in eligibility and entitlement criteria for certain veterans' benefits. The changes made by the law are set forth below, together with the proposed regulatory amendments implementing those changes.

Section 108 of the law added two disabilities to the list of conditions in 38 U.S.C. 312(b) presumed to be service-connected for former prisoners of war in the absence of affirmative evidence of some other post-service cause. Those disabilities are post-traumatic osteoarthritis and organic residuals of frostbite. The latter disability may be service-connected only if it is determined that the veteran was interned in climatic conditions consistent with the occurrence of frostbite. We propose to add these two disabilities to the list of presumptively service-connected diseases for former prisoners of war contained in 38 CFR 3.309(c).

Section 109 of the law amended 38 U.S.C. 360 to provide for special consideration in certain cases of loss of paired organs or extremities. This change authorizes the payment of compensation for five specific combinations of service-connected and nonservice-connected disabilities in the same manner as if both disabilities were service-connected, as long as the nonservice-connected disability was not the result of the veteran's own willful misconduct. The disability combinations are (1) service-connected blindness of one eye and nonservice-connected blindness of the other eye; (2) service-connected loss or loss of use of one kidney and nonservice-connected involvement of the other kidney; (3) service-connected total deafness in one ear and nonservice-connected total deafness in the other ear; (4) service-connected loss or loss of use of one hand or foot and nonservice-connected loss or loss of use of the other hand or foot; and, (5) permanent service-connected disability of one lung, rated 50 percent or more disabling, in combination with a nonservice-connected disability of the other lung. The fourth disability combination noted above previously afforded entitlement to special monthly compensation under 38 U.S.C. 314(t) which has been repealed.

Section 109 also amended 38 U.S.C. 360 to include an offset provision whereby an award of money or property of value pursuant to a judicial proceeding based on, or a settlement or compromise of, any cause of action for damages for the entitling nonservice-connected disability would be recovered through withholding of compensation. A similar offset provision was in effect for entitlement under 38 U.S.C. 314(t) and is being continued with respect to the fourth disability combination under 38 U.S.C. 360. For the remaining disability combinations the offset provisions apply only with respect to awards of compensation made on or after October 28, 1986.

We propose to implement the provisions of section 109 of the law by appropriately amending 38 CFR 3.383 to incorporate the new entitlement criteria and offset provisions. We are also adding, as we have with other offset provisions, separate paragraphs providing an exemption from offset for social security and workers' compensation, and an affirmative duty for veterans to report the receipt of money or property resulting from judgments, settlements or compromises involving the entitling nonservice-connected disabilities. We also propose to delete 38 CFR 3.384 because the statutory authority for that section has been repealed, and veterans entitled under that section will now be entitled under § 3.383.

In an opinion on a related matter, the VA General Counsel has held that the offset provisions applicable to compensation awards under 38 U.S.C. 351 do not apply to any portion of such benefits that represent payment for periods prior to the month following the date on which a separate judgment, settlement or compromise became final. Since the offset provisions of 38 U.S.C. 351 are similar to those under 38 U.S.C. 360 (as amended) and 410(b), we propose to amend 38 CFR 3.22, 3.383 and 3.800 to include clarifying language that retroactive benefits for periods prior to the month following the date of receipt of money or property pursuant to an applicable judgment, settlement or compromise are not subject to offset.

Section 205 of the law amended 38 U.S.C. 618 to recharacterize monies received as a result of participation in a therapeutic or rehabilitation activity as a distribution of funds rather than as payment or remuneration. Section 205 also excluded such distributions of funds from inclusion as income in determining pension entitlement. To implement these changes we propose to amend 38 CFR 3.342(b)(4)(ii) and 3.343(c) to incorporate the recharacterization of monies received, and we propose to provide for the income exclusion by adding a new paragraph (l) to 38 CFR 3.272.

Section 401 of the law amended 38 U.S.C. 801(b)(1) to provide eligibility for special home adaptation grants to assist certain severely disabled veterans in acquiring residences that were already adapted with special features determined to be necessary because of disability. These grants were previously available only for adding special features to a previously unadapted residence. We propose to implement this extension of eligibility by amending 38 CFR 3.809a.

Section 503 of the law amended 38 U.S.C. 3012 to provide a new effective date for discontinuance of benefits to certain incompetent veterans. Under 38 U.S.C. 3203, benefits must be

discontinued when an institutionalized incompetent veteran, without dependents, has an estate which equals or exceeds $1,500. The new law establishes the effective date of such discontinuance as the last day of the month of admission or the last day of the month in which the veteran's estate equals or exceeds $1,500, whichever is later. To implement this change we propose to amend 38 CFR 3.557(d) and 3.501(i).

We are also proposing to amend 38 CFR 3.557(c) to indicate that the value of an incompetent veteran's estate will be computed under the provisions of 38 CFR 13.109. This change will place all of the factors to be considered in estate computation into one regulation for ease of administration.

As part of a stipulation for dismissal in the case of *United States* v. *Harriet Hawk*, the VA agreed to initiate rulemaking procedures to define the term "hardship" as used in 38 U.S.C. 541(g). That section of law provides for exclusion of a child's available income in determining a surviving spouse's pension entitlement if the inclusion of the income would work a hardship on the surviving spouse. A similar exclusion is available under 38 U.S.C. 521(h) in determining pension entitlement for a disabled veteran.

To implement this agreement we propose to amend 38 CFR 3.23(d) to define the term "hardship" as existing when annual expenses for reasonable family maintenance exceed the sum of countable annual income plus VA pension entitlement. Guidance is also provided with respect to the terms "expenses for reasonable family maintenance" and "reasonable availability" of a child's income. We also propose to amend 38 CFR 3.272 by adding a new paragraph (m) to provide for exclusion from a child's available income an amount sufficient to meet that hardship.

In another opinion the VA General Counsel has held that where a surviving spouse's claim for death pension is received more than 45 days after the date of the veteran's death, thus limiting the effective date of an award to date of claim, expenses of the veteran's last illness, burial and just debts which were paid by the surviving spouse after the date of death but before the date of entitlement are not deductible from the surviving spouse's annual income for pension purposes. We propose to implement this opinion by amending § 3.272(h) to state that expenses paid during such period are not deductible in computing pension entitlement. We are also taking this opportunity to revise the language of that section and also § 3.271 to substitute the term "12-month annualization period" for the term "calendar year" since income determinations for improved pension are not on a calendar year basis.

In reviewing § 3.272 for the above opinion, the VA General Counsel also noted that paragraph (h)(1)(i) incorrectly, and in excess of statutory authority, provided that the expenses of a veteran's last illness which were paid by a veteran's child prior to the death of the veteran could be deducted from the income of the child for death pension purposes. Under 38 U.S.C. 503(a)(3) that deduction is available only for a surviving spouse. Accordingly, we propose to amend § 3.272(h)(1)(i) to delete the words "or child" each place they appear.

Executive Order 12291

In accordance with Executive Order 12291, Federal Regulation, we have determined that these regulatory amendments are nonmajor for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act (RFA)

The Administrator hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601 through 612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Thomas K. Turnage,

Administrator.

38 CFR Part 3, ADJUDICATION, is proposed to be amended as follows:

PART 3—[AMENDED]

1. In § 3.22 paragraph (b) is revised by adding a sentence and an authority citation at the end to read as follows:

§ 3.22 Benefits at DIC rates in certain cases when death is not service-connected.

* * * * *

(b) * * * The provisions of this paragraph do not apply, however, to any portion of such benefits payable for any period preceding the end of the month in which such money or property of value is received.

(Authority: 38 U.S.C. 210(c))

* * * * *

2. In § 3.23, new paragraph (d)(6) is added to read as follows:

§ 3.23 Improved pension rates—Veterans and surviving spouses.

* * * * *

(d) * * *

(6) *Reasonable availability and hardship.* For the purposes of paragraphs (d)(4) and (d)(5) of this section, a child's income shall be considered "reasonably available" when it can be readily applied to meet the veteran's or surviving spouse's expenses necessary for reasonable family maintenance, and "hardship" shall be held to exist when annual expenses necessary for reasonable family maintenance exceed the sum of countable annual income plus VA pension entitlement. "Expenses necessary for reasonable family maintenance" include expenses for basic necessities (such as food, clothing, shelter, etc.) and other expenses, determined on a case-by-case basis, which are necessary to support a reasonable quality of life.

(Authority: 38 U.S.C. 210(c))

3. In § 3.271, paragraphs (a), (e) and (f) are revised to read as follows:

§ 3.271 Computation of income.

(a) *General.* Payments of any kind from any source shall be counted as income during the 12-month annualization period in which received unless specifically excluded under § 3.272.

(Authority: 38 U.S.C. 210(c))

* * * * *

(e) Installments. Income shall be determined by the total amount received

or anticipated during a 12-month annualization period.

(Authority: 38 U.S.C. 210(c))

(f) *Deferred determinations.* When an individual is unable to predict with certainty the amount of countable annual income, the annual rate of improved pension shall be reduced by the greatest amount of anticipated countable income until the end of the 12-month annualization period, when total income received during that period will be determined and adjustments in pension payable made accordingly.

Authority: 38 U.S.C. 210(c))

4. In § 3.272 the introductory text, paragraphs (g) introductory text, (g)(1)(iii), (g)(2)(iii), (g)(3), (h) introductory text, and (h)(1)(i) are revised, and paragraphs (l) and (m) are added to read as follows:

§ 3.272 Exclusions from income.

The following shall be excluded from countable income for the purpose of determining entitlement to improved pension. Unless otherwise provided, expenses deductible under this section are deductible only during the 12-month annualization period in which they were paid.

(Authority: 38 U.S.C. 210(c))

* * * * *

(g) *Medical expenses.* Within the provisions of the following paragraphs, there will be excluded from the amount of an individual's annual income any unreimbursed amounts which have been paid within the 12-month annualization period for medical expenses regardless of when the indebtedness was incurred. An estimate based on a clear and reasonable expectation that unusual medical expenditure will be realized may be accepted for the purpose of authorizing prospective payments of benefits subject to necessary adjustment in the award upon receipt of an amended estimate, or after the end of the 12-month annualization period upon receipt of an eligibility verification report.

(Authority: 38 U.S.C. 210(c))

(1) * * *

(iii) They were or will be in excess of 5 percent of the applicable maximum annual pension rate or rates for the veteran (including increased pension for family members but excluding increased pension because of need for aid and attendance or being housebound) as in effect during the 12-month annualization period in which the medical expenses were paid.

(2) * * *

(iii) They were or will be in excess of the applicable maximum annual pension rate or rates for the spouse (including increased pension for family members but excluding increased pension because of need for aid and attendance or being housebound) as in effect during the 12-month annualization period in which the medical expenses were paid.

(Authority: 38 U.S.C. 210(c))

(3) *Children's income.* Unreimbursed amounts paid by a child for medical expenses of self, parent, brothers and sisters, to the extent that such amounts exceed 5 percent of the maximum annual pension rate or rates payable to the child during the 12-month annualization period in which the medical expenses were paid.

(Authority: 38 U.S.C. 210(c))

(h) *Expenses of last illnesses, burials and just debts.* Expenses specified in paragraphs (h)(1) and (h)(2) of this section which are paid during the calendar year following that in which death occurred may be deducted from annual income for the 12-month annualization period in which they were paid or from annual income for any 12-month annualization period which begins during the calendar year of death, whichever is to the claimant's advantage. Otherwise, such expenses are deductible only for the 12-month annualization period in which they were paid. Any such expenses paid subsequent to death but prior to date of entitlement are not deductible.

(Authority: 38 U.S.C. 210(c))

(1) * * *

(i) Amounts paid by a spouse before a veteran's death for expenses of the veteran's last illness will be deducted from the income of the surviving spouse.

(Authority: 38 U.S.C. 503(a)(3))

* * * * *

(l) *Distributions of funds under 38 U.S.C. 618.* Distributions from the Veterans Administration Special Therapeutic and Rehabilitation Activities Fund as a result of participation in a therapeutic or rehabilitation activity under 38 U.S.C. 618 shall be considered donations from a public or private relief or welfare organization and shall not be countable as income for pension purposes.

(Authority: 38 U.S.C. 618(f))

(m) *Hardship exclusion of child's available income.* When hardship is established under the provisions of § 3.23(d)(6) of this part, there shall be excluded from the available income of any child or children an amount equal to the amount by which annual expenses necessary for reasonable family maintenance exceed the sum of countable annual income plus VA pension entitlement computed without consideration of this exclusion. The amount of this exclusion shall not exceed the available income of any child or children, and annual expenses necessary for reasonable family maintenance shall not include any expenses which were considered in determining the available income of the child or children or the countable annual income of the veteran or surviving spouse.

(Authority: 38 U.S.C. 521(h), 541(g))

5. In § 3.309, the list in paragraph (c) and the authority citation for the section is revised to read as follows:

§ 3.309 Disease subject to presumptive service connection.

* * * * *

(c) *Diseases specific as to former prisoners of war.*

* * * * *

Avitaminosis
Beriberi (including beriberi heart disease)
Chronic dysentery
Helminthiasis
Malnutrition (including optic atrophy associated with malnutrition)
Pellagra
Any other nutritional deficiency
Psychosis
Any of the anxiety states
Dysthmic disorder (or depressive neurosis)
Organic residuals of frostbite, if it is determined that the veteran was interned in climatic conditions consistent with the occurrence of frostbite
Post-traumatic osteoarthritis

(Authority: 38 U.S.C. 210(c))

6. In § 3.342, paragraph (b)(4)(ii) is revised to read as follows:

§ 3.342 Permanent and total disability ratings for pension purposes.

* * * * *

(b) * * *

(4) * * *

(ii) Participation in, or the receipt of a distribution of funds as a result of participation in, a therapeutic or rehabilitation activity under 38 U.S.C. 618.

(Authority: 38 U.S.C. 618(f))

* * * * *

7. In § 3.343, the last sentence in paragraph (c)(1) is revised to read as follows:

§ 3.343 Continuance of total disability ratings.

* * * * *

(c) Individual unemployability. (1) * * * Neither participation in, nor the receipt of a distribution of funds as a result of participation in, a therapeutic or rehabilitation activity under 38 U.S.C.

618 shall be considered evidence of employability.

(Authority: 38 U.S.C. 618(f))

* * * * *

8. Section 3.383 is revised to read as follows:

§ 3.383 Special consideration for paired organs and extremities.

(a) Entitlement criteria. Compensation is payable for the combinations of service-connected and nonservice-connected disabilities specified in paragraphs (a)(1) through (a)(5) of this section as if both disabilities were service-connected, provided the nonservice-connected disability is not the result of the veteran's own willful misconduct.

(1) Blindness in one eye as a result of service-connected disability and blindness in the other eye as a result of nonservice-connected disability.

(2) Loss or loss of use of one kidney as a result of service-connected disability and involvement of the other kidney as a result of nonservice-connected disability.

(3) Total deafness in one ear as a result of service-connected disability and total deafness in the other ear as a result of nonservice-connected disability.

(4) Loss or loss of use of one hand or one foot as a result of service-connected disability and loss or loss of use of the other hand or foot as a result of nonservice-connected disability.

(5) Permanent service-connected disability of one lung, rated 50 percent or more disabling, in combination with a nonservice-connected disability of the other lung.

(b) *Effect of judgment or settlement.* (1) If a veteran receives any money or property of value pursuant to an award in a judicial proceeding based upon, or a settlement or compromise of, any cause of action for damages for the nonservice-connected disability which established entitlement under this section, the increased compensation payable by reason of this section shall not be paid for any month following the month in which an such money or property is received until such time as the total amount of such increased compensation that would otherwise have been payable equals the total of the amount of any such money received and the fair market value of any such property received. The provisions of this paragraph do not apply, however, to any portion of such increased compensation payable for any period preceding the end of the month in which such money or property of value was received.

(2) With respect to the disability combinations specified in paragraphs (a)(1), (a)(2), (a)(3) and (a)(5) of this section, the provisions of this paragraph apply only to awards of increased compensation made on or after October 28, 1986.

(c) *Social security and workers' compensation.* Benefits received under social security or workers' compensation are not subject to recoupment under paragraph (b) of this section even though such benefits may have been awarded pursuant to a judicial proceeding.

(d) *Veteran's duty to report.* Any person entitled to increased compensation under this section shall promptly report to the VA the receipt of any money or property received pursuant to a judicial proceeding based upon, or a settlement or compromise of, any cause of action or other right of recovery for damages for the nonservice-connected loss or loss of use of the paired extremity upon which entitlement under this section is based. The amount to be reported is the total of the amount of money received and the fair market value of property received. Expenses incident to recovery, such as attorneys' fees, may not be deducted from the amount to be reported.

(Authority: 38 U.S.C. 360)

§ 3.384 [Removed]

9. Section 3.384 is removed.

10. In § 3.501, paragraph (i)(3) is revised to read as follows:

§ 3.501 Veterans.

* * * * *

(i) * * *

(3) *Section 3.557.* Incompetent veteran, admitted for hospital, institutional or domiciliary care, without dependents, whose estate equals or exceeds $1,500: Last day of the month of admission or the last day of the month in which the veteran's estate equals or exceeds $1,500, whichever is later. If the veteran was hospitalized for observation and examination, the date treatment began will be considered the date of admission.

(Authority: 38 U.S.C. 3012(c))

11. In § 3.502, the heading, introductory text and paragraph (c) are revised to read as follows:

§ 3.502 Surviving spouses.

The effective date of discontinuance of pension, compensation, or dependency and indemnity compensation to or for a surviving spouse will be the earliest of the dates stated in this section. Where an award is reduced, the reduced rate will be payable the day following the date of discontinuance of the greater benefit.

(Authority: 38 U.S.C. 210(c))

* * * * *

(c) *Legal surviving spouse entitled.* Date of last payment on award to another person as surviving spouse. See § 3.657.

(Authority: 38 U.S.C. 210(c))

* * * * *

12. In § 3.503, the introductory text and paragraphs (b) and (i) are revised as follows:

§ 3.503 Children.

The effective date of discontinuance of pension, compensation, or dependency and indemnity compensation to or for a child, or to or for a veteran or surviving spouse on behalf of such child, will be the earliest of the dates stated in this section. Where an award is reduced, the reduced rate will be payable the day following the date of discontinuance of the greater benefit.

(Authority: 38 U.S.C. 210(c))

* * * * *

(b) *Enters service.* Date of last payment of apportioned disability benefits for child not in custody of estranged spouse. Full rate payable to veteran. No change where payments are being made for the child to the veteran, his (her) estranged spouse, his (her) surviving spouse, or to the fiduciary of a child not in the surviving spouse's custody.

(Authority: 38 U.S.C. 210(c))

* * * * *

(i) *Surviving spouse becomes entitled.* Date of last payment. See § 3.657.

(Authority: 38 U.S.C. 210(c))

13. In § 3.557, the first sentence of paragraphs (b)(4) and (d), and all of paragraph (c) are revised to read as follows:

§ 3.557 Incompetents; estate over $1,500 and institutionalized.

* * * * *

(b) * * *

(4) Has an estate, derived from any source, which equals or exceeds $1,500, further payments of pension, compensation or emergency officer's retirement pay will not be made, except as provided in paragraph (d) of this section, until the estate is reduced to $500.

* * * * *

(c) For veterans subject to paragraph (b) of this section, the value of the veteran's estate shall be computed

under the provisions of § 13.109 of this title.

(Authority: 38 U.S.C. 210(c))

(d) Payment of pension, compensation or emergency officers' retirement pay to a veteran subject to the provisions of paragraph (b) of this section will he discontinued the last day of the month of admission or the last day of the month in which the veteran's estate equals or exceeds $1,500, whichever is later. * * *

(Authority: 38 U.S.C. 3203)

* * * * * *

14. In § 3.800, paragraph (a)(2) is amended by adding a sentence at the end and revising the authority citation to read as follows:

§ 3.800 Disability or death due to hospitalization, etc.

(a) * * *

(2) * * * The provisions of this paragraph do not apply, however, to any portion of such compensation or dependency and indemnity compensation payable for any period preceding the end of the month in which such judgment, settlement or compromise becomes final.

(Authority: 38 U.S.C. 210(c))

* * * * * *

15. In § 3.809a, the introductory text is revised to read as follows:

§ 3.809a Special home adaptation grants under 38 U.S.C. 801(b).

A certificate of eligibility for assistance in acquiring necessary special home adaptations, or, on or after October 28, 1986, for assistance in acquiring a residence already adapted with necessary special features, under 38 U.S.C. 801(b) may be issued to a veteran who served after April 20, 1898, if the following requirements are met:

(Authority: 38 U.S.C. 801(b))

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3272-8]

Approval and Promulgation of Implementation Plans; California; Ozone and Carbon Monoxide Attainment Plans

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; extension of public comment period.

SUMMARY: In two separate notices published on July 14, 1987 (52 FR 26428 and 52 FR 26431) EPA proposed disapproval of the ozone and carbon monoxide (CO) State Implementation Plans for five areas in California. The areas are Kern (ozone), Sacramento (ozone), Ventura (ozone), Fresno (ozone and CO), and South Coast (ozone and CO). The public comment period for these notices began on the date of publication and ended September 14, 1987 (60 days). EPA has received four written requests for an extension of time for public comment. EPA has evaluated these requests and is hereby granting a thirty (30) day extension of the public comment period for these two notices.

DATES: Comments may now be submitted up to October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Wally Woo, Chief, State Liaison Section, EPA, Region 9 (A-2), Air Management Division, 215 Fremont Street, San Francisco, CA 94105, (415) 974-7634; FTS 454-7634.

Authority: 42 U.S.C. 7401-7642.

Date: September 23, 1987.

John Wise,

Acting Regional Administrator.

BILLING CODE 6560-50-M

---

40 CFR Part 52

[PRL-3272-9; NC-034]

Approval and Promulgation of Implementation Plans; North Carolina; Miscellaneous Regulatory Changes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On April 14, 1987, North Carolina Division of Environmental Management submitted regulatory amendments for incorporation into their federally approved State implementation plan (SIP). The submittal included changes to eight different regulations Three of these regulatory amendments are being processed in other **Federal Register** notices. In this notice, EPA proposes to approve the other five amendments.

The changes to regulations 2D.0103 and 2H.0607 correct an address which indicates where information can be obtained. The change to 2D.0501, Compliance with Emission Control Standards, updates and replaces outdated ASTM methods. The amendment to 2D.0505, Control of Particulates from Incinerators, offers an alternative particulate emission level. Finally the addition to 2D.0533, Stack Height, adds the definition of emission limitation, as requested by EPA.

DATES: To be considered, comments must be received on or before November 4, 1987.

ADDRESSES: Comments should be addressed to Bob Peddicord at the Region IV EPA address below. Copies of the State's submittal are available for review during normal business hours at the following locations:

Air Quality Section, Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, Archdale Building, 512 North Salisbury Street, Raleigh, North Carolina 27611

Air Programs Branch, Region IV, U.S. Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Georgia 30365.

FOR FURTHER INFORMATION CONTACT: Bob Peddicord of the Region IV EPA Air Programs Branch, at the above address and the following phone: (404) 347-2864, or FTS 257-2864.

SUPPLEMENTARY INFORMATION: On April 14, 1987, the State of North Carolina submitted eight revisions to their State Implementation Plan (SIP). The revisions were adopted by the Environmental Management Commission on April 9, 1987, after a public hearing held on January 20, 1987. Changes to three regulations, 2D.0524—New Source Performance Standards, 2D.0525—National Emission Standards for Hazardous Air Pollutants, and 2D.0528—Total Reduced Sulfur from Kraft Pulp Mills are all being processed in separate notices.

Amendments to regulations 2D.0103, .0501, .0505, .0533 and 2H.0607 are being proposed for approval here. The amendments are described below.

2D.0103—Copies of Referenced Federal Regulations

The change in this regulation is to correct the address of the recently moved Winston-Salem regional office.

2D.0501—Compliance With Emission Control Standards

The amendments here clarify the ASTM methods used. The State is specifying the years that the ASTM methods were last certified. The State is also replacing ASTM D270, which has been withdrawn by ASTM, with a sampling method of their own. The new method is at least as restrictive as the old ASTM method. It should be noted

that these fuel sampling methods will be the subject of a future SIP revision where the sampling frequency will be specified to ensure the short-term SO_2 emission limits can be adequately checked for compliance.

2D.0505—Control on Particulates From Incinerators

The proposed changes to this regulation would allow an operator to choose a new emission limit of 0.08 grains per dry standard cubic foot, which is the federal new source performance standard. The current federally approved limit is a pounds per hour standard. If this option is chosen, a demonstration that the use of the new limit will not cause an ambient air quality standard violation will be required. The option of using the new standard represents a relaxation to three sources in the State. EPA has indicated to the State, and the State has agreed, that any new permits associated with the action need not be part of a SIP revision, but the sources, prior to adopting the new limit, should submit to EPA for approval, an air quality demonstration. If EPA does not approve the demonstration the source may revert to the original emission limit or the State may model rework the demonstration and submit it at a later date as a single source SIP revision. The three sources to which this option represents a relaxation are Rocky Mount Waste Water Treatment PLant, Mitchell Systems, and City of Greensboro, North Buffalo Plant.

On July 1, 1987 (52 FR 24646) EPA promulgated a new particulate National Ambient Air Quality Standard (NAAQS) to regulate particles that are 10 micrometers or less in diameter. This standard becomes effective July 31 and replaces the total suspended particulate standard. The air quality demonstrations required prior to adopting the proposed 0.08 grains per day standard cubic foot limit will need to include demonstrations that the new particulate standard will not be violated.

2D.0533—Stack Height

The definition of emission limitation is being added to this rule. EPA, when proposing to approve the original North Carolina stack height regulation, requested that this be added. North Carolina is complying with that request.

2H.0607—Copies of Referenced Documents

Here as in 2D.0103 the address of the Winston-Salem regional office is being changed.

Proposed Action

EPA is proposing to approve the revisions to North Carolina's regulations 2D.0103, 2D.0501, 2D.0505, 2D.0533 and 2H.0607, submitted to EPA on April 14, 1987. The changes in the regulations are consistent with EPA policy and requirements.

All interested persons are invited to comment on this action. Comments received within 30 days of the publication of this notice will be considered by EPA in the final rulemaking.

Under 5 U.S.C. section 605(b), I certify that this action will not have a significant impact on a substantial number of small entities. (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Exeuctive Order 12291.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 405 and 413

[BERC–381–P]

Medicare Program; Payment for Physicians' Outpatient Maintenance Dialysis Services and Other Physicians' Services for ESRD Patients

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would reinstate a modified version of the initial method of payment for physicians' dialysis services, and clarify and modify some of the principles of the monthly capitation payment method. Under both the initial method and the monthly capitation payment, we would specify that, to be payable, physicians' services must meet certain requirements for services furnished to individual patients, as distinguished from services furnished to the facilities. The reinstatement of a modified version of the initial method is necessitated by a court decision.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on December 4, 1987.

ADDRESS: Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BERC–381–P, P.O. Box 26676, Baltimore, Maryland 21207

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Please address a copy of comments on information collection requirements to:

Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503, Attention: Desk Officer for HCFA

In commenting, please refer to file code BERC–381–P. Comments will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309–G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202–245–7890).

SUPPLEMENTARY INFORMATION:

I. Background—Physicians' Outpatient Maintenance Dialysis Services

Physicians' services to End-Stage Renal Disease (ESRD) patients undergoing dialysis in a facility approved to furnish outpatient maintenance dialysis (ESRD facility) are payable if the services are otherwise covered by the Medicare program and if they are reasonable and medically necessary. Before August 1, 1983, the Medicare program paid for physicians' outpatient maintenance dialysis services under one of two methods—the "initial method" or the "alternative reimbursement method" (ARM). Section 1881(b)(3) of the Social Security Act (the Act) confirmed our authority to establish those methods of reimbursement.

Under the ARM, all physicians' outpatient maintenance dialysis services (except declotting of shunts) were paid

through a single monthly payment to the physician. Under the initial method, the payment for physicians' "supervisory services" was made to the dialysis facility as part of the facility's dialysis treatment payment rate. (Physicians' supervisory services are listed in the regulations located at 42 CFR 405.542(b)(1) and include monitoring and evaluating the patient during dialysis, reviewing psychosocial and dietary issues, etc.) This payment was made in the form of a higher facility payment rate (the usual facility rate plus an add-on amount) than the rate the facility received when the physicians' services were paid under the ARM. The physician then negotiated his/her compensation with the facility. The physician's other professional services to dialysis patients (that is, services not included under the initial method payment, such as monthly examinations and emergency services) were paid on a fee for service, reasonable charge basis by the Medicare Part B carrier.

In the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) Congress amended section 1881(b)(3) of the Act to require that physician reimbursement be made in a way that promotes the increased use of home dialysis. To accomplish this, on May 11, 1983, under the authority of section 1881(b)(3)(B), we published in the **Federal Register** final regulations located at 42 CFR 413.170 and 42 CFR 405.542 (48 FR 21254) that were effective on August 1, 1983. These regulations changed the payment system for outpatient maintenance dialysis and related physician and laboratory services. They also established a prospective method of payment for maintenance dialysis, whether furnished at home or in a hospital-based or independent dialysis facility, and revised other aspects of the payment system to encourage home dialysis and provide incentives for economy and efficiency in furnishing dialysis services. In those regulations, we eliminated the initial method and modified the ARM to create the monthly capitation payment (MCP) method.

The main difference between the ARM and the MCP is that, under the ARM, the monthly payment for home patients had been set at 70 percent of the payment for infacility patients, whereas, under the MCP, monthly payments for services to home and infacility patients are equal. This creates a substantial incentive for physicians to accept and encourage home dialysis. The initial method did not promote the use of home dialysis because physicians do not furnish "routine physicians' services" to home patients (since the dialysis takes place at home) and rarely furnish services to home dialysis patients at other times for which physicians may be paid. Furthermore, the General Accounting Office had found problems with duplicate payments under both the initial method and ARM (GAO Report GAO/HRD–85–14; February 1, 1985); that is, in some cases the Medicare program apparently was being billed under both the initial method and the ARM. Thus, we expected to solve several problems by establishing a single payment method with substantial incentives for home treatment.

II. Basis For Reinstating a Modified Version of the Initial Method

On June 11, 1984, the U.S. District Court for the District of Columbia, in *National Association of Patients on Hemodialysis and Transplantation Inc. et al. (NAPHT), v. Heckler,* 558 F. Supp. 1108 (D.D.C. 1984), ordered the Secretary to reinstate a modified version of the initial method designed to advance the congressional purpose of encouraging home dialysis, any administrative inconvenience notwithstanding. The plaintiffs in that case suggested two ways to accomplish this:

(1) Confine the initial method to physicians' services rendered to infacility patients; or

(2) Extended the initial method to cover both infacility and home dialysis in the same manner.

Plaintiffs had offered these same suggestions during the comment period following our February 12, 1982 notice of proposed rulemaking (47 FR 6566–6567). Either of these suggestions would promote home dialysis to a greater extent than the original initial method because in either case physicians would be paid for their home patients without regard to the nature of the specific services furnished to each individual patient.

In view of the plaintiffs' suggestions, we considered paying the initial method add-on only for the physician's infacility patients and paying for the physician's home dialysis patients under the MCP method. We rejected this option because it would be difficult for carriers to track whether a particular home dialysis patient was dialyzed at home for an entire month. If a patient were dialyzed in the facility for any part of the month, it would be necessary to pay a prorated portion of the MCP to the physician while the patient was home, and to pay the add-on-amount to the facility while the patient was in the facility.

We rejected the option to reinstate the priro add-on of $12 because we have reduced the MCP rates from the previous ARM rates based on a lower estimate of physician involvement in both infacility and home services. It would be inconsistent not to apply the same reduction to the initial method.

We also rejected the option to pay a physician for home dialysis services using the prevailing charge for a physician's brief followup office visit because the MCP rate is based in part on a physician's brief followup office visit times the average number of dialysis treatments per month, and this includes services that are furnished at times other than during a dialysis. It would be inappropriate to pay the same amount under the initial method for a narrower range of services.

We propose to adjust the initial method add-on in the same manner as we adjusted the previous ARM payment (in effect for services furnished prior to August 1, 1983) to compute the present MCP payment amounts (in effect for services furnished on or after August 1, 1983).

This adjustment is done by first revising the estimate of the amount of physician involvement in treating maintenance dialysis outpatients; and then combining into one composite payment a monthly amount that is paid for infacility and home dialysis. The additional payment would be added to the labor portion of the composite rate and multiplied by the hospital wage index to account for geographic variations in physicians' renumeration. (As data become available on the nature of the physicians' services furnished and the value of those services, we will examine the appropriateness of using the hospital wage index to measure variations in physician charges.)

The specific methodology for setting rates under the initial method is described in detail in section IV, below. Section V.A. clarifies which physicians' services would be included under the intital method add-on payment.

For administrative purposes, we would require, as was required previously under the initial method, that physicians could be paid under the initial method only if all of the ESRD physicians in the ESRD facility who furnish services to patients on maintenance dialysis or undergoing self-dialysis training elect the initial method. The election of this method of payment covers all infacility and home dialysis patients the physician attends in or through that facility. Physicians must submit a statement of agreement concerning their election of the initial method; in the absence of an election the carrier will assume that the

VOL
52
ISS

OC
5
1987
UMI

physician intends to accept payment under the MCP method.

III. Principles for Determining Which Physicians' Services are Services for Individual Patients

Extending the initial method to include payment related to services in the home would encourage home dialysis and thus conform to congressional intent. However, in considering the problems attendant to reinstatement of the initial method, we concluded that merely making this modification would not adequately address other problems we have encountered concerning payment for services physicians furnish for ESRD patients. One of these problems is making a consistent and proper distinction between services a physician furnishes to individual patients and those other services the physician performs for the facility, which certainly are of general benefit to the facility's patients, but which we would not consider to be physicians' services reimbursable on a reasonable charge basis.

We have experienced this problem since the beginning of the Medicare program, particularly in regard to physicians' services for patients in hospitals and other providers. From the beginning of the program we have held that, to be paid on a reasonable charge or other related basis, a physician's services must be personally furnished to an individual patient. This distinction between physicians' services to individual patients and physicians' services that benefit patients generally has been expressed in our regulations since the beginning of the Medicare program in 1966. Our payment principles require that payment for physicians' services to the provider should be made to the provider, and that compensation to the physician for those services should come from the provider, rather than be paid for as if the services were services to individual patients.

Our initial regulations regarding this distinction were not sufficiently detailed and explicit to be fully and consistently administrable. In response to problems that arose in our long-standing effort to implement this basic principle, section 108 of Pub. L. 97–248 (the Tax Equity and Fiscal Responsibility Act of 1982, enacted September 3, 1982) provided for the addition of a new section 1887 of the Act dealing explicitly with distinguishing between physicians' professional services to patients and services to providers. Thus, the statute now affirms the distinction we had been making. Regulations implementing section 1887 of the Act are located at 42 CFR 405.480 to 405.482, and 405.550 to 405.557 (published 48 FR 8902; on March 2, 1983).

However, independent ESRD facilities are not providers, and are not subject to the requirements of section 1887 of the Act. Further, we have, as a matter of policy, been paying hospital-based and independent ESRD facilities for their ESRD services in basically the same way, with only minor necessary differences. Therefore, we have not applied the final regulations implementing section 1887 of the Act either to the hospital-based or the independent ESRD facility setting.

We have, however, continued to experience some of the same problems with regard to physicians' services furnished in ESRD facilities as we had experienced with regard to services in hospitals, skilled nursing facilities (SNFs), and comprehensive outpatient rehabilitiation facilities (CORFs) prior to issuance of the March 2, 1983 final rules. That is, we have not always been able to distinguish consistently and accurately those physicians' services that are services to the facility, rather than services to individual patients, and for which payment should flow through the facility. We are concerned that the costs taken into account under section 1881(b)(2) of the Act, for purposes of establishing facility composite rates under section 1881(b)(7) of the Act, be determined in a manner that appropriately reflects the costs to ESRD facilities for physicians' services to the facilities. In order to ensure that payments are accurate and accomplish the objectives of the statute, we are also concerned to ensure that payments made to physicians for services to individual patients are not also inadvertently compensating physicians for services furnished to ESRD facilities.

Accordingly, we are proposing to establish rules governing payment for physicians' services furnished in ESRD facilities that are consistent with the rules for physicians services furnished in hospitals, SNFs, and CORFs. We recognize that the authority established under section 1887 of the Act does not extend to independent ESRD facilities, since they are not providers (although, under section 1881(b)(2)(D) of the Act and 42 CFR 413.170(h), ESRD facilities are treated as providers for some purposes). Responsible management of the program requires that we make some distinction between services covered under two different payment mechanisms (for example, under the composite rate paid to facilities and the MCP paid to physicians), and ensure that the program does not pay twice for the same services. We believe that it is reasonable to make this distinction for ESRD services on the same basis as that which is historically established and already implemented for analogous services paid for by Medicare.

For these reasons we would define "physicians' services to an ESRD facility" in the same terms as are used for "physicians' services to a provider". Accordingly, consistent with our regulations at 42 CFR 405.480 to 405.482, physicians' services to an ESRD facility would include, but would not be limited to, teaching or supervision of professional or technical personnel, administration or management of a facility or department, quality control activities, and work schedule planning. The costs of physicians' services to the facility would be allowable (and included under the prospectively set composite rates) if—

- The services do not meet the criteria for reasonable charge reimbursement;
- The services do not include physician availability services;
- The facility has incurred a cost for the services; and
- The costs of the services meet the requirements in 42 CFR 413.9 regarding costs related to patient care.

The criteria for determining whether physicians' services furnished to a facility patient would be reimbursable on a reasonable charge basis or under the MCP or initial method, consistent with our regulations at 42 CFR 405.550(b), would be that:

- The services must be personally furnished for an individual patient by a physician;
- The services must contribute directly to the diagnosis or treatment of an individual patient; and
- The services ordinarily require performance by a physician.

We believe these same distinctions are applicable to hospital-based and freestanding ESRD facilities, which are both paid under prospectively determined composite rates. By applying these principles to ESRD facilities, whether provider-based or not we would be able to distinguish, in a manner consistent with principles and practices established in other parts of the Medicare program, between those physicians' services that should be included in payments to the facility, as part of the facility's composite rate, and those to be paid on a basis related to reasonable charges, including either the MCP or the initial method.

IV. Ratesetting Under the Proposed Initial Method

The proposed initial method (IM) add-on amount would be calculated as follows:

1. Start with the original $12 IM add-on.

2. Calculate the average ARM infacility rate:

[$260 (max.) + $180 (min.)] divided by 2 = $220.

3. Calculate the average MCP rate:

[$203 (max.) + $132 (min.)] divided by 2 = $167.50.

4. Calculate the ratio between steps 3 and 2.

$167.50 / $220 = .7614.

5. Multiply $12 (step 1) by ratio in step 4:

$12 × .7614 = $9.14 (new IM add-on amount).

In the final notice published in the **Federal Register** on August 15, 1986 (51 FR 29404) we continued the lower and upper limits on the facility ESRD composite rate originally provided in the preamble to the final regulation published May 11, 1983 (48 FR 21254). This was to limit the effect of the wage index, which otherwise would have caused a great variation in the composite rates. The lower limit was set by using a minimum wage index of 0.9. The upper limit was set at the previous ESRD facility payment screen of $138 per treatment. Under the reinstated initial physician reimbursement method we propose that the same minimum wage index of 0.9 be used, resulting in a minimum add-on of $8.23 (0.9 × $9.14). We propose to set the revised upper limit at the previous initial physician reimbursement method ESRD facility payment screen of $150 per treatment (that is $138 plus the $12 IM add-on).

V. Summary of Proposed Changes to the Regulations

A. Section 405.542—Criteria For Determination of Reasonable Charges For Physicians' Services Furnished to Renal Dialysis Patients

1. We are proposing to clarify in § 405.542(a) that physicians' services to dialysis patients include physicians' routine professional services, administrative services, and other physicians' services. We are proposing to amend the regulations to indicate that physicians may be paid under the "Initial Method" after the effective date of these regulations. This section would also provide that physicians' services furnished on or after August 1, 1983 and before the effective date of this proposed regulation are reimbursed only under the monthly capitation method.

2. We propose to add a new § 405.542(a)(2)(i) to list physicians' routine professional services and require that the services be furnished during a visit to the patient where the physician is physicially present with the patient, examines the patient or reviews the patient's medical record, and in response to this examination or review, furnishes whatever physicians' services are medically necessary. This section would specify the conditions under which services would be paid under the initial method add-on to the facility's rate. If these criteria are not met, the physician's services could only be paid by the facility, and the costs of those services would be included in the facility's dialysis treatment costs used to set the ESRD facility composite rate.

The payment to the facility under the initial method covers all physicians' non-surgical services furnished during the outpatient maintenance dialysis session, including non-renal-related physicians' services; that is, services not related to the patient's ESRD. The only surgical service covered by the initial method payment is insertion of a catheter for patients on peritoneal dialysis who do not have an indwelling catheter. If separate payment were permitted for non-renal-related physicians' services furnished during the dialysis session, Medicare carriers would be required to decide which services are renal-related and which are not, a distinction that is extremely difficult to make and one upon which experts could disagree. Also, we do not believe dialysis physicians commonly furnish non-renal-related services during the dialysis session. This policy is consistent with the monthly capitation payment (MCP) system; non-renal-related physicians' services are included under the MCP unless a separate visit, not necessitated by the patient's renal condition, is required. While we are now including services under the initial method add-on payment to the facility that were not previously included (for example, physicians' non-surgical non-renal-related services furnished during a dialysis session), this added obligation is balanced by the additional payment that would be made for home dialysis treatments.

Section 1881(b)(1)(A) of the Act provides that payments for "routine professional services performed by a physician during a maintenance dialysis episode" be made to the dialysis facility and not to the physician. Section 1881(b)(3)(A) reaffirms this provision by effectively stating that under the initial method payment for physicians' routine service furnished during a maintenance dialysis episode may not be made on a reasonable charge basis. Therefore, for purposes of distinguishing the services furnished during a dialysis session, which under the initial method are payable only to the dialysis facility, from other physicians' services, which are payable on a reasonable charge basis, we propose to define the term "during a dialysis session". In the context of infacility dialysis, it means the period of time beginning with the patient's arrival at the dialysis facility and ending with the patient's departure from the facility. In the case of home dialysis, it means the period beginning when the patient prepares for dialysis until the session ends (this is generally when the patient is disconnected from the machine).

3. We propose to add a new § 405.542(a)(2)(ii), clarifying that administrative services are services provided to the facility and not to an individual patient. As such they are reimbursable to the facility under the composite payment rate described in § 413.170, and not to the physician by the Medicare carrier under either the initial method or the MCP. (We would also continue to apply this principle as it has always been applied when we review facility costs for purposes of setting the facility composite rate.) Administrative services are differentiated from routine professional services and other physicians' services related directly to an individual patient's care because they are of benefit to all of the patients as a whole as well as to the facility. We have deleted as an example of such services "supervising staff for other than direct patient care services" and retained "supervising staff" because all staff supervision would be defined as administrative services.

4. We also propose to add a new § 405.542(a)(2)(iii) and (iv), clarifying the difference between a physician's service that is "supervision" and one that is "direction". This distinction applies to all physicians' ESRD services (including services under both the initial method and the MCP method). The carrier will pay for services of physicians to facility patients on a reasonable charge-related basis only if the following requirements are met:

- The services are personally furnished for an individual patient by a physician;
- The services contribute directly to the diagnosis or treatment of an individual patient; and
- The services ordinarily require performance by a physician.

BEST COPY AVAILABLE

VOL 52 ISS 192 OCT 5 1987 UMI

"Supervision" refers to a general activity primarily concerned with monitoring the performance of and giving guidance to medical staff (for example, nurses, dialysis technicians) with significantly diminished direct involvement in delivering services to the patient (for example, when the physician is not physically present with the patient). "Direction", on the other hand, includes substantial direct involvement and physical presence of the physician in delivering services directly to the patient.

5. We propose to revise § 405.542(b)(1) to eliminate any reference to availability of physicians, since Medicare does not cover "availability", in itself, because it is not a service. We are also proposing to revise the effective date so that the paragraph applies to payment for services furnished after the effective date of these regulations. The reference to "supervisory services" would be changed to "routine professional services", for the reasons stated in paragraph 4, above. Previously, services rendered during dialysis which are nonroutine, for example, declotting of shunts, needle insertions into fistulae, supervision of blood transfusions, care during immediately life-threatening complications related to the dialysis procedure, and care of nonrenal conditions were not covered under the initial method add-on and, therefore, were payable directly to the physician by the carrier. This would be changed so that the only physicians' services furnished during the dialysis that would be separately payable would be surgical services. We are including all non-surgical services for the reasons stated above. We are excluding surgical services from the list of services covered under the initial method because:

- Usually, surgical services are furnished to dialysis patients at a time other than during a maintenance dialysis, and usually by a physician other than the physician responsible for the patient's dialysis care; and
- Carriers can easily distinguish between surgical and non-surgical services for purposes of determining physicians' services that are paid in addition to the initial method add-on payment.

6. We propose to add a new paragraph 405.542(b)(2), requiring that, for administrative purposes, physicians may be paid under the initial physician reimbursement method only if all of the ESRD physicians in the ESRD facility who furnish services to patients on maintenance dialysis or undergoing self-dialysis training elect the same method of reimbursement. The election of this method of reimbursement covers all infacility and home dialysis patients the physician attends in or through that facility. Physicians will submit a statement of agreement concerning their election of the initial method of reimbursement. In the absence of an election the carrier will assume that the physician intends to accept payment under the MCP method.

7. We propose to add a new paragraph to § 405.542(b)(3) to clarify that the factors used in determining the amounts payable under the initial method will be related to program experience, will be reevaluated periodically, and may be adjusted as HCFA determines necessary.

8. We propose to revise § 405.542(c) to require that the physicians' services reimbursable under the MCP must meet requirements specified, which are consistent with those for Part B reimbursable physicians' services listed in 42 CFR 405.550(b)(1) through (b)(3).

We propose to specify in § 405.542(c) that payment for the administration of Hepatitis B vaccine is made in addition to the MCP. This is required by section 1881(b)(11) of the Act.

We also propose to clarify that physicians' services that are not furnished during a dialysis session or a home or office visit necessitated by the renal condition are not included in the MCP, but may be paid in accordance with the usual reasonable charge rules. The physician would have to provide documentation that the services are not related to the treatment of the patient's renal condition and that added visits are required. The carrier's medical staff would determine whether additional payment is warranted for the additional physicians' services.

9. We propose to add § 405.542(c)(1)(v) and (vi) to provide that most surgical services are not covered under the MCP. We would continue to allow additional payment for declotting of shunts and explicitly list it as a surgical service under this paragraph. The only exception to this rule (that is, the only surgical service that is included under the MCP) is insertion of a catheter for a patient on peritoneal dialysis who does not have an indwelling catheter. This is consistent with the prior policy under the initial method.

B. Section 413.170—Payments for Covered Outpatient Maintenance Dialysis Treatments

We are proposing that, if a physician furnishing services to patients dialyzing in an ESRD facility or at home elects the initial method of reimbursement, the prospective payment rate paid to that facility will be increased by an add-on amount as described in § 405.542(b).

VI. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E. O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulations that are likely to meet criteria for a "major rule." A major rule is one that would result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or any geographicl regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The payments to physicians under either the initial method of reimbursement or the monthly capitation payment method would be similar. We do not expect physicians to make major changes in their charging practices as a result of this proposed rule. We expect few physicians to change to the initial physician reimbursement method described in this proposed regulation. We do not expect this proposed regulation to cost or save money. Therefore, it would be considered to be budget neutral. Since we expect no significant economic impact to result from publishing this proposed regulation, we have not prepared an initial regulatory impact analysis.

B. Regulatory Flexibility Act

Consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare and publish an initial regulatory flexibility analysis for proposed regulations unless the Secretary certifies that the regulations would not have a significant impact on a substantial number of small entities. For purposes of the RFA, we consider all physicians to be small entities. However, as explained with reference to E.O. 12291, we expect no significant economic impact from this proposed rule. Therefore, the Secretary certifies that this proposal would not have a significant impact on a substantial number of small entities. And initial regulatory flexibility analysis is not required.

C. Paperwork Reduction Act of 1980

Section 405.542(b)(2) of this proposed rule contains information collection requirements that are subject to Office of Management and Budget (OMB) approval under the Paperwork

Reduction Act of 1980. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official whose name appears in the preamble and to the Office of Information and Regulatory Affairs, OMB, Room 3208, New Executive Building, Washington, DC 20503, ATTN: Allison Herron, Desk Officer for HCFA.

VII. Response to Comments

Because of the large number of comments we receive on proposed regulations, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments and respond to them in the preamble to that rule.

VIII. List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 413

Administrative practice and procedure, Health facilities, Health professions, Kidney disease, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

We are proposing to amend 42 CFR Part 405 as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

A. Subpart E is amended as follows:

Subpart E—Criteria for Determination of Reasonable Charges; Reimbursement for Services of Hospital Interns, Residents, and Supervising Physicians

1. The authority citation continues to read as follows:

Authority: Secs. 1102, 1814(b), 1832, 1833(a), 1842(b), and (h), 1861(b) and (v), 1862(a)(14), 1866(a), 1871, 1881, and 1887 of the Social Security Act as amended (42 U.S.C. 1302, 1395(b), 1395k, 1395l(a), 1395u(b) and (h), 1395x(b) and (v), 1395y(a)(14), 1395cc(a), 1395hh, 1395m, 1395ww and 1395xx).

2. Section 495. 542 is amended by revising the title and paragraphs (a) through (c) to read as follows:

§ 405.542 Criteria for determination of reasonable charges for physicians' services furnished to renal dialysis patients.

(a) *General requirements.*—(1) *Principle.* Physicians' services to renal dialysis patients are reimbursable if the services are otherwise covered by the Medicare program and if they are reasonable and medically necessary. This section applies to all physicians' services furnished to outpatient maintenance dialysis patients in a hospital-based or an independent ESRD facility, or to patients dialyzing at home. For purposes of this section, a dialysis session is the period of time beginning with the patient's arrival at the dialysis facility and ending with the patient's departure from the dialysis facility, or, in the case of home dialysis, it means the period beginning when the patient prepares for dialysis until the session ends (generally when the patient is disconnected from the machine).

(2) *Types of physicians' services.* Physicians' services include:

(i) *Routine professional services.* (A) Routine professional services for patients who are receiving maintenance dialysis in a facility or at home, or self dialysis training in a facility, are those physicians' services, including medical direction as described in paragraph (a)(2)(ii) of this section, that are furnished during a dialysis session and meet the following criteria:

(*1*) The services are personally furnished for an individual patient by a physician;

(*2*) The services contribute directly to the diagnosis or treatment of an individual patient; and

(*3*) The services ordinarily require performance by a physician.

(B) Routine professional services include at least all of the following when medically appropriate:

(*1*) Visiting the patient during dialysis, reviewing laboratory test results, nurses' notes and any other medical documentation, and in response to this review:

(*i*) Adjusting medication, the dialysis procedure, the patient's diet;

(*ii*) Prescribing medical supplies; and

(*iii*) Evaluating the patient's psychosocial status and the appropriateness of the patient's treatment modality.

(*2*) Directing staff (as described in paragraph (a)(2)(ii) of this section) in delivering services to the patient during a dialysis session;

(*3*) Making pre- and post-dialysis examinations where medically appropriate; and

(*4*) Inserting catheters for patients on maintenance peritoneal dialysis who do not have an indwelling catheter.

(ii) *Medical direction.* In contrast to supervision, as described in paragraph (a)(2)(iv) of this section, medical direction is a professional service, not an administrative service. It entails substantial direct involvement and physical presence of the physician in delivering services directly to the patient.

(iii) *Administrative services.* Administrative services are those services that are furnished by physicians and that are directly related to the support of the facility. They are not reimbursable under this subpart, but are paid for as part of the facility's prospective payment for dialysis services as described in § 413.170. These services are differentiated from routine professional services and other physicians' services because they are not related directly to an individual patient's care, but are of benefit to all of the patients as a whole as well as to the facility. Examples of such services include staff training, participating in the management of the facility, advising on procurement of facility supplies, supervision of staff, and staff conferences.

(iv) *Supervision.* Supervision is an administrative service and is therefore not reimbursable under this Subpart. It is a general activity primarily concerned with monitoring performance of and giving guidance to other health care personnel (for example, nurses, dialysis technicians) with significantly diminished direct involvement (for example, when the physician is not physically present with the patient) in delivering services to the patient.

(3) *Payment for physicians' routine professional services.* Physicians' routine professional services furnished after [*the effective date of these regulations*] may be reimbursed under either the "Initial Method" described in paragraph (b) of this section, (if all of the physicians at the facility elect the initial method) or under the "Physician Monthly Capitation Payment Method" described in paragraph (c) of this section. Physicians' services furnished on or after August 1, 1983 and before [*the effective date of these regulations*] are reimbursable only under the monthly capitation method as described in paragraph (c) of this section.

(b) *Initial method of payment for physicians' services furnished after [the effective date of these regulations].* Under this method, payments for routine professional services and medical direction, as described in paragraphs

(a)(2)(i) and (ii) of this section, provided by physicians to outpatient maintenance dialysis patients are paid to the facility by the intermediary. The reimbursement is made in the form of an add-on amount to the facility's composite rate payment, which is described in 42 CFR 413.170.

(1) *Services not included under payment.* Physicians' administrative services, including supervision of staff, are considered to be facility services (see paragraphs (a)(2)(iii) and (iv) of this section) and are paid for under the facility's composite rate. Physicians' services that must be furnished at a time other than during the dialysis procedure (for example, monthly and semi-annual examinations to review health status and treatment) and most physician's surgical services (see paragraph (c)(2)(v) of this section) are reimbursable to the physician (or to the beneficiary) by the carrier in accordance with the reasonable charge criteria set forth in § 405.502. Physicians' services furnished to hospital inpatients who were not admitted solely to receive maintenance dialysis or the administration of hepatitis B vaccine are also reimbursable under those reasonable charge criteria.

(2) *Physician election.* A physician may elect this initial method of reimbursement only if all of the ESRD physicians in the ESRD facility who furnish services to patients on maintenance dialysis or undergoing self-dialysis training elect this method with respect to that facility. The election of this method of reimbursement covers all dialysis patients (including patients dialyzed in the facility and at home) supported by the facility that the physician attends. Physicians must submit a written statement of agreement concerning their election of the initial method of reimbursement to the carrier and intermediary serving the facility. This payment method will be applied to dialysis services furnished in the second calendar month following the month in which all physicians in the facility elect it. Physicians may terminate this payment method by written notice to the servicing carrier and the intermediary servicing the facility at least 60 days before the first day of the calendar month in which the termination is to take effect.

(3) *Determination of payment amount.* The factors used in determining the payment amount under the initial reimbursement method (that is, the initial method add-on amount) will be related to program experience, will be reevaluated periodically, and may be adjusted as determined necessary by HCFA to maintain the payment for the average initial method physician's services to be commensurate with the prevailing charges of other physicians for comparable services.

(4) *Publication of payment amount.* Revisions to the add-on amounts will be published in the **Federal Register** in accordance with the Department's established rulemaking procedures.

(c) *Physician monthly capitation payment method.* (1) *Services included in monthly payment.* Under this method, all physicians' services, other than those specified in paragraph (c)(2) of this section, furnished to each outpatient maintenance dialysis patient (regardless of the patient's mode of or setting for dialysis) is reimbursed by the carrier on a monthly capitation basis. Services are included in the monthly payment only if the services are personally furnished for an individual patient by a physician: the services contribute directly to the diagnosis or treatment of an individual patient; and the services ordinarily require performance by a physician. Payment of the monthly amount, subject to the deductible and coinsurance, for all such services provided for that month is made by the carrier either to the physician, if the physician accepts assignment, or to the patient, if the physician does not accept assignment. This reimbursement method recognizes the need of patients on maintenance renal dialysis for physicians' services furnished periodically over relatively long periods of time, and is responsive to physicians' charging patterns in their localities. The physician must provide to a patient all physicians' services not listed in paragraph (c)(2) of this section that are required by the patient in a month to qualify for this reimbursement in that month.

(2) *Services not included in monthly payment.* Physicians' services not covered by the monthly payment, which may be reimbursed in accordance with the usual reasonable charge rules, are limited to:

(i) Administration of hepatitis B vaccine.

(ii) Covered physicians' services furnished by another physician during periods when the patient or his attending physician is not available for outpatient services as set out in paragraph (c)(2) of this sections.

(iii) Needed physicians services which are rendered either by the physician providing renal care or by another physician and which are beyond those related to the treatment of the patient's renal condition and which are not furnished during a dialysis session or office visit necessitated by the renal condition. The physician must provide documentation that the services are not related to treatment of the patients renal condition and that added visits are required. The carrier's medical staff, acting also on the basis of medical consultation obtained by the carrier as may be appropriate, determines whether additional reimbursement is warranted for the additional physicians' services.

(iv) Covered physicians' services furnished to hospital inpatients, including physicians' services related to inpatient dialysis, by a physician who elects not to continue the capitation payment method through the period of the impatient stay.

(v) Surgical services (including declotting of shunts) other than insertion of catheters for patients on maintenance peritoneal dialysis who do not have an indwelling catheter.

* * * * *

We are proposing to amend 42 CFR Part 413 as set forth below:

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT: PAYMENT FOR END-STAGE RENAL DISEASE SERVICES

B. Subpart H is amended as follows:

Subpart H—Payment for End-Stage Renal Disease (ESRD) Services

1. The authority citation for Part 413 continues to read as follows:

Authority: Secs. 1102, 1122, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, and 1886 of the Social Security Act as amended (42 U.S.C. 1302, 1320a-1, 1395l(b), 1395g, 1395l(a), 1395x(v), 1395hh, 1395rr, and 1395ww).

2. In § 413.170, the introductory text of paragraph (c) is revised and a new paragraph (c)(5) is added to read as follows:

§ 413.170 Payments for covered outpatient maintenance dialysis treatments.

* * * * *

(c) *Prospective rates for hospital-based and independent ESRD facilities.* (1) In accordance with section 1881(b)(7) of the Act, HCFA establishes prospective rates by a methodology that:

* * * * *

(5) If all the physicians furnishing services to patients in an ESRD facility elect the initial method of reimbursement, as described in § 405.542(b), the prospective rate (as described in paragraph (c)(1) of this section) paid to that facility will be increased by an add-on amount as described in § 405.542(b).

(Catalog of Federal Domestic Assistance Program No. 13.744, Medicare-Supplementary Medical Insurance Program)

BILLING CODE 4120-01-M

Family Support Administration

45 CFR Part 233

Aid to Families With Dependent Children; Essential Persons

AGENCY: Family Support Administration, HHS.

ACTION: Proposed rule.

SUMMARY: This proposed regulation would preclude States from considering individuals who do not provide an essential benefit or service to a family from being considered to be essential persons under the Aid to Families with Dependent Children (AFDC) program. Current regulations do not limit the individuals whom States may include as "essential persons" in payments under the AFDC program. This clarification would ensure that only those individuals who are actually providing an essential benefit or service to the family could receive AFDC payments, if not otherwise eligible.

DATE: Interested persons and agencies are invited to submit written comments concerning these regulations no later than November 19, 1987.

ADDRESSES: Comments should be submitted in writing to the Administrator of the Family Support Administration, Attention: Mark Ragan, Acting Director, Division of Policy, Office of Family Assistance, 2100 Second Street SW., Washington, DC 20201, or delivered to the Office of Family Assistance, Family Support Administration, Room B-428, Transpoint Building, 2100 Second Street SW., Washington, DC 20201, between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during the same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Ragan, Room B-428, Transpoint Building, 2100 Second Street SW., Washington, DC 20201, telephone 202-245-3290.

SUPPLEMENTARY INFORMATION:

Background

The Social Security Act at sections 402 and 406 and the implementing regulation at § 233.20(a)(2)(vi) permit States, at their option, to include in the AFDC grant benefits for "essential persons." Such individuals are not eligible for AFDC in their own right, but their needs are taken into account in determining the benefits payable to the AFDC family because they are considered "essential to the well-being" of an AFDC recipient in the family.

Twenty-five States currently include the option as part of their respective State Plans. A wide variety of individuals are included as essential persons. The definition and categories of essential persons. The definition and categories of essential persons vary from State to State, including the following:

—Unemployed or incapacitated stepparents living in the home with eligible children and the natural parent;
—Individuals age 18–21 who are not attending school;
—A relative necessary to provide child care or other services because the caretaker is incapacitated or employed;
—A second natural or adoptive parent living in the home;
—The needy spouse of the caretaker relative;
—Stepparents who work fewer than 100 hours per month;
—An unmarried individual who has a child in common with the caretaker relative.

Since 1943, Federal policy has recognized the concept of essential person in the AFDC program. Such benefit or service may be provided directly to a recipient, or provided to someone else in the home so long as the well-being of the recipient is thereby provided.

The Social Security Amendments of 1967 (Pub. L. 90–248) amended sections 402 and 406 of the Act to provide a specific statutory base for an essential person policy. The implementing regulations permit States to specify those individuals considered essential. States are also required to provide recipients with the final decision as to whether individuals are in fact essential. Accordingly, in implementing this provision, the Department has allowed States to simply identify the categories of individuals considered to to essential in their State plans without requiring them to identify the benefits or services that such individuals specifically have to provide in order to be essential.

In light of recent Congressional amendments to title IV–A of the Act, and subsequent changes which States have made in their State plans, we have reevaluated the current regulation. For example: In 1981, Congress amended section 406(a)(2) of the Act to exclude students age 19 to 21 from the definition of a dependent child. Some States then included such children categorically as essential persons, without regard to such individual's provision of an essential benefit or service. This is an indication that some States are using the essential person provision to circumvent and/or avoid Congressional intent.

Three States, in particular, seem to be using the essential person provision to extend benefits to 19 and 20 year-olds. These States account for an estimated 55 percent of all essential persons in the country, but 72 percent of all essential persons aged 19 and 20.

From another perspective, in these three States, we estimate that 45 percent of the 19 and 20 year-olds in the household who are not otherwise receiving benefits as eligible adults, are included as essential persons. In 5 States that explicitly require the provision of essential services, we estimate that only 3 percent of 19 and 20 year-olds are included as essential persons.

Data from the years 1981 and 1982 very strongly suggest that States did in fact shift older children made ineligible by the Omnibus Budget Reconciliation Act of 1981 (OBRA) onto the AFDC rolls as essential persons. In 1981, our data showed 4500 cases with individuals over the age limit (for a dependent child) who were not classified as adult recipients. In 1982, this figure was 23,000 cases—or four times higher. Further evidence comes from examining data from two large States in which 18 to 21-year old recipients previously considered dependent children were apparently converted to essential persons for purposes of Federal matching. There, the 1982 figure for total number of individuals over 18 who were not adult recipients was suspiciously similar to the 1981 number of 18 to 21-year old dependent children. These two States accounted for about 18,000 of the 23,000 cases nationwide.

Today they continue to carry a large number of 18 to 21-year olds as essential persons.

These same two States are using the essential person provision to directly shift the financial burden of State assistance programs to the Federal government. For example, one State specifies that a minor child ineligible for AFDC in his own right, but who is

VOL 52 ISS 192 OCT 5 1987 UMI

eligible for General Assistance, may be considered to be essential. The other State includes eligibility for public assistance other than AFDC as a factor in determining essential person status. These two States account for approximately 45% of the total expenditures for essential persons.

In addition to the problems which we identified regarding the categorical inclusion of broad groups of individuals, the Office of Inspector General, in a recent review, discovered other individual situations where persons who were in no position to provide essential benefits or services to an AFDC family were classified as essential. These individuals included a two-year-old and a drug addict. In another case, seven individuals were classified as essential persons for a single AFDC household.

Based on such experience, we are proposing to amend the regulation to emphasize that in order to be considered an essential person, an individual must provide an essential benefit or service. Such essential benefits or services clearly include the provision of child care which enables a caretaker relative to work on a full-time paid basis outside the home, and care for an incapacitated family member in the home. Accordingly, we are including these benefits and services in the proposed regulation. In this connection, we note that the proposed requirements for determining incapacity are similar to those set out at § 233.90(c)(1)(iv) for a State to find that a parent is incapacitated for AFDC purposes. Thus, we expect that States would have little difficulty in making incapacity determinations.

While we are not proposing any additional reporting or recordkeeping requirements, we would expect States, pursuant to 45 CFR 205.60(a) and 206.10(a)(9)(iii), to continue to make periodic determinations that individuals included as essential persons meet the definitional requirements for an essential person and maintain appropriate written documentation in the AFDC case record of the essential person determination. Appropriate documents might include items such as the recipient's request that the individual be included as an essential person, the basis under which the individual was determined to be an essential person, and information necessary to support the determination (such as information on the nature, regularity, and length of service and on the capacity of the individual to provide such an essential benefit or service). In a case where more than one individual was to be classified as an essential person, such as a case of severe incapacity, the documentation would probably need to include justification of the need for more than one essential person. We invite comment as to whether a specific regulatory change to further clarify this policy would be of value.

Finally, States would still be free to limit essential person status to categories of individuals, such as grandparents, but only if such individuals are actually providing an essential benefit or service. Likewise, States may specify a minimum age for classification of an individual as an essential person.

Since States may have ideas as to additional types of benefits or services that should be considered to be essential, we request suggestions for possible inclusion in the final rule.

Regulatory Procedures

Executive Order 12291

These proposed regulations have been reviewed under Executive Order 12291 and do not meet any of the criteria for a major regulation. A regulatory impact analysis is not required because the regulation will not:

(1) Have an annual effect on the economy of $100 million or more; (The Federal annual savings of these regulatory provisions are estimated to be up to $41 million a year.)

(2) Impose a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(3) Result in significant adverse effects on competition, employment, investment, innovation, or the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

There will be no new reporting or recordkeeping requirements imposed on the public or the States which would require clearance by the Office of Management and Budget (OMB).

Regulatory Flexibility Act

We certify that this regulation, if promulgated, will not have a significant impact ona substantial number of small entities because it primarily affects State governments and individuals. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act, is not required. This regulation is issued under the authority of section 1102 of the Social Security Act.

PART 233—COVERAGE AND CONDITIONS OF ELIGIBILITY

1. The authority citation for Part 233 is revised to read as follows and all other authority citations which appear throughout Part 233 are removed:

Authority: Secs. 1, 402, 406, 407, 1002, 1102, 1402, and 1602 of the Social Security Act (42 U.S.C. 301, 602, 606, 607, 1202, 1302, 1352, and 1382 note), and sec. 6 of Pub. L. 94–114, 89 Stat. 579 and Part XXIII of Pub. L. 97–35, 95 Stat. 843, and Pub. L. 97–248, 96 Stat. 324.

2. Section 233.20 is amended by revising paragraph (a)(2)(vi) and adding paragraph (a)(2)(vii) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(2) * * *

(vi) For OAA, AB, APTD, or AABD, if the State chooses to establish the need of the individual on a basis that recognizes, as essential to his well-being, the presence in the home of other needy individuals, (*a*) specify the persons whose needs will be included in the individual's need, and (*b*) provide that the decision as to whether any individual will be recognized as essential to the recipient's well-being shall rest with the recipient.

(vii) For AFDC, if the State chooses to establish the need of the individual on a basis that recognizes, as essential to his well-being, the presence in the home of other needy individuals,

(*a*) Specify the persons whose needs will be included in the individual's need, but limited to those individuals who regularly provide personal services to an incapacitated family member, or who provide child care service which permits a caretaker relative to work on a "full time" paid basis, outside of the home and

(*b*) Provide that the decision as to whether any individual will be recognized as essential to the recipient's well-being shall rest with the recipinet.

A person will be considered incapacitated for purposes of paragraph (a)(2)(vii)(*a*) of this section, when he has a physical or mental defect, illness, or impairment. The incapacity shall be supported by medical evidence and/or recorded testimony of a licensed health care professional, and must be of such a debilitating nature as to reduce substantially or eliminate his ability to support or care for himself and be expected to last for a period of at least thirty (30) days. A finding of eligibility for OASDI or SSI benefits, based on disability or blindness, is acceptable proof of incapacity.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 0

[Gen. Docket No. 87-387; FCC 87-292]

Freedom of Information Reform Act of 1986; Fee Schedule and Administrative Procedures; Amending Freedom of Information Act

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The FCC proposes to amend its Freedom of Information Act (FOIA) regulations to incorporate recent changes to the FOIA regarding establishment of fees to be charged for search, review and duplication of documents. These proposed rules follow the guidelines established by the Office of Management and Budget.

DATE: Comments are due on or before November 9, 1987. Reply comments are due on or before November 24, 1987.

ADDRESS: Secretary's Office, Room 222, Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Sharon Diskin or Lawrence S. Schaffner, 1919 M Street NW., Washington, DC (202) 632-6990.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's notice and comment in Gen. Docket No. 87-387, adopted September 10, 1987, and released September 9, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, Northwest, Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rulemaking

1. The Federal Communications Commission proposes to amend its Freedom of Information Act (FOIA) regulations to incorporate the recent changes to the FOIA regarding establishment of fees to be charged for search, review and duplication of records in response to FOIA requests. The proposed rules follow the guidelines established by the Office of Management and Budget, (OMB).

2. The proposed rules would implement the statutory amendments contained in the Freedom of Information Reform Act (Reform Act) and the administrative procedures set forth in the OMB Guidelines. The most significant revision contained in the proposed rules is the establishment of a multi-tiered structure for the assessment of FOIA charges. The Reform Act establishes several categories of FOIA requesters with separate fee provisions applicable to each category. For example, whenever records are sought for "commercial use," agencies are permitted to charge not only for search and reproduction costs, but for the costs of reviewing documents for the purpose of applying FOIA exemptions. When educational, noncommercial scientific institutions or news media requesters seek records, they will be charged only for duplication costs, after receiving the first 100 pages free. All other non-commercial use requesters will receive the first 100 pages of documents free of copying charges and two hours of search without charge.

3. Further, Reform Act permits agencies to recover only the direct costs of search, duplication or review. The Commission has determined that the direct cost of duplicating is 17 cents per page. This charge is based on the most recent estimates of costs to the Commission. As under its existing rules, the Commission's charges for search and review will be based on the grade level of the employee performing the search plus an allowance for benefits. In addition, the proposed rules provide that requesters will have the option of obtaining routinely available information from the copy contractor rather than filing a FOIA request with the Commission. Materials obtained from the contractor will be available at the contract rate and reduced assessment of fees because of the category in which he or she falls may receive such a reduced assessment only if the information request is filed with the Commission.

4. Other significant reform features include the following: (1) A provision stating that the Commission will not be authorized to require advance payment of a fee unless the requester's prior failure to pay a fee warrants such a deposit or the estimated cost of processing is $250 or more; (2) a provision that fee waiver issues will be adjudicated in court proceedings according to a *de novo* standard of review; and (3) a general fee waiver standard which provides for waivers where disclosure is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester. Other noteworthy features contained in the OMB Guidelines and the proposed rules include provisions for charging for unsuccessful searches and for assessing interest for late payments.

5. The Commission is also taking this opportunity to add a new provision establishing that only those records within the Commission's possession and control as of the date a FOIA request is received are subject to the request. By this rule, we will establish a uniform benchmark for determining which documents should be considered in responding to a request.

6. Finally, the proposed rules update the charge for certification of documents. To cover the agency's administrative costs, including the time needed to verify that the document is a true copy of the original document in the Commission's record and to bind and seal the material, we are proposing to charge $10 for each certification. Copies of certified documents, if requested, will be charged at the rate of 17 cents per copy. We do not, however, propose any charge for the additional search time that may be required to find the original document in the Commission's records. The fee for certification must be paid before the certified document is released by the Commission.

7. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

8. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), it is hereby certified that the proposed amendment will not, if promulgated, have a significant economic impact on a substantial number of small entities. The proposed amendments are not designed to alter the fees charged small entities for document production. To the extent

VOL
52
ISS
192
OC
5
1987
UMI

small entities may be among the categories of information requesters specified in the fee provisions, the rules will affect only small entities who file FOIA requests.

9. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), any reporting and recordkeeping provisions that are included in the rules will be submitted for approval to the Office of Management and Budget (OMB).

10. Under the procedures set forth in § 1.415 of the Commission's Rules, 47 CFR 1.415, interested persons may file comments or before November 24, 1987. As reflected above, this proceeding on or before November 9, 1987 and reply comments on is being conducted on an expedited basis.

11. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

12. The proposed amendments to the Commission's Rules are issued pursuant to the authority contained in section 4(i) of the Communications Act, 47 U.S.C. 154(i) and section 552(a)(4)(A)(i) of the Freedom of Information Act, as amended, 5 U.S.C. 552(a)(4)(A)(i).

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 33

Refuge-Specific Fishing Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) would amend certain regulations in 50 CFR Part 33 that pertain to fishing on individual national wildlife refuges (NWR). Refuge fishing programs are reviewed annually to determine whether the regulations governing fishing on individual refuges should be modified. Changing environmental conditions, State and Federal regulations and other factors affecting fish populations and habitats may warrant such amendments. The modifications would ensure the continued compatibility of fishing with the purposes for which the individual refuges involved were established, and to the extent practical, make refuge fishing programs consistent with State regulations.

DATE: Comments must be received on or before November 4, 1987.

ADDRESS: Send comments to: Assistant Director, Refuges and Wildlife, Fish and Wildlife Service, Room 2348, 18th and C Streets, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Nancy A. Marx, Division of Refuges, Fish and Wildlife Service, 18th and C Streets, NW., Washington, DC 20240; Telephone 202–343–3922.

SUPPLEMENTARY INFORMATION: 50 CFR Part 33 contains the provisions that govern fishing on NWRs. Fishing is regulated on refuges to (1) ensure compatibility with refuge purposes, (2) properly manage the fishery resource and (3) protect other refuge values. On many refuges, the Service policy of adopting State fishing regulations is an adequate way of meeting these objectives. On other refuges it is necessary to supplement State regulations with refuge-specific fishing regulations which will ensure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities." Refuge-specific fishing regulations are issued only after the final publication of the opening of a wildlife refuge to fishing. These regulations may list the seasons, methods of taking fish, descriptions of open areas and other provisions. The Service previously issued refuge-specific fishing regulations in 50 CFR Part 33.

This proposed rule would amend and supplement certain refuge-specific regulations in 50 CFR Part 33, §§ 33.5 through 33.55, which pertain to fishing on individual refuges in their respective alphabetically listed State.

The policy of the Department of the Interior (Department) is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. It is, therefore, the purpose of this proposed rulemaking to seek public input regarding the proposed amendments to refuge-specific fishing regulations. Accordingly, interested persons may submit written comments, suggestions or objections concerning this proposal to the Assistant Director, Refuges and Wildlife (address above), by the end of the comment period. All substantive comments will be considered by the Department prior to issuance of a final rule.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act (NWRSAA) of 1966, as amended (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (16 U.S.C. 460k) govern the administration and the public use of NWRs. Specifically, section 4(d)(l)(A) of the Refuge System Administration Act authorizes the Secretary of the Interior (Secretary) under such regulations as he may prescribe, to permit the use of any area within the System for any purpose, including but not limited to hunting, fishing, public recreation and accommodations and access when he determines that such uses are compatible with the major purposes for which such areas were established.

The Refuge Recreation Act authorizes the Secretary to administer the refuge areas within the National Wildlife Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. The Refuge Recreation Act also authorizes the Secretary to issue regulations to carry out the purposes of the Act.

Fishing plans are developed for each fishing program on a refuge prior to the opening of the refuge to fishing. In many cases, refuge-specific fishing regulations are included as a part of the fishing plans to ensure the compatibility of the fishing programs with the purposes for which the refuge was established. Compliance with the NWRSAA and Refuge Recreation Act is ensured when the fishing plans are developed and the determinations required by these Acts are made prior to the addition of the refuge to the list of areas open to fishing in 50 CFR. Continued compliance is ensured by annual review of fishing programs and regulations.

Economic Effect

Executive Order 12291 requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in cost of prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will

have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

The proposed amendments to the codified refuge-specific fishing regulations would make relatively minor adjustments to existing fishing programs. The regulations are not expected to have any gross economic effect and will not cause an increase in costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographic regions. The benefits accruing to the public are expected to exceed the costs of administering this rule. Accordingly, the Department has determined that this rule is not a "major rule" within the meaning of Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Paperwork Reduction Act

The Service has received approval from the Office of Management and Budget (OMB) for the information collection requirements of these regulations pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). These requirements are presently approved by OMB under #1018–0014 Economic and Public Use Permits. These regulations impose no new reporting or recordkeeping requirements that must be cleared by OMB.

Environmental Considerations

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)) and the Endangered Species Act of 1973 (16 U.S.C. 1531 through 1543) is ensured when fishing plans are developed and the determinations required by these Acts are made prior to the addition of refuges to the list of areas open to sport fishing in 50 CFR. Refuge-specific fishing regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular NWR. The changes proposed in this rulemaking would not significantly alter the existing uses of the refuges involved.

Information regarding the conditions that apply to individual refuge fishing programs, any restrictions related to public use on the refuge and a map of the refuge are available at refuge headquarters. This information can also be obtained from the regional offices of the Service at the addresses listed below.

Region 1—California, Hawaii, Idaho, Oregon and Washington:

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 Multnomah Street, Portland, Oregon 97232; Telephone (503) 231–6214.

Region 2—Arizona, New Mexico, Oklahoma and Texas:

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80255; Telephone (303) 236–4608.

Region 7—Alaska:

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Rd., Anchorage, Alaska 99503; Telephone (907) 786–3542.

Nancy A. Marx, Division of Refuges, Fish and Wildlife Service, Washington, DC, is primary author of this proposed rulemaking document.

List of Subjects in 50 CFR Part 33

Fishing, National Wildlife Refuge System, Wildlife refuges.

PART 33—[AMENDED]

Accordingly, it is proposed to amend Part 33 of Chapter I of Title 50 of the *Code of Federal Regulations* as set forth below:

1. The authority citation for Part 33 continues to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd and 715i.

2. Section 33.5 would be amended by revising (a)(i), (b) and (c)(2) as follows:

§ 33.5 Alabama.

(a) *Bon Secour National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset.

* * * * *

(b) *Choctaw National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following condition: Fishing is permitted only from sunrise to sunset.

(c) *Eufaula National Wildlife Refuge.* * * *

(2) Fishing, including bowfishing, is permitted from March 1 through October 31 only from sunrise to sunset on all refuge impoundments and waters other than the Walter F. George Reservoir.

* * * * *

2. Section 33.8 would be amended by revising (a)(1), (b) introductory text and (d)(1); adding (d)(5) and (6) and revising (e)(1) as follows:

§ 33.8 Arkansas.

(a) *Big Lake National Wildlife Refuge.* * * *

(1) Fishing is permitted from March 1 through October 31 only from sunrise to sunset with the following exceptions: Bank fishing is permitted at any time in the area around Floodway Dam south of the Highway 18 bridge, and fishing only for sunrise to sunset from nonmotorized boats and boats with electric motors is permitted in the Sand Slough-Mud Slough Area from November 1 through the end of February.

* * * * *

(b) *Felsenthal National Wildlife Refuge.* Fishing, frogging and the taking of turtles and crawfish are permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(d) *Wapanocca National Wildlife Refuge.* * * *

(1) Fishing is permitted from March 15 through September 30 only from sunrise to sunset.

* * * * *

(5) Big Creek and Ditch 8 are closed to fishing.

(6) Length limits for largemouth bass are required as posted.

(3) *White River National Wildlife Refuge.* * * *

(1) Fishing is permitted from March 1 through October 31 except as posted and as follows: Fishing is permitted year-round in LaGrue, Essex, Prairie, and Brooks Bayous, Big Island Chute, Moon Lake next to Highway 1, the portion of Indiana Bay south of Highway 1, and those borrow ditches located adjacent to the west bank of that portion of the White River Levee north of the Arkansas Power and Light Company powerline right-of-way.

* * * * *

3. Section 33.13 would be amended by revising (a)(1); redesignating (b) through (l) as (c) through (m); adding (b); revising newly redesignated (c)(1), (d), (f)(1), (g)(1), (h)(1) and (i)(1); adding (i)(4); revising newly redesignated (l) introductory text and (l)(1); adding (l)(3); revising newly redesignated (m)(1) and adding (m)(4) as follows:

§ 33.13 Florida.

(a) *Cedar Keys National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset.

* * * * *

(b) *Chassahowitzka National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following condition; Fishing is permitted year-round, except in a designated sanctuary that is closed to all public entry from October 15 to February 15.

(c) *Egmont Key National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset.

* * * * *

(d) *Hobe Sound National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following condition: Fishing is permitted year-round only from sunrise to sunset.

* * * * *

(f) *Lake Woodruff National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset.

* * * * *

(g) *Lower Suwannee National Wildlife Refuge.* * * *

(1) Bank fishing is permitted in interior refuge creeks, borrow pits and canals from March 15 to September 30 only from sunrise to sunset.

* * * * *

(h) *Loxahatchee National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset on all areas of the refuge except the management impoundments and those areas marked by signs as closed to public entry or fishing.

* * * * *

(i) *Merritt Island National Wildlife Refuge.* * * *

(1) Night fishing is permitted from a boat only. A permit is required.

* * * * *

(4) Air thrust boats are prohibited.

* * * * *

(l) *St. Marks National Wildlife Refuge.* Fishing and crabbing are permitted on designated areas of the refuge subject to the following conditions:

(1) Freshwater fishing and crabbing are permitted only from sunrise to sunset.

* * * * *

(3) Launching of commercial or sport net boats at the saltwater boat ramp on C.R 59 is prohibited.

(m) *St. Vincent National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset.

* * * * *

(4) Fishing seasons and largemouth bass length limits are as posted.

4. Section 33.14 would be amended by revising (a)(1), (d)(2), (f)(1), (h)(2) and (i)(3) as follows:

§ 33.14 Georgia.

(a) *Banks Lake National Wildlife Refuge.* * * *

(1) Fishing is permitted year-round only from sunrise to sunset.

* * * * *

(d) *Harris Neck National Wildlife Refuge.* * * *

(2) Bank fishing into estuarine waters is permitted only from sunrise to sunset.

* * * * *

(f) *Piedmont National Wildlife Refuge.* * * *

(1) Fishing is permitted from May 1 through September 30 only from sunrise to sunset.

* * * * *

(h) *Wassaw National Wildlife Refuge.* * * *

(2) Bank fishing into estuarine waters is permitted only from sunrise to sunset.

(i) *Wolf Island National Wildlife Refuge.* * * *

(3) Bank fishing into enstuarine waters is permitted only from sunrise to sunset.

5. Section 33.19 would be amended by revising (a)(7) and removing (a)(8) as follows:

§ 33.19 Iowa.

(a) *De Soto National Wildlife Refuge.* * * *

(7) Minimum length and creel limits are required as posted.

6. Section 33.22 would be amended by revising (b)(1) and (2), (d)(1), (e)(1), and (f)(7) as follows:

§ 33.22 Louisiana.

(b) *Catahoula National Wildlife Refuge.* * * *

(1) Fishing is permitted in Cowpen Bayou year-round only from sunrise to sunset.

(2) Fishing is permitted in the Duck Lake impoundment and discharge waters from March 1 through October 31 only from sunrise to sunset.

* * * * *

(d) *Delta National Wildlife Refuge.* * * *

(1) Fishing, shrimping and crabbing are permitted only from sunrise to sunset.

* * * * *

(e) *Lacassine National Wildlife Refuge.* * * *

(1) Fishing is permitted from March 1 through October 15 only from sunrise to sunset.

* * * * *

(f) *Sabine National Wildlife Refuge.* * * *

(7) Daily shrimp (heads on) take and/or possession limit is 5 gallons or 20 quarts per vehicle during the State inside water shrimp season; and 5 quarts take and/or possession limit per vehicle during the rest of the year.

* * * * *

7. Section 33.25 would be amended by revising (a)(1) as follows:

§ 33.25 Massachusetts.

(a) *Great Meadows National Wildlife Refuge.* * * *

(1) Fishing is permitted along the main channel of the Sudbury River, Concord River and along designated banks of Heard Pond with the following exception: Fishing is not permitted within refuge impoundments.

* * * *

8. Section 33.27 would be amended by revising (a)(1) as follows:

§ 33.27 Minnesota.

(a) *Big Stone National Wildlife Refuge.* * * *

(1) Nonmotorized boats or boats with electric motors are permitted in the Minnesota River channel only.

* * * * *

§ 33.28 [Amended]

9. Section 33.28 would be amended by revising (b) as follows:

* * * * *

(b) *Noxubee National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing is permitted from March 1 through October 31, except for the Noxubee River and the borrow pits along Highway 25 which are open year-round.

(2) Fishing is permitted only from sunrise to sunset. Boats may not be left on the refuge overnight.

(3) Limb lines, snag lines and hand grappling are prohibited in the Bluff and Loakfoma Lakes. Only nongame fish may be taken with a bow.

(4) All trotline material must be cotton twine. One trotline per person, and no more than two per boat.

(5) The length limit for largemouth bass taken from Loakfoma and Ross Branch Lakes is less than 12 inches and more than 15 inches. Largemouth bass from 12 inches to 15 inches must be released unharmed.

(6) Boats are restricted to no-wake speeds on all refuge waters.

10. Section 33.37 would be amended by redesignating (a) and (b) as (b) and (c), and (c) as (e); adding (a) and (d) and revising newly redesignated (b)(1), (c)(1) and (3) and (e)(2) as follows:

§ 33.37 North Carolina.

(a) *Alligator River National Wildlife Refuge.* Fishing and frogging are permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing is permitted year-round only from sunrise to sunset.

(2) Only the use of pole and line, rod and reel or cast net is permitted.

(3) A permit is required for night fishing.

(4) Frogs may be taken by the use of frog gigs only. A permit is required.

(b) *MacKay Island National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset from March 15 through October 15 with the exception that bank fishing is permitted in Corey's Ditch and the canal adjacent to the Knotts Island Causeway year-round.

* * * * *

(c) *Mattamuskeet National Wildlife Refuge.* * * *

(1) Fishing and crabbing are permitted from March 1 through November 1 from one-half hourbefore sunrise to one-half hour after sunset or as posted.

* * * * *

(3) Herring (alewife) dipping is permitted from March 1 to May 15 only from sunrise to sunset or as posted.

* * * * *

(d) *Pea Island National Wildlife Refuge.* Fishing and crabbing are permitted on designated areas of the refuge subject to the following condition: Fishing and crabbing are prohibited in North Pond, South Pond and Newfield impoundments.

(e) *Pee Dee National Wildlife Refuge.* * * *

(2) Fishing is permitted only from sunrise to sunset.

* * * * *

§ 33.41 [Amended]

(11.) Section 33.41 would be amended by revising (g)(1) as follows:

* * * * *

(g) *Umatilla National Wildlife Refuge.* * * *

(1) Fishing is permitted on refuge impoundments and ponds from February 1 through September 30. Other refuge waters (Columbia River and its backwaters) are open in accordance with State regulations.

* * * * *

12. Section 33.44 would be amended by revising (a)(1) and (d)(1) as follows:

§ 33.44 South Carolina.

(a) *Cape Romain National Wildlife Refuge.* * * *

(1) Fishing is permitted from March 1 through September 30 only from sunrise to sunset.

* * * * *

(d) *Santee National Wildlife Refuge.* * * *

(1) Fishing is permitted on inland ponds only from sunrise to sunset or as posted.

* * * * *

13. Section 33.46 would be amended by revising (a)(1), (b)(1), (c)(1) and (e)(2) and adding (a)(7) as follows:

§ 33.46 Tennessee.

(a) *Cross Creeks National Wildlife Refuge.* * * *

(1) Fishing is permitted in refuge pools and reservoirs from March 1 through October 31 only from sunrise to sunset.

* * * * *

(7) The length limit for largemouth bass taken from Elk and South Cross Creeks reservoirs is less than 12 inches and more than 15 inches. Largemouth bass from 12 inches to 15 inches must be released unharmed.

(b) *Hatchie National Wildlife Refuge.* * * *

(1) Fishing is permitted only from sunrise to sunset.

* * * * *

(c) *Lake Isom National Wildlife Refuge.* * * *

(1) Fishing is permitted from March 15 through October 15 only from sunrise to sunset.

* * * * *

(e) *Reelfoot National Wildlife Refuge.* * * *

(2) Fishing is permitted only from sunrise to sunset.

* * * * *

14. Section 33.51 would be amended by revising (a)(1) and (2) and adding (a)(3) and (4) as follows:

§ 33.51 Washington.

(a) *Columbia National Wildlife Refuge.* * * *

(1) Nonmotorized boats and boats with electric motors are permitted on Upper and Lower Hampton, Hutchinson, Royal and Shiner Lakes.

(2) Motorized and nonmotorized boats are permitted on all other refuge waters open to fishing except in March Units I and II.

(3) Marsh Units I and II are restricted to shoreline fishing only.

(4) The taking of bullfrogs is prohibited.

* * * * *

15. Section 33.53 would be amended by redesignating (c) as (d) and adding (c) as follows:

§ 33.53 Wisconsin.

* * * * *

(c) *Trempealeau National Wildlife Refuge.* Fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Only hand-powered craft and boats using electric trolling motors are permitted.

(2) Fishing from boats is not permitted from October 10 through November 30.

(3) Ice fishing is permitted only when ice conditions are safe.

* * * * *

16. Section 33.55 would be amended by revising (a)(1) and (2) as follows:

VOL
52
ISS
192
OC
5
1987
UMI

§ 33.55 Pacific Islands Territory.

(a) *Johnston Atoll National Wildlife Refuge.* * * *

(1) Lobsters of 3¼ inch carapace length or more may be taken from the lagoon area from September 1 through May 31, but not by spearing; no female lobsters bearing eggs may be taken at any time.

(2) The use of nets, except throw nets, is prohibited.

* * * * *

Date: September 3, 1987.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

Notices

Federal Register
Vol. 52, No. 192
Monday, October 5, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

National Conservation Review Group; Meeting

AGENCY: Agricultural Stabilization and Conservation Service (ASCS), USDA.

ACTION: Notice of meeting.

SUMMARY: The National Conservation Review Group will meet to consider recommendations from State and County Conservation Review Groups with respect to the operational features of the Agricultural Conservation Program (ACP), the Emergency Conservation Program (ECP), and the Forestry Incentives Program (FIP). Comments and suggestions will be received from the public concerning these conservation and environmental programs administered by the Agricultural Stabilization and Conservation Service (ASCS).

DATE: *Meeting Date:* October 30, 1987.

DATES: *Meeting Location:* Room 4960 South Building, U.S. Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Chief, Conservation Programs and Automation Branch, Conservation and Environmental Protection Division, ASCS, U.S. Department of Agriculture, Room 4723, South Building, Washington, DC 20013, 202–447–7333.

SUPPLEMENTARY INFORMATION: The National Conservation Review Group meeting is scheduled to be held from 9:00 a.m. to 12:00 noon on October 30, 1987, in Room 4960, South Building, U.S. Department of Agriculture, Washington, DC. Meeting sessions will be open to the public. The agenda will include consideration of State and County Review Group recommendations for changes in the administrative procedures and policy guidelines of the ACP, ECP, and FIP. An opportunity will be provided for the public to present comments at the meeting on these conservation and environmental programs administered by ASCS. Because of time constraints and anticipated participation from interested individuals and groups, comments will be limited to not more than 5 minutes. Individuals or groups interested in making recommendations may also make them in writing and submit them to Chief, Conservation Programs and Automation Branch, Conservation and Environmental Protection Division, ASCS, U.S. Department of Agriculture, Room 4723–S, Washington, DC 20013. The meeting may also include discussion of current procedures, criteria, and guidelines relevant to the implementation of these programs.

Because of the limitations of space available, persons desiring to attend the meeting should call Mr. Vincent Grimes (202) 447–7333 to make reservations.

Singed at Washington, DC, on September 29, 1987.

Milton Hertz,

Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410–05–M

Commodity Credit Corporation

Price Support Levels; 1987 Crop Soybeans

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of determinations with respect to 1987 Crop of Soybeans.

SUMMARY: The purpose of this notice is to set forth the final announcement that the level of price support for the 1987 crop of soybean is $4.77 per bushel. This announcement is made pursuant to section 201(i) of the Argicultural Act of 1949, as amended (the "1949 Act"). In accordance with section 1009 of the Food Security Act of 1985, as amended, any determinations with respect to implementation of cost reduction options will be made at a laterdate.

EFFECTIVE DATE: September 24, 1987.

FOR FURTHER INFORMATION CONTACT: Orville I. Overboe, Agricultural Economist, Commodity Analysis Division, ASCS–USDA, P.O. Box 2415, Washington, DC 20013, Telephone (202) 447–4417.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been designated as "major". It has been determined that these program provisions will result in an annual effect on the economy of $100 million or more.

The title and number of the federal assistance program to which this notice applies are: Title—Commodity Loans and Purchases; Number—10.051 as found in the Catalog of Federal Domestic Assistance.

Section 1017 of the Food Security Act of 1985 provides that the Secretary of Agriculture shall determine the rate of loans, payments and purchases under a program established under the Agricultural Act of 1949 ("the 1949 Act") for any of the 1986 through 1990 crops without regard to the requirements for notice and public participation. Accordingly, public comments were not requested with respect to the level of price support for the 1987 crop of soybeans.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since the Commodity Credit Corporation is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice. A final impact analysis has been prepared and is available from the above named individual.

Section 201(i)(1)(A) of the 1949 Act provides that the price of soybeans for each of the 1986 through 1990 marketing years shall be supported through loans and purchases. Section 201(i)(1)(B) provides that the support price for the 1986 and 1987 crops of soybeans shall be $5.02 per bushel. However, if the Secretary of Agriculture determines in accordance with section 201(i)(2) that the level of loans or purchases determined for a marketing year would discourage the exportation of soybeans and cause excessive stocks of soybeans in the United States, the Secretary may reduce the loan and purchase level for soybeans by the amount the Secretary determines necessary to maintain domestic and export markets for soybeans, except that the price support level cannot be reduced by more than 5 percent in any year nor below $4.50 per bushel. Any reduction made in accordance with section 201(i)(2) in the loan and purchase level for soybeans shall not be considered in determining

VOL
52
ISS
192
OC
5
1987
UMI

the loan and purchase level for soybeans for subsequent years.

Section 201(i)(5) of the 1949 Act provides that the Secretary shall make a preliminary announcement of the level of price support for a crop of soybeans not earlier than 30 days prior to September 1, the beginning of the soybean marketing year, based upon the latest information and statistics then available. The Secretary must make a final announcement of such level as soon as full information and statistics are available. The final announcement of the level of price support must be made no later than October 1 of the marketing year to which the announcement is applicable and cannot be less than the level set forth in the preliminary announcement. The level announced in the preliminary announcement was $4.77 per bushel.

Ending stocks of soybeans for the 1986–87 marketing year are expected to be approximately 480 million bushels, an amount considered to be excessive. Maintaining the price support level for the 1987 crop of soybeans at $5.02 per bushel would likely result in ending stocks of approximately 507 million bushels for the 1987–88 marketing year since such a support level would discourage the exportation of soybeans and to a lesser degree, result in lower domestic use of soybeans. Based upon the 1987 estimated production of soybeans, a $4.77 per bushel price support level would likely result in ending stocks of approximately 480 million bushels for the 1987–1988 marketing year.

As compared to a $5.02 per bushel price support level, a $4.77 per bushel price support level would increase the export of soybeans about 3 percent and also increase slightly the domestic use of soybeans. The price support level for the 1987 crop of corn has been established at $1.82 per bushel. Establishing a 1987 soybean price support level of $5.02 per bushel, with a $1.82 per bushel price support level for corn, would result in an adverse distortion of the historical corn/soybean price relationship and result in an adverse impact on the use of soybeans. However, a 1987 soybean price support level of $4.77 per bushel would better maintain this normal corn/soybean price relationship. Accordingly, the 1987-crop soybean price support level is $4.77 per bushel, the same as the price support level for the 1986 crop.

Section 201(i)(3) of the 1949 Act provides that, if the Secretary determines that such action will assist in maintaining the competitive relationship of soybeans in domestic and export markets after taking into consideration the cost of producing soybeans, supply and demand conditions, and world prices for soybeans, the Secretary may permit a producer to repay a loan for a crop at a level that is the lesser of (1) the announced loan level for such crop or (2) the prevailing world market price for soybeans, as determined by the Secretary. If the Secretary permits a producer to repay a loan as described above, the Secretary shall prescribe by regulation (1) a formula to define the prevailing world market price for soybeans and (2) a mechanism by which the Secretary shall announce periodically the prevailing world market price for soybeans.

Section 1009(a) of the Food Security Act of 1985 provides that whenever the Secretary determines that an action authorized by section 1009(c), (d) or (e) will reduce the total of the direct and indirect costs to the Federal Government of a commodity program administered by the Secretary without adversely affecting income to small and medium sized producers participating in such programs, the Secretary shall take such action with respect to that commodity program. These actions include: (1) The commercial purchases of commodities by the Secretary; (2) the settlement of nonrecourse loans at an amount less than the total of the principal loan amount and accumulated interest, but not less than the principal amount, if such action will result in: (A) Receipt of a portion rather than none of the accumulated interest; (B) avoidance of default of the loan; and (C) elimination of storage, handling and carrying charges on the forfeited loan collateral; and (3) the reopening of a production control or loan program established for a crop at any time prior to harvest of such crop for the purpose of accepting bids from producers for the conversion of acreage planted to a program crop to diverted acreage in return for in-kind payments if the Secretary has determined that: (1) Changes in domestic or world supply or demand conditions have substantially changed after announcement of the program for that crop and (2) without action to further adjust production, the Federal Government and producers will be faced with a burdensome and costly surplus. Such payments are not subject to the maximum payment limitation provision of section 1001 of the Food Security Act of 1985 but are limited to $20,000 per year per producer for any one commodity.

Accordingly, the following determinations have been made.

Determinations

A. Price Support Level

The price support level for the 1987 crop of soybeans shall be $4.77 per bushel.

B. Marketing Loan

A marketing loan will not be implemented with respect to the 1987 crop of soybeans.

C. Cost Reduction Options

The decision to implement any cost reduction option will be made at a later date.

(Sec. 201(i), Agricultural Act of 1949, as amended, 63 Stat. 1052, as amended (7 U.S.C. 1446(i)))

Signed at Washington, DC, on September 24, 1987.

Richard E. Lying,

Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-583-607]

Fabric and Expanded Neoprene Laminate From Taiwan; Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that fabric and expanded neoprene laminate (FENL) from Taiwan is being, or is likely to be, sold in the United States at less than fair value. The U.S. International Trade Commission (ITC) will determine, within 45 days of publication of this notice, whether these imports are materially injuring, or are threatening material injury to, a United States industry.

EFFECTIVE DATE: October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Paul Tambakis or Charles Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–4136 or 377–5288.

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that FENL from Taiwan is being, or is likely to be, sold in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)). The margin found for the company investigated is listed in the "Continuation of Suspension of Liquidation" section of this notice.

Case History

On May 8, 1987, we made an affirmative preliminary determination (52 FR 18258, May 14, 1987).

On May 18, 1987, we received a request from Shei Chung Hsin Co., Ltd. (SHEICO), sole respondent in this investigation, to extend the period for the final determination to no later than 135 days after publication of our "Preliminary Determination" notice in the **Federal Register**, in accordance with section 735(a)(2)(A) of the Act. We granted this request and postponed the final determination until no later than September 28, 1987 (52 FR 21339, June 5, 1987).

As required by the Act, we afforded interested parties an opportunity to submit oral and written comments. Since no requests were received for a public hearing, written comments on the issues arising in this investigation were submitted between July 23 and August 31, 1987, in lieu of the public hearing.

Scope of Investigation

The product covered by this investigation is fabric and expanded neoprene laminate, as provided for in items 355.8100, 355.8210, 355.8220, 359.5000 and 359.6000 of the *Tariff Schedules of the United States Annotated* (TSUSA). This material is used primarily in the manufacture of wet suits and similar products for the scuba diving and recreational markets.

Fair Value Comparisons

We made comparisons on approximately 97 percent of the sales by SHEICO of FENL to the United States during the period of investigation (P.O.I.), July 1 through December 31, 1986. Because SHEICO accounted for over 70 percent of all sales of this merchandise from Taiwan, we limited our investigation to this company.

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value for the company under investigation using data provided in the responses.

United States Price

For certain sales by SHEICO, we based United States prices on exporter's sales price (ESP), in accordance with section 772(c) of the Act, since the sale to the first unrelated purchaser took place after importation into the United States. For those sales by SHEICO made directly to unrelated parties in the United States prior to importation, we based the United States price on purchase price in accordance with section 772(b) of the Act.

For sales which were made through a related sales agent in the United States to an unrelated purchaser prior to the date of importation, we used purchase price as the basis for determining United States price. For thse sales, the Department determined that purchase price was the most appropriate indicator of United States price based on the following elements:

1. The merchandise in question was shipped directly from the manufacturer to the unrelated buyer, without being inttroduced into the inventory of the related selling agent;

2. This was the customary commercial channel for sales of this merchandise between the parties involved; and

3. The related selling agent located in the United States acted only as the processor of sale-related documentation and a communication link with the unrelated U.S. buyer.

Where all the above elements are met, we regard the rountine selling functions of the exporter as having been merely relocated geographically from the country of exportation to the United States, where the sales agent performs them. Whether these functions take place in the United States or aboard does not change the substance of the transactions or the functions themselves.

In instances where merchandise is ordinarily diverted into the related U.S. selling agent's inventory, we regard this factor as an important distinction because it is associated with a materially different type of selling activity than the mere facilitation of a transaction such as occurs on a direct shipment to an unrelated U.S. purchaser. In situations where the related party places the merchandise into inventory, it commonly incurs substantial storage and financial carrying costs and has added flexibility in his marketing. We also use the inventory test because it can be readily understood and applied by respondents who must respond to Department questionnaires in a short period of time. It is objective in nature, as the final destination of the goods can be established from normal commercial documents associated with the sale and verified with certainty.

We calculated purchase price and exporter's sale price based on the packed, f.o.b., c&i., c.&f. duty unpaid, or c.i.f. duty paid prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, brokerage and handling charges, ocean freight, marine insurance, U.S. duty and U.S. inland freight. Where we used exporter's sales price, we made additional deductions for credit expenses, other U.S. selling expenses, and commissions. We made additions to both purchase price and exporter's sale price for duty drawback (i.e., import duties which were rebated, or not collected, by reason of the exportation of the merchandise to the United States) pursuant to section 772(d)(1)(B) of the Act.

Foreign Market Value

In accordance with section 773(a)(1)(B) of the Act, we calculated foreign market value based on sales for export to a country other than the United States (a "third country"), since SHEICO had insufficient home market sales of FENL. We calculated foreign market value based on the packed, c.i.f., f.o.b., c&f., or c.&i., duty unpaid prices to unrelated purchasers in Australia. We selected Australia because it is the largest third country market and sales were made in similar quantities to that of the United States. We made deductions, where appropriate, for brokerage and handling, foreign inland freight, marine insurance, and ocean freight.

VOL
52
ISS
192
OC
5
1987
UMI

When we compared foreign market value to purchase price sales, we adjusted foreign market value for differences in credit expenses between the two markets, in accordance with § 353.15 of the Department's regulations (19 CFR 353.15). When we compared foreign market value with exporter's sales price, we deducted credit expenses in Australia from foreign market value. We also used indirect selling expenses in the Australian market to offset United States selling expenses and commissions, in accordance with § 353.15(c) of our regulations.

SHEICO's claim for warranty expenses in the Australian market was disallowed since this information could not be verified.

In order to adjust for differences in packing between the two markets, we deducted Australian packing costs from foreign market value and added U.S. packing costs.

We established separate categories of "such or similar" merchandise, pursuant to section 771(16) of the Act, on the basis of thickness, fabric type and foam type. Where there were no identical products in the Australian market with which to compare products sold to the United States, we made adjustments to similar merchandise to account for differences in the physical characteristics of the merchandise, in accordance with section 773(a)(4)(C) of the Act. These adjustments were based on differences in the costs of materials, labor and directly related factory overhead.

Interested Parties' Comments

Comment 1: Petitioner asserts that the Department should base its final determination exclusively on verified information and should reject information submitted after the verification, including the amended computer tape. Petitioner also urges the Department to assign zero sales prices to the six unreported U.S. sales found during verification.

Respondent disagrees with petitioner's suggested that the Department should reject the amended computer tape submitted by SHEICO since all data in the amended tape have been verified. Respondent further contends that the tape was submitted in accordance with the Department's request that SHEICO amend its sales listing. Respondent also explains that the six sales reported at verification were not, as petitioner suggests, intentionally omitted from SHEICO's original response. Therefore, no adverse action should be taken against SHEICO with respect to these sales.

DOC Position: We agree with petitioner that the final determination should be based exclusively on verified information. We have used information contained in SHEICO'S amended computer tape since it was verified and was submitted in response to a request from the Department. Additionally, we have excluded in our fair value comparisons the six transactions unreported prior to verification for the reasons discussed in the Department's response to Comment 2.

Comment 2: Respondent urges the Department not to consider in its calculations certain U.S. sales made to a customer who has yet to pay Go-Sport, SHEICO's U.S. subsidiary. Respondent claims that these sales were not made in the ordinary course of trade and, because payment for the goods was never made, that a basic component of the sales transaction has not yet taken place. Respondent also contends that if these transactions are not deferred until an annual review, it would punish respondent unfairly with dumping duties simply because it is involved in litigation to recoup all monies owed, plus interest and punitive damages.

Respondent further argues that if the Department decides to use these transactions for the final determination, then the entire one-year period of non-payment should not be considered a credit expense since Go-Sport has no control over the payment time. Instead, respondent claims that credit expenses should be imputed based on the terms of each invoice. Respondent also urges the Department to impute indirect selling expenses based on the "bad debt" from the date on which payment was due on each invoice to the date of the final determination in this investigation.

DOC Position: We agree with respondent that all sales where the customer has yet to pay respondent's U.S. subsidiary should not be included in our fair value comparisons. This includes the six transactions unreported prior to verification. We have not included these sales because we were not able to calculate an accurate credit adjustment for them at this time. Moreover, they comprise less than one percent of the total value of FENL sold to the United States during the P.O.I. and the unusual circumstances surrounding these sales indicate that they are not representative of the respondent's selling practices in the U.S. market.

Comment 3: Petitioner claims that the Department should either correct errors found at verification on the reported credit expenses of Go-Sport on exporter's sales price transactions or apply the highest verified credit expense to those U.S. sales where respondent understated its credit costs.

Respondent, however, claims that Go-Sport did not understate certain credit expenses, as claimed by petitioner. Respondent explains that the credit expenses associated with those sales where the customer never paid were intentionally left blank because of SHEICO's argument that credit expenses could not be calculated on these sales. Therefore, respondent states that use of best information available to calculate credit expenses on these sales is inappropriate.

DOC Position: We agree with petitioner that these errors should be corrected for the final determination, and the Department has done so. However, the Department disagrees with petitioner's contention that it should apply, as best information otherwise available, the highest verified credit expense where errors were found since most of these discrepanices occurred on sales which we excluded from our final calculations as described above. Errors found on other U.S. sales were not of the type or magnitude that would cause the Department to use best information available.

Comment 4: Petitioner claims that brokerage and handling expenses and certain claims related to U.S. inland freight charges on exporter's sales price transactions could not be verified. Consequently, petitioner states that the Department should adjust U.S. prices.

Respondent counters that, contrary to petitioner's assertions, brokerage and handling on the Go-Sport sales was verified by the Department, and should, therefore, be used in the final determination.

DOC Position: We disagree with petitioner that U.S. brokerage and handling could not be verified. Although some discrepancies were found, they were not of a magnitude to consider the use of best information available. As for U.S. inland freight, the reported amounts were verified, with the exception of two invoices. For these two sales, we have applied the highest verified U.S. inland freight charge as the best information otherwise available.

Comment 5: Petitioner assert that the Department must disallow SHEICO's claim for warranty expenses in the Australian market since it could not be verified. Respondent, however, claims that warrant expenses were verified and should be allowed.

DOC Position: Since warranty expenses claimed on Australian sales was not verified to the satisfaction of the Department, we have disallowed warranty expenses on those Australian sales where SHEICO made this claim.

Comment 6: Petitioner urges the Department to base credit expenses for Australian and U.S. purchase price sales on verified data because respondent

inaccurately reported credit on some sales.

DOC Position: We agree and have based credit expenses claimed on Australian and U.S. purchase price sales on verified information. Credit expenses on most purchase price sales were under-reported because respondent made a mathematical error in failing to convert one component of the credit expense from U.S. dollars to New Taiwan dollars before totalling credit charges. This has been corrected in respondent's revised sales listing.

Comment 7: Petitioner contends that reported quantity discounts in both markets should be disallowed since this claim could not be verified.

DOC Position: We agree. No documentation could be produced at verification showing quantity discounts.

Comment 8: Petitioner claims that fumigation charges associated with Australian packing costs contain errors, which must be corrected in the final determination.

DOC Position: We agree that packing was understated on Australian sales because SHEICO made a mathematical error in calculating fumigation expenses. We have used the verified amounts in the final determination.

Comment 9: Petitioner claims that the verification report shows that duty drawback was overstated on four Australian sales. Therefore, these discrepancies should be corrected for the final determination.

DOC Position: We disagree. The calculations in the verification report only included drawback associated with the chemical blowing agent, and do not include the second component of drawback for nylon jersey. Therefore, we find no discrepancies in the reported drawback amounts when both components are added together. Respondent confirmed that the drawback amounts reported in the response are correct.

Comment 10: Respondent claims that virtually all of Go-Sport's operating expenses are not related to FENL sales and are not indirect selling expenses. Respondent argues that the indirect selling expenses properly allocable to Go-Sport's U.S. sales are only those indirect selling expenses incurred on the sales of FENL sheets, and should not include expenses related to wet suits and other accessories as well as those expenses not related to the selling function. Respondent further explains that the corporate officer's salary should be excluded to be consistent with the Department's policy in past investigations.

DOC Response: Since no assembly or further manufacturing took place during the review period, we have considered all of Go-Sport's operating expenses, with the exception of those allocated to repair and maintenance, to be selling expenses. We agree with respondent that those selling expenses found at verification to be directly related to products other than FENL sheets should not be included as indirect selling expenses. These include show costs, advertising, commissions, sales promotion, travel expenses, and sample costs. We also disregarded bad debt expenses since these expenses relate to sales of products other than FENL.

The Department considered all remaining operating expenses of Go-Sport to be indirect selling expenses including portions of rent and supplies allocated to the selling, warehouse and office administration categories. We also allocated a portion of the president's salary to repair and maintenance, but included the remaining portion in the pool of indirect selling expenses. Total indirect selling expenses were allocated over sales of all products.

Comment 11: Respondent contends that the total amount claimed by SHEICO for indirect selling expenses on Australian sales was verified and should be used by the Department as an offset to U.S. selling expenses on exporter's sales price transactions. This includes rental on SHEICO's Lo Tung sales office and any expenses put on the books during the P.O.I., even if paid outside the P.O.I.

Petitioner counters by requesting that the Department correct discrepancies found at verification on Australian indirect selling expenses.

DOC Position: As petitioner suggests, Australian indirect selling expenses used in our final calculations are based on verified data. Furthermore, we agree with respondent that indirect selling expenses should include rent on the Lo Tung sales office and other indirect selling expenses accrued during the P.O.I., even if paid outside the P.O.I. since SHEICO uses the accrual method of accounting. The Department has, however, disallowed (1) the portion of the interest expense attributable to the claimed credit expenses on Australian and U.S. sales, because credit expenses have already been claimed as a circumstance-of-sale adjustment; and (2) expenses associated with a trip to Taiwan by the president of Go-Sport, because this did not relate to Australian sales.

Currency Conversion

For exporter's sales price comparisons, we used the official exchange rate in effect on the date of sale, in accordance with section 773 (a)(1) of the Act, as amended by section 615 of the Trade and Tariff Act of 1984 (1984 Act). For purchase price comparisions, we used the exchange rate described in § 353.56(a)(1) of our regulations. All currency conversions were made at the rates certified by the Federal Reserve Bank.

Verification

As provided in section 776(a) of the Act, we verified all information relied upon in making this final determination. We used standard verification procedures, including examination of all relevant accounting records and original source documents provided by the respondent on relevant sales and financial records.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entires of FENL from Taiwan that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register.** The U.S. Customs Service shall continue to require a cash deposit or the posting of a bond on all entries equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, which is 0.80 percent of the entered value of the merchandise. The suspension of liquidation will remain in effect until further notice.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on FENL from Taiwan entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the U.S. price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

September 28, 1987.

Lee W. Mercer,

Acting Assistant Secretary for Trade Administration.

BILLING CODE 3510-DS-M

[C-614-701]

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Certain Steel Wire Nails From New Zealand

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in New Zealand of certain steel wire nails as described in the "Scope of Investigation" section of this notice. The estimated net bounty or grant and duty deposit rates are indicated in the "Suspension of Liquidation" section of this notice.

We are directing the U.S. Customs Service to continue suspension of liquidation of all entries of steel wire nails from New Zealand that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit on entries of these products in an amount equal to the duty deposit rates.

EFFECTIVE DATE: October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Barbara Tillman or Mark Linscott, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-2438 (Tillman) or 377-8330 (Linscott).

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in New Zealand of steel wire nails. For purposes of this investigation, the following programs are found to confer bounties or grants:

- Export Performance Taxation Incentive (EPTI).
- Sales Tax Exemptions or Refunds on Machinery and Equipment Used in the Production of Goods for Export.
- Export Suspensory Loan Scheme (ESLS).
- South Island Electricity Concession Scheme (SIECS).

Due to the termination of EPTI, the SIECS, and sales tax exemptions or refunds on machinery and equipment used in the production of goods for export, we have also determined that separate duty deposit rates are warranted, as set forth in the "Suspension of Liquidation" section of this notice.

Case History

Since the last **Federal Register** publication pertaining to this investigation [the *Preliminary Affirmative Countervailing Duty Determination and Countervailing Duty Order: Certain Steel Wire Nails from New Zealand* (52 FR 27441, July 21, 1987)], the following events have occurred. We conducted verification in New Zealand from August 3 through 13, 1987, of the questionnaire responses of the Government of New Zealand, Consolidated Metal Industries (South Island) Ltd. (CMI), Auto Machine Manufacturing Co., Ltd. (AM), and Pearson, Knowles & Rylands Brothers (NZ) Ltd. (PKR). Supplementary responses from the Government of New Zealand were received on August 3 and 26, 1987. AM and CMI submitted supplementary responses on August 5 and 27, 1987, and September 11, 1987. A supplementary response from PKR was also received on September 11, 1987.

Respondents filed a brief on September 1, 1987, and comments on the verification reports on September 11, 1987. Petitioners filed no comments during the course of the investigation. Both petitioners and respondents waived their respective rights to a hearing in this case.

Scope of Investigation

The products covered by this investigation are certain steel wire nails from New Zealand. These nails are: one-piece steel nails made of round wire, as currently provided for in *Tariff Schedules of the United States Annotated* item numbers 646.2500, 646.2610-90, and 646.3040; two-piece steel wire nails as currently provided for in item number 646.3200; and nails with steel wire shanks and lead heads, as currently provided for in item number 646.3600. These products are currently classifiable under *Harmonized System* item numbers 7317.00.55, 7317.00.65, 7317.00.75 and 7616.10.10.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984).

For purposes of this final determination, the period for which we are measuring bounties or grants ("the review period") is calendar year 1986. Each company has recently modified its fiscal year, and, currently, each operates on the same fiscal year. However, the companies will not complete identical fiscal years until June 30, 1988. In accordance with our practice in such situations, we have chosen the most recently completed calendar year as our review period.

We have calculated a company-specific estimated net bounty or grant in the review period for purposes of this final determination for CMI because its estimated net bounty or grant is significantly different from the country-wide rate. As set forth in § 355.20(d) of our proposed regulations (50 FR 24207, June 10, 1985):

A significant differential is a difference of the greater of at least 10 percentage points, or 25 percent, from the weighted-average net subsidy calculated on a country-wide basis.

Since the differential between CMI's estimated net bounty or grant and the country-wide rate meets this requirement, we have calculated a separate estimated net bounty or grant under each program for CMI.

Due to the termination of EPTI, the SIECS, and sales tax exemptions or refunds on machinery and equipment used in the production of goods for export, all of which were verified, we also calculated separate duty deposit rates. PKR's and CMI's duty deposit rates are zero and, as such, are significantly different from the duty deposit rate for AM and all others.

Because the net bounty or grant calculated for all respondent companies during the review period was above *de minimis* and because the zero rate for PKR and CMI reflects program-wide changes which occurred after our review period but prior to our preliminary determination, we also determine that the zero duty deposit rate does not warrant a negative determination and exclusion from the order for those

companies. We are, therefore, requiring suspension of liquidation for all entries of the subject merchandise from PKR and CMI, but no collection of duties. Entries of the subject merchandise from AM and all others will be assessed at the duty deposit rate set forth in the "Suspension of Liquidation" section of this notice.

Based upon our analysis of the petition, the responses to our questionnaires, verification, and written comments filed by respondents, we determine the following:

I. Programs Determined to Confer Bounties or Grants

We determine that bounties or grants are being provided to manufacturers, producers or exporters in New Zealand of steel wire nails under the following programs:

A. *Export Performance Taxation Incentive* (EPTI) Exporters in New Zealand are entitiled to receive a tax credit based on the f.o.b. value of qualifying goods exported under section 156A of the Income Tax Act of 1976, as amended. Credits are available as a deduction against income tax payable. If the tax credit exceeds the income tax payable, the remainder is paid to the taxpayer in cash. A credit cannot be carried forward and claimed on future tax returns.

The rate of the tax credit is dependent upon the government's predetermined value-added categories into which the exported products of a taxpayer fall. The amount of the tax credit is calculated by multiplying the rates corresponding to the value-added categories by the f.o.b. value of export sales. We verified that steel wire nails fall into value-added category B, for which the corresponding rate was 10.5 percent for fiscal years ending in 1985 and in earlier years, 5.25 percent for fiscal years ending in 1986, 2.625 percent for fiscal years ending in 1987, and zero thereafter. All three respondent companies claimed EPTI credits on their tax returns for the fiscal year ending in 1986.

Because only exporters are eligible for this program, we determine that it provides a bounty or grant to manufacturers, producers or exporters of steel wire nails within the meaning of the countervailing duty law.

In previous New Zealand cases, we looked to when tax returns were actually filed in order to assess when the EPTI tax benefits are received. Our rationale throughout has been that, for income tax programs, the benefits are received when the tax return is filed because only then "can a company truly discern the ultimate benefit, and its effects, derived from any tax program." *Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Steel Wire from New Zealand* (51 FR 31156, 31160, September 2, 1986).

After conducting a number of investigations during which we documented and verified the operation of EPTI, we now conclude that EPTI is different from most income tax programs in that it offers a definite percentage of the f.o.b. export sales value as a credit or cash rebate, received each year with no uncertainty as to eligibility, no need for complex tax accounting, and no dependence on ultimate tax liability.

We now believe that our standard lag methodology for income tax programs should not be used to measure the benefits under EPTI. Because a firm can precisely calculate an associated EPTI benefit for each export transaction at the moment the transaction is made and because this credit is not subject to alteration depending on them ultimate tax liability, we are able to calculate benefits on a credits-as-earned basis, looking to the percentage rate which applies to exports shipped during the review period.

To calculate the benefit under EPTI during the review period, we used the EPTI rates earned on exports made during this period. Because each company completed a fiscal year and began a new fiscal year during the review period, two EPTI rates applied during this period. We weight-averaged these rates based on associated export sales of steel wire nails to the United States and calculated a net bounty or grant of 3.87 percent *ad valorem* for CMI andm 3.62 percent *ad valorem* for all others.

We verified in this investigation and in past investigations that the phase-our of EPTI benefits is proceeding as scheduled, as set forth in sections 156A(3A) through (3B) of the Income Tax Act. Each of the companies under investigation completed a fiscal year on June 30, 1987, which was prior to the publication of our preliminary determination. The EPTI rate earned on exports shipped by these companies after July 1, 1987, is zero. We have consistently taken into account program-wide changes which are implemented subsequent to our review period but prior to a preliminary determination, when the effect of the change is measurable and verifiable, by adjusting the duty deposit rate which applies to suspension of liquidation.

Because the termination affects all New Zealand exporters and is decreed by the Income Tax Act itself and because we have verified by examining tax returns that the phase-out is proceeding as scheduled, we are satisfied that a program-wide change has been implemented and are setting the duty deposit rate at zero.

B. Sales Tax Exemptions or Refunds on Machinery and Equipment Used in the Production of Goods for Export Under Item 136 IV of the Sales Tax Exemption Order of 1979, enacted pursuant to Part VII of the Sales Tax Act of 1974, machinery used in the production of goods for export may be exempt from the ten percent sales tax. According to verified information, PKR received a sales tax exemption and CMI received a sales tax refund under Item 136 IV during the review period. Both related to the purchase of machines to be used in the production of nails.

Because the sales tax exemption received by PKR and the sales tax refund received by CMI during the review period under Item 136 IV were provided only if the machinery and equipment purchased were to be used for export production, we determine that this program provided a bounty or grant to manufacturers, producers or exporters of steel wire nails within the meaning of the countervailing duty law.

Therefore, to calculate the benefit for CMI, we divided the refund received by CMI during the review period by CMI's export sales of steel wire nails during the review period. On this basis, we calculate an estimated net bounty or grant of 41.03 percent *ad valorem* for CMI. To calculate the estimated net bounty or grant for all others, we divided the value of the exemption received by PKR during the review period by PKR's and AM's exports of steel wire nails during the review period. On this basis, we calculate an estimated net bounty or grant for all others of 1.20 percent *ad valorem*.

We verified that all leigislation and regulations associated with the Sales Tax Act were repealed upon the imposition of the Goods and Services Tax (GST) on October 1, 1986. No applications for exemption could be accepted after this date. Due to delays in processing refund claims and further delays on the part of some companies in filing refund claims for machinery purchased prior to the date, the New Zealand Customs Department was still approving and disbursing outstanding claims after October 1, 1986. We verified that the New Zealand Customs Department continued to disburse sales tax refund checks through June 1987, but that no refunds have been disbursed since then. We also verified that the respondent companies received all of

the exemptions and refunds for which they were eligible no later than the end of 1986.

The GST which replaced the sales tax is a value-added tax regime. It is designed to impose the tax only on the final consumer of goods and services in the New Zealand economy. For this reason, we determine that no countervailable benefits are conferred under the GST.

Since the imposition of the GST on October 1, 1986, effectively repealed the Sales Tax Act and we verified that no exemptions or refunds have been received since 1986 by the companies under investigation, we consider this termination to be a program-wide change which occurred prior to the preliminary determination and are, therefore, calculating a duty deposit rate of zero.

C. Export Suspensory Loan Scheme (ESLS)

According to verified information, exporters may receive loans from the Development Finance Corporation (DFC) for the purchase of equipment used to expand production of exportable goods. If an exporter meets predetermined export sales targets for three consecutive years, its loans are converted to grants.

The term for a loan is five years.

We verified that AM received a loan in 1982, which was converted to a grant in 1986, a second loan in 1984, and a third loan in 1985. In addition, we verified that CMI and PKR have not received ESIS loans or grants.

Because the suspensory loans under this program are made available only for purchasing equipment used in producing export goods, we determine that this program provides a bounty or grant to manufactures, producers or exporters of steel wire nails within the meaning of the countervailing duty law.

To calculate the benefit, we allocated the loan that was converted to a grant during the review period over 15 years, the average useful life of equipment used in the steel industry. Our preferred methodology is to allocate benefits over time using as our discount rate a weighted average of the firm's marginal costs of debt and equity for the year in which the grant was made. Because AM assumed no new long-term debt in 1986, when the first loan was converted to a grant, nor did it have any long-term debt outstanding during this period, other than export suspensory loans, we used as our discount factor New Zealand's national average cost of debt in 1986, as published in the bulletin of the Reserve Bank of New Zealand.

For the two loans which have not been converted, we compared the variable rates in force for each during the review period to New Zealand's national average short-term rate during the same period and expensed the differential in payment as a benefit received during the review period. We used the national average short-term rate in lieu of a national average or company-specific variable rate or a company-specific short-term rate because these preferred alternatives were unavailable for the review period. The interest rates on one of the loans were above the benchmark for the entire review period, therefore, we calculated no benefits associated with this loans.

The loan converted to a grant and the loan that was below the benchmark were tied specifically to nail production. Since CMI has received no ESLS loans or grants, the estimated net bounty or grant is zero for CMI. To calculate the country-wide rate, we added the benefit allocated to the review period for the grant to the benefit expensed to the review period for the loan and divided by AM's and RKR's export sales of steel wire nails during the review period. On this basis, we calculate an estimated net bounty or grant of 0.43 percent *ad valorem* for all others.

D. South Island Electricity Concession Scheme (SIECS)

Under the SIECS, established in 1979, the Department of Trade and Industry (DTI) offered select industrial users with operations on the South Island a 25 percent rebate on electricity consumption costs. The scheme's stated objectives were to stimulate growth and development in the South Island and to take into account the generous hydro-electricity supplies and the scarcity of natural gas deposits on the South Island. DTI limited rebate benefits to specified manufacturing industries, hotels and motels of five or more bedrooms and electricity-intensive agricultural activities.

From 1984 to March 31, 1986, DTI gradually phased-out the rebate scheme and implemented in its place a price differential in the bulk tariff rates (the supply rates charged to municipal distributors) between the South Island and North Island. In contrast to the SIECS, the new price differential was calculated based on government studies which documented that costs of electricity supply were lower on the South Island than on the North Island and that bulk tariff rates should reflect this differential. Moreover, while the SIECS was a direct rebate to designated industrial users, the price differential system applies to rates charged to municipal distributors and not to end-users and is in no way limited to specific industries on the South Island.

Because the SIECS applied to only designated activities within a certain region, the South Island, we determine that it is limited to a specific enterprise or industry, or group thereof, within the meaning of the Act. Moreover, because the SIECS offered rebates that were not clearly related to cost differentials between specific end-users, we determine that this program provided goods or services on preferential terms within the meaning of the Act. To calculate the benefit under this program, we divided the amount of rebates received during the review period by CMI, the only company under investigation which is located on the South Island and, therefore, eligible under this program, by CMI's total sales during the review period. The estimated net bounty or grant is 0.11 percent *ad valorem* for CMI and zero for all others.

We verified that DTI formally terminated the SIECS in March 1986 and that it has no funds budgeted to the SIECS and has made no expenditures under the program in 1987. We also verified that CMI reveived its last electricity rebate in November 1986. Accordingly, we consider this termination to be a program-wide change and are, therefore, calculating a duty deposit rate of zero.

II. Program Determined Not to Confer Bounties or Grants

We determine that bounties or grants are not being provided to manufacturers, producers or exporters in New Zealand of steel wire nails under the following program:

Unit Rate Freight Rebate Scheme (URFRS)

During verification, we found that CMI received rebates under this program during the review period for goods shipped to the North Island. We verified that manufacturers or producers on the South Island are entitled to a nine to ten percent rebate of freight costs for goods shipped to the North Island, depending on whether the goods are shipped depot-to-depot or door-to-door. CMI is the only company under investigation located on the South Island, and is therefore the only such company eligible to receive benefits under this program.

We verified that the rebate applies only to goods sold for domestic consumption and consigned to points on the North Island north of Porirua and Upper Hutt. Goods intended for export are not eligible for the rebate.

Furthermore, we verified that all of CMI's exports are made directly from the South Island and are not shipped to the North Island and then exported from North Island ports. We therefore determine that rebates under this program do not confer a countervailable benefit on exports of steel wire nails to the United States.

III. Programs Determined Not To Be Used

We determine, based on verified information, that manufacturers, producers or exporters in New Zealand of steel wire nails did not apply for, claim or receive benefits during the review period for exports of steel wire nails to the United States under the following programs which were listed in the *Initiation of Countervailing Duty Investigation: Certain Steel Wire Nails from New Zealand* (52 FR 18590, May 18, 1987).

A. Export Marketing and Technical Assistance from the New Zealand Export-Import Corporation, DTI, the Building Research Association of New Zealand and the Standards Association of New Zealand
B. Export Credits and Development Financing from the DFC
C. Export Programme Grant Scheme (EPGS)/Export Programme Suspensory Loan Scheme (EPSLS)
D. Preferential Treatment to Exporters in Granting Import Licenses under the Export Production Assistance Scheme (EPAS)
E. Export Manufacturing Investment Allowance (EMIA)
F. Supplementary Investment Allowances for Plants and Machinery under sections 121 and 121A of the Income Tax Act of 1976
G. Research and Development Incentives under the Applied Technology Program (ATP)
H. Export Market Development Taxation Incentive (EMDTI) Although EMDTI credits were claimed by PKR on the tax return for its fiscal year ending in 1986, filed during the review period, and by AM on the tax return for its fiscal year ending in 1986, filed in February 1987, we verified that these credits were not related, in any way, to exports to the United States.
I. Regional Development Incentives other than SIECS and URFRS

We verified that all regional development incentives other than SIECS and URFRS were terminated as of April 21, 1986, and replaced by a single new program, the Regional Development Investigation Grants Scheme. We verified that none of the companies under investigation received benefits under this new scheme.

Comments

Comment 1: Respondents argue that the Department should not calculate benefits under EPTI by using its tax lag methodology. They contend that the Department has been inconsistent in the application of the tax lag methodology, citing as examples the *Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Low-Fuming Brazing Copper Rod and Wire from New Zealand* (50 FR 31638, August 5, 1985), in which the Department calculated the estimated net bounty or grant rate based on the applicable EPTI rate for the company's fiscal year ending July 31, 1984, which corresponded to the end of the review period, rather than on the tax return filed during this period, and the preliminary determination in the present investigation, in which it treated the tax return filed by AM in February 1987 as if it had been filed during the review period.

Respondents believe that this approach contradicts our determination in *Lime from Mexico. Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Lime from Mexico* (49 FR 35672, September 11, 1984). Respondents contend that EPTI is distinct from other countervailable tax programs because the benefits of EPTI can be assessed prior to the filing of a tax return. Respondents conclude that the Department should modify its review period to correspond to the companies' fiscal years ending June 30, 1987, and should calculate the estimated net bounty or grant as 2.625 percent, the EPTI rate that applied to exports made during this period, or alternatively, should exclude AM from the EPTI calculation if it continues with calendar year 1986 as the review period.

DOC Position: We agree that we should no longer use the tax lag methodology to calculate benefits under EPTI, and instead, should calculate benefits on a credits-as-earned basis. See section I.A. of this notice. However, we believe that our review period should remain calendar year 1986. Our usual practice is to choose the calendar year as our review period when the fiscal years of the respondent companies are not coincident. In this investigation, PKR's last completed fiscal year ran from April 1, 1986 to June 30, 1987, while AM and CMI operated on a July 1, 1986 to June 30, 1987 fiscal year. If we were to honor respondent's request, our review period would run to June 30, 1987, only a few weeks prior to our preliminary determination and verification. Each company's financial statements for this period are unaudited and, as such, are not completely reliable for purposes of verification and the final determination.

Comment 2: Respondents argue that the estimated net bounty or grant should be calculated as 2.625 percent, the rate applied to exports over the fiscal year ending June 30, 1987, because the level of EPTI is known in advance of the filing of a company's tax return. They argue further that the Department should consider the phase-out of EPTI as a program-wide change and should find that EPTI has been terminated as of July 1, 1987, for AM, CMI and PKR. Respondents identify 2.625 percent as the applicable EPTI rate for the fiscal year ending June 30, 1988 (although we verified that the EPTI rate earned for each export shipment made after June 30, 1987, is zero), and request that the duty deposit rate be set at 2.625 percent.

DOC Position: As explained in section I.A. of the notice, because our review period remains calendar year 1986, we have calculated the net bounty or grant under EPTI by weight-averaging 5.25 and 2.625 percent, the rates at which each company earned credits during the review period. We agree that we should consider the phase-out of EPTI as a program-wide change and have set the duty deposit rate at zero to reflect termination of this program, which was effective before our preliminary determination and was verified.

Comment 3: Respondents argue that benefits arising from sales tax exemptions or refunds should be excluded from the duty deposit rate, as the sales tax legislation under which these exemptions or refunds were granted was repealed with the imposition of the GST Act on October 1, 1986.

DOC Position: We agree. Because the sales tax legislation under which refunds or exemptions were granted was repealed prior to our preliminary determination and no exemptions or refunds were provided under the program prior to our preliminary determination, we determine that no countervailable benefits are conferred under the GST (see section I.B. of this notice). Therefore, the duty deposit rate for benefits due to sales tax exemptions or refunds is zero.

Comment 4: Respondents argue that the sales tax refund received by CMI during the review period should not be countervailed because it related to the purchase of a nail machine in January 1985 and was only received during the review period due to excessive delays on the part of the New Zealand Customs Department.

DOC Position: We disagree. The Department has consistently ruled that

BEST COPY AVAILABLE

such delays have no bearing on the countervailability of a given benefit, unless the delay is mandated by the government. Due to the termination of the program, however, the duty deposit rate for benefits due to sales tax exemptions or refunds is zero (see DOC Position on Comment 3).

Comment 5: Respondents claim that the ESLS loan of NZ 30,000, which was converted to a grant during the review period, was used to purchase a nail packaging machine that is used entirely for the domestic market and is unable to pack nails in the pack sizes sold on the U.S. market. Respondents argue that the grant is not applicable to exports of nails and should therefore be found to be not countervailable.

DOC Position: We disagree. During verification, respondents were unable to provide us with evidence showing that this machine can never be used for packaging exports to the United States or that the package sizes for the U.S. market can never vary.

Comment 6: Respondents argue that AM's EMDTI claim on its 1986 tax return was directed at exports destined for the South Pacific and was unrelated to exports to the United States. They therefore conclude that EMDTI benefits should be excluded from the final determination.

DOC Position: We verified that, although both AM and PKR claimed and received EMDTI credits on their 1986 tax returns, these credits were specifically tied to non-U.S. exports. We have therefore determined that credits under EMDTI were not used with respect to exports to the United States.

Verification

In accordance with section 776(a) of the Act, we verified the information used in making our final determination. During verification we followed standard verification procedures, including meeting with government and company officials, inspecting documents and ledgers, tracing information in the response to source documents, accounting ledgers, and financial statements, and collecting additional information that we deemed necessary for making our final determination.

Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation on all entries of steel wire nails from New Zealand which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. In accordance with section 706(a) of the Act (19 U.S.C. 1671e), we are directing the U.S. Customs Service to require a cash deposit for each entry of steel wire nails according to the duty deposit rates listed below:

Manufacturer/producer/exporter	Estimated net bounty or grant	Duty deposit rate
Consolidated Metal Industries (South Island) Ltd.	45.01 (percent)	zero
Pearson Knowles & Rylands Brothers (NZ) Ltd.	5.25 (percent)	zero
All Others	5.25 (percent)	1.52 (percent)

This suspension will remain in effect until further notice.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

September 28, 1987.

Lee W. Mercer,

Acting Assistant Secretary for Trade Administration.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

September 30, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on September 30, 1987. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 566-6828. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the previously established restraint limits for man-made fiber, silk blend and other vegetable fiber textiles and textile products in Categories 634 and 847, produced or manufactured in the People's Republic of China and exported during 1987.

Background

A CITA directive dated December 23, 1986 (51 FR 47041) established import restraint limits for certain cotton, wool and man-made fiber textile products, including Categories 331 and 634, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1987 and extends through december 31, 1987. A subsequent directive dated April 17, 1987 (52 FR 13115) established import limits for Category 659-S, among others, for the same twelve-month period. In addition, 1987 restraint limits were established for silk blend and other vegetable fiber textile products in Categories 847 and 831, in CITA directives dated June 26, 1987 and September 21, 1987, respectively (52 FR 24503 and 52 FR 35939).

Under the terms of the bilateral textile agreement of August 19, 1983, as amended, and the bilateral textile agreement, effected by exchange of letters dated September 11 and 14, 1967, and at the request of the Government of the People's Republic of China, the limits for Categories 331, 634, 659-S, 831 and 847 are being adjusted. The limit for Category 634 is being increased by application of swing and Categories 331 and 659-S are being reduced to account for the swing being applied. These reductions also include swing applied to Categories 434 and 645/646 in a separate directive. Category 847 is being increased by application of swing and Category 831 is being reduced to account for such swing.

Merchandise shipped in Category 634, amounting to 13,000 dozen, which was exported in 1986, but charged to the 1987 limit for Category 634, will be deducted and charged back to the limit established for 1986.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 20768), and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987).*

Adoption by the United States of the Harmonized Commodity Code (HCC)

may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register**.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

September 30, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel the directives of December 23, 1986, April 17, 1987, June 26, 1987 and September 21, 1987, concerning imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on September 30, 1987, the directives of December 23, 1986, April 17, 1987, June 26, 1987 and September 21, 1987 are amended to include adjustments to the previously established restraint limits for the following categories, as provided under the terms of the bilateral agreement of August 19, 1983, as amended, and the bilateral agreement, effected by exchange of letters dated September 11 and 14, 1987: [1]

Category	Adjusted 12-month limit [1]
331	3,561,213 dozen pairs.
634	447,383 dozen.
659–S [2]	850,000 pounds.
831	117,071 dozen pairs.
847	1,023,750 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

[2] In Category 659–S, only TSUSA numbers 381.2340, 381.3170, 381.9100, 381.9570, 384.1920, 384.2339, 384.8300, 384.8400 and 384.9353.

[1] The agreement provides, in part, that (1) with the exception of Category 315, any specific limit may be exceeded by not more than 5 percent of its square yard equivalent total, provided that the amount of increase is compensated by an equivalent square yard decrease in one or more other specific limits in that agreement year; (2) the specific limits for categories may be increased for carryover or carryforward; and (3) administrative arrangement or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Also effective on September 30, 1987, you are directed to deduct import charges amounting to 13,000 dozen from the 1987 limit established for Category 634. This same amount is to be charged to the limit established for 1986.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 87–C0004]

McCrory Corp., a Corporation; Provisional Acceptance of a Settlement Agreement

AGENCY: Consumer Product Safety Commission.

ACTION: Provisional acceptence of a Settlement Agreement under the Consumer Product Safety Act.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of 16 CFR 1118.20(e). Published below is a provisionally-accepted Settlement agreement with McCrory Corporation, a corporation.

DATE: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by October 20, 1987.

ADDRESS: Persons wishing to comment on this Settlement Agreement should send written comments to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207.

FOR FURTHER INFORMATION CONTACT: Ronald G. Yelenik, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 492–6626.

SUPPLEMENTARY INFORMATION:

Date: September 30, 1987.

Sheldon D. Butts,

Deputy Secretary.

Settlement Agreement and Order

1. This Settlement Agreement and Order, entered into between McCrory Corporation, a corporation (hereinafter, "McCrory"), and the staff of the Consumer Product Safety Commission (hereinafter, "staff"), is a compromise resolution of the matter described herein, without a hearing or determination of issues of law and fact.

I. The Parties

2. McCrory is a corporation organized and existing under the laws of the State of Delaware with its principal corporate offices located at 2955 East Market Street, York, Pennsylvania 17402.

3. McCrory has imported certain baby walkers indentified further in paragraphs 6 and 7 below (hereinafter, "baby walkers" or "walkers"), (a) for sale to a consumer for use in or around a permanent or temporary household or residence, or (b) for the personal use, consumption or enjoyment of a consumer in or around a permanent or temporary houshold or residence. These baby walkers are "consumer products" within the meaning of section 3(a)(1) of the Consumer Product Safety Act (hereinafter, "CPSA"), 15 U.S.C. 2052(a)(1).

4. McCrory imported and sold these baby walkers at McCrory Company stores throughout the United States. The product was also sold to other retail stores nationwide. McCrory, therefore, is a "manufacturer" of a "consumer product" which is "distributed in commerce," as those terms are defined in sections 3(a) (1), (4) and (11) of the CPSC, 15 U.S.C. 2052(a) (1), (4) and (11).

5. The "Staff" is the staff of the Consumer Product Safety Commission, an independent regulatory agency established by Congress pursuant to section 4 of the CPSA, 15 U.S.C. 2053.

II. The Product

6. Between 1983 and 1986, McCrory imported nationwide approximately 103,000 baby walkers, Reference No. PHT 417.

7. The subject walkers are circular in design with a silver metal frame and yellow tray, padded vinyl seat, and six yellow plastic wheels.

III. Staff Allegations Concerning Baby Walkers and of a Failure By McCrory To Comply With the Reporting Requirements of Section 15(b) of the CPSA

8. The defect is in the buckle of the crotch strap and allows slippage or disengagement under normal use. This defect can result in an infant falling through the seat of the walker to the floor or becoming entrapped in an enlarged leg hole.

9. Unless there is adult intervention to extricate the child, such entrapment could lead to positional asphyxia.

10. By mid-January 1985, McCrory had received three complaints stating that infants had fallen through the seat of the walker. One child sustained a fractured clavicle as the result of a fall.

11. In January 1985, McCrory officials met and decided to stop shipment of the baby walkers from their warehouses to their stores.

12. In March 1985, McCrory received three additional complaints regarding the baby walkers and decided to implement a redesign of the product.

13. In April 1985, McCrory engaged in a stop sale and repair program at the retail level.

14. McCrory knew or should have known by March 1985 that the buckle of the walker's crotch strap allows for slippage or disengagement under normal use, and that an infant could fall through the seat of the walker to the floor or become entrapped in an enlarged leg hole with resulting injuries.

15. McCrory had received sufficient information by March 1985 to reasonably support the conclusion that the baby walkers, described in paragraphs 6 and 7 thereof, contained a defect which could create a substantial product hazard, but the company failed to report such information to the Commission as required by section 15(b) of the CPSA, 15 U.S.C. 2064(b). Section 15(b) requires a manufacturer of consumer products who obtains information that reasonably supports the conclusion that its product contains a defect which could create a substantial product hazard to immediately inform the Commission of the defect.

IV. Response of McCrory Corporation

16. McCrory denies that its baby walkers contain a defect which creates or which could create a substantial product hazard within the meaning of Section 15(a) of the CPSA, 15 U.S.C. 2064(a), and further specifically denies an obligation to report information to the Commission under section 15(b) of the CPSA, 15 U.S.C. 2064(b) with respect to these baby walkers.

V. Agreement of the Parties

17. McCrory and the staff agree that the Commission has jurisdiction in this matter for purposes of entry and enforcement of this Settlement Agreement and Order.

18. McCrory agrees to settle the Commission's claim for a civil penalty by payment of the amount of $33.000 within 10 days of final acceptance of this Settlement Agreement by the Commission and service of the Commission's Order on McCrory. This payment is made in settlement of allegations by the staff, disputed by McCrory, that McCrory failed to report to the Commission pursuant to the requirements of section 15(b) of the CPSA, 15 U.S.C. 2064(b), with regard to Reference No. PHT 417 baby walkers imported and sold by McCrory between 1983 and 1986. McCrory makes no admission of any fault, liability or statutory violation and expressly denies any fault, liability or statutory violation. The Commission does not make any determination that Reference No. PHT 417 baby walkers contain a defect which could create a substantial product hazard or that a violation of the CPSA has occurred.

19. For purposes of section 6(b) of the CPSA, 15 U.S.C. 2055(b), this matter shall be treated as if a complaint been issued.

20. Upon final acceptance of this Settlement Agreement by the Commission, McCrory knowingly, voluntarily and completely waives any rights it may have (1) to an administrative or judicial hearing with respect to the Commission's claim for a civil penalty, (2) to judicial review or other challenge or contest of the validity of the Commission's action with regard to its claim for a civil penalty, (3) to a determination by the Commission as to whether a violation of section 15(b) of the CPSA, 15 U.S.C. 2064(b), has occurred, and (4) to a statement of findings of fact and conclusions of law with regard to the Commission's claim for a civil penalty.

21. Upon final acceptance of this Settlement Agreement and Order by the Commission and payment of the $33,000 settlement amount by McCrory, the Commission agrees to waive its right to pursue any penalty proceeding for a violation of section 15(b) of the CPSA, 15 U.S.C. 2064(b), relating to the matters encompassed by this Settlement Agreement and Order.

22. Upon provisional acceptance of this Settlement Agreement and Order by the Commission, this Settlement Agreement and Order shall be placed on the public record and shall be published in the **Federal Register** in accordance with the procedure set forth in 16 CFR 1118.20(e). If the Commission does not receive any written request not to accept the Settlement Agreement and Order within 15 days, the Settlement Agreement and Order will be deemed finally accepted on the 16th day after the date it is published in the **Federal Register**, in accordance with 16 CFR 1118.20(f).

23. The parties further agree that the incorporated Order be issued under the CPSA, 15 U.S.C. 2051 *et seq.*, and that a violation of the Order will subject McCrory to appropriate legal action.

24. No agreement, understanding, representation, or interpretation not contained in this Settlement Agreement and Order may be used to vary or to contradict its terms.

Dated: August 10, 1987

McCrory Corporation,

David H. Lissy,

Vice President, McCrory Corporation.

The Consumer Product Safety Commission

David Schmeltzer,

Associate Executive Director, Directorate for Compliance and Administrative Litigation.

Dated: August 24, 1987.

Ronald G. Yelenik,

Counsel for the staff of the Consumer Product Safety Commission.

ORDER

Upon consideration of the Settlement Agreement of the parties, it is hereby

Ordered that McCrory Corporation shall pay within 10 days of final acceptance of this Settlement Agreement and service of this Order, a civil penalty in the sum of $33,000 to the Consumer Product Safety Commission.

Provisionally accepted on the 29th day of September 1987.

By Order of the Commission.

Sayde E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Office of the Secretary

Medical and Dental Reimbursement Rates for Fiscal Year 1988

Notice is hereby given that the Assistant Secretary of Defense (Comptroller) in a September 24, 1987, memorandum to the Assistant Secretary of Defense (Health Affairs), Assistant Secretaries of the Army and Navy (Financial Management), and Comptroller of the Air Force established reimbursement rates for inpatient and outpatient medical and dental care provided during fiscal year 1988 as follows:

	IMET[1]	Inter-agency[2]	Other
Per Inpatient Day:			
—Burn Unit	$1086	$1762	$1891
—General Medical and Dental Care	179	432	466
Per Outpatient Visit	21	56	60
Per FAA Air Traffic Controller Examination		89	

[1] International Military Education and Training students.
[2] Other Federal Agency-sponsored patients and Government civilian employees and their dependents outside the United States.

The per diem rate (supplies and subsistence) charged to dependents of military personnel in Federal medical facilities shall become $7.85 per day beginning January 1, 1988.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

[CFDA Nos. 84.044 and 84.066]

Applications for New Awards Under Talent Search and Educational Opportunity Centers Programs for Fiscal Year 1988

Purpose: Provide grant awards under both the Talent Search (TS) and Educational Opportunity Centers Programs (EOC) to permit applicants to carry out projects designed to identify qualified individuals from disadvantaged backgrounds and to assist them in preparing for programs in postsecondary education.

Deadline for Transmittal or Applications: December 15, 1987.

Applications Available: October 15, 1987.

Available Funds: The Administration's budget request for fiscal year 1988 does not include funds for either program. However, applications are invited to allow for sufficient time to evaluate applications complete the grant process before the end of the fiscal year, should the Congress appropriate funds for either or both of these programs. The following estimates are based upon Fiscal Year 1987 appropriations:

Estimated Range of Awards: $70,000–225,000 (TS); $100,000–500,000 (EOC).

Estimated Average Size of Awards: $112,000 (TS); $238,000 (EOC).

Estimated Number of Awards: 175 (TS); 37 (EOC).

Project Period: 36 months.

Applicable Regulations: Regulations applicable to this program are:

(a) The Education Deparment General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78, and

(b) Regulations governing the Talent Search and Educational Opportunity Centers Programs, 34 CFR 643 and 34 CFR 644 respectively.

Application Preparation Workshops: The Department of Education will conduct Application Preparation Workshops to assist prospective applicants in developing applications for the Talent Search and Education Opportunity Centers Programs. The Scheduled dates and locations are as follows:

October 13 (8:30 a.m.–4:00 p.m.), Washington, DC., G.S.A. Auditorium, R.O.B. #3, 7th and D Streets, SW. (Use "D" St. Entrance)
Host Persons: Mr. Walter Lewis, Chief, Education Outreach Branch, Division of Student Services, (202) 732–4804

October 16 (8:30 a.m.–4:00 p.m.), Chicago, Illinois, Roosevelt University, Room 306, 430 S. Michigan Avenue
Hose Person: Dr. Clifton Washington, Roosevelt University (312) 341–3877

October 19 (8:30 a.m.–4:00 p.m.), San Freancisco, California, University of San Francisco, Parina Lounge, University Center, Main Entrance, Golden Gate Avenue & Kitteridge
Host Person: Ms. Janice D. Cook, Director, Upward Bound Project (415) 666–6476

For Applications or Information Contact: For further information contact Walter Lewis, Chief Education Outreach Branch, Division of Student Services, U.S. Department of Education (Room 3060, Regional Office Building 3), 400 Maryland Avenue SW., Washington, DC 20202. Telephone number: (202) 732–4804.

Authority: 20 U.S.C. 1070d–1b, and 1070d–1c.

(Catalog of Federal Domestic Assistance Number: 84.044 and 84.066, Talent Search and Educational Opportunity Centers Programs, respectively)

Dated: September 24, 1987.

C. Ronald Kimberling,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of requests submitted for clearance to the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for approval under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not contain information collection requirements contained in new or revised regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) collection number(s); (3) current OMB docket number (if applicable); (4) collection title; (5) type of request, e.g., new, revision, or extension; (6) frequency of collection; (7) response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) affected public; (9) an estimate of the number of respondents per report period; (10) an estimate of the number of responses annually; (11) annual respondent burden, i.e., an estimate of the total number of hours needed to respond to the collection; and (12) a brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed by October 2, 1987. Last notice published Wednesday, September 23, 1987.

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards, at the address below.)

For Further Information and Copies of Relevant Materials Contact: Carol Patton, Office of Statistical Standards (EI–70), Energy Information Administration, M.S. 1H–023, Forrestal Building, 1000 Independence Avenue, SW. Washington, DC 20585, (202) 586–2222.

UMI

SUPPLEMENTARY INFORMATION: If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this Notice, you should advise the OMB DOE Desk Officer of your intention to do so as soon as possible.

The energy information collection submitted to OMB for review was:

1. Economic Regulatory Administration.
2. ERA–766R.
3. 1903–0073.
4. Recordkeeping Requirements of DOE's Allocation and Price Rules.
5. Extension.
6. On occasion.
7. Mandatory.
8. Businesses or other for profit.
9. 819 recordkeepers.
10. N.A. (Recordkeeping Requirements).
11. 8,190 recordkeeping hours.
12. The ERA–766R requires firms in all segments of the oil industry to maintain only those records essential to the orderly and timely completion of the oil pricing enforcement program. Firms not having such records would be exempt from the recordkeeping requirements of 10 CFR 210.1.

Statutory Authority: Secs. 5(a), 5(b), 13(b), and 52, Pub. L. 93–275, Federal Energy Administration Act of 1974, (15 U.S.C. 764(a), 764(b), 772(b), and 790(a).

Issued in Washington, DC, September 29, 1987.

Yvonne M. Bishop.

Director, Statistical Standards, Energy Information Administration.

Economic Regulatory Administration

Proposed Consent Order With Diamond Shamrock R and M, Inc.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed Consent Order and opportunity for public comment.

SUMMARY: The Economic Regulatory Administration (ERA) announces a proposed Consent Order between the Department of Energy (DOE) and Diamond Shamrock R and M, Inc. (Diamond). This Consent Order would resolve Diamond's potential liability for DOE regulatory violations based on an audit which tentatively concluded that Diamond had overcharged in linked crude oil transactions during the period January 1, 1980, through January 27, 1981. Diamond has disputed ERA's audit findings and denies any overcharge liability. No formal allegations of violations have been issued against Diamond.

ERA proposes that Diamond's liability for potential overcharges and interest be settled by payment of $15 million over a period of three years, plus interest on any unpaid balances. This proposed settlement reflects negotiated compromises present in every settlement, including assessments of litigation risks in significant areas of dispute between ERA and Diamond. ERA will direct that these monies be deposited in a suitable account for appropriate distribution by DOE.

Pursuant to 10 CFR 205.199J, ERA will receive written comments on the proposed Order for thirty (30) days following publication of this Notice. Comments should be addressed to: Diamond Consent Order Comments, RG–30, Economic Regulatory Administration, 1000 Independence Avenue SW., Washington, DC 20585.

ERA will consider the comments received from the public in determining whether to make final the proposed settlement. This will result in one of the following courses of action: Rejection of the settlement; acceptance of the settlement and issuance of a final Order; or renegotiation of the agreement and, if successful, issuance of the modified agreement as a final Order. DOE's final decision will be published in the **Federal Register**, along with an analysis of and response to the significant written and oral comments, as well as any other considerations that were relevant to the decision.

FOR FURTHER INFORMATION CONTACT: Dorothy Hamid, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–8900.

Diamond is a refiner subject to the audit jurisdiction of ERA to determine compliance with the federal petroleum price and allocation regulations. During the period covered by this proposed Order, Diamond engaged in, among other things, the production, gathering, transporting, refining and marketing of crude oil and refined petroleum products.

In addition to earlier audits of Diamond which resulted in no allegations of violation, and audits in 1977 and 1979 which resulted in settlements of $10,301 and $380,198, respectively, ERA conducted an audit of Diamond's crude oil transactions for the period January 1, 1980, to the date when federal price and allocation controls were ended by the President (January 28, 1981, Executive Order 12287). As a result of this audit, disputes arose between ERA and Diamond concerning Diamond's compliance with the federal petroleum price and allocation regulations which pertain to the sale of lower or upper tier crude oil in transactions which were related to transactions involving Diamond's acquisition of price-exempt crude oil.

During the audit period from January 1, 1980 through January 27, 1981, Diamond entered into contingent contracts with a crude oil reseller to sell a significant quantity of price-controlled crude oil, certified as lower and upper tier, in return for which the crude oil reseller agreed to sell Diamond equivalent quantities of crude oil certified as stripper crude oil at substantial discounts from market prices. As a result, the audit findings indicate Diamond received prices in excess of those permitted in its sales of controlled crude oil. The total excess consideration, or premiums, alleged to have been unlawfully received by Diamond from the reseller for the barrels of domestic price-controlled crude oil was $22.5 million.

In its consideration of settlement, ERA reviewed the revenues Diamond received in the sales of price-controlled oil, the costs it incurred in the purchases of price-exempt oil, and the additional entitlements benefits it received. In addition, ERA considered Diamond's contentions that: (1) The linked crude oil transactions reduced Diamond's increased costs which could be recovered in its sales of refined products; (2) the firm lacked banked costs to apply to the pricing of its refined products during the period the linked crude oil transactions occurred; (3) it had an historic mid-range pricing position for refined products among its various competitors; and (4) Diamond significantly lowered its sales prices for those products to below those of its lowest priced competitor in contrast to its historic pricing position. In the context of a negotiated settlement ERA considered it appropriate to give some consideration to these circumstances.

ERA has preliminarily agreed to the settlement amount after assessing the litigation risks associated with establishing the audit findings in litigation, and considering the asserted facts and legal issues underlying the audit, and appropriate settlement compromises related to those issues.

In addition to the analysis of potential litigation risks, ERA took into account such factors as the interest which could be added to possible adjudicated refund amounts, the legal and factual issues, and the time and expense required for the government to fully litigate every

issue. Based on all of these considerations, ERA has tentatively concluded that the resolution of these matters for $15 million is an appropriate settlement. Given all these factors, ERA has made a preliminary determination that this settlement is in the public interest.

The settlement calls for Diamond to make $15 million (plus interest from the date of execution of the proposed Order by DOE) in restitutionary payments to discharge in full all of Diamond's obligations under the price and allocation regulations. The restitutionary sum would be paid to DOE for appropriate distribution.

Within thirty days of the effective date of the Consent Order, Diamond will pay DOE the principal restitutionary amount of $5 million, $5 million within eighteen (18) months of the effective date of the Consent Order, and $5 million within thirty-six (36) months of the effective date of the Consent Order, plus accrued interest on the unpaid balances, for appropriate distribution by DOE.

Pursuant to the proposed Consent Order, Diamond and DOE mutually release each other from issues and claims regarding Diamond's compliance with the federal petroleum price and allocation regulations which pertain to the sale of price-controlled crude oil in transactions which were linked to, and contingent upon, transactions involving Diamond's acquisition of other crude oil. The proposed Consent Order would also release Diamond from any other potential civil claims arising under the federal petroleum price and allocation regulations.

Submission of Written Comments

The proposed Consent Order cannot be made effective until the conclusion of the public review' process, of which this Notice is a part.

Interested persons are invited to submit written comments concerning this proposed Consent Order to the address noted above. All comments received by the thirtieth day following publication of this Notice in the **Federal Register** will be considered before determining whether to adopt the proposed Consent Order as a final Order. Any modifications of the proposed Consent Order which significantly alter its terms or impact will be published for additional comment. If, after considering the comments it has received, ERA determines to issue the proposed Consent Order as a final Order, the proposed Order will be made final and effective by publication of a Notice in the **Federal Register**.

Any information or data considered confidential by the person submitting it must be identified as such in accordance with the provisions of 10 CFR 205.9(f).

Issued in Washington DC, on September 28, 1987.

Milton C. Lorenz,

Special Council, Economic Regulatory Administration.

I. Introduction

101. This Consent Order is entered into between Diamond Shamrock R & M, Inc. ("Diamond") and the United States Department of Energy ("DOE"). Except as specifically excluded herein, this Consent Order settles and finally resolves all civil and administrative claims and disputes, whether or not heretofore asserted, between the DOE, as hereinafter defined, and Diamond, as hereinafter defined, relating to Diamond's compliance with the Federal petroleum price and allocation regulations during the period January 1, 1973, through January 27, 1981 (all the matters settled and resolved by this Consent Order are referred to hereafter as "the matters covered by this Consent Order").

II. Jurisdiction, Regulatory Authority, and Definitions

201

This Consent Order is entered into by the DOE pursuant to the authority conferred by sections 301 and 503 of the Department of Energy Organization Act ("DOE Act"), 42 U.S.C. 7151 and 7193, Executive Order 12009, 42 FR 46267 (1977); Executive Order 12038, 43 FR 4957 (1978); and 10 CFR 205.199J.

202

The Economic Regulatory Administration ("ERA") was created by section 206 of the DOE Act, 42 U.S.C. 7136. In Delegation Order 0204–4, the Secretary of Energy delegated responsibility for the administration of the Federal petroleum price and allocation regulations to the Administrator of the ERA. Authority to enter into this Consent Order on behalf of the DOE has been delegated by the Administrator of the ERA to the Special Counsel by Delegation Order 0204–4A dated December 14, 1981.

203

The following definitions apply for purposes of this Consent Order.

a. "Federal petroleum price and allocation regulations" means all statutory requirements and administrative regulations and orders regarding the pricing and allocation of crude oil, refined petroleum products, natural gas liquids, and natural gas liquid products, including (without limitation) the entitlements and mandatory oil imports programs and the pricing, allocation, reporting, certification, and recordkeeping requirements imposed by or under the Economic Stabilization Act of 1970, the Emergency Petroleum Allocation Act of 1973, the Federal Energy Administration Act of 1974, Presidential Proclamation 3279, all applicable DOE regulations codified in 6 CFR Parts 130 and 150 and 10 CFR Parts 205, 210, 211, 212, and 213, and all rules, rulings, guidelines, interpretations, clarifications, manuals, decisions, orders, notices, forms, and subpoenas relating to the pricing and allocation of petroleum products. The provisions of 10 CFR 205.199J, and the definitions under the Federal petroleum price and allocation regulations, shall apply to this Consent Order, except to the extent inconsistent herewith.

b. "DOE" includes not only the Department of Energy but also the Cost of Living Council, the Federal Energy Office, the Federal Energy Administration, the Office of Special Counsel ("OSC"), the ERA and all predecessor and successor agencies.

c. "Diamond" includes (1) Diamond Shamrock R & M, Inc., its successors in interest, and its predecessor in interest Diamond Shamrock Corporation and its predecessors in interest, and the subsidiaries and affiliates of the foregoing firms, including Diamond Shamrock Refining and Marketing Company, and their predecessors and successors in interest (but only for the acts of such subsidiaries and affiliates while they were subsidiaries or affiliates of Diamond Shamrock Corporation or one of its predecessors in interest); (2) all of the petroleum-related activities of each of the foregoing firms, including the subsidiaries and affiliates, as refiner, producer, operator, working interest or royalty interest owner, reseller, retailer, natural gas processor, or otherwise; and (3), except for purposes of Article IV, *Infra*, the directors, officers, and employees of each of the foregoing firms including the subsidiaries and affiliates.

III. Facts

The stipulated facts upon which this Consent Order is based are as follows:

301

During the period covered by this Consent Order, Diamond was a "refiner" and "producer" of crude oil as those terms are defined in the Federal petroleum price and allocation regulations and was subject to the jurisdiction of the DOE. During the

period covered by this Consent Order, Diamond engaged in, among other things, the production, sale, and refining of crude oil, the sale of residual fuel oil, motor gasoline, middle distillates, aviation fuel, propane, and other refined Petroleum Products, and the extraction, fractionation, and sale of natural gas liquids and natural gas liquid products.

302

In 1973, the DOE began an audit to determine Diamond's compliance with the Federal petroleum Price and allocation regulations. In 1977, pursuant to the mandate of the Secretary of Energy, the ERA continued the audit. The audit encompassed an examination of Diamond's policies and procedures pertaining to, and Diamond's compliance with, the Federal petroleum price and allocation regulations.

303

As part of its audit, the DOE examined Diamond's books and records relating to Diamond's compliance with the Federal petroleum price and allocation regulations and the reporting requirements imposed by those regulations. At the DOE's request, Diamond prepared and submitted to the auditors a number of responses to audit inquiries.

304

During the course of the DOE's audit and the negotiations that led to this Consent Order, the DOE identified certain issues with respect to Diamond's application of the Federal petroleum price and allocation regulations. Diamond maintains that it has calculated its costs, determined its prices, sold its crude oil and petroleum products, and operated in all other respects in accordance with the Federal petroleum price and allocation regulations. The DOE and Diamond disagree concerning the proper application of the Federal petroleum price and allocation regulations to Diamond's activities with respect to the matters covered by this Consent Order, and each believes that its respective legal and factual positions are meritorious. These positions were emphasized in the intensive review and exchange of information conducted during the audit and during the subsequent negotiation process. However, in order to avoid the expense of protracted and complex litigation and the distruption of its orderly business functions, Diamond has agreed to enter into this Consent Order. The DOE believes this Consent Order constitutes a satisfactory resolution of the matters covered herein and is in the public interest.

IV. Remedial Provisions

401.

In full and final settlement of all matters covered by this Consent Order and in lieu of all other remedies which have been or might have been sought by the DOE against Diamond for such matters under 10 CFR 205.1991 or otherwise, Diamond shall pay a total of fifteen million dollars ($15,000,000) Plus interest to DOE in the manner specified in paragraph 402. OSC and Diamond agree that OSC will petition DOE's Office of Hearings and Appeals to implement special refund procedures pursuant to 10 CFR Part 205, Subpart V, to distribute the amount so paid.

402

Within thirty (30) days of the effective date of this Consent Order, Diamond shall pay five million dollars ($5,000,000) to DOE. Within eighteen (18) months of the effective date of this Consent Order, Diamond shall make a second payment of five million dollars ($5,000,000) to DOE. Within thirty-six months of the effective date of this Consent Order, Diamond shall make a third payment of five million dollars ($5,000,000) to DOE. Diamond may, at its option, combine and accelerate any or all of these payments. Each payment shall be accompanied by a payment of interest in an amount computed in accordance with paragraph 403.

403

Interest shall be computed at the rate of 7.80% per annum, compounded quarterly, on any unpaid principal amount, from the date of execution of this Consent Order by DOE.

404

The payments made pursuant to paragraph 402 of this Consent Order shall be by certified or cashier's check, made payable to the Department of Energy, and delivered to the Office of the Controller, Office of Washington Financial Services, Cash Management Division, Post Office Box 500, Germantown, Maryland 20874–0500.

405
